# TABLE OF CONTENTS

Power Transmission in Great Britain - What Does the Future Hold? .......................................................... 1  
   A. Hiorns

Full-scale Tests of the AC Transmission System to Examine the New SPS Complexes ........................................... 4  
   A. Grobovoy, N. Bondareva, N. Borodina, D. Denisova, A. Germond, R. Cherkasov, M. La Scala, S. Bruno, M. De Benedictis

Effects of Instrument Transformers Location on Measured Impedance by Distance Relay in Presence of TCSC ................................................................................................................................. 9  
   S. Jamali, H. Shateri

Fault Location Techniques for One of the World’s Longest AC Interconnector Cables ........................................ 14  
   B. Howarth, M. Coates, L. Renforth

A Comparative Study of High Phase Order Transmission System with Three Phase Double Circuit Transmission System ........................................................................................................................................... 19  
   A.S. Pandya, R.B. Kelkar

HVDC Transmission - Opportunities and Challenges .............................................................................................. 24  
   B.R. Andersen

Latest Control and Protection Innovations Applied to the Basslink HVDC Interconnector ..................................... 30  
   M. Davies, A. Kolz, M. Kuhn, D. Monkhouse, J. Strauss

AC Harmonic Filters for Konti-skan 1 Refurbishment HVDC Project ........................................................................ 36  
   C. Zhan

Forced Commutation Circuit for HVDC Transmission ......................................................................................... 41  
   D. Jovcic

Control System Design for HVDC Systems Using Optimization-enabled Electromagnetic Transient Simulation .............................................................................................................................. 46  
   S. Filizadeh, A.M. Gole, D.A. Woodford, D.A. Irwin

HTS Cable and Its Anticipated Effects on Power Transmission Networks ............................................................... 50  
   A. Kalam, H. Al-Khalidi, D. Willen

Intelligent Control and Protection of Power System with IEPS-W ......................................................................... 54  
   M.T.O. Amanullah, A. Kalam, A. Zayegh

Usefulness of DC Power Flow for Active Power Flow Analysis with Flow Controlling Devices ................................. 58  
   D. Van Hertem, J. Verboomen, K. Parchala, R. Belmans, W.L. Kling

Applications of TNB-EGAT 300 MW HVDC Interconnection Transient Stability Functions ............................... 63  
   R.A. Rusli, S.B. Ismail, A.R. Davood, A. Noosuk

The Development of Super High Voltage Grid in China ........................................................................................... 69  
   Y. Song, X.P. Zhang

The Challenges of Offshore Power System Construction-bringing Power Successfully to Troll A, One of the Worlds Largest Oil and Gas Platform ............................................................... 74  
   L. Stendius, P. Jones

Fault Ride-through Capability Investigation of a Doubly-fed Induction Generator with an Additional Series-connected Voltage Source Converter ................................................................. 78  
   C. Zhan, C.D. Barker

Impact of a Passing Weather Front on Local & Region-wide Wind & Solar Generation Output ................................ 83  
   K. Mitchell, J. Ritz, M. Nagrial

Impact of GB Transmission Charging on Renewable Electricity Generation ....................................................... 87  

New Approach for Phase Shifter Transformer Allocation .................................................................................... 92  
   A.K. Kazerooni, H. Seifi, M.S. Sepasian, H. Haghighat

Gas Insulated Transmission Lines (GIL) with Spare Phase - New Concepts for Investment Reductions ................. 97  
   G. Schoffner, K. Oswald

First Major 275 kV XLPE Cable System in the UK ............................................................................................ 103  
   P. Cunningham, J. McPhillips, G. Williams

Integrated Modelling and Residue Method Based Tuning of PWM Based STATCOM for Suppressing Power System Oscillations ........................................................................................................... 108  
   N.M.M. Razali, R.N. Mukerjee, V.K. Ramachandaramurthy

Genetic Algorithm Based Optimization for Allocation of Static VAr Compensators .......................................... 113  
   A.A. Alabduljabbar, J.V. Milanovic

Basslink HVDC Interconnector - System Design Considerations ........................................................................... 119  
   T. Westerweller, J.J. Price
Transmission Line System Impedance Characteristics

Generators

The Use of Vacuum Interruption at Transmission Voltages

A Novel Concept for a Fault Current Limiter

Research on Isolated Diesel-wind Power System Equipped with Doubly Fed Induction Generator

New Generation Rapid-response Emergency Tower

AC or DC? Economics of Grid Connection Design for Offshore Wind Farms

Benefits and Control of STATCOM with Energy Storage in Wind Power Generation

Energy Supplies

On Effect of HVDC on Subsynchronous Damping

Multi-level Voltage Rejection VSC HVDC Transmission

A Power-electronics-based Transmission Line De-icing System

Anomalous Power Line Carrier Signal Propagation on the Monopolar Cahora Bassa HVDC Lines

Power System Stabiliser for a Generic DFIG-based Wind Turbine Controller

Voltage Stability of an HVDC System for a Large Offshore Wind Farm with DFIGs

Control of Voltage Source Converters with an Unbalanced Supply System

Wavelet-based Relay Agent for Isolating Faulty Sections in Distribution Grids with Distributed Generators

Performance Comparison of Fixed-speed and Doubly-fed Induction Generator Under Torsional Oscillations

Progress Report on the Investigations Into the Recycling of Existing HVAC Power Transmission

Circuits for Higher Power Transfers Using HVDC Technology

Power-frequency Control for VSC-HVDC During Island Operation

Commutation Failure in Single- and Multi-infeed HVDC Systems

Study of Overvoltages on ±800 kV UHVDC Transmission System

New Implosive Connector Technology for High Voltage Conductors

A New Technique for Setting Distance Protection and Fault Location by Measurement of Transmission Line System Impedance Characteristics

Use of Wide Area Monitoring, Protection and Control Systems to Supervise and Maintain Power System Stability

Comparison of Optimal Location of UPFC Applied to Linear and Non-linear Load Model

Southern Africa Can Contribute to Solving the Global Warming Problem with Its Huge Hydropower Potential

Offshore Wind Farm Based on Variable Frequency Mini-grids with Multiterminal DC Interconnection

Improved Power System Stability and Reliability Using Innovative Energy Storage Technologies

An Alternative Control Strategy for the Thyristor Based HVDC Interconnection of Renewable Energy Supplies

Benefits and Control of STATCOM with Energy Storage in Wind Power Generation

AC or DC? Economics of Grid Connection Design for Offshore Wind Farms

New Generation Rapid-response Emergency Tower

Research on Isolated Diesel-wind Power System Equipped with Doubly Fed Induction Generator

A Novel Concept for a Fault Current Limiter

The Use of Vacuum Interruption at Transmission Voltages
