2012 16th Workshop on Interaction between Compilers and Computer Architectures

(INTERACT 2012)

New Orleans, Louisiana, USA
25 February 2012
# Table of Contents

INTERACT 2012 Organization ................................................................................................................ vii

## Session: Compiler and Architecture Optimizations

Doubling the Number of Registers on ARM Processors ................................................................................. 1

*Hsu-Hung Chiang, Huang-Jia Cheng, and Yuan-Shin Hwang*

Enhancing LRU Replacement via Phantom Associativity ............................................................................... 9

*Min Feng, Chen Tian, and Rajiv Gupta*

MGC: Multiple Graph-Coloring for Non-Volatile Memory Based Hybrid Scratchpad Memory ...................... 17

*Qingan Li, Yingchao Zhao, Chun Jason Xue, and Yanxiang He*

## Session: Compiler and Runtime Optimizations

Understand and Categorize Dynamically Dead Instructions for Contemporary Architectures ..................... 25

*Marianne J. Jantz and Prasad A. Kulkarni*

Cooperative Heterogeneous Computing for Parallel Processing on CPU/GPU Hybrids .............................. 33

*Changmin Lee, Won W. Ro, and Jean-Luc Gaudiot*

Lazy Reference Counting for the Microgrid .................................................................................................. 41

*Raphael Poss, Clemens Grelck, Stephan Herhut, and Sven-Bodo Scholz*

## Author Index

........................................................................................................................................... 49
