2012 Annual SRII Global Conference

(SRII 2012)

San Jose, California, USA
24 – 27 July 2012
Cloud/Mobile Services Session (Wednesday)

Configurable and Extensible Multi-flows for Providing Analytics as a Service on the Cloud ................................................................. 1
    Deepak P., Prasad M. Deshpande, and Karin Murthy

Model Driven Provisioning in Multi-tenant Clouds ................................................................. 11
    Atul Gohad, Karthikeyan Ponnalagu, and Nanjangud C. Narendra

Characterizing Service Assurance for Cloud-Based Implementations:
    Augmenting Assurance via Operations ................................................................. 21
    Teresa Tung and Jaeyoung Kang

Marketer Perceptions of Quality on the Success of Mobile Shopping System
    and Its Impact on Performance ................................................................................... 29
    Lisa Y. Chen

WindTunnel: A Tool for Network Impact Testing of Mobile Applications .............................................. 34
    Karthikeyan Balaji Dhanapal, Siva Sankaran, Arun Agrahara Somasundara,
    and Sanjoy Paul
An Innovative System for Remote and Automated Testing of Mobile Phone Applications .................................................................44

Karthikeyan Balaji Dhanapal, K. Sai Deepak, Saurabh Sharma,
Sagar Prakash Joglekar, Aditya Narang, Aditya Vashistha, Paras Salunkhe,
Harikrishna G.N. Rai, Arun Agrahara Somasundara, and Sanjoy Paul

Cross Enterprise Collaboration Session (Wednesday)
Privacy and Reliability in Crowdsourcing Service Delivery .................................................................55

Lav R. Varshney

Reducing Amount of Information Loss in k-Anonymization for Secondary Use of Collected Personal Information .................................................................61

Kunihiko Harada, Yoshinori Sato, and Yumiko Togashi

A Generic Business Artifacts Based Authorization Framework for Cross-Enterprise Collaboration .................................................................70

Lior Limonad, David Boaz, Richard Hull, Roman Vaculin, and Fenno (Terry) Heath

Business Process Insight: An Approach and Platform for the Discovery and Analysis of End-to-End Business Processes .................................................................80

Szabolcs Rozsnyai, Geetika T. Lakshmanan, Vinod Muthusamy, Rania Khalaf,
and Matthew J. Duffler

Work as a Service Meta-model and Protocol for Adjustable Visibility, Coordination, and Control .................................................................90

Roman Vaculin, Yi-Min Chee, Daniel V. Oppenheim, and Lav R. Varshney

Integration of Service Models - Preliminary Results for Consistent Logistics Service Management .................................................................100

Christoph Augenstein, André Ludwig, and Bogdan Franczyk

Intelligent Services Session (Wednesday)
Prospective Client Driven Technology Recommendation .................................................................110

Qi He, W. Scott Spangler, Bin He, Ying Chen, and Linda Kato

Opportunistic Adversaries: On Imminent Threats to Learning-Based Business Automation .................................................................120

Michiaki Tatsubori and Shohei Hido

Decision Support Services Based on Dynamic Digital Analyses - Quality Metrics for Financial Planning Processes .................................................................130

Jochen Martin, Thomas Setzer, Florian Teschner, Tobias Conte,
and Christoph Weinhardt

Mining Patient Experiences on Web 2.0 - A Case Study in the Pharmaceutical Industry .................................................................139

Carolin Kaiser and Freimut Bodendorf
Cross-Border Challenges in Financial Markets Monitoring and Surveillance: A Case Study of Customer-Driven Service Value Networks .................................................................146
   David Diaz, Babis Theodoulidis, and Eliza Abioye

Knowledge Management for Services Transitions .................................................................158
   Axel Martens and Kaan Katircioglu

**SEIQ Session (Wednesday)**

Operational Performance and Customer Satisfaction: An Integrated Approach to Analyzing Inter-relationships .................................................................165
   Aruna Rajan

A Conceptual Framework of Service Innovation and Its Implications for Future Research .................................................................172
   Sven Schwarz, Carolin Durst, and Freimut Bodendorf

Evolving Social Media into Productivity Platforms .................................................................183
   Sven Graupner, Claudio Bartolini, Hamid Motahari, and Jamie Erbes

Measuring Service Solution Quality in Services Outsourcing Projects Using Value Driver Tree Approach .................................................................191
   Rama Akkiraju and Ruoyi Zhou

Governance Framework for IT Transformation Projects in Outsourcing ................................201
   Sujoy Basu, Sharad Singhal, Jun Li, Bryan Stephenson, and Wen Yao

Information and Knowledge in Telecommunications: A Service-Dominant View .................................................................211
   Vilho Räisänen

**Health Care Session (Thursday)**

Characterizing Hospital Services Using Temporal Data Mining ................................................219
   Shusaku Tsumoto, Shoji Hirano, Haruko Iwata, and Yuko Tsumoto

Systems Health Care: Coevolutionary Integration of Smart Devices and Smart Services .................................................................231
   Hiroshi Nakajima, Toshikazu Shiga, and Yutaka Hata

Risk Mediation Cloud Service: Constructing Statistical Models of Patient Adherence for Sustainable Case Management ................................................237
   Pei-Yun Hsueh, Sreeram Ramakrishnan, and Henry Chang

A System to Provide Primary Maternity Healthcare Services in Developing Countries .................................................................243
   Chinmoy Mukherjee, Komal Gupta, and Rajarathnam Nallusamy

Towards Personalized Care Coordination Service: Integrating Guideline-Based Practice with Interactive Data-Driven Analytics ................................................250
   Pei-Yun Hsueh and Sreeram Ramakrishnan
## Mobile/SEIQ/CEC Main Paper Session (Thursday)

- **Document Quality Checking Tool for Global Software Development** .................................................. 267  
  Kohtaroh Miyamoto, Takashi Nerome, and Taiga Nakamura

- **The Role of Technology in Defining a Service Innovation Capability** .................................................. 277  
  S.A. McLaughlin

- **The Role of Business Model Design in the Service Engineering Process: A Comparative Case Study in the Field of Cloud Computing to Join Service Engineering with Business Model Design** .................................................. 283  
  Christoph Ehrenhöfer and Ernst Kreuzer

- **A Cloud HUB for Brokering Business Processes as a Service: A “Rendezvous” Platform that Supports Semi-automated Background Checked Partner Discovery for Cross-Enterprise Collaboration** .................................................. 293  
  Alex Norta and Lea Kutvonen

- **The WaaSaBE Model: Marrying WaaS and Business-Entities to Support Cross-Organization Collaboration** .................................................. 303  
  Lior Limonad, Lav R. Varshney, Daniel V. Oppenheim, Elad Fein, Phina Soffer, Yair Wand, Moran Gavish, and Ateret Anaby-Tavor

## SEIQ Session (Thursday)

- **Predictive Monitoring of Heterogeneous Service-Oriented Business Networks: The Transport and Logistics Case** .................................................. 313  
  Andreas Metzger, Rod Franklin, and Yagil Engel

- **On the Connections between Types and Service Level Agreements and Implications for Digital Commercial Printing and Other Domains** .................................................. 323  
  Sunil Kothari, Sharad Singhal, Gary Dispoto, and I-Jong Lin

- **Emerging Research Themes in Services-Oriented Systems** .................................................. 333  
  Luciano Baresi, Nikolaos Georgantas, Kristof Hamann, Valerie Issarny, Winfried Lamersdorf, Andreas Metzger, and Barbara Pernici

- **A Gap-Analysis-Based Framework for Evolution and Modernization: Modernization of Domain Management at Red.es** .................................................. 343  
  Jorge Moratalla, Valeria de Castro, Marcos López Sanz, and Esperanza Marcos

- **Innovation Contests as Support Systems for New Service Value** .................................................. 353  
  Olivier Zephir, Laurence Johannsen, and Géraldine Vidou

- **Improving Service Quality through Use of Standard Workbenches** .................................................. 361  
  Richard Goodwin, Pietro Mazzoleni, Sweefen Goh, Aubrey Rember, Vibha Sinha, Debodoot Mukherjee, and Senthil Mani
Service Management & Marketing Session (Thursday)

Global IT Manageability Policies across Service Boundaries in a Cloud Environment .................................................................................................................................369
   Enrique Castro-Leon, Raghu Yeluri, Robert R. Harmon, John M. Kennedy,
   Andrew Edmonds, Jerry Wheeler, and Javier Martinez Elicegui

Building Trust and Compliance in the Cloud for Services ..................................................379
   Raghu Yeluri, Enrique Castro-Leon, Robert R. Harmon, and James Greene

Evaluating the Use of ITIL to Manage SOA Applications in Operations Environments .......................................................................................................................391
   Tsepo Lesihla, Petrie Coetzee, and Manoj Lall

Using Webcrawling of Publicly Available Websites to Assess E-commerce Relationships ..................................................................................................................402
   Dirk Thorleuchter and Dirk Van den Poel

Cloud/Mobile Session (Friday)

Cloud Services Measures for Global Use: The Service Measurement Index (SMI) .................................................................................................................................411
   Jane Siegel and Jeff Perdue

A Policy-Based Approach to Smart Cloud Services ....................................................................416
   Karuna P. Joshi, Tim Finin, Yelena Yesha, Anupam Joshi, Navid Golpayegani,
   and Nabil R. Adam

Smart IVR Service Platform ....................................................................................................426
   Ananlada Chotimongkol, Nattanun Thatphithakkul, and Passakon Prathombutr

Mobile Phone TV Services Business Model Based on Value Co-creation ..................................435
   Jinluan Ren, Hu Liu, and Lihua Liu

Agility in Mobility .......................................................................................................................440
   Basavaraj Hooli

MobileDMS (Mobile Application Design for Disaster Management System) ..................................444
   Gaurav Khatwani

IT Service Platforms: Their Value Creation Model and the Impact of Their Level of Openness on Their Adoption .......................................................................................451
   Selam Abrham Gebregiorgis and Jörn Altmann

Cross Enterprise Collaboration Session (Friday)

Allegro: A Metrics Framework for Globally Distributed Service Delivery ..................................461
   Daniel Oppenheim, Yi-Min Chee, and Lav R. Varshney
Towards a Formal Model for Optimal Task-Site Allocation and Effort Estimation in Global Software Development .........................................................................................................................470
Nanjangud C. Narendra, Karthikeyan Ponnalagu, Nianjun Zhou, and Wesley M. Gifford

ERPEL: Enabling Seamless Ad Hoc Cross Enterprise Collaborations ....................................................478
Christian Huemer, Gerti Kappel, Philipp Krenn, Philipp Liegl, Dieter Mayrhofer, Rainer Schuster, Mario Topf, Hannes Werthner, and Marco Zapletal

Hamid R. Motahari Nezhad, Claudio Bartolini, Jamie Erbes, and Sven Graupner

Achieve Agile Enterprise System through Collaboration with BPMS .......................................................494
Qinhua Wang, Changrui Ren, and Feng Chen

Method for Modeling and Validation of Cross Enterprise Services Composition ..............................................................502
Feng Chen, Changrui Ren, Qinhua Wang, and Jinfeng Li

Intelligent Services Session (Friday)

Customer Behavior Modelling Using Radio Frequency Identification Data and the Hidden Markov Model ..................................................................................................................................................509
Katsutoshi Yada and Natsuki Sano

A Game Theoretic Approach to Identify Critical Components in Networked Systems ........................................................................................................................................................................515
Ramasuri Narayanam

A Fast Interactive Search System for Healthcare Services ..............................................................................................................................525
Maria Daltayanni, Chunye Wang, and Ram Akella

Optimizing Service Selection in Dynamic Workflow Composition: Using Social Media to Develop Recommendations ........................................................................................................................535
John McDowall and Larry Kershberg

Adaptive Employee Profile Classification for Resource Planning Tool ..........................................................544
Tere Gonzalez, Pano Santos, Fernando Orozco, Mildreth Alcaraz, Victor Zaldivar, Alberto De Obeso, and Alan Garcia

Financial Market Service Architectures: A “Pump and Dump” Case Study ..............................................554
Mohamed Zaki, David Diaz, and Babis Theodoulidis

Knowledge Driven Enterprise Risk Management ..........................................................................................564
Nitin Nayak and Rama Akkiraju

Analysis Engine for Automated Health Checks, Early Problem Detection and Advanced Problem Determination ..................................................................................................................574
Yogendra K. Srivastava and Alexander Abrashkevich
Government Services Session (Friday)

Shared Data Manager for Next-Generation IT for Municipal Governments ........................................582
   Rangachari Anand, Stacy Hobson, Jeaha Yang, Juhnyoung Lee, Yuan Wang, and Jing Min Xu

Public Value Provision: A Design Theory for Public E-services ...............................................................592
   Liam Church and Maria Moloney

Service Authentication via Electronic Identification Cards: VoIP Service
Authentication through the DNle ...............................................................................................................602
   Igor Ruiz-Agundez and Pablo G. Bringas

Smarter Financial Management – An Answer to the Missing Link between Key Performance Indicators and Budgeting Decisions for Smarter Cities .......................................................608
   Neil Boyette and Haijing Fang

A Consumer Based Model for E-Tax Services Adoption in Uganda ..........................................................614
   Elizabeth Asianzu and Gilbert Maiga

Interexchange Museum Database via Web Service ..................................................................................623
   L. Kovavisaruch, V. Somlertlamvanich, P. Kamolvej, N. Iamrahong, and G. Prommoon

Health Care Session (Friday)

An Innovative Decision Support Service for Improving Pharmaceutical Acquisition Capabilities .................................................................628
   Phattharat Songthung, Kunwadee Sripanidkulchai, Paithip Luangruangrong, Rungpetch C. Sakulbumrungsil, Siripa Udomaksorn, Nusaraporn Kessomboon, and Inthira Kanchanaphibool

A Health Care Service to Disaster Survivors ............................................................................................637
   Yutaka Hata and Hiroshi Nakajima

Towards the Dynamic Relocation of Ambulances in Germany: The Risk of Being Too Late .................................................................642
   Melanie Reuter and Wibke Michalk

Combatting Counterfeits - The Need for a Global Traceability Platform ..................................................650
   Nampuraja Enose

CT Image Management and Communication Services .............................................................................660
   Kanda Runapongsa Saikaew, Nantachai Jirandom, Nuntapon Juntaranon, Supree Ariyadech, Vera Sa-Ing, Wasan Pattara-Atikom, and Saowapak S. Thongvigitmanee
Progress in the Healthcare Service Innovation Project at the Tsukuba University Hospital

Hideaki Takagi, Hisashi Kurata, Yukihiko Okada, Maiko Shigeno, Akiko Yoshise, Yongbing Zhang, and Keizo Yamashita

**SEIQ - A Session (Friday)**

Resiliency Analytics Framework for Service Delivery Organizations ..................................................672

* Srinivas Karthik, Sreyash Kenkre, Krishnasuri Narayanan, and Vinayaka Pandit

Effective Content Reuse for Business Consulting Practices .............................................................682

* Richard Goodwin, Sweefen Goh, Pietro Mazzolen, Vibha Sinha, Debdoott Mukherjee, and Senthil Mani

Customer Tracking and Tracing Data as a Basis for Service Innovations at the Point of Sale .................................691

* Johannes Kröckel and Freimut Bodendorf

User Centered Design of Innovative E-Service Solutions - A Scientific Approach to User Fascination ..............................................697

* Christian Zagel and Freimut Bodendorf

On the Role of Analytics in Estimating the Cost of Delivering Complex Information Technology (IT) Outsourcing Services Projects ........................................705

* Rama Akkiraju, Toby Lehman, Neil Boyette, Haijing Fang, Mario Lichtsinn, and Ben Shaw

Business Process Optimization in Cross-Company Service Networks:

Architecture and Maturity Model ..............................................................................................................715

* Falko Koetter, Anette Weisbecker, and Thomas Renner

Use of IT Best Practices for Non-IT Services ........................................................................................725

* Elizaveta Kozlova, Ulrich Hasenkamp, and Evangelos Kopanakis

On the Analysis of Global Team Performance ....................................................................................735

* Nianjun Zhou, Wesley M. Gifford, and Krishna Ratakonda

The Application of Six Sigma to Promote Information System Service Quality ........................................744

* Huey-Der Chu

Characterizing Time-Bounded Incident Management Systems ................................................................750

* V. Cavalcante, C. S. Pinhanez, C. B. de Souza, R. A. de Paula, A. P. Appel, and C. S. Andrade
SEIQ - B Session (Friday)

Quality and Service Management: Processes for Improving the Productivity of Service Provisioning ................................................................. 760

Andrea Rößner, Florian Kicherer, and Rainer Nägele

Potentials and Barriers of Technology Deployment in Services: Productivity Increase and Innovation ................................................................. 768

Arno Schmitz-Urban, Benedikt Brenken, and Gerhard Gudergan

Proposal and Evaluation of Metadata Management Method for eDiscovery ................................................................. 778

Yukihisa Fujita, Ken Naono, and Tomohiro Hanai

Optimization for Service Plan of Environmental Emergency Based on Entropy Value-TOPSIS Method ................................................................. 787

Tao Zhao, Yingjun Zheng, and Tao Lin

Applicability of Industrial Manufacturing Innovations and Concepts for the Industrialization of IT ................................................................. 793

Harirajan Padmanabhan and Manjunath Kamath

Uncovering Interesting Business Insights through the Use of Data Analytics in Airport Operation: An Empirical Study ................................................................. 803

Nang Laik Ma, Murphy Choy, and Michelle Cheong

Enterprise Water Management Using ICT ................................................................. 811

Anitha Damodharaswamy

Service Innovation and Emerging Economies ................................................................. 819

Rajaram Venkataraman

Innovation in Banking Business Models Exploring the Emergent Customer Role in Social Networks ................................................................. 827

Javier Busquets, Rajiv Kohli, Pol Navarro, and Toni Plana

User Centered Design and E-service Quality in the Virtual Tourism Community ................................................................. 836

Yao Chin Lin, Ping Heng Tsai, and Nhu Hang Ha

Experiences in Delivering Power System Decision Support Tools over the Web Using Software-as-a-Service (SaaS) Model ................................................................. 846

Archana Pandya, Mehul Shah, Narayanan Rajagopal, and Krishna V. Prasad

Service Marketing and Management Session (Friday)

Employee Engagement: Conceptual Model and Computation Framework ................................................................. 850

Mayuri Duggirala, Sameep Mehta, Nanda Kambhatla, and Pooja Arya

A Top Down Approach to Enterprise Monitoring Using Change Point Detection ................................................................. 859

Bharat Krishnamurthy

Harnessing Employee Engagement and ICT for Organizational Sustainability ................................................................. 863

Lavanya Subramanian and Ananthalakshmi
Traffy Social Eyes: The Traffic CCTV Service Platform ..............................................................869
   Passakon Prathombut, Wasan Pattara-atikom, and Pimwadee Chaovalit

Goal-Oriented Dynamic Business Processes in Service Environments: Models
and Methods Applied in Finance Industry ..................................................................................875
   Monika Kochanowski, Thomas Renner, and Anette Weisbecker

Improving Application Management Services through Optimal Clustering
of Service Requests ....................................................................................................................885
   Ying Li and Kaan Katircioglu

Problem to the Productivity Improvement of the Service Industry of Japan ..............................895
   Norihiko Saiga

How Japanese Traditional “Omonpakari” Services are Delivered - A
Multidisciplinary Approach ........................................................................................................906
   Yoshinori Hara, Yutaka Yamauchi, Yoshinori Yamakawa, Junya Fujisawa,
   Hiroaki Ohshima, and Katsumi Tanaka

The Service Implementation of Business Intelligence System for a Taiwan
High Tech Corporation ................................................................................................................914
   Min-Jen Tsai and Jin-Sheng Yin

A Study on External Knowledge, Knowledge Management Capability
and Corporate Performance ........................................................................................................921
   Shu-Mei Tseng and Chun-I Wu

The Influence of Cross-Border Brand Alliance on Attitude of Consumers: A
Conceptual and Structural Model Perspective ...........................................................................927
   Yu-Hui Tao, Lisa Y. Chen, and KeWei Covi Dai

Author Index ...............................................................................................................................936
