Workshop on Computational Approaches to Deception Detection 2012

Held at the 13th Conference of the European Chapter of the Association for Computational Linguistics (EACL 2012)

Avignon, France
23-27 April 2012

ISBN: 978-1-62276-473-0
# Table of Contents

**Linguistic Cues to Deception Assessed by Computer Programs: A Meta-Analysis**
Valerie Hauch, Iris Blandón-Gitlin, Jaume Masip and Siegfried Ludwig Sporer .......................... 1

**“I Don’t Know Where He is Not”: Does Deception Research yet Offer a Basis for Deception Detectives?**
Anna Vartapetianc and Lee Gillam ................................................................. 5

**Seeing through Deception: A Computational Approach to Deceit Detection in Written Communication**
Ángela Almela, Rafael Valencia-García and Pascual Cantos ................................. 15

**In Search of a Gold Standard in Studies of Deception**
Stephanie Gokhman, Jeff Hancock, Poornima Prabhu, Myle Ott and Claire Cardie ........ 23

**Building a Data Collection for Deception Research**
Eileen Fitzpatrick and Joan Bachenko ......................................................... 31

**On the Use of Homogenous Sets of Subjects in Deceptive Language Analysis**
Tommaso Fornaciari and Massimo Poesio ................................................. 39

**Invited Talk: Current and Future Needs for Deception Detection in a Government Screening Environment**
Daniel Baxter ................................................................. 48

**The Voice and Eye Gaze Behavior of an Imposter: Automated Interviewing and Detection for Rapid Screening at the Border**
Aaron Elkins, Douglas Derrick and Monica Gariup ........................................ 49

**Let’s Lie Together: Co-Presence Effects on Children’s Deceptive Skills**
Marc Swerts ................................................................. 55

**Argument Formation in the Reasoning Process: Toward a Generic Model of Deception Detection**
Deqing Li and Eugene Santos ................................................................. 63

**Pastiche Detection Based on Stopword Rankings. Exposing Impersonators of a Romanian Writer**
Liviu P. Dinu, Vlad Niculae and Maria-Octavia Sulea ........................................ 72

**Making the Subjective Objective? Computer-Assisted Quantification of Qualitative Content Cues to Deception**
Siegfried Ludwig Sporer ................................................................. 78

**Modelling Fixated Discourse in Chats with Cyberpedophiles**
Dasha Bogdanova, Paolo Rosso and Thamar Solorio ........................................ 86

**Detecting Stylistic Deception**
Patrick Juola ................................................................. 91

**Identification of Truth and Deception in Text: Application of Vector Space Model to Rhetorical Structure Theory**
Victoria L. Rubin and Tatiana Vashchilko ................................................ 97
