2012 IEEE 36th Annual Computer Software and Applications Conference Workshops

(COMPSACW 2012)

Izmir, Turkey
16 – 20 July 2012
2012 IEEE 36th International Conference on Computer Software and Applications Workshops

COMPSACW 2012

Table of Contents

Message from the Workshops Chairs ............................................................... xvi
SSS 2012: The Fifth IEEE International Workshop on Service Science and Systems ............................................. xvii
MidArch 2012: The Sixth Middleware Architecture in the Internet ........................................................... xix
METHOD 2012: The First IEEE International Workshop on Methods for Establishing Trust with Open Data ........... xxi
IWSC 2012: The Ninth IEEE International Workshop on Software Cybernetics ............................................. xxiii
MVDA 2012: The First IEEE International Workshop on Modeling and Verifying Distributed Applications ........... xxvii
QUORS 2012: The Sixth IEEE International Workshop on Quality Oriented Reuse of Software ......................... xxix
REFS 2012: The Sixth IEEE International Workshop on Requirements Engineering for Services ......................... xxxi
SAPSE 2012: The Fourth IEEE International Workshop on Security Aspects in Processes and Services Engineering ...................................................... xxxiii
STA 2012: The Fourth IEEE International Workshop on Software Test Automation ........................................... xxxv

CORCS 2012: The Fourth IEEE International Workshop on Component-Based Design of Resource-Constrained Systems ................................................................................................................................................................................xli

STPSA 2012: The Seventh IEEE International Workshop on Security, Trust, and Privacy for Software Applications ........................................................................................................................................................................xliii

ESAS 2012: The Seventh IEEE International Workshop on Engineering Semantic Agent Systems .............................................................................................................................................................................xlv

Invited Talk
Asian Information HUB Project: NICT’s R&D Vision and Strategies for Universal Communication Technology in the Big Data Era .................................................................................................................................................................1
Michiaki Iwazume, Hideaki Fujii, Takahiro Iwase, Hiroshi Haraguchi, and Makoto Hijiya

SSS Session 1: Service Creation and Evolution
Automated Web Service Composition Using Genetic Programming .................................................................................................................................................................................................7
Liyuan Xiao, Carl K. Chang, Hen-I Yang, Kai-Shin Lu, and Hsin-yi Jiang

User’s Requirements Driven Services Adaptation and Evolution .................................................................................................................................................................................................13
Ziyan Xu, Haihong Zhao, and Lin Liu

An Adaptive Quality Level Selection Method for Efficient QoS-Aware Service Composition .................................................................................................................................................................................................20
Jae-Hyun Cho, Jang-Ho Choi, Han-Gyu Ko, and In-Young Ko

A Novel Solution of Distributed File Storage for Cloud Service .................................................................................................................................................................................................26
Yu Zhang, Weidong Liu, and Jiaxing Song
SSS Session 2: Service Marketing and Management

GARSS: A Generic Annotation and Recommendation Service System for Digital Repositories ..........................................................32
   Xiaodong Huang, Yong Zhang, and Chunxiao Xing

Material Hub: A Semantic Search Engine with Rule Reasoning ..........................................................38
   Sen Ma, Wen Zhao, Shi-kun Zhang, and Hang Zhang

Integrated QoS Utility-Based Model for Cloud Computing Service Provider Selection ..........................................................45
   Maria Salama, Ahmed Shawish, Amir Zeid, and Mohamed Kouta

SSS Session 3: Service Paradigms in Industry

Service Level Management for Service Value Networks ........................................................................51
   Frank Schulz, Wibke Michalk, Markus Hedwig, Marcus McCallister,
   Christof Momm, Simon Caton, Christian Haas, Daniel Rolli, and Monika Tavas

Agent-Based Simulation and Its Applications to Service Management: Invited Talk ..........................................................57
   Yang Li

MidArch 1

Application Architecture to Foster User-Centric Information Discovery and Retrieval ..........................................................58
   Toru Kobayashi

Secure ID Transformation for Robust Pseudonymity against Backflow of Personal Information in SAML Federation ..........................................................64
   Wataru Oogami, Takaaki Komura, and Yasuo Okabe

Secure Monitoring for Identity Federations and Distributed Systems ...................................................................................70
   Miguel Macías Enguidanos and Jaime Pérez Crespo

MidArch 2

Flexible Access Control Framework Considering IdP-Side's Authorization Policy in Roaming Environment ..........................................................76
   Toshiki Watanabe, Shunichi Kinoshita, Junichi Yamato, Hideaki Goto, and Hideaki Sone

Implementation and Evaluation of an OpenFlow-Based Access Control System for Wireless LAN Roaming ..........................................................82
   Shunichi Kinoshita, Toshiki Watanabe, Junichi Yamato, Hideaki Goto, and Hideaki Sone
A Prototype of Network Failure Avoidance Functionality for SAGE Using OpenFlow

Tomoya Furuichi, Susumu Date, Hiroaki Yamanaka, Kohei Ichikawa, Hirotake Abe, Haruo Takemura, and Eiji Kawai

MidArch 3

Group Management System for Federated Identities with Flow Control of Membership Information by Subjects

Takeshi Nishimura, Motonori Nakamura, Makoto Otani, Kazutsuna Yamaji, and Noboru Sonehara

Analysis of Security of PKI Operation with Multiple CP/CPS Based on Level of Assurance

Shigeaki Tanimoto, Shinichi Mizuhara, Msasahiko Yokoi, Hiroyuki Sato, and Atsushi Kanai

METHOD Session 1

Linked Open Data Aggregation: Conflict Resolution and Aggregate Quality

Tomáš Knap, Jan Michelfeit, and Martin Necaský

Identification and Utilization of Components for a Linked Open Data Platform

Evanela Lapi, Nikolay Tcholtchev, Louay Bassbouss, Florian Marienfeld, and Ina Schieferdecker

Sensor Information Fueling Open Data

Miquel Oliver, Manuel Palacín, Albert Domingo, and Víctor Valls

METHOD Session 2

Automated Trust Estimation in Developing Open News Stories: Combining Memento & Provenance

Erik Mannens, Sam Coppens, Ruben Verborgh, Laurence Hauttekeete, Davy Van Deursen, and Rik Van de Walle

Privacy Preserving Data Publishing for Recommender System

Xiaoqiang Chen and Vincent Huang

METHOD Session 3

Attack Vectors to Metering Data in Smart Grids under Security Constraints

Florian Skopik and Zhendong Ma

Protecting Resources in an Open and Trusted Peer-to-Peer Network

J.-F. Lalande and D. Rodriguez
IWSC 2012 Session 1

Architectural Concepts: Evolution of a Software System across Design and Implementation Stages in Dynamically Changing Environments ................................................................. 144
   Bahtijar Vogel, Arianit Kurti, Marcelo Milrad, and Tommi Mikkonen

A Graph Transformation Based Approach for Modeling Component-Level Migration in Mobile Environments ............................................................................................................. 152
   Yu Zhou, Xuefeng Yan, and Zhiqiu Huang

Towards a General Supporting Framework for Self-Adaptive Software Systems .................................................................................................................................................... 158
   Liangdong Wang, Yang Gao, Chun Cao, and Li Wang

Learning-Based Multi-controller Coordination for Self-Optimization ......................................................... 164
   Richang Lin, Bihuan Chen, Yi Xie, Xin Peng, and Wenyun Zhao

IWSC 2012 Session 2

Distribution-Aware Mutation Analysis ....................................................................................................... 170
   Chang-ai Sun, Guan Wang, Kai-Yuan Cai, and Tsong Yueh Chen

A Reputation System for Trustworthy QoS Information in Service-Based Systems ............................................................................................................................................................................................ 176
   Jun Lin, Changhai Jiang, Hai Hu, Kai-Yuan Cai, Stephen S. Yau, and Dazhi Huang

Program Behavior Analysis and Control for Online IDE ........................................................................... 182
   Ling Wu, Guangta Liang, and Qianxiang Wang

IWSC 2012 Session 3

Safe Regression Test Selection Based on Program Dependence Graphs ...................................................... 188
   Jianchun Xing, Hongda Wang, Wei Song, and Qiliang Yang

CFSE-1

Cloud Log Forensics Metadata Analysis .................................................................................................... 194
   Sean Thorpe, Indrajit Ray, Tyrone Grandison, and Abbie Barbir

Proposal and Evaluation of the Digital Certificate System with Sumi-coating Module for Privacy Protection ......................................................................................................................... 200
   Takashi Sakuma and Ryoichi Sasaki
CFSE-2
Software Piracy Forensics: A Proposal for Incorporating Dead Codes and Other Programming Blunders as Important Evidence in AFC Test .................................................................206
  P. Vinod Bhattathiripad
Development of InfoVis Software for Digital Forensics .............................................................................213
  Grant Osborne, Benjamin Turnbull, and Jill Slay

MVDA-1: Algorithms and Platforms
A Graphical Language to Integrate Process Algebra and State Machine Views for Specification and Verification of Distributed Real-Time Systems .................................................................218
  Jinho On, Sujeong Woo, and Moonkun Lee
A BPEL4WS Extension to Develop and Execute Grid Service Workflow Application ........................................................224
  Yousra Bendaly Hlaoui, Leila Jemni Ben Ayed, Imen Ben Fraj, and Ahlem Benyounes
A Distributed and Coordinated Massive DDOS Attack Detection and Response Approach .................................................................230
  Mohamed Karim Aroua and Belhassen Zouari

MVDA-2: Emerging Techniques
UML AD Refinement Patterns for Modeling Workflow Applications .................................................................236
  Ahlem Ben Younes, Leila Jemni Ben Ayed, and Yousra Bendaly Hlaoui
An Efficient IPTV Distribution Technique under NAT Environment .................................................................242
  Ming-Huang Chen, Yaw-Chung Chen, and Wen-Kang Jia

MVDA-3: Formal Approaches
Automatic Generation of an Operational CSP-Z Specification from an Abstract Temporal*Z Specification .................................................................248
  Thouraya Gouasmi, Amira Regayeg, and Ahmed Hadj Kacem
A Semantics-Based Privacy-Aware Approach for Fragmenting Business Processes .................................................................254
  Mohamed-Anis Zemni, Nejib BenHadj-Anouane, and Moez Yeddes

QUORS 1: Software Evolution
Evaluating the Extended Refactoring Guidelines .................................................................260
  Wafa Basit, Fakhar Lodhi, and Muhammad Usman Bhatti
Quantifying Quality of Software Design to Measure the Impact of Refactoring .................................................................266
  Tushar Sharma
Mining Association Rules to Facilitate Structural Recovery ..................................................272
   Wu Ren

QUORS 2: Reuse-Driven Design and Patterns
Towards Reuse-Based Development for the On-chip Distributed SoC
Architecture ........................................................................................................................................278
   Moazzam Fareed Niazi, Tiberiu Seceleanu, and Hannu Tenhunen
Performance Comparison of Combined Collaborative Filtering Algorithms for Recommender Systems ......................................................................................................................284
   Dilek Tapucu, Seda Kasap, and Fatih Tekbacak
Simplifying the Design of Signature Workflow with Patterns ..................................................290
   Hwai-Jung Hsu, Ming-Wei Tsai, and Feng-Jian Wang
A New Cohesion Metric and Restructuring Technique for Object Oriented Paradigm ..................296
   Mehmet Kaya and James W. Fawcett

QUORS 3: Advanced Component-Based Software Engineering
Performance Analysis of Reusable Components with Hybrid Modelling of Strategies and Processes: A Real World Case Study .................................................................302
   Sheau Ling Tan and Lin Liu
Translation Rules and a Supporting Tool for Model-Based Reuse .............................................310
   Junfeng Zhao, Jiantao Zhou, and Jing Liu
Parallel Software Reuse Driven CPN Model Reduction and Analysis Approach .......................316
   Tao Sun, Xinming Ye, Hongji Yang, and Jing Liu

QUORS 4: Cloud Computing Services and QoS
A QoS Assurance Middleware Model for Enterprise Cloud Computing ......................................322
   Shou-Yu Lee, Dongyang Tang, Tingchao Chen, and William Cheng-Chung Chu
Towards OWL 2 Natively Supported Fuzzy Cloud Ontology ....................................................328
   Daren Fang, Xiaodong Liu, Imed Romdhani, and Huiqun Zhao
SE-EQUAM - An Evolvable Quality Metamodel ..........................................................................334
   Aseel Hmood, Iman Keivanloo, and Juergen Rilling

REFS 1: Keynote Speech I
Introduction to Our Honored Keynote Speakers ........................................................................340
   Willem-Jan van den Heuvel
REFS 2: RE for Services Adaptation and Evolution

Viewpoints and Issues in Requirements Engineering for Services ......................................................... 341
Jolita Ralyté

A Goal-Oriented Perspective on Approaches to Web Service Discovery ............................................... 347
Saïd Assar, Carine Souveyet, and Kadan Aljoumaa

Software Service Evolution: A Requirements Perspective ................................................................. 353
Feng-Lin Li, Lin Liu, and John Mylopoulos

Representing Non-functional Requirements on Services - A Case Study ........................................... 359
Clotilde Rohleder

REFS 3: RE for Non-functional Requirements

Mutual Refinement of Security Requirements and Architecture Using Twin Peaks Model ................................................................. 367
Takao Okubo, Haruhiko Kaiya, and Nobukazu Yoshioka

Automated Reasoning with Goal Tree Models for Software Quality Requirements ................................................................. 373
Bo Wei, Zhi Jin, Didar Zowghi, and Bin Yin

Improving Software Quality Requirements Specifications Using Spectrum Analysis ................................................................. 379
Haruhiko Kaiya and Atsushi Ohnishi

The Concepts and Ontology of SīSL: A Situation-Centric Specification Language ................................................................. 385
Haihua Xie, Carl K. Chang, Hua Ming, and Kai-Shin Lu

A Functional Implementation Approach for Web Services-Based Context-Aware Systems ................................................................. 392
Jianchu Huang and Hongji Yang

REFS 4: REFS Panel

Requirements Engineering for Service Adaptation and Evolution ......................................................... 398
Lin Liu

SAPSE 1

Modeling of A-Posteriori Access Control in Business Processes ................................................................. 403
Mohamed Karim Aroua and Belhassen Zouari

Petri-Net-Based Modeling and Resolving of Black Hole Attack in WMN ......................................................... 409
Heijiao Huang and Qiang Zhou

Database as a Service: Towards a Unified Solution for Security Requirements ......................................................... 415
M. A. Hadavi, M. Noferesti, R. Jalili, and E. Damiani
SAPSE 2

Deriving Process-Related RBAC Models from Process Execution Histories ........................................421
Anne Baumgrass, Sigrid Schefer-Wenzl, and Mark Strembeck

Approximation Algorithms for Minimizing the Number of Roles
and Administrative Assignments in RBAC .................................................................................................427
Hejiao Huang, Feng Shang, and Jiangtao Zhang

Robust XML Watermarking Using Fuzzy Queries ..................................................................................433
Tchokpon Romaric, Ernesto Damiani, and Nadia Bennani

STA2 Agile Software Testing

Model Based Test Automation through Asynchronous Channels .............................................................439
Robert M. Hierons

Strategies for Agile Software Testing Automation: An Industrial Experience ........................................440
Eliane Collins, Arilo Dias-Neto, and Vicente F. de Lucena Jr.

Adaptive Agile Performance Modeling and Testing .................................................................................446
Marek G. Stochel, Mariusz R. Wawrowski, and James J. Waskiel

STA3 Testing Mobile and Open Software

Model-Based Conformance Testing of WS-BPEL Compositions ..............................................................452
Afej Jmal Maâlej, Moez Krichen, and Mohamed Jmaïel

A Conceptual Framework for Open Source Software Test Process .........................................................458
Tamer Abdou, Peter Grogono, and Pankaj Kamthan

STA4 Testing Large Systems

Mining Data Chain Graph for Fault Localization ......................................................................................464
Bo Yang, Ji Wu, and Chao Liu

Effects of Class Imbalance in Test Suites: An Empirical Study of Spectrum-Based Fault Localization ..............................................................................................................470
Cheng Gong, Zheng Zheng, Wei Li, and Peng Hao

IEESD-TiP 1

Load Balancing for Cross Layer Communication .....................................................................................476
John F. Schommer, Dominik Franke, Tim Lange, and Stefan Kowalewski

Development of a Mobile Platform to Support Building Maintenance Engineering ........................................482
Paul Stack

An Estimation Model for the Savings Achievable by Tool Chains ..........................................................488
Matthias Biehl and Martin Törngren
IEESD-TiP 2

GcLite: An Expert Tool for Analyzing Garbage Collection Behavior ..................................................493
Vasileios Angelopoulos, Trevor Parsons, John Murphy, and Patrick O'Sullivan

Integration and Analysis of Design Artefacts in Embedded Software Development ..............................................................503
Daniel Merschen, Julian Pott, and Stefan Kowalewski

Product Line Variability Modeling Based on Model Difference and Merge ..........................................................509
Kunming Nie, Li Zhang, and Zengtao Geng

CORCS 1

Lubomir Bufej, Tomas Bures, Vojtech Horky, Jaroslav Keznikl, and Petr Tuma

Understanding the Role of Transmission Power in Component-Based Architectures for Adaptive WSN ..................................................520
Guillermo Rodriguez-Navas, Miquel A. Ribot, and Bartomeu Alorda

Tool-Supported Methodology for Component-Based Design of Wireless Sensor Network Applications ........................................526
Steffen Peter and Peter Langendörfer

CORCS 2

Extending EAST-ADL for Modeling and Analysis of System’s Resource-Usage ..................................................532
Raluca Marinescu and Eduard Paul Enoiu

Modelling the Design for an SOA System to Control a Small Scale Energy Zone ..................................................538
Maria Anjum and David Budgen

Rule Based Axiomatic Design Theory Guidance for Software Development ..................................................544
Cengiz Togay, Emre Selman Caniaz, and Ali Hikmet Dogru

STPSA 1

Branch Obfuscation Using Code Mobility and Signal ..................................................553
Zhi Wang, Chunfu Jia, Min Liu, and Xiaoxu Yu

Detection of Buffer Overflow Vulnerabilities in C/C++ with Pattern Based Limited Symbolic Evaluation ..................................................559
Sun Ding, Hee Beng Kuan Tan, Kaiping Liu, Mahinthan Chandramohan, and Hongyu Zhang

Towards a Secure Software Development Lifecycle with SQUARE+R ..................................................565
Weider D. Yu and Kyle Le
STPSA 2
Internet-Based Evaluation and Prediction of Web Services Trustworthiness ...........................................571
Meng Li, Zhebang Hua, Junfeng Zhao, Yanzhen Zou, and Bing Xie
On Security Analysis of PHP Web Applications ........................................................................577
David Hauzar and Jan Kofron
Measuring the Software Security Requirements Engineering Process .............................................583
Nancy R. Mead

STPSA 3
Attack Model Based Penetration Test for SQL Injection Vulnerability ..............................................589
Wei Tian, Ju-Feng Yang, Jing Xu, and Guan-Nan Si
An Efficient Graph Codec System for Software Watermarking ........................................................595
Maria Chroni and Stavros D. Nikolopoulos

ESAS 1
Conditional Ontology Mapping .................................................................................................................601
Islam Elgedawy
Integration of 3D Trajectory Maps into a Local Distribution Map of Radiation Dose Using Unmanned Aerial Vehicle ..................................................................................................................607
Katsunori Oyama, Hiroyuki Wakabayashi, Atsushi Takeuchi, and Naoki Ishitsuka
A Load Balancing Scheme for Distributed Simulation Based on Multi-agent System ..................................................613
Young Joon Lee, Geon Yong Park, Ho Kuen Song, and Hee Yong Youn
The Semantics of the Interaction between Agents and Web Services on the Semantic Web ..................................................619
Sinem Getir, Moharram Challenger, Sebla Demirkol, and Geylani Kardas

ESAS 2
Integrating Linked Data Space with Agents Using the Environment Abstraction ..................................625
Riza Cenk Erdur, Oguz Dikenelli, Oylum Alatli, Erdem Eser Ekinci, and Ziya Akar
An Image Processing Approach to Solve Labyrinth Discovery Robotics Problem ..................................................631
Behnam Rahnama, Atilla Elçi, and Shadi Metani
Development of Semantic Model and Information Exploration System for TV Media ..................................................637
Duygu Çelik, Atilla Elçi, Esra Çalık, and Ayman Ahmad Khalil

Author Index ...............................................................................................................................................643
