88th Textile Institute World Conference 2012

Bridging Innovation, Research and Enterprise

Shah Alam, Selangor, Malaysia
15-17 May 2012

# TABLE OF CONTENTS

## SUSTAINABILITY

**Closing the Loop: A Case Study of Environmental Sustainability in Clothing Supply Chains** ........................................ 1  
*Alison Ashby, Melanie Hudson Smith, Rory Shand*

**Sustainable Minimalism: Little Green Will Do the Rest** .................................................. 20  
*Anna Khan, Davood Mustafa Ghazali, Shoab Wahab*

**Push and Pull – Strategies to Improve Sustainable Practice** .............................................. 41  
*Clare Hussey, Simone Veldema*

*Lynne Hammond, Reaz Bin-Mahmood, Ruchimta Alam, John T. Smith, Munira Rahman*

**Sustainable Colour for Lyocell through Design** .............................................................. 73  
*D. Ellams, S. Robertson, R.M. Christie*

**Degradable Behaviors of PLA Nonwovens by UV-Ray Irradiation** .................................. 79  
*Jin Whan Park, Chang Whan Joo*

**Development of Novel, Environment Friendly and Sustainable Finishing System for Cotton** ........................................ 85  
*M. Mohsin, C.M. Carr, M. Rigout*

**Electrochemial Treatment of Textile Waste Water with Shielded Platinised Titanium Under UV Light** ........................................ 92  
*Mohammad Kamruzzaman, Rolf-Dieter Hund, Chokri Cherif*

**Sustainable Developments in Printing Cotton Fabric with Indigo** ........................................ 99  
*Saminathan Ratnapandian, Stanley MacArthur Fergusson, Lijing Wang, Rajiv PAdhye*

**Environmental Benign Processing of Green Cellulosic Fibers** ........................................ 108  
*S.R. Shah, J.N. Shah*

**Peracetic Acid: A New Emerging Environment Friendly Pretreatment Agent for Flax** ...................... 115  
*S.R. Shah, J.N. Shah*

## TECHNICAL TEXTILES

**Modelling Puncture Impactor Shapes Effects on Plain Woven Fabric** ................................ 121  
*Mohamad Faizul Yahya, W.Y.W. Ahmad, J. Salleh*

**Electrical Actuation Performance of Shape Memory Alloy Friction Spun Yarn** ...................... 129  
*M.R. Ahmad, M.H.M. Yahya, W.Y.W. Ahmad, J. Salleh, M.R. Hassan, N. Hassim*

**Influence of Extreme Flexion on the Thermal Properties of Laminated Aerogel Blankets** ........ 137  
*Polona Kraner Zrim, Tatjana Rijavec*

**Geometrical and Probabilistic Models of Nonwoven Fabrics – Some Results** ...................... 142  
*Moon W. Suh*

**The Effect of Graphene Nanoplatelets on the Mechanical Properties of Lyocell Fibres** .......... 148  
*Shaya Mahmoudian, Mat Uzir Wahit*

**Preparation, Characterization, and Analytical Application of Electrospun Gas Diffusion Membranes in the Determination of Dissolved Carbon Dioxide** ........................................ 157  
*Yen Bach Truong*

**Textile Based Bioconversion Media for Ammonia/Water Bio-Remediation** ......................... 167  
*Yu Sun, Yong K. Kim, Armand F. Lewis*

## DESIGN, FASHION & FOOTWEAR

**Textile Performance from a Costumier’s Perspective - Working with Major Events** .................. 179  
*Gracie Matthews, Nigel Wild*

**Technical Innovation & Creative Solutions for Malaysian Batik** ....................................... 201  
*Janet Stoyel*

**The Use of Heat Setting as a Surface Design Technique for Polyester Fabrics and Its Applications in Commercial Lifestyle Products** .................................................. 223  
*Karen Hong*

**Impact Resistant Materials and Design Principles for Sportswear** ..................................... 229  
*Praburaj Venkatraman, David Tyler*

**Development of a Sizing System for Ghanaian Women for the Production of Ready-to-Wear Clothing** ........................................ 250  
*Stella Adu-Boahye, Jess Power, Tina Wallace, Zhimin Chen*
Predictors of Menswear Design Preferences in Terms of Physical and Psychological Dimensions
Travis W. Li, Raymond W. Au, Joe S. Au

Relationships Between Hip Circumference and Hip Depth in Women’s Trousers
Xianqun Luo, Victor Y. Kuzmichev, Yanyan Zhang

HISTORICAL
Handwoven Kota Doria Textiles - Working with Traditions
Vijaya Luniya

HEALTHCARE & MEDICAL
Mechanical Behavior of Knitted Compression Arm Sleeves
J. Cruz, R. Carvalho, S. Rana, R. Fangueiro, G. Coutinho, M. Pereira
Development of Hygienic Socks for Patients with Tinea Pedis (Athlete’s Foot) through Microencapsulation Technology
Application of Wool in Medical Textiles
Saniyat Islam, Lyndon Arnold, Rajiv Padhye
Thermal Comfort of Footwear Insole Materials for People with Diabetes
K.L. Yick, H.P. Sze, S.P. Ng, J. Yip, H.H. Kwan, Y.Y. Kwong, C.F. Cheng

MARKETING & MANAGEMENT
How Colour Affects Garment Sell Through Rates in the UK
Julie King
Impact of Information Technology & Communication Revolution on Indian Fashion
Meha P. Jayaswal
Antecedents of Organizational Resilience in Economic Crises – An Empirical Study of Swedish Textile and Clothing SMEs
Rudrajeet Pal, Hakan Torstensson
A Critical Evaluation of the Potential fora Luxury Fashion Market in Sanya, Hainan Province, China
Zhimin Chen, Tianshu Ma, Richard Murray

EDUCATION & TRAINING
Active Learning and the Development of Employability Skills for Apparel Students
Jess Power
Trade Secrets: Facilitating Knowledge Transfer Within the Emerging-Designer Sector of the New Zealand Fashion Industry
Lisa McEwan, Andrew Withell
Education and Training of Skills of Pattern Making and Construction to Aspiring Candidates for Apparel Industry
G.S. Dhapodkar, Bela Gupta

SMART FABRICS
Embedding Design in the Process of Communication of Functionality in Smart Clothes and Wearable Technology to the Active Ageing Consumer
David Taylor, Jane McCann
Creative Applications of Smart Technologies for Wellness, Fashion Design, and Dance
Galina Mihaleva
A Method for Screen Printing Conductive Tracks on Textiles
Gordon Paul, Russel Torah, Kai Yang, Steve Beeby, John Tudor
Flexible Piezoelectric Materials for Smart Textile Application
Konstantin Astafiev, Tomasz Zawada, Lise Nielsen, Erling Ringgaard
Fabricating the Conductive Polyurethane/MWCNTs Nanofibres via Electrospinning
Songmin Shang, Wei Zeng, Xiao-Ming Tao
Inkjet Printed Flexible Antenna on Textile for Wearable Applications
Yi Li, Russel Torah, Steve Beeby, John Tudor
CLOTHING MANUFACTURING

Influence of Fusing on Wool and Wool Blend Fabric
Khadija S. N. Misfer .................................................................................................................. 530

Methods to Better Understand Behaviour of Seams in Apparel Fabrics
N. Yusof, R.M. Laing, B.E. Niven, D.J. Carr ............................................................................. 534

ULTRASONIC Seaming in Fashion Clothing
Niromi Seram, Darron Cabon .................................................................................................. 541

Consumer Understanding and Evaluation of Technical Shell Garments
S. Casey-Markwell, J. Williams ................................................................................................. 549

TEXTILE MANUFACTURING

3D Woven Structures and Their Manufacturing Technologies
M. Amirul (Amir) Islam ........................................................................................................ 565

Simulation of Warp Tension for Power Looms
Yves-Simon Gloy, Wilfried Renkens, Stephanie Kato, Thomas Gries ................................. 598

FUTURE TRENDS & VISIONS

Translating the Hybrid Methodologies and Practical Outputs of Smart Textile-Oriented Research, in
Clothing for the Growing Ageing Market, for the Benefit of All Stakeholders
Jane McCann .......................................................................................................................... 608

Textile Research in Process: 21st Century Approaches to Textile Design Innovation
T.J. Kavanagh, J. Matthews, R. Huddleston ........................................................................ 618

Indian Handloom Sector – Growth and Future Prospects
Rachna Imam .......................................................................................................................... 636

PERSONAL PROTECTIVE EQUIPMENT

Response of Unidirectional Coated Fabrics at Slow and High Speed Impact Penetration
M. R. Ahmad, N. Hassim, W.Y.W. Ahmad, A. Samsuri, M.H.M. Yahya .............................. 657

Physical Characterisation of Kevlar® XP Aramid and Its Interdependence with Hard Armour
Rajneesh Jaitlee .......................................................................................................................... 662

Effect of Stitching Patterns on the Puncture Resistance of Twaron Fabric
Suraya Ahmad Suhaimi, J. Salleh, M.R. Ahmad, Nur Awatif Ahmad, Nor Azreen Abu Bakar 695

COMPOSITES

An Investigation of Mechanical Properties of Multi-Axial Fabrics-Waste Newspaper Reinforced

PLA/RAMIE Green Composites - A Novel Processing Technique
Mohammad Tajul Islam Mollah, Jiansheng Guo ................................................................ 714

Fabrication and Characterization of Jute/Poly(butylene succinate) Biocomposites
Sang Yeol Lee, Chang Whan Joo ................................................................................................. 727

NATURAL FIBRES

Degumming Agave Cantala Fiber Using Microbial (Green Degumming) and Economic Review
Asmanto Subagyo ..................................................................................................................... 733

Effects of Functional Finishing on Characteristics of Cotton Fabrics Using Garad tree (Acacia
Nilotica) Extracts
Fadl Elmoula .......................................................................................................................... 746

New Natural Luxurious Womenswear Merino Wool, Wool/Silk and Wool/Bamboo Viscose Woven
Worsted Fabrics
Surinder Tandon, Mitsuo Matsudaira ......................................................................................... 753
DYEING FINISHING & PRINTING

Development of Novel Chitosan Gel Beads for the Removal of Synthetic Dyes ........................................................................ 770
Chun-Wah Marcus Yuen, J. Yip, Kim-Hung Lam, Chi-Wai Kan, Kwun-Wai Man

Improving Optical Brightness of Cellulosic Textiles with β-Cyclodextrin ............................................................................. 777
Morgane Le Fur, Graça M.B. Soares

Study of Laser Effect on Decolourization of Dyed Cotton Sample ............................................................................................... 783
Maral Pishgar, Khosro Farizadeh

Dye Absorption Modification of Cotton Fabric Using PPI Dendrimer Nano-Structure ................................................................. 792
Razieh Ardekani, Reza Mohammad Ali Malek, Majid Montazer, Samera Salimpour

Screen-Printed Multilayer Meander Heater on Polyester Cotton .................................................................................................. 796
Russel Torah, Kai Yang, Steve Beeby, John Tudor

Preparation of Flame-Retardant Cotton Fabric Using PPI dendrimer Nano-Structure ................................................................. 809
Samera Salimpour Abkenar, Reza Mohammad Ali Malek, Firouz Mazaferi

Improvement of Efficiency of Nanoparticle Fixation on the Surface of Lignocelulosic Fabrics .................................................. 814
M. Zimniewska, J. Batog, E. Bogacz, B. Romanowska

QUALITY CONTROL, TESTING AND EVALUATION

How Closely Do Hospital Staff Follow NHS Guidelines on Domestic Laundering Procedures? ..................................................... 822
K. Riley, J. Williams, K. Laird

The Effect of Copper Sulphate Solutions on Physical Properties of Cotton and Polyester Woven Fabrics ........................................ 831
M. Uzun, E. Sancak, M. Akalin, O. Atak, A. Beyit, I. Usta

POSTERS

Designing Innerwear Using Cotton Lycra Blend Treated with Eve Care Vital ............................................................................ 837
T. Lyngdoh, V. Karnad

Air-Proof Surface Coating for 3D Spacer Fabric and the Effect on Its Physical Properties ............................................................ 838
Fawzy Sherif, Rolf-Dieter Hund, Rasha El Nahas

Effect of Fibre Extraction and Retting Processes on the Properties of Pineapple Leaf Fibres (PLF) .............................................. 839
Siti Hajar Mohd Zaki, M. R. Ahmad, Khadijah Omar

Author Index
