Proceedings of IEEE International Conference on Teaching, Assessment, and Learning for Engineering

(TALE 2012)

Hong Kong, China
20-23 August 2012
# TABLE OF CONTENTS

## Multivariate Analysis for Students’ Evaluation of Teaching Effectiveness in Teleinformatics Engineering

Thomaz E. V. Silva, F. Herbert L. Vasconcelos, Andre L. F. Almeida, Joao C. M. Mota

## An Automatic Marking System for FOL to CF Conversions

Foteini Grivokostopoulou, Isidoros Perikos, Ioannis Hatzilygeroudis

## Towards a Sustainable Assessment Strategy for Digital Forensic Education and Training

Lei Pan, Nisar Khan

## A Tutorial on Evaluation of Network Survivability under Sophisticated Attacker

Frank Yeong-Sung Lin, Pei-Yu Chen

## Teaching Introductory Electrical Engineering: Project-Based Learning Experience

Chi-Un Lei, Hayden Kwok-Hay So, Edmund Y. Lam, Kenneth Kin-Yip Wong, Ricky Yu-Kwong Kwok, Cecilia K. Y. Chan

## Helping First-Year Engineering Students in Transition: Promoting Transformative Learning in Student and Faculty Development

Frankie Leung, Edmond Ko, Tracy Chow

## Toward Constructive Alignment with Portfolio Assessment for Introductory Programming

Andrew Cain, Clinton J. Woodward

## An Engineering Introductory Seminar Course for First-Year College Students

Fan Heliang, Dong Zhiyang, Hu Guanghua, Song Jin, Wang Qilong, Zhang Meng

## An Analysis of Moodle in Engineering Education: The TAM Perspective

Hui Hui Chen, Ming Chee Lee, Yun Lin Wu, Jing Yao Qiu, Cheng He Lin, Hong Yong Tang

## A Holistic Review of Cloud-Based E-learning System

Heba Fasihuddin, Geoff Skinner, Rukshan Athauda

## Towards Semantic Learning Object Metadata: Mapping Standard Metadata Specifications to Ontologies

Qiyan Han, Feng Gao

## Department Course Selection Problem: The Primitive Cognitive Network Process Approach

Kevin Kam Fung Yuen, Manwai Yuen

## An Advanced C Programming Course for the Embedded Systems Development

Ling Ming, Shi Longxing, Tang Yongming

## A Hybrid Course Curriculum Design and Implementation Based on CDIO Approach to Engineering Education

Zhenli Yu, Hong Wu, Xiaoli Zhou

## Excellent Engineer Cultivation Teaching Plan Exploration for Electronic Engineering Major

Haibing Yin, Xia Min Wang, Zhelei Xia

## Framing Core and Advanced Competencies for Courses: Does the Nature, Level, Complexity and Audience of a Course Matter?

Ilse Baumgartner, Venky Shankararaman

## Computer Science Curriculum in a Liberal Arts Setting: Case Studies at the University of San Diego

Simon G. M. Koo

## Towards Practical Education of Students through Local Contribution

Hitotake Funaki, Yutaka Tange, Kenji Mihara

## Inducing Students’ Intrinsinc Motivation through Conceptual Learning in a Digital Circuit Class

Kawan Soetanto, Mai Higuchi

## Quadcopter Design and Implementation as a Multidisciplinary Engineering Course

Igor Gaponov, Anastasia Razinkova

## Construction Safety Education Model Based On Second Life

Quang-Tuan Le, Chan-Sik Park

## Experiences in Developing Mobile Educational Games

Angela Cartagena, Rowel Atienza, Tyrone Tai, Rica Cruz

## Using Game-Based Learning in Teaching CS Algorithms

Ioannis Hatzilygeroudis, Foteini Grivokostopoulou, Isidoros Perikos

## Interactive Study Method in Engineering Education Based on Animation Applet Design

Jinsong Tao, Shujuan Zhang, Xishan Wen

## Staff Exchange Teaching Model for an Offshore Campus

Alan J. Murphy, Ivan C. K. Tam
Teaching Notes of MVDR in Digital Signal Processing (DSP) - From MVDR to Semidefinite Programming (SDP) ................................................................. 116
Xiansheng Guo, Qin Wan, Ying Zhang, Jin Liang

Faculty Development in Engineering Colleges in Mainland China: The Humanities Perspective ................................................................. 120
Hong Huang, Xiaoxiang Li, Yinghui Kuang

Tales from Inside the Blender – Five Models of Collaboration ................................................................. 123
Kim L. Blackmore, Malcolm Pettigrove, Paul Compston, Lauren Thompson, Diana Quinn, Anne Lonie

Extending Micro and Nanoelectronics Education through Integrated Online Microelectronics and Technology CAD Laboratory ......................................................... 129
Ananda Maiti, Subhajit Mahata, C. K. Maiti

Application of Virtual Experiment in High-Voltage Engineering Education ......................................................... 132
Jinsong Tao, Shujian Zhang, Wei Zhang, Hui Zhang, Xishan Wen

Performance and Quality of Experience of Remote Access Laboratories ......................................................... 135
Alexander A. Kist, Andrew Maxwell

Remotely Triggered Semiconductor Devices Characterization Laboratory in Cloud Environment ......................... 141
Ananda Maiti

The Use of Wiki to Facilitate Critical Thinking .................................................................... 145
Goh Wei Wei

Using iPad 2 with Note-Taking Apps to Enhance Traditional Blackboard-Style Pedagogy for Mathematics-Heavy Subjects: A Case Study ................................................................. 148
Alan Pak Tsoi Lau, Siu-lau Ho

Exploring Chinese through Learning Objects and Interactive Interface on Mobile Devices ................................................................. 151
Vincent Tam, Nan Luu

m-LTE: A Mobile-Based Learning and Teaching Interactive Environment ................................................................. 154
W. Yan, C. Li, J. Ma, S. Ma, H. Truong

Introductory Project in Electrical Engineering as a Tool to Improve Motivation among Second-Year Students ................................................................. 158
Aharon Gero

An Experimental Study of Engineering-Science-Mathematics Approach in Elementary Engineering and Science Education ................................................................. 163
Eric Z. Ma, Edward W. Lo, Mansun Chan

Philosophy Thinking in the Teaching Application and Research of Engineering Drawing ................................................................. 169
Zhang Ruiqiu, Liu Lin, Wu Pingqiang, Chen Liang

Research-Based Learning in Computing Courses for Senior Engineering Students ................................................................. 173
Khaled Bashir Shaban, Mahmoud Abdulwahed

an Experience of Teaching Industrial Automation for Industrial Engineering Undergraduate Students ................................................................. 180
Fabio Lima, Alvaro Camargo Prado, Alexandre Augusto Massote

Development of a Self-Management Mode for an Undergraduate Student Innovation Lab ................................................................. 186
Yongming Tang, Xiaoyan Song, Xianyuan Zhang, Wei Lei

Energy Conservation Study on Induction Motors Using MATLAB/Simulink for Enhancing Electric Machinery Courses .................................................................... 189
Navneet Kumar, Thanga Raj Chelliah, S. P. Srivastava

Cultivating Power Converter Talents On Campus through the Design Methodology of Flyback Converter ................................................................. 196
Tze-Yee Ho, Yuan-Joan Chen, Mu-Song Chen, Jia-Shen Lin

A System to Assist the Learning of Embedded Microprocessor Programming ................................................................. 200
Yu-fai Fung, Shuyun Ren, M. Fikret Ercan

Live Peer Marking for HCI Design Education .................................................................... 203
Steve Bennett, Trevor Barker

Integrating the Kinect Camera, Gesture Recognition and Mobile Devices for Interactive Discussion ................................................................. 210
Vincent Tam, Ling-Shan Li

Development and Evaluation of Open Educational Resources for Enhancing Engineering Students’ Learning Experience .................................................................... 213
Mahmoud Abdulwahed, Zoltan K. Nagy, Adam R. Crawford

The Systematic Development of Rubrics in Assessing Engineering Learning Outcomes ................................................................. 218
Tracy Chow, Edmond Ko, Cindy Li, Catherine Zhou

Item Response Prediction for Incomplete Response Matrix Using the EM-Type Item Response Theory with Application to Adaptive Online Ability Evaluation System ................................................................. 223
Hideo Hirose, Takenori Sakamura
An Electronics Threshold-Concept Inventory - Assessment in the Face of the Dependency of Concepts ................................................................. 228
Jonathan Scott, Mira Peter, Ann Harlow
A Model for Teaching, Assessment and Learning in Engineering Education for Working Adults ................................................................. 232
Kin Chew Lim, Stephen Low, Attaullah Samir, Emet LaBoone
Impact of Role Models on the Entrepreneurial Intentions of Engineering Students ................................................................. 235
Hongyi Sun, Carol C. T. Lo
The PIPE Model for Teaching Creativity, Innovation and Entrepreneurship ................................................................. 240
Hongyi Sun
A Structured Framework for Training Technologists in Systematic Innovation ................................................................. 244
Shankar Venugopal, Anil Kumar Davuluri
Student, Engineer, Innovator, Entrepreneur or Can you Sell Something you do not own? ................................................................. 247
Francois Ladouceur
Capstone Team Design Projects in Engineering Curriculum: Content and Management ................................................................. 250
Kin Fun Li, Adam Zielinski, Fayeze Gebali
A Procedural Approach to Assessing Undergraduate Students’ Project ................................................................. 256
Madhavan Shanmugavel, Veera Ragavan
Promoting Creativity, Innovation and Engineering Excellence - A Case Study from Sri Lanka ................................................................. 261
Shahani Markus Weerawarana, Amal Shehan Perera, Vishaka Nanayakkara
Agile Model Adaptation for E-Learning Students’ Final-Year Project ................................................................. 267
Muhammad Adnan Ashraf, Shafay Shamaill, Zeeshan A. Rana
Curriculum Design for Engineering Education on Embedded System Based on Broad Partnership with University, Corporation and Local School ................................................................. 271
Yasuhiro Takayama, Takanori Koga, Takayuki Nitta, Hideaki Yanagisawa, Tetsuji Shigemura
Implication of Curricula Design on Engineering Education ................................................................. 278
Praneel Chand, Mansour H. Assaf, Imran Jannif
Integrating Global Education Program into Engineering Curriculum: Developing Global Engineering Education Program at GECE ................................................................. 283
Hyun Jong No, Hyungsub Choi, Sung-Gil Hong, Seung-Yeop Kwak
Toward More Effective Strategies in Teaching Programming for Novice Students ................................................................. 288
Xiaoyuan Suo
Questionnaire Research and Development of Self-Motivating Education Method Using Intellectual Property Rights ................................................................. 291
Yoshihiro Deguchi, Eri Morimoto, Takehito Yoshida, Nobuaki Shiokawa, Akinobu Shimada, Hidetoshi Hakamishi, Naoko Akumatsu, Tsuyoshi Kouda
Encouraging Active Autonomous Learners in Electric and Electronic Laboratories for Second-Year Students ................................................................. 294
Ren-Jie Hu, Hong Huang, Qiu-Mei Guan, Susan M. Lord
Problem-Based Learning Approach for Martronics - An Application on Marine Informatics Course Paper ................................................................. 298
Mark Lee
Integration in Engineering Education An Experimentation of Curriculum Design ................................................................. 302
M. Fikret Ercan
Collaborative-Interdisciplinary Studio Control System and Instrumentation Engineering and Industrial Design programs ................................................................. 305
Nimit Mengveha, Watthichai Polvisate
A Case Study on Teaching Computerized Information Systems for Fashion Retailing Students ................................................................. 308
Tsan-Ming Choi
Chie Sato
“In Case There is Something Fault in Power Supply..., Then Unit will Broken without This.” - An Investigation into a Global Engineer’s Language ................................................................. 317
Jessie Yijia Wang, Noble Naibo Ji
Teamwork Assessment and Averaged Feedback to Students in Very Small Groups ................................................................. 322
Boonchuay Supmonchai, Kuntinee Maneeratana
Co-Curricular Activity and Cooperative Learning - A Case Study ................................................................. 328
Rajashree Jain, Ashok Kotwal, Lalit Kathpalia, Narendra Jain
Design and Practice of an Acoustic Education Program to Increase Vocational Awareness ................................................................. 331
Masashi Nakayama, Shinobu Mukai, Shunsuke Ishimitsu
Utilization of Fuzzy Cognitive Map in Modeling of Thailand Science-Based Technology School ................................................................. 335
Pattanun Nornnaisin, Komkrit Chomsuan, Nate Hongkrailert
Interactive Learning in Pre-University Mathematics
Flora S. Tsai, Chan Yuen, Ngai-Man Cheung

Taste of Electrical Engineering Workshops for High School Students
Jayashri Ravishankar, Phillip Allen, Ray Eaton, Stephen J. Redmond

Enhancement of Personal Concept Map Constructing for Effective Assessment
Li-Yu Lee, Yu-Shih Lin, Chih-Ping Chu

A Dynamic Input–Output Work Capacity Model for a Group of Agents
Emmanuel A. Gonzalez

Assessing for Fundamental Electronics
Swat-Eng Tan

Curriculum: A Longitudinal Observation
Wency W. S. Lee, Kenneth C. H. Lo, Victor C. W. Chan

Control of a Remote Laboratory by Augmented Reality
S. K. Kamble, B. L. Tembe

Strengthening the Electronic System Design Ability
Hai-Ning Liang, Jim Morey, Kamran Sedig

A Study of Switching Mechanisms in Remote Electronics Laboratories for Engineering Education
Ananda Maiti, Subhasis Mahata

Role-Play Exercises for Project Management Education that Incorporate a Software Agent
Taichi Nakamura, Hiroshi Maruyama, Akio Takashima, Yasuo Sambe

Motivational Education for Science Course
Kawan Soetanto

Systems Engineering Design of Engineering Education: A Case of an Embedded Systems Course
Wael Balid, Imad Alrouh, Abdulrahman Hussian, Mahmoud Abdulwahed

Curriculum Design Using Mentor Graphics Higher Education Program (HEP) for ASIC Designing from Synthesizable HDL to GDSII
Muhammad Kamran, Muhammad Adnan Bhatti, Zahoor Ul Haque

Teaching Information Theory Using a Wireless Optical Transceiver Platform
Yau Hee Kho, M. L. Dennis Wong

System Design – A Novel Electrical Engineering Course
Elias Aboutanios, David Taubman

Competency-Based Education (CBE) for IT Security: Towards Bridging the Gap
Hazinah K. Mammi, Norafida Ithnin

An Experiment for Testing Efficiency of Effective Teaching Model and Comprehensive Use of Limited Resources
Yawar Rehman, Ghous Baksh Narejo, Shoaib Zaidi

A Study of Switching Mechanisms in Remote Electronics Laboratories for Engineering Education
Ananda Maiti, Subhasis Mahata

Curriculum: A Longitudinal Observation
Wency W. S. Lee, Kenneth C. H. Lo, Victor C. W. Chan

Control of a Remote Laboratory by Augmented Reality
Joaquin Cubillo, Sergio Martin, Manuel Castro, Russ Meier

A Rethinking of Digital Learning Device Projects
Tianchong Wang, Dave Towey
Effects on Training Mathematics Problem-Solving Behaviors Using a Tablet Computer - A Case Study of Secondary High-school Classes ................................................................. 462
  Youngjae Kim, Cheolil Lim, HaeWook Choi, Minsoo Hahn

Teaching Monte Carlo Codes at University: Development of a Geant4 Course for Students of Schools of Physics ................................................................. ............................................. 467
  Susanna Guatelli, Dean Cutajar, Anatoly B. Rosenfeld, Catherine Layton

Using Computer Games in a Computer Course to Improve Learning ................................................................. 472
  Tsung-Yu Liu, Yu-Ling Chu, Tan-Hsu Tan

Historical Perspectives and Unbalanced Growth of Engineering Education Infrastructure in India .................... 476
  V. L. Patil

Conjoint Comparison of Support Systems for Intellectual Property Activities of University Students in Science and Engineering Majors in Korea and Japan ................................................................. 479
  Joon-Hwan Shim, Yoshihiro Deguchi

Perceptions and Expectations of Engineering Curriculum Reform by Graduates: A Survey Study in China ................................................................. 482
  Jun Cui, Jiwen Zhang, Susan M. Lord, Xia Wang

Meta-Evaluation Viewpoints on Curriculum Evaluation of Engineering Education: Evidence from a North University of Taiwan ................................................................. 488
  Ming Che Lee, Hui Hui Chen, Yao Ming Li, Li Yin, Chien Mu Liu, Ching Hui Chen

Author Index
