2012 15th International Conference on Network-Based Information Systems

(NBiS 2012)

Melbourne, Australia
26 – 28 September 2012
# Table of Contents

Welcome Message from NBiS 2012 General Co-Chairs ................................................................. xix
Welcome Message from NBiS 2012 Program Committee Co-Chairs ........................................... xx
Welcome Message from NBiS Steering Committee Co-Chairs ..................................................... xxi
Welcome Message from Workshops Co-Chairs of NBiS 2012 .................................................. xxii
Keynote 1 ........................................................................................................................................ 1
Keynote 2 ....................................................................................................................................... xxiv
NBiS 2012 Organizing Committee ............................................................................................... xxv
Reviewers ..................................................................................................................................... xxx
ADPNA 2012 Welcome Message ................................................................................................. xxxi
ADPNA 2012 Committee ............................................................................................................. xxxii
ADPNA 2012 Reviewers ............................................................................................................. xxxiii
CPSAT 2012 Welcome Message ................................................................................................. xxxiv
CPSAT 2012 Committee ............................................................................................................. xxxv
CPSAT 2012 Reviewers ............................................................................................................. xxxvi
DEMoC 2012 Welcome Message ................................................................................................. xxxvii
DEMoC 2012 Committee ........................................................................................................... xxxviii
DEMoC 2012 Reviewers ............................................................................................................ xxxix
HETNET 2012 Welcome Message ............................................................................................... xl
HETNET 2012 Committee .......................................................................................................... xli
HETNET 2012 Reviewers .......................................................................................................... xlii
INVITE 2012 Welcome Message ............................................................................................... N/A
INVITE 2012 Committee ............................................................................................................ xliv
INVITE 2012 Reviewers ............................................................................................................. xlv
INWC 2012 Welcome Message .................................................................................................. xlv
INWC 2012 Committee .............................................................................................................. xlvii
INWC 2012 Reviewers ............................................................................................................. N/A
ISSE 2012 Welcome Message .................................................................................................... xlvi
ISSE 2012 Committee ................................................................................................................ li
ISSE 2012 Reviewers ................................................................................................................ lli
ITIS 2012 Welcome Message .................................................................................................... lli
ITIS 2012 Committee ................................................................................................................ N/A
Session 1A: Cloud and Scalable Computing
Reducing Power Consumption and Improving Quality of Service in Cloud Computing Environments ................................................................................................................. 1

Yuuki Awano and Shin-ichi Kuribayashi

Multitenancy - Security Risks and Countermeasures ........................................................................................................ 7

Wayne J. Brown, Vince Anderson, and Qing Tan

The Cloud Computing Applications in Information Resource Dynamic Allocation ............................................. 14

Hui Ma and Yue Qiu

Cloud Computing: Architecture for Efficient Provision of Services ................................................................. 18

Nawsher Khan, A. Noraziah, Tutut Herawan, Elrasheed Ismail, and Zakira Inayat

Session 1B: Data Management
Single Transition Constraint for XML Update Validation ......................................................................................... 24

Norfaradilla Wahid and Eric Pardede

Integration of Data Warehouse and Unstructured Business Documents .......................................................... 32

Ahmad Abdullah Alqarni and Eric Pardede

Indexing Moving Objects in Indoor Cellular Space ............................................................................................. 38

Sultan Alamri, David Taniar, and Maytham Safar

Database Research: Are We at a Crossroad? Reflection on NoSQL ................................................................. 45

Maria Indrawan-Santiago
Session 2A: P2P Computing and Networks

Experimental Evaluation of Anonymous Protocols under the JXTA Middleware ................................................................. 52
Joan Arnedo-Moreno, Noemí Pérez-Gilabert, and Marc Domingo-Prieto

Trustworthy Group Formation Algorithm Based on Decentralized Trust Management in Distributed Systems ................................................................. 58
Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Dynamic Reconfiguration of Chord Ring Based on Physical Network and Finger Table Information ................................................................. 66
Yuta Shimano and Fumiaki Sato

A Chunk Scheduling Based on Chunk Diffusion Ratio on P2P Live Streaming ................................................................. 74
Yoshiki Sakata, Kazuyuki Takayama, Rei Endo, and Hiroshi Shigeno

Session 2B: Intelligent Systems and Networking

Estimating the Number of Lanes on Rapid Road Map Survey System Using GPS Trajectories as Collective Intelligence ................................................................. 82
Nobuyoshi Sato, Tsuyoshi Takayama, and Yoshitoshi Murata

Local Area Network Reactivation in Never Die Network for a Large Scale Disaster ................................................................. 89
Noriki Uchida, Kazuo Takahata, Yoshitaka Shibata, and Norio Shiratori

Performance Evaluation of DYMO Protocol in Different VANET Scenarios ................................................................. 97
Evjola Spaho, Makoto Ikeda, Leonard Barolli, Fatos Xhafa, Aleksander Biberaj, and Makoto Takizawa

Integrating Information Systems Business Rules into a Design Model ................................................................. 104
Mohammed Bonais, Wenny Rahayu, and Eric Pardede

Session 3A: Distributed Computing and Networking

The Extended Transmission Power Consumption Model for Communication-Based Applications ................................................................. 112
Tomoya Enokido and Makoto Takizawa

Evaluation of an Energy-Aware Selection Algorithm for Computation and Storage-Based Applications ................................................................. 120
Takuro Inoue, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

RAIDv: Extensible RAID1 Based on Voting ................................................................. 128
Minoru Uehara

Session 3B: Mobile Ad Hoc Networks

A Comparative Study of a MANET Testbed Performance in Indoor and Outdoor Stairs Environment ................................................................. 134
Masahiro Hiyama, Elis Kulla, Makoto Ikeda, Leonard Barolli, and Muhammad Younas
Simulation Performance of a MANET Using Static Source and Destination Considering AODV Routing Protocol .................................................................................................................................141
  Elis Kulla, Makoto Ikeda, Leonard Barolli, Muhammad Younas, Kazunori Uchida, and Makoto Takizawa

An Implementation of Visualization System for Visualizing Network Topology and Packet Flow in Mobile Ad Hoc Networks .................................................................................................................................148
  Akio Koyama, Shohei Sato, Leonard Barolli, and Makoto Takizawa

TCP Congestion Control in MANETs for Multiple Traffic Considering Proactive and Reactive Routing Protocols .................................................................................................................................156
  Makoto Ikeda, Elis Kulla, Masahiro Hiyama, Leonard Barolli, Muhammad Younas, and Makoto Takizawa

Session 4A: Multimedia Systems and Applications

Design and Evaluation of Multimedia Quorum-Based Synchronization Protocols .................................................................................................................................164
  Tadateru Ohkawara, Alilxier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Geological Visualisation with Augmented Reality .................................................................................................................................172
  Dylan Mathiesen, Trina Myers, Ian Atkinson, and Jarrod Trevathan

Extending Service Coverage Using FGS-Aware Blind Repetition .................................................................................................................................180
  Juyoung Park, Jaemyoun Lee, Junbeom Hur, and Kyungtae Kang

Evaluation of a Seamless Surveillance Video Monitoring System Used by High-Speed Network and High-Resolution Omni-directional Cameras .................................................................................................................................187
  Takuma Kon, Noriki Uchida, Koji Hashimoto, and Yoshitaka Shibata

Session 4B: Wireless Sensor Networks

A Boundary Node Detection Based Solution for Minimizing the Effects of Nodes Distribution over Key Exchange in Group Based WSN .................................................................................................................................194
  Rabia Latif and Asad Raza

Energy-Efficient Data Gathering Using Traffic Reduction Based on Change in Data Characteristics in Wireless Sensor Networks .................................................................................................................................200
  Shinya Kondo, Akimitsu Kanzaki, Takahiro Hara, and Shojiro Nishio

A Fuzzy-Based Simulation System for Controlling Sensor Speed in Wireless Sensor Networks .................................................................................................................................208
  Qi Wang, Leonard Barolli, Elis Kulla, Arjan Durresi, Aleksander Biberaj, and Makoto Takizawa

Node Placement in WMNs and Visualization of Evolutionary Computation Process Using WMN-GA System .................................................................................................................................214
  Tetsuya Oda, Admir Barolli, Evjola Spaho, Leonard Barolli, Fatos Xhafa, and Jiro Iwashige
Session 5A: Social Networks

Mobile Social Game Design from the Perspective of Persuasive Technology ......................................................221
   Toshihiko Yamakami

Transition Analysis of Mobile Social Games from Feature-Phone to Smart-Phone ..................................................226
   Toshihiko Yamakami

Feedback Capacity of Random Networks ..................................................................................................................231
   Maytham Safar, Khaled Mahdi, and Ghufran Al-Shiridah

Finding Hidden Nodes by Checking for Missing Nodes against Past Social Networks ............................................239
   Alan Chia-Lung Chen, Mohamad Elzohbi, Ahmed Elhajj, Konstantinos F. Xylogiannopoulos,
   Panagiotis Karampelas, Mick Ridley, and Reda Alhajj

Session 5B: Secure Systems and Networks

TCADS: Trustworthy, Context-Related Anomaly Detection for Smartphones ...............................................................247
   Ingo Bente, Bastian Hellmann, Joerg Vieweg, Josef von Helden, and Gabi Dreo

Vulnerability Analysis of Relay Set Selection Algorithms for the Simplified Multicast Forwarding (SMF) Protocol for Mobile Ad Hoc Networks ........................................................................................................255
   Jiazi Yi and Thomas Clausen

A Proposal of Security Advisory System at the Time of the Installation of Applications on Android OS ........................................................………………………………………………………………………………261
   Takayuki Matsudo, Eiichiro Kodama, Jiahong Wang, and Toyoo Takata

Session 6A: Communication Networks and Protocols

Theoretical Suggestion of Policy-Based Wide Area Network Management System (wDACS System Part-I) .............................................................................................................................................268
   Kazuya Odagiri, Shogo Shimizu, Naohiro Ishii, and Makoto Takizawa

The QoS-Aware Order Prediction Scheduling (QOPS) Scheme for Video Streaming Using the Multi-path Datagram Congestion Control Protocol (MP-DCCP) ..........................................................................................276
   Chung-Ming Huang, Yih-Chung Chen, and Shih-Yang Lin

Application Layer Traffic Engineering for Multipoint Communication System ...........................................................284
   Yumi Nakayama, Katsuhiko Kaji, and Nobuo Kawaguchi

Proposal and Evaluation of Ant-Based Routing with Autonomous Zoning for Convergence Improvement ......................................................................................................................................................290
   Naomi Kuze, Naoki Wakamiya, and Masayuki Murata

Session 6B: Web and Internet Applications

A Mechanism of Trailing the Footprint for the Previously Visited Web Pages to Ease a Meta-Knowledge-Based Search ..................................................................................................................................298
   Keizo Sato, Yoshitaka Adachi, Makoto Nakashima, and Tetsuro Ito
Building an Information System for Reality Mining Based on Communication Traces ........................................306
Matthias Steinbauer and Gabriele Kotsis

Riskr: A Low-Technological Web2.0 Disaster Service to Monitor and Share
Information .................................................................................................................................................................311
Jess Farber, Trina Myers, Jarrod Trevathan, Ian Atkinson, and Trevor Andersen

Community Site for Music Therapists Based on the Session Records of Music Therapy ........................................319
Naoko Kosugi and Mayu Kondo

Session 7A: Mobile and Wireless Networks
An Interface for Simulating Node Placement in Wireless Mesh Networks ..........................................................326
Fatos Xhafa, Albert Bravo, Admir Barolli, and Makoto Takizawa

Effects of Directional Receiving for MAC-Level Broadcasting on Wireless Ad Hoc
Networks .....................................................................................................................................................................334
Tetsuya Shigeyasu and Hiroshi Matsuno

Performance Evaluation of WSNs Considering MAC and Routing Protocols Using
Goodput and Delay Metrics ........................................................................................................................................341
Tao Yang, Elis Kulla, Tetsuya Oda, Leonard Barolli, Muhammad Younas, and Makoto Takizawa

Dynamic Superframe Selection Scheme for High-Speed Wireless Networks .........................................................349
Suhaimi Bin Abd Latif and Mohammad Abdur Rashid

Session 7B: Ubiquitous and Pervasive Computing Applications
Building and Evaluating a Mobile Application for an Academic Library ............................................................357
Stan Kurkovsky and Wittawat Meesangnil

A Handling Management System for Freight with the Ambient Calculus and UHF
RFID Tags ..................................................................................................................................................................364
Toru Kato and Masahiro Higuchi

General Pattern Discovery for Social Game on Facebook ......................................................................................372
Martin M. Weng, Guangyu Piao, Neil Y. Yen, and Timothy K. Shih

Session 8A: Secure Systems and Trust Management
On Remote Attestation for Google Chrome OS ........................................................................................................376
Ingo Bente, Bastian Hellmann, Thomas Rossow, Joerg Vieweg, and Josef von Helden

Robust Biometrics-Based Remote User Authentication Scheme Using Smart Cards ........................................384
Toan Thinh Truong, Minh-Triet Tran, and Anh-Duc Duong

Trust Management of Social Networks in Health Care ..........................................................................................392
Pawat Chomphoosang, Arjan Durresi, Mimoza Durresi, and Leonard Barolli
ADPNA 2012

Session: Distributed Networks and Applications

Ordered Delivery of Messages in Group Communication Protocols ................................................................. 397
  Dilawer Duolikun, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Trustworthiness of Peers in P2P Overlay Networks .................................................................................. 402
  Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

An Approach Mining Cyclic Association Rules in E-Commerce ................................................................. 408
  Nguyen Dinh Thuan, Nguyen Gia Toan, and Nguyen Lam Vu Tuan

Online Slicing Analysis in Adverse Drug Reaction Data Warehouse .................................................. 412
  Xiuzhen Feng, Xiaohong He, and Bianling Feng

CPSAT 2012

Session 1: Cyber-Physical Systems and Cloud Web Services

Cyber-Physical Systems as an Enabler for Next Generation Applications .................................................. 417
  Jaipal Singh and Omar Hussain

PID Controller for Temperature Control with Multiple Actuators in Cyber-Physical Home System ......................... 423
  Wai Wai Shein, Yasuo Tan, and Azman Osman Lim

Detecting and Mitigating HX-DoS Attacks against Cloud Web Services .................................................... 429
  Ashley Chonka and Jemal Abawajy

Session 2: Sensor Networks and Healthcare Systems

jxSensor: A Sensor Network Integration Layer for JXTA ............................................................................. 435
  Marc Domingo-Prieto, Joan Arnedo-Moreno, and Xavi Vilajosana-Guillén

Empirical Study of Decision Trees and Ensemble Classifiers for Monitoring of Diabetes Patients in Pervasive Healthcare ................................................................. 441
  A.V. Kelarev, A. Stranieri, J.L. Yearwood, and H.F. Jelinek

Establishing Context for Software Agents in Pervasive Healthcare Systems .................................................. 447
  Cedric Perrot, Gavin Finnie, and Iain Morrison

DEMoC 2012

Session: Content Delivery Scheduling and Broadcasting Systems

A Scheduling Scheme for Improving Error Resilience on Media Data Broadcasting ........................................ 453
  Yusuke Gotoh and Hideo Taniguchi

Novel Control Method for Preventing Missed Deadlines in Periodic Scheduling ............................................. 459
  Yuuki Furukawa, Toshihiro Yamauchi, and Hideo Taniguchi
TeleCaS: Division Based Broadcasting System Considering Sequential Playback .................................................................................................465
  Akihiro Kimura, Yusuke Gotoh, and Hideo Taniguchi

Video Data Reception Methods Considering Playing Position on Hybrid Broadcasting Environments .................................................................................................................................471
  Tomoki Yoshihisa and Shojiro Nishio

**HETNET 2011**

**Session 1: Heterogeneous Networking and Applications**

A Novel Server System to Support Different Types of Communication Services for Applications ..................................................................................................................477
  J. Elton and P.W.H. Chung

Crowdsourcing in Heterogeneous Networked Environments - Opportunities and Challenges ...........................................................................................................483
  Axel Korthaus and Wei Dai

Intelligent Cargo Tracking System Based on the Internet of Things ..................................................................................................................489
  Lixin Zhou and Catherine Xiaocui Lou

An Integration Technology for Socially Aware Mobile Applications in Heterogeneous Networking Environments ........................................................................494
  Xiaomin Zhu, Donghua Chen, Wei Dai, and Runtong Zhang

**Session 2: HETNETs for Enterprise and Business**

Integration of Mobile-Devices-Based Personal Analytics into Enterprise Organizational Transformation Scenarios ........................................................................500
  Serguei Dobrinevski

HetNet Framework for Supply Chain Management ..........................................................................................................................506
  Paul Moynihan and Wei Dai

Developing an Integrated Supply Chain System for Small Businesses in Australia: A Service-Oriented PHOENIX Solution ..................................................512
  Yongqiang Li, Wei Dai, Anona Armstrong, Andrew Clarke, and Miaoli Du

Robust Supply Chain Services System through Optimization Modeling for Enterprises .........................................................................................518
  Catherine Xiaocui Lou and Wei Dai

**INVITE 2012**

**Session 1: Multimedia Applications**

A Preliminary Evaluation for Effectiveness of Media Switching Function ...................................................................................................................524
  Kaoru Sugita and Masao Yokota

A Method for User-Location Estimation for Intuitive Input System on Very Large Display Space .................................................................................................528
  Akira Sakuraba, Tomoyuki Ishida, and Yoshitaka Shibata

xii
Digital 3D Ukiyoe Using the Effect of Motion Parallax .......................................................... 534
  Tetsuro Ogi, Yoshisuke Tateyama, Hao Lu, and Erika Ikeda

Session 2: Tiled Display

Approaches to Display of Ultra-resolution Video Streaming by Multi-transmission
on Tiled Display Environment ................................................................. 540
  Yasuo Ebara

A Universal Multimedia Contents on a Tiled Display Equipment .......................................... 546
  Kaoru Sugita and Masao Yokota

A Unified Large Scale Disaster Information Presentation System Using Ultra GIS
Based Tiled Display Environment ........................................................................... 550
  Tomoyuki Ishida, Akira Sakuraba, Noriki Uchida, Koji Hashimoto, and Yoshitaka Shibata

INWC 2012

Session: Information Networking and Wireless Communication Systems

An Algorithm to Estimate Propagation Parameters Based on 2-Ray Model .............................. 556
  Kazunori Uchida, Masafumi Takematsu, and Junichi Honda

Numerical and Experimental Study on Confinement of Microwave in Dielectric
and Metallic Post Array Waveguide ................................................................. 562
  Hiroshi Maeda, Huili Chen, Kazuya Tomiura, and Takuya Shinohara

An Algorithm for Analysis of Reflected and Diffracted Fields from a Polyhedron Type
of Target above a Plane-Ground ........................................................................ 567
  Junichi Honda and Takuya Otsuyama

A Study on the Reading Characteristics of Colored 2-Dimensional Code .............................. 572
  Toshihiko Wakahara, Samretwit Damri, and Noriyasu Yamamoto

ISSE 2012

Session: Intelligent Sensors and Smart Environments

Application of RFID Technology for In-House Drug Management System .......................... 577
  Malabika Parida, Huan-Chi Yang, Shiaw-Wen Jheng, and Chung-Jen Kuo

A Location-Based Personal Task Management Application for Indoor and Outdoor
Environments ........................................................................................................ 582
  Chi-Yi Lin, Ming-Tze Hung, and Wei-Hsun Huang

Posture Recognition with G-Sensors on Smart Phones ......................................................... 588
  Hui-Huang Hsu, Kang-Chun Tsai, Zixue Cheng, and Tongjun Huang

Physiological Angry Emotion Detection Using Support Vector Regression ........................... 592
  Chuan-Yu Chang, Yu-Mon Lin, and Jun-Ying Zheng
ITIS 2012

Session 1: Innovative Systems

A Multicast Routing Protocol for Wireless Mesh Networks Considering Network Load .................................................597
Kiyotaka Oe and Akio Koyama

On Automatic Flying Distance Measurement on Ski Jumper’s Motion Monitoring
System ........................................................................................................................................................................603
Nobuyoshi Sato, Tsuyoshi Takayama, and Yoshitoshi Murata

Design of Management System for Arrayed Returnable Containers .................................................................610
Rei Itsuki

Storage Deduplication by Virtual Large-Scale Disks ..........................................................................................615
Ritu Endo, Junichi Kumamimi, and Minoru Uehara

Session 2: Innovative Applications

The Evaluations of Desktop as a Service in an Educational Cloud .................................................................621
Shinichiro Kibe, Teruaki Koyama, and Minoru Uehara

Proposal for Cloud Search Engine as a Service ...............................................................................................627
Takamasa Miyano and Minoru Uehara

Evaluation of a Web-Based Programming Environment .............................................................................633
Hideaki Yanagisawa

Long Term Management of Web Cache for Web Archive .............................................................................639
Ryunosuke Ozawa and Minoru Uehara

MCCTA 2012

Session 1: Mobile and Cloud Computing

Meta Index Model Based Matchmaking for Human Resource Management: An Approach for Similarity Comparing between Employee and Job Position Using Meta Index Model ..............................................................645
Keon Soo Lee and Seungmin Rho

A Study on the Design of Digital Narrowband Communication System for Next Generation Group Communication .........................................................................................................................650
Yang Sun Lee, Ze Guang Jin, Jae Myeong Choi, and Sang-Soo Yeo

Mobile Cloud Computing for Biometric Applications ..................................................................................654
Milos Stojmenovic

Mobile Crowd Computing with Work Stealing .............................................................................................660
Niroshinie Fernando, Seng W. Loke, and W. Rahayu
Session 2: Modeling, Trust and Security

Trust Based Sensor Network Clustering with Load Balance Factors .................................................................666
Mucheol Kim and Sang Oh Park

A Neural Network Model Using Extended Feature-Based Neuron: NNDFF .................................................................670
Seokhwan Yang and Mokdong Chung

Improved Differential Fault Analysis on Block Cipher SEED-128 ...........................................................................675
Yuseop Lee, Jongsung Kim, Seokhie Hong, and Changhoon Lee

Automated Security Level Conversion on Security Documents in Different Domains ..............................................681
Jae-Myeong Choi and Sang-Soo Yeo

NeoFusion 2012

Session 1: Ubiquitous Computing

Providing High Availability for Distributed Stream Processing Application with Replica Placement .................................................................................................685
Rong He, Zhongzhi Luan, Yuanqiang Huang, Zhendong Cheng, Depei Qian, and Gang Guan

Context-Based Hybrid Semantic Matching Framework for E-mentoring System .................................................................691
Mye Sohn, Young Min Kwon, and Hyun Jung Lee

Construction of Tag-Based Dynamic Data Catalog (TaDDCat) Using Ontology .................................................................697
Hyun Jung Lee and Mye Sohn

Ambient Widget: An Ambient Information System Using Gesture-Based Interactions ..................................................703
Seongil Lee, Kyohyun Song, Jihwan Kim, and Jiho Choi

Session 2: Wireless and Multimedia Networking

Efficient Statistical Computing on Multicore and MultiGPU Systems ........................................................................709
Yulong Ou, Bo Li, Hailong Yang, Zhongzhi Luan, and Depei Qian

Routing Algorithm Based on Ant Colony Optimization for DTN Congestion Control ....................................................715
Chengjun Wang, Baokang Zhao, Wei Peng, Chunqing Wu, and Zhenghu Gong

CLIP: A Distributed Emulation Platform for Research on Information Reconciliation ....................................................721
Dingjie Zou, Baokang Zhao, Chunqing Wu, Bo Liu, Wanrong Yu, Xiangchun Ma, and Hongxin Zou

Following Routing: An Active Congestion Control Approach for Delay-Tolerant Networks ................................................727
Chengjun Wang, Baokang Zhao, Wei Peng, Chunqing Wu, and Zhenghu Gong

Session 3: Ubiquitous Services and Applications

A Ubiquitous Smart Learning Platform for the 21st Smart Learners in an Advanced Science and Engineering Education ................................................................................................................733
JongSuk Ruth Lee, Young Jin Jung, Sun Rae Park, Junglok Yu, Du-seok Jin, and Kumwon Cho
<table>

WReCS 2012

Session 1: Bioinspired Computing

Biologically Inspired Hardware: Status and Perspectives (Invited Talk) .......................................................... 811
Salvatore Vitabile

Design of Development as a Service in the Cloud ................................................................. 815
Katsuyoshi Matsumoto, Shinichiro Kibe, Minoru Uehara, and Hideki Mori

Session 2: Reconfigurable Systems

Castle of Chips: A New Chip Stacking Structure with Wireless Inductive Coupling
for Large Scale 3-D Multicore Systems .................................................................................. 820
Hideharu Amano

Extension of Memory Controller Equipped with MuCCRA-3-DP: Dynamically
Reconfigurable Processor Array ......................................................................................... 826
Toru Katagiri, Kazuei Hironaka, and Hideharu Amano

A Uniform Partitioning Method for Mono-Instruction Set Computer (MISC) ......................... 832
Hiroyuki Ito and Minoru Watanabe

Session 3: Energy Saving

Proposed Sensor Network for Living Environments Using Cloud Computing ....................... 838
Yuichiro Takabe, Katsuyoshi Matsumoto, Motoi Yamagiwa, and Minoru Uehara

A Study on Constructing an Energy Saving Cloud System Powered by Photovoltaic
Generation .......................................................................................................................... 844
Motoi Yamagiwa and Minoru Uehara

Storage-Side Computing for Data Management in Private and Public Clouds ...................... 849
Tatsunori Takahashi, Hidenao Tanaka, Shinichiro Kibe, and Minoru Uehara

WSSM 2012

Session 1: Social Media Experiences

Evaluating the Usefulness of Online Reviews ................................................................. 855
Jun Iio

User Acceptance of Mobile Business Intelligence Services ............................................. 861
Tobias Brockmann, Stefan Stiegltz, Johannes Kmieciak, and Stephan Diederich

How to Encourage Intermediary on Social Media .......................................................... 867
Yui Takizawa, Kazutaka Tsuji, and Tatsuhiro Yonekura

Investigating Trends in Social TV Services Based on User Participating Experiments ........ 873
Narichika Hamaguchi, Hiroshi Fujisawa, Masaru Miyazaki, Ritsu Yonekura, and Satoshi Nishimura
Session 2: Web Tools and Social Media

A Personal Branding for University Students by Practical Use of Social Media ..............................................................879
  Yoshihiro Kawano, Yuka Obu, Yorinori Kishimoto, Takashi Yamaguchi, Eiji Nunohiro,
  and Tatsuhiro Yonekura

Web-Based Tool for Programming Interactive Animations in Terms
of State-Transition Diagrams ................................................................................................................................................885
  Naoto Takama, Michitoshi Niibori, Shusuke Okamoto, Masaru Kamada, and Tatsuhiro Yonekura

An Authoring Tool for Flash Games in ActionScript3.0 ..........................................................889
  Michitoshi Niibori, Yutaro Arisawa, Shusuke Okamoto, Masaru Kamada, and Tatsuhiro Yonekura

Authoring Tool for Flash 3D Animations in Terms of State-Transition Diagrams .................................893
  Makoto Rokujo, Michitoshi Niibori, Shusuke Okamoto, Masaru Kamada, and Tatsuhiro Yonekura

Author Index ........................................................................................................................................................................898
