2012 IEEE Symposium on Visual Languages and Human-Centric Computing

(VL/HCC 2012)

Innsbruck, Austria
30 September – 4 October 2012
Table of Contents

Foreword ................................................................. ix
Conference Committees ........................................... xi
Sponsors ................................................................. xiv

Keynotes
  Computational Thinking and Creative Practice ................. 3
    Alan Blackwell
  Some Thoughts on Executable Visual Languages and their Interfaces .... 4
    David Harel

Spreadsheets and Tables
  Planted-model evaluation of algorithms for identifying differences between spreadsheets . 7
    Anna Harutyunyan, Glencora Borradaile, Christopher Chambers and Christopher Scaf-fidi
  Design and Evaluation of a Literate Spreadsheet .................... 15
    Matthew Dinmore
  Extension and Implementation of ClassSheet Models .................... 19
    Jácime Cunha, João Paulo Fernandes, Jorge Mendes and João Saraiva
  Automating Data Entry for End Users ................................ 23
    Allen Cypher

Design and Notation
  The Shape of Empty Space: Human-Centred Cognitive Foundations in Computing for Spatial Design ............................................. 33
    Mehul Bhatt, Carl Schultz and Minqian Huang
  Using the “Physics” of Notations to Analyze a Visual Representation of Business Decision Modeling .................................................. 41
    John C. Thomas, Judah Diament, Jacquelyn Martino and Rachel K. E. Bellamy
  A Combination of Stroke Manipulation and Recognition Strategies to Support User Interface Construction and Interactive Behavior Definition through Sketching ........ 45
    Vinícius C. V. B. Segura and Simone D. J. Barbosa
  On the Impact of Layout Quality to Understanding UML Diagrams: Diagram Type and Expertise ......................................................... 49
    Harald Störrle
End Users: Mobile Devices and Programming

From Barriers to Learning in the Idea Garden: An Empirical Study .......................... 59
   Jill Cao, Irwin Kwan, Rachel White, Scott D. Fleming, Margaret Burnett and Christopher Scaffidi

wProjects: Data-centric Web Development for Female Nonprogrammers .................. 67
   Nicole L. Harshbarger and Mary Beth Rosson

An Exploratory Study of Blind Software Developers ............................................. 71
   Sean Mealin and Emerson Murphy-Hill

End-user programmers on the loose: A study of programming on the phone for the phone 75
   Balaji Athreya, Faezeh Bahmani, Alex Diede and Christopher Scaffidi

A Prototype for EUD in Touch-based Mobile Devices ........................................... 83
   José Danado and Fabio Paternò

Symbols and Notation

Informing the Design of Situated Glyphs for a Care Facility ............................... 89
   Jo Vermeulen, Fahim Kawsar, Adalberto L. Simeone, Gerd Kortuem, Kris Luyten and Karin Coninx

Symbol Choice and Memory of Visual Models ..................................................... 97
   Kathrin Figl

Combining cognitive, semiotic and discourse analysis to explore the power of notations in visual programming ............................................................... 101
   Juliana J. Ferreira, Clarisse S. de Souza, Luciana C. de Castro Salgado, Cleyton Slaviero, Carla F. Leitão and Fábio de F. Moreira

Code Understanding

GUI-Driven Code Tracing ....................................................................................... 111
   André L. Santos

Visualizing Traceability Links between Source Code and Documentation .............. 119
   Xiaofan Chen, John Hosking and John Grundy

Automatically locating relevant programming help online ................................... 127
   Oleksii Kononenko, David Dietrich, Rahul Sharma and Reid Holmes

Domain-Specific Languages

Blocks Languages for Creating Tangible Artifacts .............................................. 137
   Franklyn Turbak, Smaranda Sandu, Olivia Kotsopoulos, Emily Erdman, Erin Davis and Karishma Chadha

Simplifying Filter/Flow Graphs by Subgraph Substitution ...................................... 145
   Florian Haag, Steffen Lohmann and Thomas Ertl

Development of platform-independent and multi-user choreographies based on ontology combination and mapping ..................................................... 149
   Emanuel Silva, Nuno Silva, Hugo Paredes, Paulo Martins, Benjamim Fonseca and Leonel Morgado

Poster and Demos
CONVERt: A Framework for Complex Model Visualisation and Transformation . . . .. 237
  Iman Avazpour and John Grundy
Visual languages conversion from Saber models to Modelica multi-system simulation environments ................................................................. 239
  Felice Colarusso, Gennaro Costagliola, Fiorenzo D’Errico, Nicola Perillo and Fabrizio Torre
TypeJump: A Typing Game for KeyScratch ..................................................... 241
  Gennaro Costagliola, Mattia De Rosa, Vittorio Fuccella and Fabrizio Torre
SmellSheet Detective: A Tool for Detecting Bad Smells in Spreadsheets .......... 243
  Jácime Cunha, João Paulo Fernandes, Pedro Martins, Jorge Mendes and João Saraiva
Comparison of Visual Languages in Geographic Information Systems ........... 245
  Zdena Dobesova and Petr Dobes
Skeletons from Sketches of Dancing Poses .................................................... 247
  Manuel J. Fonseca, Stuart James and John Collomosse
Handling of Layout-Sensitive Semantics in a Visual Control Language .......... 249
  Niklas Fors and Görel Hedin
Combining Multitouch Gestures and Sketches to Explore Photo Collections ...... 251
  Paulo Gonçalves and Manuel J. Fonseca
Visual clutter reduction for UML component diagrams: A tool presentation.... 253
  Lukas Holy, Jaroslav Snajberk and Premek Brada
Dependency Injection Refined by Extra-functional Properties ..................... 255
  Kamil Ježek, Lukáš Holý and Premek Brada
Modelling a Cardiac Pacemaker Visually and Formally ................................ 257
  Jérôme Leemans and Nuno Amâlio
Linking Codecharts with Programs ................................................................. 259
  Jon Nicholson, Aidan Delaney and Gem Stapleton
CodeSmellExplorer: Tangible Exploration of Code Smells and Refactorings .... 261
  Felix Raab
GUITA Toolkit: Interaction-Driven Code Tracing ............................................. 263
