25th International Conference on Computer Applications in Industry and Engineering 2012

(CAINE-2012)

Held with the 4th International Symposium on Sensor Network and Application (SNA – 2012)

New Orleans, Louisiana, USA
14-16 November 2012

Editors:

Gongzhu Hu

ISBN: 978-1-62276-476-1
# Table of Contents

## COMPUTER NETWORKS, SECURITY, AND DISTRIBUTED SYSTEMS

- Deficit Round Robin Scheduling With Adaptive Weight Control  
  *Mikkel Hagen, Ryan Zarick, Radim Bartos* ................................................................. 1
- On Encryption without a Shared Key  
  *Phillip Nordwall, James Hearne, Joshua Stein* ............................................................ 7
- A Role-based Access Control Approach for SQL Injection Attacks  
  *Ying Jin, Tanvi Desai* ........................................................................................................ 11

## DATA MINING

- Towards Improving Multi-query Search Approaches  
  *Yong Shi, Marcus Judd* ........................................................................................................ 17
- Implementation of Genetic K-means Algorithm on Iterative MapReduce Framework for Gene Expression Data Clustering  
  *Yi Lu, Salahaldeen Taamneh, Jamin Ashley* ....................................................................... 23
- An Efficient Algorithm for Generating Composition Tables for Qualitative Spatial Relations  
  *Chaman L. Sabharwal, Jennifer L. Leopold* ....................................................................... 29

## WORKSHOP: INDUSTRIAL AND SERVICE MANAGEMENT & ENGINEERING I

- Microblog Analysis from the viewpoint of Social Sensor  
  *Suguru Isaji, Hidekazu Yanagimoto, Michifumi Yoshioka* .............................................. 35
- Text Mining of Securities Reports for Discovering Reason of Change  
  *Shin-ichiro Yoshida, Tetsuya Nakato, Shuichi Mitarai, Sachio Hirokawa* ......................... 41
- Ontology Design and Implementation for RFID services  
  *Yung-Cheol Byun, Min-Soo Kang, Sumi Helal* .................................................................. 47

## SOFTWARE ENGINEERING I

- GAIA Human Resources - An approach to integrate ITIL and Maturity Levels focused on improving the Human Resource Management in Software Development  
  *Flávio E. A. Horita, Rodolfo Miranda de Barros* ............................................................ 51
- GAIA Risks: A risk management framework  
  *Fernando H. Gaffo, Rodolfo Miranda de Barros* ............................................................... 57
- GaiaDoc: a Tool Focused on Business Requirements for Code Documentation  
  *Humberto Ferreira da Luz Jr., Rodolfo Miranda de Barros* ............................................ 63

## DISTRIBUTED SYSTEMS, SIGNAL PROCESSING, XML

- NMP-LTI System Identification Using Evolutionary Spectral Representation  
  *Abdullah I. Al-Shoshan* ....................................................................................................... 69
- Scheduling Modifications for Improvement Performance on a Beowulf Cluster Single-Node  
  *Damian Valles, David Williams, Patricia Nava* ............................................................... 75
- Using Cached Results to Expedite XML Query Evaluations  
  *Cheng Luo, Wen-Chi Hou, Shan He, Feng Yu* .................................................................. 81
# Vision, Visualization, and Algorithm

**Fusion of Stereo Vision and RFID for Site Safety**  
*Rana H. Raza, George C. Stockman* ......................................................... 87

**Uncertainty Analysis of Earthen Embankment Dams**  
*Mitchell L. Neilsen, Gregory J. Hanson, Darrel M. Temple* ............................................. 93

**Determining the Evolutionary Sequence of Versions of a Text with the Minimum Spanning Tree Algorithm**  
*Katia P. Mayfield, Emanuel S. Grant, Crystal Alberts* .................................................. 99

---

# Workshop: Industrial and Service Management & Engineering II

**Polarity Estimation of Tweets by Feature Sets**  
*Toshihiko Sakai, Kiyota Hashimoto, Yuya Kamisoyama, Makoto Okada, Sachio Hirokawa* ................. 105

**Development of Healthcare Agent System**  
*Micchio Yokoyama, Seung-Il Cho* ............................................................... 111

**Foxes and Chickens: An Android Game**  
*Justin R. Martinez, Wenbin Luo* ........................................................................ 115

---

# Bioinformatics, Biomedical Systems/Engineering

**Technologies for Personalized Healthcare**  
*Donna L. Hudson, Maurice E. Cohen* ...................................................................... 121

**ChiCanBank: A Chinese Cancer Tissue Bank Management System**  
*Kong Yan, Chengxue Dang, Huanmei Wu* ............................................................. 127

**MicroRNA regulatory network involved in impaired functionality in cardiomyocytes derived from human embryonic stem cells**  
*Jane Synnergren* .................................................................................................. 133

---

# Symposium: Sensor Networks

**New Approach for Predicting Channel Parameter in Cognitive Radio Network**  
*Mohamed G. Bingabr, Ali Manea, Sahar Abdultive, Nada Al-Moayad* ............................... 139

**Efficient Data Routing for Fusion in Wireless Sensor Networks**  
*Minh Nguyen, Qi Cheng* ......................................................................................... 145

**Environmental Effects on Target Tracking in Wireless Sensor Networks**  
*Youngwon Kim An, Seong-Moo Yoo, B. Earl Wells, Changhyuk An* ... 151

---

# Software Engineering II, Mobile Network

**Technical Debt Reduction Using a Game Theoretic Competitive Source Control Approach**  
*Sarah Morrison-Smith, Stephen Dighans, Talon Daniels, Chad Marmon, Clemente Izurieta* 157

**Description of Structured Data and Syntax Analysis Using Internal DSLs in Ruby**  
*Kazuaki Maeda* ...................................................................................................... 163

**Generating Minimum Connected Dominating Set in Mobile Ad Hoc Networks**  
*Mallikarjun Avula, Seong-Moo Yoo, Seungjin Park* .................................................... 169

---

# Symposium: Sensor Applications

**A Support Vector Machine Algorithm for Estimating Road Adhesion Coefficients in Vehicle Steering**  
*Shoutao Li, Xinglong Pei, Yongxue Ma, Lihua Tao, Gordon Lee* .................................... 175

**Sensor Network Based Parking Management System**  
*Nagarajan Prabakar, Jong-Hoon Kim, Uwe Cerron, S. Sitharama Iyengar* ..................... 181

**Classifier Fusion for Gesture Recognition using a Kinect Sensor**  
*Ye Gu, Qi Cheng, Weihua Sheng* ................................................................................ 187
Visualization, Web-Based Systems 305

Data Center Infrastructure Management and Automation Systems: an Evaluation Method

Mauro Faccioni Filho, Moacyr Franco Neto ................................................................. 305

Visualization of Multidimensional Bloom Filters: An analysis of Differing Bloom Filters and their Visual Representations

Jacob Schreiver, Kyle Underwood, Jeffrey L. Hieb, James Graham, Ahmed Desoky ..................................................... 311

A Comparison Study of Web Based Application Development Using PHP and Asp.Net

Morris M. Liaw, Abdul Mansoor Mohammed ............................................................... 317

Author Index 323
