2012 12th International Conference on Quality Software

(QSIC 2012)

Xi’an, Shaanxi, China
27 – 29 August 2012
2012 12th International Conference on Quality Software

QSIC 2012

Table of Contents

Message from the QSIC 2012 General Chair ................................................................. x
Message from the QSIC 2012 Program Chairs .............................................................. xi
Message from the QSIC 2012 Industry Track Chairs ................................................... xii
Message from the Workshop on Embedded System Software Development and Quality Assurance (WESQA) Chairs ....................................................... xiii
QSIC 2012 Conference Committees ............................................................................ xiv
QSIC 2012 Program Committee ................................................................................ xv
QSIC 2012 Software Quality in Practice
Industry Track Program Committee ............................................................................. xvii
QSIC 2012 Additional Reviewers ................................................................................ xviii
Keynote Speakers ........................................................................................................ xix

Research Track

Fault Localization and Prediction
Leveraging Method Call Anomalies to Improve the Effectiveness of Spectrum-Based Fault Localization Techniques for Object-Oriented Programs ................................................................................................. 1

Jingxuan Tu, Lin Chen, Yuming Zhou, Jianjun Zhao, and Baowen Xu

Fault Localization for Null Pointer Exception Based on Stack Trace and Program Slicing ......................................................................................................................... 9

Shujuan Jiang, Wei Li, Haiyang Li, Yanmei Zhang, Hongchang Zhang, and Yingqi Liu
Compressed C4.5 Models for Software Defect Prediction ..................................................13
   Jun Wang, Beijun Shen, and Yuting Chen

Toward Effectively Locating Integration-Level Faults in BPEL Programs ..........................17
   Chang-ai Sun, Yimeng Zhai, Yan Shang, and Zhenyu Zhang

**Constraint-Based Testing and Analysis**

Efficient Refinement Checking for Model-Based Mutation Testing ..................................21
   Bernhard K. Aichernig and Elisabeth Jöbstl

Function Substitution: Towards Constraint Solving in Software Testing ..........................31
   Xin Feng, Simon Marr, Tony O'Callaghan, Zhi Quan Zhou, and Jacques Carette

Reducing the Size of Dynamic Slicing with Constraint Solving .......................................41
   Birgit Hofer and Franz Wotawa

**Passive and Metamorphic Testing**

An IOSTS Based Passive Testing Approach for the Validation of Data-Centric
Protocols ...............................................................................................................................49
   Pramila Mouttappa, Stephane Maag, and Ana Cavalli

A New Method for Constructing Metamorphic Relations ................................................59
   Huai Liu, Xuan Liu, and Tsong Yueh Chen

Passive Testing of Timed Systems with Timeouts .............................................................69
   Mercedes G. Merayo

**Software Testing**

Automated Discovery of Valid Test Strings from the Web Using Dynamic
Regular Expressions Collation and Natural Language Processing ......................................79
   Muzammil Shahbaz, Phil McMinn, and Mark Stevenson

3-Way GUI Test Cases Generation Based on Event-Wise Partitioning ............................89
   Jing Feng, Bei-Bei Yin, Kai-Yuan Cai, and Zhong-Xing Yu

Generating Test Data for Structural Testing Based on Ant Colony Optimization ................98
   Chengying Mao, Xinxin Yu, Jifu Chen, and Jinfu Chen

Improved Delta Debugging Based on Combinatorial Testing ........................................102
   Jie Li, Changhai Nie, and Yu Lei
Reliability Prediction and Analysis of Component-Based Systems and Architectures

Reliability Prediction for Component-Based Systems: Incorporating Error Propagation Analysis and Different Execution Models .......................................................... 106
  Thanh-Trung Pham and Xavier Défago

On Reliability Analysis for Embedded Systems with AADL Behavior Model ........................................ 116
  Chang Shaofeng, Dong Yunwei, and Zhang Fan

Emerald: An Automated Modeling and Verification Tool for Component-Based Real-Time Systems .......................................................... 120
  Yizhou Zhang, Hao Lin, and Guoqiang Li

Model-Based Specification and Analysis

Towards Formal Energy and Time Aware Behaviors in EAST-ADL: An MDE Approach .......................................................... 124
  Eun-Young Kang, Gilles Perrouin, and Pierre-Yves Schobbens

A Unified Modeling and Verifying Framework for Cyber Physical Systems ........................................ 128
  Xiaoxiang Zhai, Qiaoqiao Chen, Shunhui Ji, and Bixin Li

An Approach to Integrating Non-functional Requirements into UML Design Models Based on NFR-Specific Patterns .......................................................... 132
  Yi Liu, Zhiyi Ma, Rui Qiu, Hongjie Chen, and Weizhong Shao

Security Testing and Quality Models

  Weiguang Wang, Qingkai Zeng, and Aditya P. Mathur

Towards Risk–Driven Security Testing of Service Centric Systems ........................................ 140
  Philipp Zech, Michael Felderer, and Ruth Breu

Redefinition of Fault Classes in Logic Expressions .......................................................... 144
  T.K. Paul and M.F. Lau

A Mobile Software Quality Model .......................................................... 154
  Dominik Franke, Stefan Kowalewski, and Carsten Weise

Quality of Service-Oriented Applications

Preferential Refinements of Abstract State Machines for Service Mediators ........................................ 158
  Klaus-Dieter Schewe and Qing Wang

Qualitative Analysis of the Impact of SOA Patterns on Quality Attributes ........................................ 167
  Matthias Galster and Paris Avgeriou

International Workshop on Embedded System Software Development and Quality Assurance (WESQA)

WESQA—Session I

JSCloud: Toward Remote Execution of JavaScript Code on Handheld Devices ...........................................240
Winson Y.S. Li, Shangru Wu, W.K. Chan, and T.H. Tse

A Cyber-physical Energy System Architecture for Electric Vehicles Charging
Application ................................................................................................................................................246
Yongqi Ge, Yunwei Dong, and Hongbing Zhao

Design and Implementation of AADL Model Safety Assessment Tool ..................................................251
Hongbing Zhao, Deming Song, and Yunwei Dong

WESQA—Session II

An Integrated Development Environment to Support the Multi-core Embedded
Systems Development ..............................................................................................................................258
Chih-Hung Chang, Chih-Wei Lu, William C. Chu, Pao-Ann Hsiung, Nien-Lin Hsueh, Chorng-Shiuh Koong, and Chao-Tung Yang

A Component-Based Authoring Tool and Script Language for MPEG-4 ................................................265
Chorng-Shiuh Koong, Bo-Huan Lee, Yu-Hsiang Wang, Chih-Hung Chang, and William C. Chu

WESQA—Session III

A Program Transformation Framework for Multicore Software Reengineering ........................................270
Feng Chen, Hongji Yang, William Cheng-Chung Chu, and Baowen Xu

Fingertips Detection Algorithm Based on Skin Colour Filtering and Distance
Transformation ..........................................................................................................................................276
Yun Liao, Yuxiang Zhou, Hua Zhou, and Zhihong Liang

Tutorial Synopses

Strategic Management of Technical Debt: Tutorial Synopsis .................................................................282
Philippe Kruchten

Metamorphic Testing: Applications and Integration with Other Methods:
Tutorial Synopsis ....................................................................................................................................285
Tsong Yueh Chen, Fei-Ching Kuo, Dave Towey, and Zhi Quan Zhou

Structural Testing with PathCrawler: Tutorial Synopsis ....................................................................289
Nicky Williams and Nikolai Kosmatov

Author Index ............................................................................................................................................293
