Contents

VOLUME 1

Preface

Stability, Non-Linear Behaviour and Design of Steel Structures

Special session organised by D. Camotim and C. Basaglia

1	The Influence of Residual Stresses on the Buckling Behaviour of Rack Uprights M.M. Pastor, J. Bonada, F. Roure and M. Casafont	1
2	Interactive Buckling of Thin-Walled I-Section Columns M.A. Wadee and L. Bai	14
3	The Behaviour of Beam-Column Elements with Variable I Cross-Sections considering Lateral Restraints I.M. Cristutiu and A.I. Dogariu	31
4	Finite Element Analysis of Failure Modes for Cellular Steel Beams B. Dervinis and A.K. Kvedaras	46
5	Numerical Evaluation of Column Base Rigidity J. Razzaghi and A. Khoshbakht	66
6	Computational Non-Linear Buckling Analysis of an Elastically Restrained Steel Beam I. Misiunaite and A. Juozapaitis	80
7	Calculation of Initial Post-Buckling Behaviour of Moderately Thick Plates using an Exact Finite Strip S.A.M. Ghannadpour, H.R. Ovesy and E. Zia-Dehkordi	93
8	Finite Element Analysis of Light Gauge Steel Plate Shear Walls E.B. Machaly, S.S. Safar and M.A. Amer	109
9	Thin-Walled Structures: Warping Modes R.F. Vieira, F. Virtuoso and E.B.R. Pereira	129
10	Shear Strength of End Web Panels S.S. Safar	150
11	Numerical Analysis and Measurement of Non-Uniform Torsion J. Murin, T. Sedlar, V. Kralovic, V. Goga, A. Kalas and M. Aminbaghai	169
12	The Torsion Effects on the Non-Linear Behaviour of Thin-Walled Beams: A Finite Element Approach F. Mohri, N. Damil and M. Potier-Ferry	187
13	Progressive Collapse and Robustness of Steel Framed Structures A. Formisano and F.M. Mazzolani	207

14	Axial-Shear Force-Bending Moment Interaction in Elastoplastic Analysis of Steel Frames M.M.S. Manola and V.K. Koumouisis	225
15	On the Imperfection Sensitivity of Thin-Walled Frames S. Gabriele, N. Rizzi and V. Varano	243
16	Imperfection Sensitivity Analysis of the Behaviour of Single Storey Frames with Tapered Web Members I.M. Cristutiu and D.L. Nunes	260
17	The Influence of Elastic Boundary Conditions on the Stability of Steel Frames P. Luhakooder and I. Talvik	272
18	Structural Design of Frames Able to Prevent Element Buckling F. Giambanco, S. Benfratello, L. Palizzolo and P. Tabbuso	283
19	Nonlinear Flexural-Torsional Dynamic Analysis of Beams of Variable Cross Section using the Boundary Element Method: Application to the Analysis of Wind Turbine Towers E.J. Sapountzakis and I.C. Dikaros	299
20	Non-Linear Dynamic Analysis of Steel-Concrete Composite Floors subjected to Human Rhythmic Activities E.D.C. Lopes, S.G. Gonçalves, C.M.R. Gaspar, J.G. Santos da Silva and S.A.L. de Andrade	316
21	The Effects of Seismic Loading on Pallet Rack Semi-Rigid Joints K.O. Kwarteng, R.G. Beale, M.H.R. Godley and S.D. Thomson	328
22	Computer-Based Nonlinear Analysis for the Seismic Performance Assessment of Three-Dimensional Steel Frameworks C.G. Chiorean, G. Tarta, I. Marchis and M. Buru	352
23	Finite Element Analysis of Walking Vibration Problems for Tubular Steel-Concrete Composite Footbridges G.L. Debona, J.G. Santos da Silva, A.C.C.F. Sieira, P.C.G. da S. Vellasco and L.R.O. de Lima	372
24	A Hysteretic Displacement Based Fibre Beam Element I.A. Gkimousis and V.K. Koumouisis	385
25	Direct Strength Method to Predict the Resistance of Cold-Formed Steel Columns against Local-Distortional Interactive Failure P.B. Dinis and D. Camotim	402
26	Numerical Analysis and Model Calibration for Perforated Pallet Rack Uprights A. Crisan, V. Ungureanu and D. Dubina	435
27	The Optimal Drift Design Method to Control the Elastic and Inelastic Performance of Steel Moment Frames S.W. Choi, J.H. Lee, Y.S. Kim and H.S. Park	455
28	Buckling, Post-Buckling, Collapse and Design of Thin-Walled Steel Continuous Beams and Frames C. Basaglia, D. Camotim and H.B. Coda	463
29	A Finite Element Study of the Severe Temperature Effect on the Behaviour of Elliptical Hollow Section Columns N. Goodfellow, F. Ali, T. Scullion, A. Nadjai and J. Gardner	499

30	Application of Direct Strength Method Design to Distortional Buckling Resistance of Thin-Walled Steel Columns Exposed to Fire A. Landesmann and D. Camotim	511
31	Local and Global Stability Analysis of a Large Free Span Steel Roof Structure Z. Nagy, M. Cristutiu and Z. Kiss	552
32	Numerical Evaluation of Chord Failure Resistance for Multi-Intersection Tubular Joints with Non-Regular Geometry: A Case Study R. Gori, A. Mastropasqua and M. Zanchin	563
33	A Parametric Study of Cold-Formed Steel Bolted Joints in Pitch-Roof Portal Frames Z. Nagy and P. Pernes	574
34	A Study on the Behaviour of H-shaped Beam-to-Column Connections with Newly Reformed T-Stubs S.M. Shin and D.K. Lee	589
35	Nonlinear Finite Element Modelling of Welded Pinned Connections with and without Web Angles J. Razzaghi and A. Pourali	602
36	Introducing an Innovative Column Splicing Technique for Steel Structures M. Foroughi and M.A. Barkhordari	620

Composite, Sandwich and Adaptive Structures: Modelling, Optimization, Simulation and Testing

Special session organised by C.M. Mota Soares, A.L. Araujo and F. Moleiro Duarte

37	A Finite Element for Bending Analysis of Sandwich Composite Beams P. Belbute, A.L. Araújo, S. Teixeira de Freitas and M. de Freitas	630
38	Finite Element Modeling of Shear Deficient Beams Bonded with Aluminum Plates A. Abu-Obeidah, R. Hawileh and J.A. Abdalla	643
39	Multiscale Design and Optimization of Bi-Material Laminated Structures P.G. Coelho, H.C. Rodrigues and J.M. Guedes	651
40	Local and Global Pareto Dominance in Multi-Populations Evolution applied to Optimization of Composites C.A.C. António	664
41	A Two-Node Finite Element for Linear Magneto-Electric Laminated Timoshenko Beams A. Milazzo and C. Orlando	681
42	A Mathematical Model of a Five Layer Sandwich Beam K. Magnucki, M. Smyczynski and P. Jasion	694
43	Collapse of Carbon and E-Glass Composite Tubes under External Hydrostatic Pressure P.T. Smith, A.P.F. Little and C.T.F. Ross	703
44	Analysis of Cracked and Notched Composites applying a New Formulation of the Scaled Boundary Finite Element Method R. Dieringer and W. Becker	714
45	Modelling of Piezocomposite Functionally Graded Plates for Active Vibration Control M. Pietrzakowski	730

46	Numerical Analysis of the Initiation of Delamination in Fibre Composites J.-W. Simon and S. Reese	743
47	Large Deformation Analysis of Laminated Composite Plates T. Yıldız, Y. Olcay and H. Darendeliler	761
48	Analysis of the Mechanical Behaviour of Composites and their Bonded Assemblies under Tensile or Compression Shear Out-of-Plane Loads L. Sohier, J.Y. Cognard and P. Davies	776
49	A Finite Element Model for Analysis of Laminated Soft Core Sandwich Structures A.L. Araújo, C.M. Mota Soares and C.A. Mota Soares	791
50	Elastic Solids Reinforced with Random Fibres Developing Large Deformations: A Finite Element Approach M.S.M. Sampaio, H.B. Coda and R.R. Paccola	806
51	Thermal Postbuckling Behaviour of Rectangular Functionally Graded Plates using the Finite Strip Method H.R. Ovesy, S.A.M. Ghannadpour and M. Nassirnia	823
52	A Passive Approach to the Development of High Performance Composite Laminates with Improved Damping Properties J.M. Silva, M. Piriz, P.V. Gamboa, R. Cláudio, N. Nunes and J. Lopes	837
53	The Dispersion Function of a Quasi Two-Dimensional Periodic Sandwich using a Dirichlet-to-Neumann Map N.T. Bagraev, G.J. Martin, B.S. Pavlov, A.M. Yafyasov, L.I. Goncharov and A.V. Zubkova	848
54	Impact Resistance of Metallic Cellular Materials: Effects of Cell Shape and Base Material Ductility E. Law, K.K. Tan, S.D. Pang and S.T. Quek	866
55	A Mixed Mode Cohesive Law for Z-Pinned Composite Delamination H. Cui, S. Koussios, Y.-L. Li and A. Beukers	886
56	Investigation of Lightweight Composite and Hybrid Primary Aircraft Structures A. Shanygin	900

VOLUME 2

57	Accurate Stresses for Homogeneous and Composite Beams J. Aalto, R. Syrjä and C.A. Ribas	917
58	Sequentially Linear Analysis applied to a FETI-Based Model of Quasi-Brittle Interfaces P. Gruber and J. Zeman	940

Derivative-Free Methods for Engineering Optimization

Special session organised by J.F. Aguilar Madeira and H. Pina

59	Handling Linear Constraints in Genetic Algorithms H.L. Pina and J.F.A. Madeira	955
60	Optimization of Tendon Geometry of Post-Tensioned Concrete Bridges using Genetic Algorithms L. Dlouhý and M. Lepš	967
61	Application of Genetic Algorithms for Approximation with Energy-Based Models W.B. Bończyk	979

62	Deterministic Global Optimization Methods for Solving Engineering Problems D.E. Kvasov and Y.D. Sergeyev	987
63	Searching for Multiple Minima of Bound Constrained Optimization Problems using Derivative Free Optimization Techniques U.M. García Palomares	1006
64	Damping Optimization of Viscoelastic Laminated Sandwich Structures using the Direct Multisearch Method J.F. Aguilar Madeira, A.L. Araújo, C.M. Mota Soares and C.A. Mota Soares	1014
65	Optimization of Materials Selection in a Multi-Part Environment with Direct Multi-Search M. Leite, J.F.A. Madeira, A. Silva, E. Henriques and R. Roth	1026
66	Multi-Objective Ant Colony Approaches for Structural Optimization Problems J.S. Angelo, H.S. Bernardino and H.J.C. Barbosa	1037
67	Particle Swarm Optimization for Non-Convex Problems of Size and Shape Optimization of Trusses Y.J. Xu, M. Domaszewski, D. Chamoret, W.H. Zhang and J.G. Korvink	1057
68	A Comparison of Genetic Algorithm and Particle Swarm Optimisation for Theoretical and Structural Applications Z. Wang, T.J. McCarthy and M.N. Sheikh	1074
69	Structural Optimization of Tall Buildings using NSGA-II and Resizing Techniques E.-M. Kwon, S.-W. Choi and H.-S. Park	1092
70	An Evolutionary Structural Optimization applied to Fluid-Structure Problems W.M. Vicente, R. Picelli and R. Pavanello	1101
71	Design Optimization of Moment Resisting Steel Frames using a Cuckoo Search Algorithm M.P. Saka and E. Doğan	1121
72	Optimum Detailing Design of Reinforced Concrete Plane Frames to ACI 318-05 using the Harmony Search Algorithm A. Akin and M.P. Saka	1144
73	Discrete Design Optimization of Space Steel Frames using the Adaptive Firefly Algorithm İ. Aydoğdu, A. Akın and M.P. Saka	1168

Damage Identification Methods

Special session organised by J.V. Araujo dos Santos and H.M.R. Lopes

74	Improvement in Damage Localisation using Speckle Shearography H. Lopes, J.V. Araújo dos Santos, P. Moreno García and F. Ferreira	1185
75	Damage Localisation in Composite Laminated Plates using Higher Order Spatial Derivatives P. Moreno-García, H. Lopes, J.V. Araújo dos Santos and N.M.M. Maia	1201
76	Detection of Localized Damage for Beams using a Frequency Based Method F. El Khannoussi, A. Khamlichi, A. Hajraoui and A. Limam	1217
77	A Method to Detect and Assess Damage in Beams based on Frequency Changes G.-R. Gillich, Z.-I. Praisach and D. Amariei	1228

78	Detection of Multiple Cracks in Beams using the Superposition Property Z.-I. Praisach, G.-R. Gillich and D. Amariei	1243
79	Damage Detection for Beams subject to Moving Loads based on Wavelet Transforms J.M. Machorro-López, A. Bellino, S. Marchesiello and L. Garibaldi	1262
80	Structural System Identification in the Presence of Resonant Non-Structural Appendages E. Matta, R. Ceravolo, A. De Stefano, A. Quattrone and L. Zanotti Fragonara	1282
81	A Subspace Fitting Method based on Finite Elements for Identification and Localisation of Damage in Mechanical Systems G. Gautier, R. Serra and J.-M. Mencik	1298
82	Damage Detection of Truss Structures using an Improved Charged System Search Algorithm A. Kaveh and A. Zolghadr	1310
83	Statistical Multi-Objective Structural Damage Identification based on Dynamic Parameters R. Perera, E. Sevillano and A. Ruiz	1327
84	Damage Detection in Beam Structures using a Combined Genetic Algorithm and Nonlinear Optimisation System S. Aktasoglu and M. Sahin	1339
85	Influence of Incomplete Modal Data on the Performance of a Vibration-Based Damage Detection Methodology J.E. Laier and J.D. Villalba	1355
86	A Structural Health Monitoring System Based on an Analysis of Changes in the Static, Dynamic and Magnetic Properties of the Structure J. Maczak	1372
87	Early Failure Detection in Large Scale Civil Engineering Structures S. Radkowski and J. Maczak	1387
88	The Passive Electric Potential Computed Tomography Method for Identification of a Part-Through Three-Dimensional Crack S. Kubo, K. Nakamura and T. Sakagami	1398

Eigenvalues of Continuous Systems

Special session organised by S. Ilanko and D. Kennedy

89	Higher Order Beam Equations H. Abadikhah and P.D. Folkow	1408
90	Free Vibration of a U-Type Liquid-Contained Rectangular Container with Simply Supported Boundary Condition K.-H. Jeong	1418
91	A Comprehensive Dynamic Model for Axial, Flexural and Torsional Vibration of a CANDU Fuel Element S.D. Yu and M. Fadaee	1433
92	Dynamic Analysis of a Timoshenko Beam on a Semi-Infinite Elastic Subgrade using an Ordinary Differential Equation Method Y.Q. Gong and F.H. Xu	1443

93	The Eigenpairs of a Coupled Rectangular Cavity N. Tanaka	1451
94	An Equivalent Isotropic Model for Functionally Graded Plates D. Kennedy and R.K.H. Cheng	1464
95	Exact Dynamic Stiffness Matrix for a Class of Elastically Supported Structures W.P. Howson, A. Watson and B. Rafezy	1477
96	Computation of Eigenvalues for Thick and Thin Circular and Annular Plates using a Unified Ritz-Based Formulation L. Dozio	1493
97	Sets of Admissible Functions for the Rayleigh-Ritz Method L.E. Monterrubio and S. Ilanko	1511
98	Free Vibration Analysis of Shallow Shells using the Superposition-Galerkin Method Y. Mochida and S. Ilanko	1527
99	Dynamic Stiffness Analysis of Graphene Sheets and Carbon Nanotubes D. Kennedy	1537
100	Solving Homogeneous Trees of Sturm-Liouville Equations using an Infinite Order Determinant Method A. Watson, W.P. Howson, C. James and C. Williams	1549
101	Free vibration Analysis of Laminated Plates using Wavelet Collocation and a Unified Formulation A.J.M. Ferreira, E. Carrera and L. Castro	1561
102	Free Vibration of a Functionally Graded Timoshenko Beam using the Dynamic Stiffness Method H. Su and J.R. Banerjee	1577

Fatigue Assessment and Damage Control of Railway Bridges

Special session organised by W. Salvatore and G. De Roeck

103	The Non-Linear Influence of Ballast on the Vibrations of Railway Bridges J.-M. Battini	1592
104	Fatigue Assessment of a Riveted Plate Girder Railway Bridge: Numerical and Experimental Investigations V. Zabel, A. Schmidt and I. Reichert	1606
105	Dealing with Uncertainty in Advanced Frequency-Domain Operational Modal Analysis B. Peeters, M. El-Kafafy and P. Guillaume	1626
106	Fatigue Assessment of a Bowstring Railway Bridge C. Albuquerque, R. Calçada and P.M.S.T. de Castro	1638
107	Experimental Analysis and Fatigue Assessment of a Railway Steel Viaduct L. Vincenzi, M. Savoia and W. Salvatore	1656
108	Vehicle-Bridge Interactive Analyses on the Lagoscuro Viaduct L. Vincenzi, M. Savoia and F. Rossi	1674
109	Assessment of Dynamic Loads on Railway Bridges H. Bigelow, B. Hoffmeister and M. Feldmann	1688

110	Local Fatigue Analysis using a Long Term Monitoring System at the Trezói Railway Bridge F. Marques, C. Moutinho and Á. Cunha	1707
111	Weigh in Motion Measurement and Experimental Fatigue Assessment of a Railway Bridge G. Chellini, M. Orlando, W. Salvatore, G. Sorrentino and M. Tisalvi	1726
112	The Assessment of Riveted Railway Bridges in accordance with Swiss Codes SIA 269 M.A. Tschumi	1744
113	Stochastic Modelling of Fatigue Crack Progression using the DOProC Method M. Krejsa	1761
114	Train-Bridge Interaction and Fatigue on Railway Bridges A. Bekö and L. Rossbacher	1779
115	A Numerical Approach for Local Fatigue Analysis of Bridge Details: Analysis of Two Portuguese Case Studies A.L.L. Silva, A.M.P. Jesus and A.A. Fernandes	1793

Masonry Models

Special session organised by L. Pallares and F.J. Pallares

116	A Study of the Out-of-Plane Behaviour of Unreinforced Masonry Walls using a “Unit and Interaction” Micro-Modelling Approach E. Bultot and L. Van Parys	1811
-----	--	------

VOLUME 3

117	A Rigid Block Model with Cracking Units for Limit Analysis of Masonry Walls subject to In-Plane Loads F. Portioli, L. Cascini, M. D’Aniello and R. Landolfo	1829
118	Numerical Methods for Slender Masonry Structures: A Comparative Study M. Girardi, M. Lucchesi, C. Padovani, G. Pasquinelli, B. Pintucchi and N. Zani	1839
119	Masonry Walls under Membrane or Bending Loading Cases: Experiments and Discrete Element Analysis T.T. Bui and A. Limam	1855
120	Network Analysis of Masonry: Indicator Computations for Detecting Soil Defect Impact L. Van Parys, T. Descamps, J. Noël, E. Bultot and S. Datoussaïd	1872
121	Numerical Modelling of Reinforced Masonry Arches J. Brozovsky, M. Jasek and D. Mikolasek	1883
122	An Unabridged Push-Over Approach: Beyond POR Analyses for Three-Dimensional Masonry Buildings O. Corbi	1894
123	Structural Safety Control of Masonry Buildings: Non-Linear Static Seismic Analysis with a Non-Linear Shear Strength Criterion D. Foti, M. Debernardis and V. Paparella	1904
124	Coupled Limit Analysis and Topological Optimization for Masonry Wall Reinforcement A. Baratta and I. Corbi	1918
125	Strengthening of Masonry Buildings by Post-Stressing: The Verticalisation Method A. Morais and S. Sazedj	1927

- 126 A One-Dimensional Evolutionary Masonry Model with Low Tensile Strength 1938
A. Baratta and O. Corbi
- 127 Masonry Vaulted Staircases: Interpretation of Equilibrium Paths 1952
A. Baratta and I. Corbi

Railway Research: Vehicle Dynamics, Infrastructure Response and their Interaction

Special session organised by J. Pombo and V. Markine

- 128 Simulation of Fatigue Crack Growth of a Contact Wire in a Catenary System 1964
S.H. Mai and M.L. Nguyen
- 129 Development of a Computational Tool for the Dynamic Analysis of the Pantograph-Catenary Interaction for High-Speed Trains 1972
P. Antunes, A. Mósca, J. Ambrósio, J. Pombo and M. Pereira
- 130 Application of a Special Sensing Sleeper for Dynamic Interaction within the Boundary Layer between a Sleeper and Ballasts 1997
A. Aikawa
- 131 Experimental Analysis of the Dynamic Behaviour of Railway Turnouts 2008
V.L. Markine and I. Shevtsov
- 132 Railway Earthworks: Integrating Ground Investigation Data into Ground Models 2018
D.A. Gunn, H.J. Reeves, J.E. Chambers, P.B. Wilkinson, C.J. Munro, P.I. Meldrum, G.A. Williams, M.J. Raines, E. Haslam, S.J. Holyoake and J. Wragg
- 133 The Influence of Deck Flexibility on the Dynamic Response of Railway Bridges 2040
P.G.C. Amaral and C.E.N. Mazzilli
- 134 Modeling Shakedown Plastic Strains of Subballast and Subgrade Materials in the Concrete Slab Track System of High-Speed Trains 2055
Y.H. Jung, C.Y. Choi and E. Nsabimana
- 135 Multi-Objective Design Optimization of the Nose of a High-Speed Train 2069
M. Suzuki and K. Nakade
- 136 Dynamic Optimization of Ladder Track Components to Minimize the Subway Vibration 2082
Z.Q. Yan, V.L. Markine, A.J. Gu and Q.H. Liang
- 137 Assessment of the Dynamic Characteristics of a Ballasted Railway Track subject to Impact Excitation using Three-Dimensional Composite Finite Element - Discrete Element Modelling 2099
A. Aikawa
- 138 A Three-Dimensional Calculation for Dynamic Pantograph-Catenary Interaction 2111
N. Cuartero, E. Arias, T. Rojo, F. Cuartero and P. Tendero
- 139 A Study on Multiple Pantograph Operations for High-Speed Catenary Contact 2131
J. Pombo, P. Antunes and J. Ambrósio

Computational Aspects in Contact and Interface Modeling

Special session organised by S. Dumont and F. Lebon

- 140 The Influence of the Geometry of Coaxial Adhesively-Bonded Joints on the Transmitted Load 2150
J.Y. Cognard, L. Sohier, R. Créac'hcadec, F. Lavelle and N. Lidon

141	Finite Fracture Mechanics for the Assessment of Failure Loads of Adhesive Joints P. Weißgraeber and W. Becker	2165
142	Analysis of Stress Concentrations in Adhesively-Bonded Assemblies subject to Thermo-Mechanical Loads: Application to the Characterisation of the Adhesive Behaviour J.Y. Cognard, C. Badulescu, N. Carrère, R. Créac'hacdec and P. Védrine	2177
143	On the Modelling of the Direct Bonding of Two Silicon Surfaces N. Cocheteau, F. Lebon, I. Rosu, A. Maurel, S. AitZaid and I. Savin DeLarclause	2192
144	An Asymptotic Approach to Thin Film Adhesion F. Lebon and R. Rizzoni	2209
145	The Influence on the Geometric Curvature of the Mechanical Behaviour of the Adhesive Joint F. Ascione and G. Mancusi	2223
146	Numerical Analysis of Thermo-Mechanical Wear Problems for Reciprocal Punch Sliding I. Pączelt and Z. Mróz	2235
147	Numerical Simulations and Experimental Investigations of Contact Phenomena in a Mechanical Friction Clutch J. Awrejcewicz and D. Grzelczyk	2255
148	A Space-Time Finite Element Method for Elastodynamics Problems with a Moving Loading Zone S. Dumont and F. Jourdan	2265
149	On Higher Order Approximation for Nonlinear Variational Problems in Nonsmooth Mechanics J. Gwinner	2281
150	Three-Dimensional Cohesive Crack Propagation using Hybrid-Trefftz Finite Elements G. Edwards, C.J. Pearce and Ł. Kaczmarczyk	2292

Composite and Hybrid Structures of Steel and Concrete

Special session organised by L. Pallares

151	Structural Response of a Composite Beam subject to Cyclic Loading Conditions considering the Interfacial Slip Effect J.W. Hwang, H.G. Kwak and Y.H. Lee	2305
152	Nonlinear Finite-Element Analysis of the Shear Behaviour of Stud Connectors Q. Wang, Y.Q. Liu and J.P. Lebet	2318
153	Computational Modelling of Deconstructable Composite Steel-Concrete Beams M.A. Bradford and Y.-L. Pi	2332
154	Creep and Shrinkage Analysis of Curved Composite Beams Including the Effects of Partial Interaction X. Liu, R.E. Erkmen and M.A. Bradford	2347
155	Analysis of Steel-Concrete Beams: Influence of Time Dependent Effects, Cracking and Connection Flexibility R.F. Vieira and F. Virtuoso	2367
156	A Study of Modelling Composite Connections in Two and Three Dimensions M.N. Kataoka and A.L.H.C. El Debs	2383

157	A Parametric Study of the Development of Transverse Deck Cracking A. Abdel-Mohti and A. ElSafty	2400
158	Rheological-Dynamical Limit Analysis of Reinforced Concrete Folded Plate Structures using the Harmonic Coupled Finite-Strip Method D.D. Milašinović, D. Goleš, A. Borković, D. Kukaras, A. Landović, Ž. Živanov and P. Rakić	2414
159	Ductility Demand on Steel Reinforcing Bars in Concrete Buildings A. Braconi, F. Braga, S. Caprili, R. Gigliotti and W. Salvatore	2434
160	Automatic Calculation of Optimum Reinforcement for Flexural and Axial Loading A. Tomás, G. Sánchez and A. Alarcón	2453
161	Finite Element Modelling of Steel-Caged Reinforced Concrete Columns subjected to Combined Bending and Axial Loads J. Garzón-Roca, J.M. Adam, L. Pallarés and P.A. Calderón	2472

Structural Stability: Modelling, Simulation and Experiments

Special session organised by J. Blachut and A. Limam

162	Stability, Breathing and Design of Steel Girders subjected to Repeated Loading M. Škaloud, M. Zörnerová and Sh. Urushadze	2487
163	Elastic Buckling of Conical Shells under the Combined Loading of Axial Compression and External Pressure J. Błachut and D. Stanier	2502
164	Non-Linear Buckling of Conical Shells under External Hydrostatic Pressure C.T.F. Ross, T. Eeeles, C. Fraser, J. Burt, M. Fitzgerald, C. Knipe and A.P.F. Little	2520
165	The Effect of a Thermal Barrier on the Buckling and Post-Buckling Behavior of Pressurized Aluminum Cylindrical Shells subjected to Shear A. Limam, J. Didier, A. Da-Silva, F. Marteau and F. Lorioux	2536
166	Assessing the Effect of Two Entering Triangular Initial Geometric Imperfections on the Buckling Strength of an Axisymmetric Shell subjected to Uniform Axial Compression A. Khamlichi and A. Limam	2547
167	Effects of Approximations on the Lateral-Torsional Buckling and Postbuckling Analysis Y.-L. Pi and M.A. Bradford	2558
168	Analytical and Experimental Investigations of Crippling in Multiplate Rods and Panels G. Zamula and I. Kondakov	2573
169	Dynamic Instability of Circular Cylindrical Shells subject to Base Excitation F. Pellicano	2587
170	Buckling of Structures with Interacting Propagating Cracks D.C. Tran and A. Limam	2605
171	Tripping Instability of Ring Stiffened Cylinders induced by Underwater Explosions Y.O. Shin and Y.S. Shin	2625

Vibration Effects on Structures and Environments

Special session organised by J. Bencat and K. Stypula

172	Measurements and Prediction of Pedestrian Walking Loads on an Aluminium Catwalk J. Fernández, A. Fraile, E. Alarcón and L. Hermanns	2644
173	Measurement and Prediction of the Dynamic Behaviour of Laminated Glass L. Hermanns, J. Fernández, A. Fraile and M.S. Gómez	2658
174	Train Induced Free Field Vibrations Experimental and Numerical Analysis J. Benčat and M. Škarupa	2670
175	Numerical Analysis of Railway Track Vibrations J. Benčat and J. Koňar	2680
176	The Design of Rail Tracks including the Influence of Vibration on People in Buildings J. Kawecki, K. Koziol and K. Stypula	2694
177	Methods of Assessment for Vibration Impact on People in Buildings J. Kawecki and K. Stypula	2704
178	Paraseismic Loading of Bridge Structures D. Papán	2713
179	Dynamic Stability of a Non-linear Continuous System Subjected to Vertical Seismic Excitation J. Náprstek and C. Fischer	2722

VOLUME 4

180	Dynamic Identification of a Pedestrian Bridge using Operational Modal Analysis D. Foti, S. Ivorra, D. Bru and G. Dimaggio	2736
-----	--	------

Novel Numerical Methods in Solid Mechanics

Special session organised by L. Godinho and D. Dias da Costa

181	A Quadratic Ten Node Tetrahedral Cosserat Point Element for Nonlinear Elasticity M. Jabareen, E. Hanukah and M.B. Rubin	2754
182	Axisymmetric Large Deflection Analysis of an Annular Circular Plate subject to Rotational Symmetric Loading M. Altekin and R.F. Yükseler	2771
183	Bipenalty Methods for Single-Point and Multi-Point Constraints in Computational Dynamics J. Hetherington, A. Rodriguez-Ferran and H. Askes	2784
184	A New Method for Solving Random Vibration Problems M. Grigoriu	2798
185	A Hybrid Approach for Modelling Wave Propagation near Hollow Elastic Pipelines P. Amado-Mendes, L. Godinho and A. Pereira	2810
186	Simulation of a Crack Detection Method for Concrete Structures using SH Waves L. Godinho, D. Dias-da-Costa, E. Júlio and P. Areias	2824
187	Efficient Linear and Non-Linear Finite Element Formulation using a New Local Enhancement of Displacement Fields for Triangular Elements L. Damkilde and R.R. Pedersen	2839
188	Biomechanics of the Willis Circle Arteries D.V. Ivanov, L.Yu. Kossovich, Y.E. Salkovsky and N.G. Chernyshevsky	2851

Numerical Analysis of Low-Frequency Vibrations in Lightweight Buildings

Special session organised by L. Andersen and P.H. Kirkegaard

- 189 A Modular Finite Element Model for Analysis of Vibration Transmission in Multi-Storey Lightweight Buildings 2866
L.V. Andersen, P.H. Kirkegaard, K. Persson, N. Kiel and B. Niu
- 190 Different Modelling Approaches to Coupling Wall and Floor Panels within a Dynamic Finite Element Model of a Lightweight Building 2886
N. Kiel, L.V. Andersen, B. Niu and K. Persson
- 191 Model Reduction in Dynamic Finite Element Analysis of Lightweight Structures 2900
O. Flodén, K. Persson, A. Sjöström and N. Olhoff
- 192 Accurate Finite Element Modelling of Chipboard Single-Stud Floor Panels subjected to Dynamic Loads 2916
A. Sjöström, O. Flodén, K. Persson, P.H. Kirkegaard, D. Bard and J. Negreira
- 193 Evaluation of Various Joints between Studs and Plates on Flanking Noise Transmission within Lightweight Periodic Structures 2931
P.G. Domadiya, K.A. Dickow, L.V. Andersen and S.V. Sorokin
- 194 Vibration Transmission in a Multi-Storey Lightweight Building: A Parametric Study 2941
B. Niu, L.V. Andersen, N. Kiel, O. Flodén and G. Sandberg
- 195 Accuracy of Dynamic and Acoustic Analysis of Lightweight Panel Structures: A Comparison of ABAQUS and ANSYS 2959
P.H. Kirkegaard, K.A. Dickow, L. Andersen and A. Sjöström

Seismic Vulnerability Assessment

Special session organised by G. De Roeck and H. Friedl

- 196 On the Contribution of Experimental Data to the Reduction of the Uncertainty of Fragility Curves 2968
M. Perrault and P. Gueguen
- 197 Vulnerability Assessment of Structures in a Low-To-Moderate Seismic Region based on Ambient Vibration Test Modal Data 2985
T.T. Bui and G. De Roeck
- 198 Seismic Reliability of Eccentrically Braced Frames 2996
I. Mansouri, N.M. Mirzai and H. Saffari
- 199 Seismic Behaviour and Retrofitting of the Poggio Picense Historical Centre Damaged by the L'Aquila Earthquake 3009
A. Formisano
- 200 Seismic Performance Assessment of a Reinforced Concrete Building designed using the Albanian Seismic Code 3028
E. Zhulegu and H. Bilgin
- 201 Evaluation of Seismic Energy Demand of Reinforced Concrete Moment Resistant Frames Considering Soil-Structure Interaction Effects 3036
S. Gharehbaghi, E. Salajegheh and M. Khatibinia

202	Dynamic In-Situ Assessment for Seismic Analysis H. Friedl, K. Alten and A. Lechner	3056
-----	---	------

Reliability Based Optimization: Stationary and Dynamic Problems

Special session organised by K. Marti, G.I. Schuëller and H.A. Jensen

203	An Open Computational Framework for Reliability Based Optimization E. Patelli and M. de Angelis	3069
204	Reliability Assessment and Reliability-Based Design of Plastic Shallow Curved Plates L.M.C. Simões	3086
205	Deterministic and Reliability-Based Optimization of a Belt-Conveyor Bridge L.M.C. Simões, J. Farkas and K. Jármai	3096
206	The Coupling of Robust Metamodel and Heuristic Methods in Reliability Based Design Optimization N. Rabhi, M. Guedri and N. Bouhaddi	3109
207	Topology Optimization for the Case of Probabilistic Loading J. Lógó, E. Pintér and D.B. Merczel	3121

Recent Advances in Structural Analysis and Optimization for Acoustics and Vibrations

Special session organised by M. Matos Neves

208	A Finite Element-Boundary Element Approach for Sound and Vibration Reduction using Piezoelectric Shunt Damping W. Larbi, J.-F. Deü and R. Ohayon	3132
209	Two Scale Modelling of Acoustic Waves in Phononic Plates using Homogenization of High-Contrast Media E. Rohan, R. Cimrman and B. Miara	3144
210	A Time-Domain Methodology for Rotordynamics: Analysis and Force Identification P.V. Paulo, Y.E. Lage, M.M. Neves, N.M.M. Maia and F.J.P. Lau	3163
211	Transient Fluid-Structure Interaction Analysis of Exhaust Gas Recirculation Cooler Pipes T. Grätsch	3175
212	Efficient Calculation of the Added Mass Matrix for Vibration Analysis of Submerged Structures L.E. Monterrubio and P. Krysl	3188

Probabilistic Approaches to Structural Mechanics

Special session organised by A. El-Hami

213	A Variability Study on the Response of Composite Structures based on Sensitivity Indices C.A.C. António and L.N. Hoffbauer	3199
214	Firefly Metaheuristics for the Size, Shape and Topology Optimization of Truss Structures L.F. Fadel Miguel, R.H. Lopez, A. El-Hami and L.F.F. Miguel	3218
215	Reliability-Based Design Optimization for the Analysis of Vibro-Acoustic Problems M. Mansouri, B. Radi and A. El Hami	3227
216	Derivation of Deterministic Design Data from Stochastic Analysis in the Aircraft Design Process U. Armani, S. Coggon and V.V. Toropov	3238

Structural Waveguide Modelling Methods

Special session organised by J.R.F. Arruda and J.-M. Mencik

- 217 Wave Spectral Finite Element Analysis of Two-Dimensional Waveguides 3254
P.B. Silva and J.R.F. Arruda
- 218 Wave Finite Element based Strategies for Computing the Acoustic Radiation of Stiffened or Non-Stiffened Rectangular Plates subject to Arbitrary Boundary Conditions 3272
J.-M. Mencik and M.-L. Gobert
- 219 A Study of Waveguides with Sections of Proportional Sizes: Application to Wave Radiation 3292
D. Duhamel

New Applications of Isogeometric Methods to Structural Analysis

Special session organised by M. Cuomo, L. Greco and A. Reali

- 220 Shape Optimization using Isogeometric Analysis and Particle Swarm Optimization 3310
A. Pospíšilová, M. Lepš, D. Ryppl and B. Patzák
- 221 Isogeometric Shell Formulation based on a Classical Shell Model 3325
A.H. Niemi, N. Collier, L. Dalcin, M. Ghommem and V.M. Calo
- 222 Multi-Patch Isogeometric Analysis of Space Rods 3337
L. Greco and M. Cuomo

Buckling and Postbuckling of Laminated Structures

Special session organised by A.J.M. Ferreira

- 223 Buckling of Laminated and Functionally Graded Plates using Radial Basis Functions 3357
A.M.A. Neves, A.J.M. Ferreira, E. Carrera, M. Cinefra, C.M.C. Roque, C.M. Mota Soares and R.M.N. Jorge
- 224 Stability Analysis of Laminated Composite Thin-Walled Beam Structures 3374
D. Lanc, I. Pešić and G. Turkalj

Plate Analysis

- 225 The Spectral Method for Moving Load Analysis of Thin Plates 3382
I. Kožar and N. Torić Malić
- 226 On the Convergence of a Refined Nonconforming Thin Plate Bending Finite Element 3391
R. Flajs and M. Saje
- 227 Formulation of Thin Plate Finite Elements using the Galerkin Boundary Integral Approach 3410
M. Mazza and F. Mazza

Shell Structures

- 228 Dynamic Equations for a Spherical Shell 3422
R. Okhovat and A. Boström

Design of Experiments

- 229 Estimation of Critical Flutter Load of a Non-Uniform L-Shaped Beam subjected to a Follower Force 3430
I. Takahashi

Multi-Level Optimisation

- 230 Gradient-Enhanced Metamodels and Multiparametric Strategies for Designing Structural Assemblies 3445
L. Laurent, P.A. Boucard and B. Soulier

Shape and Topology Optimisation

- 231 On the Design of a Compliant Mechanism with Non-Uniform Thermal Effects using Evolutionary Structural Optimization 3465
E. Vegeria, R. Ansola, J. Canales and A. Maturana
- 232 Generating Structural Configurations Having a Number of Specified Eigenfrequencies using a Level Set-Based Topology Optimization Method 3483
T. Yamada, T. Matsumoto and S. Nishiwaki
- 233 Shape and Topology Optimization of Elastic Contact Problems using the Piecewise Constant Level Set Method 3494
A. Myśliński
- 234 From Optimal Structural Configuration to Truss Optimization 3506
C.Y. Lin, J.F. Chang and J.Y. Juang
- 235 Optimal Fibre Reinforcement for Masonry Structures using Topology Optimization 3523
M. Bruggi, G. Milani and A. Taliercio
- 236 Symmetry of Solutions in Discrete and Continuous Structural Topology Optimization 3536
J.N. Richardson, S. Adriaenssens, Ph. Bouillard and R. Filomeno Coelho
- 237 Topology Optimisation of Bodies in Unilateral Contact by Maximizing the Potential Energy 3555
N. Strömberg
- 238 Shape Optimization of Membrane Structures based on Finite Element Simulation 3563
C.W. Lim, V.V. Toropov and J. Ye

Space, Cable, Membrane and Shell Structures

- 239 Theoretical and Experimental Analysis of Tensegrity Structures 3581
S. Kmet and P. Platko
- 240 Numerical Analysis of Cable Structures 3602
M. Hüttner, J. Máca and P. Fajman
- 241 Optimization of Arch Supported Tensile Roofs 3615
K. Hincz
- 242 A New Approach for Shell Form Finding combining Numerical and Physical Design Tools 3629
D. Weiss and S. Adriaenssens

VOLUME 5

Progressive Collapse

- 243 The Behaviour of an Old Representative Reinforced Concrete Building subjected to Abnormal Loads 3640
A.G. Marchis, T.S. Moldovan and A.M. Ioani
- 244 Progressive Collapse Risk and Robustness of Low-Rise Reinforced Concrete Buildings 3660
L. Bredean, M. Botez and A. Ioani

245	Progressive Collapse Mitigation in Flat-Slab Buildings O.A. Mohamed	3680
Thermal Problems		
246	An Exact Elastic Plastic Solution for a Thin Disc subject to Thermal Loading O. Chesnikova, A. Pirumov and S. Alexandrov	3690
Thermo-Mechanical Analysis		
247	Thermo-Mechanical Analysis of Isotropic and Orthotropic Beams using a Unified Formulation D. Crisafulli, G. Giunta, E. Carrera and S. Belouettar	3702
Multi-Scale Modelling		
248	Multiscale Hydro-Thermo-Mechanical Analysis of Hydrating Concrete Structures L. Jendele, V. Šmilauer, M. Hlobil and J. Červenka	3722
249	Resolution of Different Length Scales by an Efficient Combination of the Finite Element Method and the Discrete Element Method M. Michael, B. Peters and F. Vogel	3738
250	Hierarchical Numerical Modelling of Nested Poroelastic Media E. Rohan and R. Cimrman	3755
251	A Variational Multiscale Approach to Recover Perfect Bond in the Finite Element Analysis of Composite Beams R.E. Erkmén	3769
252	Representation of Localized Phenomena in Dynamics using Multi-Scale Coupling J. Marchais, C. Rey and L. Chamoin	3789
253	Optimal Prediction of Lyapunov Exponents for a Duffing Oscillator A. LaBryer, P.J. Attar and P. Vedula	3801
254	Analytical and Computational Perspectives of Multi-Scale Theory for Homogeneous, Laminated Composite, and Sandwich Beams and Plates A. Tessler, M. Gherlone, D. Versino and M. Di Sciuva	3821
Multi-Physics Simulations		
255	Object Oriented Design of a Coupled, Multi-Physics Finite Element Kernel M. Horák and B. Patzák	3842
Finite Element Technology		
256	On the Convergence of a Nonconforming Plane Quadrilateral Finite Element M. Saje and R. Flajs	3854
Crack Modelling		
257	A Two-Node Multi-Cracked Beam Element for Static and Dynamic Analysis of Planar Frames M. Donà, A. Palmeri, A. Cicirello and M. Lombardo	3873

258	Limit Analysis of Highly-Undermatched Welded Joints with Cracks S. Alexandrov	3893
Material Modelling and Identification		
259	A Two-Scale Micromechanical Model for Closed-Cell Aluminium Foams J. Němeček and V. Králík	3906
260	Spline-Based Hyperelasticity for Transversely Isotropic Incompressible Materials M. Latorre and F.J. Montáns	3918
261	Strain Behaviour of Concrete subjected to Combined Mechanical and Thermal Loading: From Micromechanical Modelling to Simulation of Real-Scale Fire Tests T. Ring, M. Zeiml and R. Lackner	3929
262	The Elastic-Viscoelastic Correspondence Principle and Parameter Identification T. Ohkami, S. Matsuura and S. Koyama	3939
263	Obtaining Material Properties from Indentation Loading-Unloading Curves using Simplified Equations J.J. Kang, M. Boris, A.A. Becker and W. Sun	3948
264	Calibration of a Distortional Hardening Model of Plasticity J. Plešek, Z. Hrubý, S. Parma, H.P. Feigenbaum and Y.F. Dafalias	3965
265	Numerical Analysis of Concrete at an Early Age A. Ilc, G. Turk and I. Planinc	3976
Structural Mechanics		
266	Hypergraph Products for Structural Mechanics A. Kaveh and B. Alinejad	3992
Aluminium Structures		
267	A Commentary on Improving the Design Rules for Thin Aluminium Shell Structures J.W. Bull	4009
Shakedown		
268	Eurocode Stability Requirements in Optimal Shakedown Truss Design J. Atkočiūnas and G. Blaževičius	4017
269	Shakedown Analysis in n -dimensional Loading Spaces with Kinematical Hardening J.-W. Simon	4028
Finite Element Studies		
270	A Study of the Structural Design of a Bottle with Vacuum Insulation K. Utsumi, T. Kobayashi, T. Horiuchi, T. Tanaka and Y. Arai	4048
271	Development and Implementation of Numerical Strategies for Nonlinear Dynamic Analysis of Risers using the Finite Element Method J.A.G. Sánchez and H.B. Coda	4061

272 Development of a Vehicle Suspension Finite Element Model for Kerb Impact Simulations 4076
W.Z. Golinski

Impact Studies

273 Validation of Numerical Simulation Models for Transport and Storage Casks using Drop Test Results 4085
L. Qiao, U. Zencker, H. Völzke, F. Wille and A. Musolff

Structures subject to Blast Loading

274 The Collapse of a Skylight Shell Structure caused by a Blast 4097
A. Angotzi, A. Mussi, E. Trolese, M. Zanchin, R. Gori and A. Mastropasqua

Control of Structures

275 The Continuation Method for Dynamic Problems of Frames with Viscoelastic Dampers 4108
R. Lewandowski

276 The Influence of Various Fractional Models of Viscoelastic Dampers on the Dynamic Behaviour of Structures 4118
Z. Pawlak and R. Lewandowski

277 A Differential Evolution Algorithm for Fuzzy Control of Smart Structures 4136
M. Marinaki, Y. Marinakis and G.E. Stavroulakis

278 Vibration Control of Civil Engineering Structures using Magneto-Rheological Dampers 4156
M.B. Cesar and R.C. Barros

Retrofitting and Repair

279 The Reinforcement of Multiple-Leaves Masonry Walls using Carbon Fibre Reinforced Polymer: A Theoretical Approach 4178
L. Anania, C. Giaquinta and G. D'Agata

280 Placement of Fibre Reinforced Polymer Provision in No-Tension Vaults using the Vault Inequality System 4195
A. Baratta and O. Corbi

281 A Simple Homogenized Model for the Non-Linear Analysis of FRP Strengthened Masonry Structures 4206
G. Milani and P.B. Lourenço

282 Finite Element Analyses of Reinforced Concrete Beams Strengthened using CFRP 4222
A.E. Demirer and G. Arslan

283 Retrofitting a Truss-Z Modular Pedestrian Ramp with Fully Automated Generation of the Spatial Configuration of the Modules 4232
M. Zawidzki and K. Nishinari

Seismic Engineering

284 Seismic Wave Motion over a Geographical Area by a Random Field Model 4243
I. Corbi

285 Spectrum-Compliant Accelerograms through Harmonic Wavelet Transform 4258
D. Cecini and A. Palmeri

286	Building Pounding Forces for Different Link Element Models R.C. Barros and S.M. Khatami	4278
287	Tuned Mass Dampers for the Mitigation of Impulsive Ground Motions E. Matta, R. Ceravolo, A. De Stefano, A. Quattrone and L. Zanotti Fragonara	4292
288	Structural Integrity Evaluation of Reactor Pool Working Platform: Guide Tubes and Refuelling Cover in a Research Reactor S. Kwag, J.-M. Lee, J.-S. Ryu and Y.-K. Kim	4310
289	Accounting for Uncertainty in Bidirectional Ground Motion C.S. Belsham	4323
290	Seismic Retrofitting Strategy for Improved Strength and Ductility of a Plan-Wise Irregular Reinforced Concrete Building M. Valente	4337
291	The Performance Assessment of a Multi-Span, Box Girder Reinforced Concrete Bridge with and without Seismic Isolation M. Borekci, M. Altun and G. Arslan	4348
292	A Displacement-Based Design Procedure for Seismic Retrofitting of Reinforced Concrete Frames using Braced Ductile Shear Panels M. Valente	4358
293	Soil-Pile Interaction in Deep Layered Marine Sediment subject to Seismic Excitation T.P. Peiris, D. Thambiratnam, N. Perera and C. Gallage	4368
294	Reproducing Ground Motions with Shaking Tables with Limited Stroke Y. Ribakov and G. Agranovich	4380
295	Simulating Responses of Objects to Seismic Input Motion using Multibody Dynamics C.S. Belsham	4390

Boundary Element Method

296	Nonlinear Inelastic Nonuniform Torsion of Bars including the Secondary Torsional Moment Deformation Effect V.J. Tsipiras and E.J. Sapountzakis	4403
-----	---	------

Error Estimation

297	A Practical Tool for Estimating Errors of Stresses in Assemblies S. Pavot, E. Florentin, P. Pasquet and S. Guinard	4423
-----	---	------

Risk Assessment

298	Numerical and Statistical Methods in Quantitative Risk Analysis of Road Tunnels C. Forster, M. Drakulić and B. Kohl	4432
-----	--	------
