9th International Conference on Condition Monitoring and Machinery Failure Prevention Technologies 2012

(CM 2012 AND MFPT 2012)

London, United Kingdom
12-14 June 2012

Volume 1 of 2

ISBN: 978-1-62276-433-4
# TABLE OF CONTENTS

Volume 1

## 1A: WIND TURBINE CONDITION MONITORING METHODS AND STRATEGIES

**Development and Demonstration of a Novel Integrated Condition Monitoring System for Wind Turbines**
- M. Ph. Papaelias

**On Development of a Test Rig for Research & Education in Condition Monitoring Technology**
- Surendra N. (Suri) Ganeriwala

**On Development of a Test Rig for Research in Drivetrain Diagnostics/Prognostics**
- Surendra N. (Suri) Ganeriwala

**A Multi-Measurand Fibre-Optic Sensor System for Process and Health Monitoring of Fibre Reinforced Composites**
- Abilash K. Nair, Venkata R. Machavaram, Christophe Paget, Colin Barrow, Banshi D. Gupta, Gerard F. Fernando

**A Novel Predictive Maintenance Method for Wind Turbines Based On Wavelets Transforms**
- Raúl Ruiz De La Hermosa González-Carrato, Fausto Pedro García Márquez, Jesús María Pinar Pérez

## 1B: TRAINED STRUCTURES AND STATISTICAL METHODS IN CONDITION MONITORING

**Probabilistic Artifact Filtration Attached to Adaptive Testing of CM Personnel Professional Skills**
- Lev S. Kuravsky, Grigory A. Yuryev

**Application of Kurtosis in Vibration Time Histories Analysis**
- Tomasz Galka

**Decision Support System for Testing CM Personnel Professional Skills**
- L. S. Kuravsky, A. A. Margolis, G. A. Yuryev, P. A. Marmalyuk

**Interpretation of Measured Flow-Induced Vibration at a Nuclear Power Plant with RBMK**
- Vladislav D. Sizarev, M. F. Dimentberg

**Forecasting Fatigue Failures of Aircraft Structures with the Aid of Trained Multifactor Markov Networks**
- S. N. Baranov, L. S. Kuravsky

## 1C: VIBRO-ACOUSTICS

**Vibro-acoustic Measurement Methods in Condition Monitoring**
- Andy Moorhouse

**Combustion Analysis of a CI Engine with Biodiesel Blends based on Vibro-Acoustic Measurement**
- D. Zhen, T. Wang, F. Gu, V. T. Tran, A. D. Ball

**A Study on Transient Enhancement for Fault Diagnosis Based on an Active Noise Control System**
- X. Tian, F. Gu, D. Zhen, V. T. Tran, A. D. Ball

**Acoustic Condition Monitoring of Wind Turbines: Tip Faults**
- Bruno M. Fazenda, Daniel Combini

**Vibro-Acoustic Characteristic of A Self Aligning Spherical Journal Bearing due to Eccentric Bore Fault**
- P. Raharjo, S. Abdussalam, F. Gu, A. D. Ball

## 1D: ADVANCES IN MONITORING AND DIAGNOSTIC OF HEAVY MACHINERY WORKING UNDER VARYING LOAD

**Secondary Misalignment As the Main Cause of Gearbox Failure**
- Walter Bartelmus

**Modal Analysis in Diagnostics of Rotating Machinery**
- Jaroslaw Bednarek, Tomasz Barszcz

**Optimisation of State Definition for Wind Farms – Part 1. Development of Algorithms**
- Darek Broda, Adam Jablonski, Tomasz Barszcz
Procedure for Data Acquisition for Machinery Working Under Non-stationary Operational Conditions
Jablonski Adam, Barszcz Tomasz

Development of In-service Condition Monitoring System Using Combined Vibrational and Acoustic Emission Signature for Wind Turbine Gearbox and Generator Shaft
Slim Soua, Tat-Hean Gan

1E: EMAINTENANCE: INTEGRATION OF CM AND CMMS IN DSS

The Evolution from E(lectronic)maintenance to I(ntelligent)maintenance
Diego Galar, Karina Wandt, Ramin Karim, Luis Berge

Integration of Knowledge-based Information in Intelligent Condition Monitoring
Esko K. Juaso

An Environment for Efficient Design and Implementation of Condition Monitoring Systems for Mechanical Drives
Matic Ivanovic, Pavle Boškoski, Dani Juricic, Jože Vižintin

Design and Development of a Electric Vehicle Drive Train Test Bed
Michael Knowles, Dirk Kok, David Baglee, Adrian Morris

An I-Maintenance Solution for Condition Monitoring in Diesel Powered Marine Vessels
Michael Knowles, David Baglee, Alvaro Garcia, Eduardo Gilahert

2A: WIND TURBINE CONDITION MONITORING METHODS AND STRATEGIES

Analysis of Guided Wave Test Data to Detect Time-dependent Structural Degradation
Vichaar Dimlaye, Alex Haig, Peter Mudge

Condition Monitoring of Wind Turbine Brake Systems
M. Entezami, S. Hillmansen, P. Weston, M. Ph. Papaelias

Fault Identification and Analysis of Wind Turbines
Jesús María Pinar, Fausto Pedro García Márquez, Raúl Ruiz De La Hermosa González-Carrato, Mayorkinos Papaelias

2B: NANOMECHANICS – NEW FRONTIERS IN NONDESTRUCTIVE TESTING

Mechanical Behavior of Biomaterials as Studied by Nanoindentation and Atomic Force Microscopy
Sidney R. Cohen

Nanotribology and Lubrication Mechanism of Fullerene-like Nanoparticle Investigated Using In-situ HRTEM Nanocompression Tests
Fabrice Dassenoy, Imène Lahouij

Friction Mechanism of Individual Multilayered Nanoparticles
Ofer Tevet, Reshef Tenne

2C: EXPERIMENTAL AND VIRTUAL MODELS FOR MACHINES AND PLANTS DIAGNOSTICS

Theoretical and Experimental Investigation on Techniques for Controlling Brake Pads Damping
Aleramo Lucifredi, Paolo Silvestri, Fabio Denevi, Davide Rebora, Diego A. Santamaria Razo, Andrea Della Rovere

Theoretical and Experimental Investigation on Vibration Phenomena of the Interaction Between the Alternator and the Ferrari V8 Engine
A. Lucifredi, C. Manna, P. Silvestri, M. Ottvio

Theoretical and Experimental Investigation About the Dynamic Behavior of a Paper Cutting Machine
A. Lucifredi, P. Silvestri, S. Porcile

2D: ADVANCES IN MONITORING AND DIAGNOSTIC OF HEAVY MACHINERY WORKING UNDER VARYING LOAD

Dynamic Analysis of a Single Stage Bevel Gear Transmission in Presence of Geometrical Errors
Maha Karray, Fakher Chaari, Fernando Viadero Rueda, Alfonso Fernandez Del Rincon, Mohamed Haddar
Multidimensional Data Analysis for Condition Monitoring: Features Selection and Data Classification .......................... 344
Radoslaw Zimroz, Anna Bartkowiak

Modelling of Transmission Used in Wind Turbines .................................................................................................................. 356
Walter Bartelmus, Fakher Chaari, Radoslaw Zimroz, Tomasz Barszez, Mohamed Haddar

2E: EMAINTENANCE: INTEGRATION OF CM AND CMMS IN DSS

Roadmap for the Development and Realisation of I-maintenance in the Automotive Industry ........................................ 365
David Baglee, Michael J. Knowles

Feature Selection Algorithm for Machine Multi-Class Fault Assessment ............................................................................ 373
Aida Rezaei, Azzedine Dadouche, R. J. Anderson, M. G. Lipsett

Integration of Disparate Data Sources to Perform Maintenance Prognosis and Optimal Decision Making ................................................................. 386
Adriaan Van Horenbeek, Liliane Pintelon, Diego Galar

3A: WIND TURBINE CONDITION MONITORING METHODS AND STRATEGIES

Long-term High-frequency Vibration Spectral Monitoring for Wind Turbine Tower Structural Damage Detection .................................................................................. 398
Frederik Vermeulen, Mayorkinos Papaelias

S. C. Kerkyras, Y. C. Kerkyras, O. Fanagoliopoulos, V. Karakassidis, D. Lekou, M. Ph. Papaelias

Detection of Run-out of Electrical Machine/Generator Slip-rings Using Vibration Measurements and Nonlinear Frequency Analysis .................................................................................................................. 408
R. S. Bayma, Z. Q. Lang, L. Celniski

Detection of Shaft Cracks Using Vibration Signature Analysis .......................................................................................................................... 419
Surendra N. (Suri) Ganeriwala

3B: NOVEL SENSING/PROCESSING METHODS FOR EQUIPMENT HEALTH MONITORING

Use of Equipment Health Monitoring Information for Assessing Potential Exposure to Volcanic Events, ................................................................................................................................. 420
S. King, E. Erlund, R. Clarkson, A. Bird, S. Da Col

Neural Network Based Classification of Unbalances in Rotating Machinery .................................................................................................................. 435
Gopinadh Sirigineedi, Suresh Perinpanayagam, Ian K. Jennions

A Novel Condition Indicator Gearbox Diagnosis: Amplitude of Probability Density Function (APDF) .............................................................................. 444
P. J. Rzeszucinski, J. K. Sinha, R. Edwards, A. Starr, B. Allen

Unbalance Localisation using High-Fidelity Simulations .......................................................................................................................... 454
Ryan Walker, Suresh Perinpanayagam, Ian Jennions

3C: COHERENT MEASUREMENT TECHNIQUES AT THZ FREQUENCIES FOR NON-DESTRUCTIVE TESTING

Coherent Measurement Techniques at THz Frequencies for Non-Destructive Testing .......................................................... 470
Willem Jellema, Andrey Baryshev, Alena Belitskaya, Henk Van Der Linden, Gerard Cornet

Data Fusion in Interdependent Signal Systems via Orthogonal Projection ................................................................................................. 478
Pál Galicza

Adjoint Sensitivity in Electrical Impedance Tomography using COMSOL Multiphysics ...................................................................................... 490
Wouter Mulckhuyse, Domenico Lahaye, Alena Belitskaya

Theoretical and Experimental Investigation on the Vibro-acoustic Behavior of the Exhaust Pipe of the Piaggio P180 Aircraft .................................................................................................................. 502
A. Lucifredi, P. Silvestri, F. Bassi, D. Noceti
3D: CONDITION MONITORING OF ROTATING MACHINERY

Combining Discrepancy Analysis with Sensorless Signal Resampling for Condition Monitoring of Rotating Machines Under Fluctuating Operations

T. Heyns, P. S. Heyns, Radoslaw Zimroz

Research on Potential Errors in Measurement of Shaft Power Based on Phase Difference Method

Kun Yang, Xincong Zhou, Liyao Li, Xingping Yan, Songsong Liao, Xiang Zheng

Diagnostics and Prognostics Utilising Dynamic Bayesian Networks Applied to a Wind Turbine Gearbox

Charles E. Plumley, Graeme K. Wilson, Andrew D. Kenyon, Francis Quail, Athena Zitrou

3E: EMAINTENANCE: INTEGRATION OF CM AND CMMS IN DS

Context Adapted Prognostics and Diagnostics

Karina Wandt, Ramin Karim, Diego Galar

Cloud Computing for Maintenance of Railway Signalling Systems

Amparo Morant, Diego Galar, Jaime Tamarit

Condition Monitoring of Rolling Stock Using Wheel/Rail Forces

Mikael Palo, Håkan Schunnesson, Uday Kumar

4A: CONDITION BASED MONITORING – CONCEPTS FOR SUCCESS

Condition Based Monitoring – Concepts for Success

Thomas L. Lagö

Human Listening Tests in Production Lines

Thomas L. Lagö

Production Line Testing of Small Electrical Motors

Thomas L. Lagö

How to Properly Find Amplitude Values in CBM Applications

Thomas L. Lagö

4B: MODEL-BASED ANALYSIS FOR MONITORING AND DIAGNOSTICS OF EQUIPMENT IN TIME-VARYING SERVICE

Haul Truck Tire Condition Monitoring Using Optical Techniques

Amanda C. Kotchon, David S. Nobes, Michael G. Lipsett

Volume 2

Modeling the Crack Growth in a Pneumatic Tire under Time-Varying Loads

R. Vaghar-Anzahi, D. S. Nobes, M. G. Lipsett

Application of Continuous Wavelet Transform and Principal Component Analysis for Anomaly Detection in Mining Haul Truck Suspension Struts

M. Hajizadeh, M. G. Lipsett

Wear in a Slurry Pipeline under Time-Varying Conditions

M. G. Lipsett

4C: INTEGRATED SHM FOR REFINERY - SAFETY WHICH INCREASES PROFIT

Convergence of the Integrated Structural Health Monitoring and the RBI Strategies

Igor V. Razuvaev

Real-time AE Criteria in the Long-term Integrated Structural Health Monitoring of the Dangerous Plants

Igor V. Razuvaev, Eugeny A. Suchkov, Maria V. Zuikova

New AE Sensors for the Integrated SHM Systems Working Under Strong Low-frequency Noise

Igor V. Razuvaev
Diagnostic and Condition Monitoring Expert Systems ................................................................. 646
Anatoly A. Myntsov, Dmitri V. Sokolov, Olga V. Myntsova

4D: ADVANCED REASONING AND DIAGNOSIS IN CONDITION MONITORING

Intelligent Stress Indices in Fatigue Detection .............................................................................. 654
Esko Jausso, Salo Lahdelma

Sensorless Method for Detecting Surge in Variable-Speed-Driven Fan Systems ......................... 665
Jussi Tamminen, Jero Ahonen, Jero Ahola, Ahti Jaatinen, Pekka Ryytti

A Fault Detection Concept for Single Class Problems ................................................................. 675
Jens Strackeljan, Stefan Goreczka, Dietrich Behr

Comparison of One-class Classifiers for Condition Monitoring of Rolling Bearings in Non-stationary Operations ...................................................................................... 683
Stefan Goreczka, Jens Strackeljan

5A: CONDITION BASED MONITORING – CONCEPTS FOR SUCCESS

Robust Classification of Gearbox Faults by Means of Vibration Condition Monitoring and Evolutionary Optimisation of Kohonen’s Self-organising Maps ................................................. 696
Jay Nkuna, Thomas Lagö

Spectral Resolution Enhancement Using the MPCA Method, a Non-linear Approach .................. 697
Thomas L. Lagö

SVM Combined FTA Approach for On-line Reliability Estimation ............................................ 704
Jihong Yan, Ai Dong, Wanzhao Li

Update on ISO Standards in Condition Monitoring and Vibration .............................................. 705
Simon Mills

5B: METHODS OF VIBRATION BASED DIAGNOSTICS

Extreme Value Statistics for Vibration Spectra Outlier Detection ............................................... 736
Aurélien Hazan, Jérôme Lacaille, Kurosh Madani

Ball Bearing Model for Faults Simulation ..................................................................................... 745
Gidon Kogan, Jacob Bortman, Alex Kushnirsky, Renata Klein

Methods for Bearing Feature Extraction ....................................................................................... 753
Renata Klein, Eyal Masad, Itai Winkler

Structural Fault Detection Using Volterra Series and Multi-Tone Harmonic Probing .................... 765
Nalinaksh S. Vyas, Sharad Dwivedi

5C: INTEGRATED SHM FOR REFINERY - SAFETY WHICH INCREASES PROFIT

Development and Implementation of Integrated Structural Health Monitoring Systems on Russia Enterprises for Ensuring Safety Operation of Industrial Equipment and Buildings .................. 777
Stanislav Trutaev, Kiril Kaznetsov, Sergei Bykov, Boris Juraido, Valentina Trutaeva

Techniques and Applications of Terahertz Imaging ..................................................................... 781
Mira Naftaly

Remote Sensing and Vibration Testing Using Laser Doppler Vibrometry .................................... 782
Joe Armstrong

5D: ADVANCED REASONING AND DIAGNOSIS IN CONDITION MONITORING

Fusion of Production, Operation and Maintenance Data for Underground Mobile Mining Equipment ................................................................. 783
Anna Gustafson, Diego Galar, Håkan Schunnesson, Stephan Heyns

Mechanical Systems Fault Diagnosis in Variable Operating Conditions by Feature Modelling .......... 792
Gabrijel Persin, José Salgueiro, Jozef Vizintin, Dani Juricic

Advancement in Structural Health Monitoring of Wind Turbine Blades ....................................... 805
Olatunji R. Adewale, A. Desilva, U. I. K Galappaththi
Optimisation of Operational State Definition for Wind Farms – Part 2. Integration of Matlab Environment with Web-enabled Database System
Adam Jablonski, Tomasz Barszcz

A CUSUM-like Approach for Online Change-point Detection on Bus Door Systems
Nicolas Cheifetz, Allou Samé, Patrice Aknin, Emmanuel De Verdiere

7C: ADVANCED SIGNAL PROCESSING IN CONDITION MONITORING

Detecting Misalignment of a Claw Clutch Using Vibration Measurements
Sulo Lahdelma, Jouni Laurila

Detection of Bearing Faults in High Speed Rotor Systems
Jens Strackeljan, Stefan Goreczka, Tahsin Doguer

Practical Considerations on Selecting Assets for Condition Monitoring
Henry Mikkonen, Sulo Lahdelma

Vibration Analysis for Diagnosis Purposes of Mechanical Faults by Means of Optimal Bandpass Filters
Anton Urevc, Jurij Kern, Joze Vizintin

7D: REAL-TIME CONDITION MONITORING OF MACHINERY

Theoretical and Experimental Investigation About the Dynamic Behavior of a Paper Cutting Machine
A. Lucifredi, P. Silvestri, S. Porcile

Radiostatistical Method of Control of Substances in Conditions of Partial Uncertainty
Nikita Yu. Veshkurtsev, Yuri M. Veshkurtsev

Designing and Operation Experience of Real-time Monitoring Systems
Vladimir N. Kostyukov, Alexandr P. Naumenko

Real-time Condition Monitoring of Gear Pumps by the Recurrent Selection of the Noise and Periodic Components of Vibration
Vladimir N. Kostyukov

Totals of the Metal Magnetic Memory Method Development in Russia and Other Countries
Anatoliy A. Dubov

8A: CONDITION BASED MONITORING – CONCEPTS FOR SUCCESS

Steam Turbine Rotor/Stator Impact and Rubbing Detection
Jindrich Liska, Jan Jakl, Eduard Janecek

Advanced Signal Processing in Wireless Sensor Networks for MCM
Jan Neuzil, Ondrej Kreibich, Radislav Smid

Application of Wireless Sensor Networks in Condition Monitoring of Rotating Devices
Ondrej Kreibich, Jan Neuzil, Radislav Smid

Accuracy Monitoring of Opto-electronic Angle Measuring Systems
Vytas Gintautas, Mindaugas Rybokas, Gintaras Dmitrijiev

Acoustic Emission Analysis in the Early Stage of Heavy Duty Hydrodynamic/Hydrostatic Pod-Drive Bearing Development
H. T. Nguyen, S. Gold, J. Weber, A. Albers

8B: MODEL-BASED ANALYSIS FOR MONITORING AND DIAGNOSTICS OF EQUIPMENT IN TIME-VARYING SERVICE

Geometrical Acoustics Approximation for Rayleigh and Lamb Waves
Victor V. Krylov

Condition Monitoring of Rotor Using Multivariate EMD and Full Spectrum
Tejas H. Patel, Xiaomin Zhao, Ming J. Zuo

A System for Automated On-line Oil Analysis
José Salgueiro, Gabriel Peršin, Jožef Vizintin, Dani Juricic
8C: INTEGRATED SHM FOR REFINERY - SAFETY WHICH INCREASES PROFIT

Automated Diagnosis of Piston Slap in Engines ................................................................. 1145
Jian Chen, Robert Randall, Bart Peeters, Herman Van Der Auweraer, Wim Desmet

Effect of Guide-vanes Direction on a Blower Vibration for Boiler Utility - A Case Study-......................... 1156
Afshin Daghighi Asli, Amirreza Shamsdini

Surveying Compressor C-2501 Vibration Problem by Method Analysis of Vibration and Its Analytical Report ........................................................................................................ 1157
Hamidreza Minaeipour, Hamid Sarabeigi, Ehsan Heydari

Vibration Reduction of a LP Steam Turbine with Support Subsidence ........................................ 1166
Y.-S. Choi

Analyzing Imbalance In a 24 MW Steam Turbine ........................................................................ 1175
Afshin Daghighiasli, Vahid Rezaie, Leila Hayati

9A: GENERAL CONDITION MONITORING

Impact of Surface Finish and Target Size for Testing and Monitoring Using Cameras................................. 1183
Paul W. Waterfall, Matthew C. L. Read-Jennings, Fabio Scenini, Nick J. McCormick

Improve Availability and Reduce Maintenance Spend Whilst Maintaining Safety Using Asset Integrity Management and Risk Based Inspection ................................................................................................. 1195
Alexandra Knight, Mike Anderson, Martin Concannon

Troubles and Condition Monitoring of Korean Express Railway(KTX) .................................................. 1205
Y.-S. Choi

9C: CONDITION MONITORING OF ROTATING MACHINERY

The Analysis of the Bending at HP-IP Rotor of a 660MW Supercritical Steam Turbine Generator Unit .......................................................................................................................... 1206
Jingming Chen, Dongxiang Jiang, Junjie Zhang

Investigating the Causes of Failure Body of MV Electromotor in Centrifuge Equipment ........................................ 1214
Hamidreza Minaeipour, Hamid Sarabeigi, Ehsan Heydari, Farzad Sadaghiani

Modelling for Monitoring the Condition of Vibrating Machinery ..................................................... 1221
Vladimir D. Anakhin, Tomar V. Anakhin

ADDITIONAL PAPERS

The Way to Safety, Reliability and Growth .................................................................................. 1228
Cameron Sinclair

Magnetic Characterization of Neutron Irradiated Reactor Steel Material ........................................... 1230
G. Vértésy, I. Tomáš, F. Gillemot, R. Székely

The Effectiveness of Using Monitoring Systems of Technical Condition of Equipment .................. 1241
V. Panchikov, D. Kakovkin
