International Gas Union Research Conference 2011

(IGRC 2011)

Seoul, Korea
19-21 October 2011

Volume 1 of 4

ISBN: 978-1-62276-385-6
# TABLE OF CONTENTS

Volume 1

## ORAL PRESENTATIONS

### A. HOW CAN ADVANCED GEO-ENGINEERING IMPACT BOTTOM LINE PERFORMANCE?

**Thermomechanical Aspects of High Frequency Cycling in Salt Storage Caverns** ........................................................... 1  
  P. Bérest, B. Brouard, M. Karimi-Jafari, C. Pellizzaro

**Natural Gas Storage Applied to Compressed Air Energy Storage Power Plants** ................................................................. 26  
  James B. Marean, Robert B. Schainker

**Geosciences Challengers to Develop and Produce Pre-salt Fields, Offshore SE Brazil** ......................................................... 34  
  Mauro R. Becker, Cristiano L. Sombra

### B. DO INNOVATIONS DRIVE ASSET MANAGEMENT IN TRANSMISSION & DISTRIBUTION SYSTEM?

**Strategy for Eliminating Risks of Corrosion and Overprotection for Buried Modern Pipelines** .................................................. 45  
  Fumio Kajiyama

**GDF Suez Develops a Global Mobility Solution for Field Operations: Souche®** ................................................................. 82  
  B. Bouffaut, E. Drouet, F. Lainault, J. Pelce

**Maximizing Critical Infrastructure Performance with Probabilistic Methods** ................................................................. 107  
  Eddie Johnston

**De-risking of Gas Transport Systems: Best Practices and Lessons Learned for Asset Management** .............................................. 114  
  Robert Van Der Geest

### C. DOES ELECTRICITY POWER THE GAS INDUSTRY?

**Natural Gas Power Production – Now and in the Future** ............................................................................................. 121  
  Rudolph Blum

**TriGen, an Innovative Oxy-fuel Technology to Convert High CO₂ Gas Reserves Into Power** .................................................. 131  
  P. Kapteijn, C. Biebuyck, E. Kutscha

**Merging Natural Gas with Solar Power Generation: Evaluating the Potential of Integrated Solar Combined Cycle (ISCC)** ............................................................................................................. 142  
  Rémi Bourgeois, Hervé Gasq, Mathieu Hess, Josef Petek, Peter Pechtl

**Added Value Enhancement for 1,000kW-class CHP System** ............................................................................................. 153  
  M. Ogawa

### D. CAN UNCONVENTIONAL GAS MEET MARKET DEMANDS AND ENVIRONMENTAL REQUIREMENTS?

**Main Technologies for CBM Exploration and Development in China** ................................................................. 168  
  Yiheng Wang

**Improving the Effectiveness and Managing the Impact of Hydraulic Fracturing** ................................................................. 190  
  G. Levis

**Potential Analysis of Coal-bed Methane in Sanjiang Basins of Eastern Heilongjiang Province** .............................................. 236  
  Bin Sun, Ning Ning, Fenjin Sun, Qiuping Sun, Gang Chen

### E. WHICH INNOVATIONS WILL IMPROVE TRANSMISSION SYSTEM OPERATION?

**Paradigm Shift in Modern Flow Measurement and Gas Flow Metering** ................................................................. 249  
  Y. Takeda, Y. Murai
Experimental Reference Database of Mechanical Damage Defects for Developing and Validating Defect Assessment Models
M. Zarea, R. Batisse, P. Cardin, B. Leis

Direct Assessment Techniques for Integrity Management of Underground Petroleum Pipelines
Angel R. Kowalski, John A. Beavers

Evaluation of Predictive Assessment Reliability on Corroded Transmission Pipelines
M. Lecchi

F. WHAT ARE THE OPPORTUNITIES FOR NATURAL GAS IN HOMES AND BUSINESSES OF THE FUTURE?

Energy Management Systems and Integrated Use of Gas and Renewables
F. Pastier

Motivation and Drivers of a German Gas Utility to Support MCHP/Fuel Cells: Overview About E.ON Ruhrgas’ Engagement in Lab & Field Trials
Martin Wilmsmann

Experience and Future Prospects of Fuel Cell mCHP for Residential Use
Kiyoshi Okamura

Ceramic Fuel Cells Residential Generator BlueGen™: Ultra-efficient Distributed Power Generation in Smart Grid Environment
Karl Föger

G. IS BIO ENERGY AN OPTION FOR GREENING THE GAS MARKET?

Development of Innovative Technologies for Biogas Production and Purification
S. Osumi, T. Kume, J. Tsubota, H. Sakamoto

Challenges for Green Gas Injection into the Natural Gas Grid
Jörg Gigler, Ton Van Wingerden, Harm Vlap

Next Generation Biomethane Technologies - Experiences and Further Prospects
Jean Relus Beining, Alexander Vogel, Stephan Ramesohl

Syngas for Today and Biomethane 2G for Tomorrow as Opportunities to Green the Gas Market
Olivier Bordelanne, Marc Perrin

H. HOW TO ASSESS THE ENVIRONMENTAL FOOTPRINT OF THE GAS CHAIN?

LCA of the European Gas Chain: Challenges and Results
A. Prieur-Vernat, P. Pacitto, D. Hec, V. Bichler

Life-cycle Analysis of Renewable Natural Gas Pathways with the GREET Model
Jeongwoo Han, Michael Wang, Marianne Mintz

Life Cycle Greenhouse Gas Emissions of LNG and City Gas 13A
Tomohito Okamura

LCA of Biomethane
Marius Adelt

I. ARE NEW GASES AND NEW TECHNOLOGIES THE FUTURE?

Silica Formation From Siloxanes n Biogas: Novelty or Nuisance
A. V. Mokhov

Applications of High Efficiency Gas Burners to Contribute to Energy Saving in Industrial Field
Hiromu Sakaguchi

Innovative and Efficient Technologies for Industry
Clotilde Villermaux

GASQUAL Project: A Step Closer to Gas Quality Harmonization in Europe
Jean Schweitzer, Francois Cagnon
J. LNG - WHERE ARE THE NEXT TECHNOLOGY BREAKTHROUGHS?

Innovations in Natural Gas Liquefaction Technology for Future LNG Plants and Floating LNG Facilities ................................................................. 605
Justin Bukowski, Yu Nan Liu, Stephen Boccella, Leo Kowalski

Future Perspectives in LNG Transportation .................................................................................................................................................. 632
Jacques Sainson, Jean-Marc Quenez

Latest Tank Design for the World’s Largest 270,000m³ Full Containment LNG Tank ................................................................. 640
Young-Myung Yang

Mercury Removal From Gas Streams Using New Solid Adsorbents ........................................................................................................ 659
Shahidah Mohd Shariff

K. Which Innovations Will Improve Distribution System Operation?

Next-generation Gas Smart Metering System: Current Status of “Smart Metering” Initiatives in the City Gas Industry .................................................................................................................................................. 669
Hajime Furusawa

New Methodologies to Help Natural Gas Odorisation ................................................................................................................................. 679
F. Cagnon

Various Methods to Evaluate the Long-term Reliability of PE Pipes and Joints in Use at Osaka Gas ................................................................. 694
Yuji Higuchi, Seiji Miyaki, Takaaki Kawaguchi, Hiroki Nishimura

Third Party Damage and Plant Protection – The Common Ground Alliance ........................................................................................................ 706
Bryan Goulden

L. Where Are Natural Gas Vehicles Taking The Gas Industry?

Emerging Developments in Heavy Duty Natural Gas Engines ................................................................................................................................. 719
Patric Ouellette

Options For Natural Gas Vehicles In the UK Transport Roadmap ................................................................................................................................. 731
Robert Judd, Martin Brown

Biomethane As Vehicle Fuel – Showcasing the Swedish Development ........................................................................................................ 741
Jörgen Held

Biomethane + CNG Hybrid: A Reduction by More Than 80% of Greenhouse Gases Emissions Compared to Gasoline ................................................................................................................................. 753
Olivier Bordelanne

POSTER PRESENTATIONS

POSTER SESSION 1: BIO GASES, HYDROGEN, GREENHOUSE GASES, SMART GRIDS, OTHER GASES & NEW ENERGY TECHNOLOGIES

Optimisation of Biogas Production by Infrared Spectroscopy Based Process Control ........................................................................................................ 766
Dieter Wolf, Harald Von Canstein, Cathrin Schröder

Design, Operation and Maintenance of Local Biogas Networks ................................................................................................................................. 780
R. N. Van Eekelen, M. Wolters

Alternative Biomethane Analysis ................................................................................................................................................................................................. 797
M. J. T. Geurds, E. L. Huijzer, E. E. Hardi

Development of BaTiO3-based Catalyst for Tar Reforming ................................................................................................................................. 804
T. Haneeda, Y. Yokoi, T. Matsui

Biogrid – Biogas Supply Through a Special Distribution Grid and Adjustment of Residential Appliances .................................................................................................................................................. 814
E. E. Hardi, P. A. Beumers, M. J. T. Geurds

Conversion to Biogas-fueled Rotary Engine ................................................................................................................................................................. 823
Kunio Kitano, Naoto Imada, Kiyoshi Soh, Kouji Tanaka
The Use of Biogas Generated from Swine Manure As a Preliminary Agent in the Viabilization of Biogas Pipeline Construction ................................................................. 835
Antonio Rogério Machado Jr.

Extended Options for the Conditioning of Processed Fermentation Gas Using Liquefied Petroleum Gas (LPG) .......................................................... 844
J. Senner, J. Leicher, F. Burmeister, M. Götz, K. Görner

Developing a Burner System for Low Calorific Gases in Micro Gas Turbines: An Application for Small Scale Decentralized Heat and Power Generation ........................................ 855
J. Leicher, A. Giese, K. Görner, V. Scherer, T. Schulze

Possibilities for Admixing Gasification Gases: Combustion Aspects in Domestic Natural Gas Appliances in the Netherlands .................................................. 865
V. M. Van Essen, H. De Fries, H. B. Levitsky

Large Scale Production of Bio-methane from Woody Biomass ........................................ 880
Christiaan Van Der Meijden, Luc Raibou, Bram Van Der Drift, Berend Vreugdenhil, Ruben Smit

Biomethane Gas Grid Injection Case Study ........................................................................ 896
Nuno Afonso Moreira

Two-stage Pressurized Anaerobic Digestion – An Invention to Foster Biogas Injection Into a Natural Gas Grid ........................................................................ 903
A.-M. Wonneberger, F. Graf, A. Lemmer, R. Reimert

Ringkoebing-Skjern biogasproject .................................................................................. 916
Carsten Rudmose

A Biomass Energy System by Dry Anaerobic Digestion for Urban Areas in Japan ......................................................................................................................... 927
T. Takahashi, N. Osaksa, H. Hosono, T. Hasegawa, T. Fujiwara

Biomass Gasification with a Fast Internal Circulating Fluidized Bed – Parametric Study Based on a 0D-model Using the Experimental Design Approach ........................................ 938
M. Bessieres, Y. Kura, G. Peureux, B. Marchand, M. Perrin

Vegaz Project - Towards a Green Natural Gas Efficient Pathway Through Biomass Gasification and Methanation ................................................................. 951

Dutch Gas Distribution Grid Goes Green: Decision Support Tool for Local Biogas Utilization ........................................................................................................ 975
T. D. Weidenau

Technology of Electronic GHG Emission Inventory for Gas-Producing Companies ................................................................................................................................. 997
O. Andreev, A. Arabsky, O. Maklyuk, G. Akopova, N. Kruglova, P. Mironov

Gasmunie’s Experiences with Leak Detection and Repair as a Part of Footprint Reduction .................................................................................................................. 1007
M. Bekker

Towards a Social Life Cycle Assessment of the Natural Gas Chain ........................................ 1027
P. Pacitto, A. Prieur-Vernat, M. Mimouitchin, V. Bichler

Understanding Methane Emissions Sources and Viable Mitigation Measures in the Natural Gas Transmission Systems: Russian and U.S. Experience ........................................................................ 1038

LNG Cold Energy Supply for CO2 Reduction and Energy Conservation in Mitsui Chemicals Ethylene Plant ........................................................................ 1058
Yuudai Kanohe, H. Kurokawa, H. Yukabe, T. Tokumoto

Greenhouse Gas Sequestration by a Novel Microbubble Injection Technology in Saline Aquifers ........................................................................................................ 1074
Susanu Nisho, Hiromichi Kameyama, Koji Yoshizaki, Tatsuya Yamada, Ziqiu Xue

Assessment of the Life Cycle of Nitrogen and Carbon Compounds Emitted in the Arctic: The Example of Natural Gas Fields of Gazprom Dobycha Yamburg ........................................................................................................ 1087
O. P. Andreev, A. K. Arabsky, V. N. Bashkin, I. V. Prutipina, P. A. Barsukov

The First Hythane® Refueling Station in France: A Successful Demonstration ........................................ 1105
Isabelle Alliat

NOx Emission Reduction in Hydrogen Combustion .................................................................. 1111
S. Igawa, T. Matsui, A. Seo

Demonstration Study of a 70MPA Hydorgen Refueling Station ................................................. 1126
Hisatoshii Ito, Mikio Nakagawa, Takuro Hugino, Masakazu Moriioki, Koji Okada, Yoshito Umeda

Highly Efficient Hydrogen Production System with Membrane Reformer for Hydrogen Refueling Station .................................................................................. 1140
Yuudai Kanohe, H. Kurokawa, H. Yukabe, T. Tokumoto
Perspectives of Using New Energy Sources Based on Methane-Hydrogen Fuel

Pilot Project on Hydrogen Injection in Natural Gas on Island of Ameland in the Netherlands
M. J. Kippers, J. C. De Luat, R. J. M. Herkmans, J. J. Overdiep, A. Van Der Molen, W. C. Van Erp, A. Van Der Meer

Development of Compact and Efficient Hydrogen Production Module with Membrane on Catalyst

Computational Fluid Dynamics Analysis for Designing Hydrogen Production System
Y. Nakagawa, T. Tominaga, T. Kume, T. Iseki, M. Tamura, H. Yakabe

Production of Methane from Hydrogen and Captured CO₂
Hiromichi Kameyama, Hiroshi Kaneko, Takahide Haneda, Koji Yoshizaki

Estimation of Potential Demand of “Networked Area Energy Use” in Yokohama City
Takao Ogata, Yousuke Watanabe, Takao Shinji, Satoru Sadohara, Satoshi Yoshida, Jindan Cui

Alternatives to Electricity for Transmission and Lowcost Firming Storage of Large-scale Stranded Renewable Energy As Pipelined Hydrogen and Ammonia Carbon-free Fuels
William C. Leighty, John H. Holbrook

Bottom-up Model for Local Gas and Electricity Interactions with Hybrid Technologies
C. Vuillecard

Power Storage in Smart Natural Gas Grids: Fiction Or Fact?
Gerald Linke

Storage of Volatile Renewable Energy in the Gas Grid Applying 3-phase Methanation
M. Götz, R. Reimert, D. Buchholz, S. Bajohr

POSTER SESSION 2: DISTRIBUTION, STORAGE, TRANSPORT

Innovative Technologies to Detect and Measure Leaks
Timothy G. Brown

The Gas Smell: A Study of the Public Perception of Gas Odorants
F. Cagnon, A. Louvat, V. Vasseur

Introduction and Development of Trenchless Technology to Reduce the Environmental Impact of Gas Construction Work
Takaya Hayashi

Neo Joint, Fitting to Use for the Connection of the Flexible Pipe Which Has Strong Seal Performance
Yousuke Ueda, Taketoshi Higashino

Development of Ubiquitous Metering System (New Wireless Communication Device for Smart Metering)
J. Ichimura

The Hot Branching Technique Without Shut-off Device for Steel Pipe and Ductile Iron Pipe
Takeo Kawamura, Hiroyuki Wada

Failure of Field Joint Coating under Soil Stress
Younggeun Kim

Development of Industrial Ultrasonic Meter for Custody Transfer
Mitsunori Komaki, Kazuya Fujisawa, Takeshi Shinga, Noriaki Saito

Development of the “Gray-Buster-Advance Lining” Method for Renovation of Gray Cast-iron Pipes
Minoru Konno

Effect of Heat Treatment on Preventing Hydrogen Cracking in Joining Procedure of Fitting to Pipeline in Hot Tapping
Ebrahim Mohseni Homagerani, A. Mohseni Homagerani, A. Tavakoli, G. Kamyab

Development of Protective Sheet for PE Pipes
O. Nomiyama

Development of a Reuse Method for Gas Meter Components
Yoshinori Ozawa, Takafumi Kawaguchi

Flexible Asset Management for the Transition to Multigas Networks
P. M. Herder, K. Pulles

Yann Belec, Benoit Guyot, Jean-Yves Pollard, Philippe Ray

Gas Quality Tracking in Distribution Grids
Peter Schley, Joachim Schenk, Andreas Hielsher

Development of the “Advanced Live Joint Seal Construction Method”
T. Shindo

</table>
Development of Finite Element Based Defect Assessment Method for Gas Pipelines Subject to Operating Condition Changes

Woosik Kim, Jongsung Baek, Yunjae Kim

Direct Assessment Techniques for Integrity Management of Underground Petroleum Pipelines

Angel R. Kowalski, John A. Beavers

Evaluation of Predictive Assessment Reliability on Corroded Transmission Pipelines

M. Lecchi

First Steps in Developing an Automated Aerial Surveillance Approach

G. Pognonec

Assessing the Reliability of Pressure-reducing Stations As Part of the GRTgaz Investment Prioritisation Strategy

Benoit Guyot, Denis Faure, Yann Belec

Dynamic Modelling of the Reliability and Availability of Complex Installations of Natural Gas Transmission Networks Application to a Blending Station

Benoit Guyot, Arnaud Vandycke, Patrice Dubourg, Odile Mozar, Anne Leprince

New Tools for In-situ Checking of Gas Flow Meters

Henk Riezebos, Gert Van Essen, Jan Mulder, Martijn Doowes, Henk Top, Jeroen Zijlstra

Development of a Measuring and Analysis System for Gas Pipelines Under Cathodic Protection

M. Sawai

Detailed Experimental Database of Dent & Gouge Defects to Qualify Burst and Fatigue Strength Models

M. Zaréa, R. Batisse, B. Leis, P. Cardin

POSTER SESSION 3: COMMERCIAL UTILISATION, GAS FOR MOBILITY, INDUSTRIAL UTILISATION , RESIDENTIAL UTILISATION

Thermal Environment and Conservation in a Commercial Kitchen with “SUZUCYU” Low Radiation Cooking Appliance

Kazushiro Hirota, Koichi Nishikawa, Fumikazu Kase, Toshiaki Omori, Kenichi Yamamoto, Megumu Ichikawa, Takahiro Koyama, Daisuke Kawai, Toru Hiroyama, Shuichi Aoki

Development of PAFC System with CO2 Separation

T. Isshiki, H. Kameyama, K. Yoshizaki, K. Kubota, H. Yoshioka

Environmental Optimisation of Natural Gas Fired Engines

Torben Kvist, Lise M. Frohn, Lars Jørgensen

High-performance, High-efficiency GHP Development

Satoshi Niigawa, Takashi Murakami, Toshinari Sakai, Eiji Morita, Hiroshi Kanai, Yasuhiro Kakutani

Added Value Enhancement for 1,000KW-class CHP System

Masaki Ogawa, Yasushige Nakatsukasa, Junichi Fujita, Shunsaku Nakai, Hiroyuki Kawakami, Masataki Shiraishi, Yasuke Kitamura

Spread of GHP and Future Development

Toshinari Sakai, Takashi Murakami, Satoshi Niigawa

Approach to Energy Conservation by Introducing Highly Effective Equipment for Commercial Kitchen

S. Sogo, K. Nishikawa, M. Yasuda, T. Furushashi

Gas Driven Cogeneration Network Systems As Impetus for an Intelligent and Dynamic Grid and the Development of Renewable Energies

Stefan Storace, Gerhard Schmitz

The Effect of Various Surface Conditions on Corrosion Resistance of Absorption Refrigeration Regenerators

Hidefumi Yamanaka, Hidemasa Nonaka

Partial Oxidation of Natural Gas to Produce a Carburizing Atmosphere for Surface Treatment of Steel

J. De Azevedo

Red Pottery - Innovation is the Key to a Sustainable Future

W. Lehmkühl

Development of HCCI Natural Gas Engines

Replacement of Electric Power by Natural Gas in the Manufacture of Rigid Pipes

A. Ferraz

Substitution of Electricity by Natural Gas in Textile Stamping Machines: A New Technology

Introducing Flameless Oxidation Into the Glass Industry ................................................................. 2110
  J. Leicher, A. Giese, K. Görner

A New Experimentally Tested Method to Classify Gaseous Fuels for Knock Resistance Based on the
Chemical and Physical Properties of the Gas..................................................................................... 2120
  S. Gersen, M. H. Rotink, G. H. J. Van Dijk, H. B. Levinsky

The Combustion Behaviour of Forged-draught Industrial Burners When Fired Within the EASEE-
Gas Range of Wobbe Index................................................................................................................... 2137
  B. K. Slim, H. D. Daramevil, S. Gersen, H. B. Levinsky

An Experimental and Numerical Investigation of Premixed Flame Propagation in Confined/Semi-
confined Explosion Chamber............................................................................................................. 2146
  Hibiki Ryuzaki, R. Tominaga

Development of 1MW High Efficiency Gas Engine Co-generation System ........................................ 2161
  H. Saito, K. Horimoto, T. Noguchi, M. Takamatsu

The Effects of Fuel Composition on a Medium-sized Gas Engine ..................................................... 2176
  Yuki Sato, Shunsuke Somezawa

Optimization of Combustion in Gas Turbines by Applying Resonant Turbulence ................................ 2186
  A. A. Verbeek, G. G. M. Stoffels, R. J. M. Bastiaans, Th. H. Van Der Meer

Innovative Flameless Regenerative Burners for Direct Fired Furnaces of Hot Dip Galvanizing Lines -
Up to 15% Lines Productivity Increase .............................................................................................. 2197
  Clotilde Villermaux, Nicolas Richard, Thierry Bellin-Croyat, Guillaume Daill, Philippe Buchet, Karen Beaujard,
  Armand Danda, Bertrand Louis, Hubert Saint-Raymond

Energy Savings for Spray Dryers in the Dairy Industry ...................................................................... 2214
  M. Toquard

Development of Regenerative Radiant Tube Burners for Heat Treatment Furnaces ............................. 2224
  Masataka Yabushita, Shinpei Miura, Minoru Ito, Yoshihiro Nakamura

Development of the Industrial Self Regenerative Combustion System .............................................. 2239
  Hyunseok Yu, Hyunchan Lee, Seongho Hong, Sanggeun Dong, Jehok Yang

The Development of Safety Sensor Equipped Gas Stoves ................................................................. 2252
  Satoshi Azumi, Kazuki Shouda, Yoko Saso, Asuka Ito

LCA Applied to the Restoration of a Building in Bayonne ................................................................. 2269
  P. Pacitto, V. Bichter

Power-generating Heating System for a Single-family House, the CHP Micro-unit as a Sustainable
Alternative to the Condensing Boiler ................................................................................................. 2282
  Jörg Hartan, Ingo Gatske, Marek Preißner

Ceramic Fuel Cells Ltd Residential Generator Bluegen: Ultra-efficient Distributed Power Generation
in Smart Grid Environment.................................................................................................................. 2296
  G. Fujimoto, H. Shinozaki, Y. Nakamura, H. Kashio

Development of New Simulation Method That Considers Electricity and Heat Demand Distribution
for Performance Evaluation of Residential Fuel Cells ...................................................................... 2308
  Naoto Imada, Kunito Kitano, Kiyoshi Soh, Kouji Tanaka

R&D of the Gas Engine Heat Pump Water Heater ............................................................................. 2325
  M. Toquard, H. Shinzaki, Y. Nakamura, H. Kashio

Commercialization of Residential PEFC Cogeneration System ...................................................... 2339
  Yusuke Ito, Katsuomi Otsuka

A Study on the Economic Evaluation and the Analysis of MCFC Power Generation Under RPS
System ............................................................................................................................................... 2349
  Sanghee Jeon, Dalryung Park, Seongho Hong

Noise Prediction Simulation and Noise Reduction Technology at Low-frequencies ................................ 2361
  Ken Kanecuchi, Koichi Nishimura

Development and Field Test of Residential SOFC Co-generation System with All-Ceramics-
Segmented Cells ............................................................................................................................... 2373
  Y. Kawabata, T. Seyama, T. Sobue

Development of the Plastic Panel Radiator, "Clear Warm" .................................................................. 2384
  D. Kawamata

Development of a SOFC System for Small-scale Commercial Use .................................................... 2396
  Akira Matsui, Seigo Kurachi, Koichi Katsurayama, Eiji Tohma

Energy-Saving Design for Small and Mid-sized Buildings – The Case of Y Building ........................ 2405
  S. Nakajima

PEM Power Generation Under High-temperature Conditions: Experiments and Simulations ............. 2413
  Masahiko Narita, Yusuke Ogura, Yukio Kimura, Eiji Tohma
Hierarchical Needs Analysis for Effective Gas Marketing: Lifestyle of the “Twenties” – What Do People in Their Twenties Value in Home Life Today? ................................................................. 2423
  M. Ogiwara, C. Nakatsuka, Y. Kimura

  P. Nitschke-Konsky, W. Wefling

Influence of Building Insulation Performance and Heating Systems on Thermal Comfort and Energy ................................................................. 2462
  T. Omori, S. Tanabe

Natural Gas and Renewable Energy Sources: Combined Solutions for Current and Future Low Consumption Dwellings ................................................................. 2474
  Aurélien Alfairé

Opportunities Development for Micro-cogeneration in France - The Point of View of GDF SUEZ ................................................................. 2486
  Régis Contreau, Stéphane Hody

Status and Market Opportunities of Solid Oxide Fuel Cells Based Cogeneration Systems ................................................................. 2490
  O. Posdziech, B. E. Mai, C. Wunderlich, S. Voss

Volume 4

Natural Gas and Heat Pumps: Recent Developments for Individual Housing ................. 2507
  J. Promelle, D. Dupuis, P. Robinet

Effect of Cyclohexene on the Performance of PEFC ................................................................................................................................. 2525
  Kaori Saigusa, H. Kameda, Y. Yokoi

Development of "SOLAMO" Gas Hot Water System with Combined Use of Solar Heat ................................................................. 2537

GASQUAL Project: A Step Closer to Gas Quality Harmonization in Europe ................................................................. 2553
  Jean Schweitzer, F. Cagnon

Practical Development of Tubular Flames ................................................................................................................................. 2564
  Yoshuke Shiraga, Akeshi Kegasa

Project to Establish Heat Recovery-type Gas Hot-water Heaters As the De Fact Standard ................................................................. 2573
  Akinori Suzuki, Keisuke Okubi, Yasuo Koketsu, Tatsuya Matsumoto, Tadao Kawasaki

Development of Residential Gas Engine CHP System Optimized for Cold Regions and Its Evaluation on Environmental Performance ................................................................. 2586
  Kiyotaka Takeda, Ryuichiro Goto, Satoshi Suzuki, Hiroshi Kamiya, Yasushiro Hamada

New ECOWILL - A New Generation Gas Engine Micro-CHP ................................................................................................................................. 2597
  Hiroki Tanaka, Akinori Suzuki, Katsuya Yamamoto, Itaru Yamamoto, Masahiro Yoshimura, Kazuhito Togawa

Introduction of Micro Combined Heat and Power Generation Unit for Residential Use in Germany ................................................................. 2610
  Michael Thiem, Masanori Takeishi, Kazuya Miwa

Residential Gas Utilisation the Current Technical Status of MCHP and Its Future Application Variety ................................................................................................................................. 2626
  Leonie Toffel

Technical Development of High Efficiency and Added Value for 35kW Micro CHP Systems ................................................................................................................................. 2640
  Toshiyuki Hayashi, Syouhei Amakawa, Keisuke Kawakita, Kenichi Fukuda, Hiroaki Ishida, Shunsaku Nakai, Junichi Fujita

MCHP & Fuel Cells ................................................................................................................................................................................................. 2652
  Martin Wilmsmann

Minimisation of Pressure Loss by Optimising the CO Removal Stage in PEM Fuel Cell Heating Appliances ................................................................................................................................................................................................. 2669
  Markus Wolf, Gregor Worringer, Rainer Reimert

Downsizing Gas Engine Micro-CHP’s for the Japanese Housing Market ................................................................................................................................................................................................. 2679
  M. Yagi

POSTER SESSION 4: EXPLORATION, PRODUCTION, LNG, PROCESSING, CCS

CCTS (Carbon Capture Transportation & Storage) Transportation Issues ................................................................................................................................. 2690
  Carlo Maria Spinelli, Antonio Lucci

Safety and Pipe Integrity: From Natural Gas to CO2 Transport by Pipes ................................................................................................................................. 2704

A New Model Considering Nonlinear Flow in the Low-permeability Fractured Gas Reservoir .................................................................................................................. 3176
Yuanhe Su

Application of Dynamic Simulation for Liquefied Natural Gas (LNG) Plant Debottlenecking .................................................................................................................. 3182
Siti Rafidah Moslim

WORKSHOPS

WORKSHOP 1: DOES CCS HAVE ANY FUTURE IN THE GAS INDUSTRY?

Does CCS Have Any Future in The Gas Industry? CO₂ Transport ................................................................................................................................. 3183
Carlo Spinelli

Rotterdam Opslag en Afvang Demonstratieproject (ROAD) .................................................................................................................................................. 3188
O. J. Tillema

Carbon Capture and Storage: A Developer’s Perspective ................................................................................................................................. 3198
Lewis Jeffery

CCS in Japan: R&D, Policy, and Prospects ................................................................................................................................. 3203
Kenji Yamaji

WORKSHOP 2: IS THERE A ROLE FOR NATURAL GAS IN SMART ENERGY GRIDS?

Natural Gas in a Smart Energy Future .................................................................................................................................................. 3206
Eddie Johnston

The Role of Natural Gas in Smart Grids .................................................................................................................................................. 3216
Frits W. Blik

Smart Energy Networks: Natural Gas Taking Its Share Towards a Low Carbon Society ........................................................................................................... 3219
Shinichi Sasayama

Smart Grid and Gas Industry in Korea .................................................................................................................................................. 3222
Yeoungjin Chae

Smart Grids: A Big Illusion or an i-Evolution .................................................................................................................................................. 3229
Martin Seifert

WORKSHOP 3: WHAT IS THE FUTURE OF LNG?

What Is the Future of LNG? .................................................................................................................................................. 3240
Hiroshi Hashimoto
Natural Gas Liquefaction Technology for Land Based and Floating LNG Facilities .................................................. 3245
  Heinz C. Bauer

Safety in LNG and Floating LNG Facilities ................................................................................................................... 3254
  Rob Klein Nagelvoort

Gas to Liquids: An Alternative Solution for Natural Gas Monetization ................................................................. 3259
  Daniel Colalillo, Cesare Panzieri

WORKSHOP 4: WHAT WILL BE THE PICTURE IN 2030: ZERO GAS OR ZERO CARBON GAS?

Medium-Term Oil & Gas Markets 2011 ........................................................................................................................... 3266
  Anne-Sophie Corbeau

The Role of NG as an Enabler for Energy System Transformation in Germany: Results of a Short
Study Commissioned by Greenpeace Germany e.V. ........................................................................................................ 3270
  Dietmar Schüwer, Manfred Fischedick

What Are the Measures to be Implemented to Attain the CO2 Reduction Target? ................................................... 3284
  Junichi Fujino

100% Renewable Energy Supply by 2050: Shale Gas and the Global Carbon Budget .................................................. 3288
  Rafael Senga

WORKSHOP 5: KEEPING GAS IN THE BUILDINGS OF TOMORROW: WILL CODES AND STANDARDS KILL GAS?

Housing/Building Efficiency Standard and Energy Supply in Japan ............................................................................... 3292
  Takashi Akimoto

The Impact of Energy Efficiency Codes and Standards on the Natural Gas Market in the United
States ........................................................................................................................................................................... 3300
  Jim Ranfone

Canadian Standards – A Balancing Act ........................................................................................................................... 3308
  John Overall

WORKSHOP 6: CAN R&D BE A MAGNET FOR NEW TALENT IN THE GAS INDUSTRY?

Nurturing the Future Generations: Key Findings of IGU Task Force 2 Study .......................................................... 3312
  Soh Mey Lee

Global KOGAS, Our Vision, Strategy and Performance ............................................................................................... 3330
  Seung Seop Shin
