47th AES International Conference 2012

Music Induced Hearing Disorders: New Technologies for Measurement and Prevention

Chicago, Illinois, USA
20-22 June 2012
# TABLE OF CONTENTS

Keynote: Bringing Together the Cultures of Music, Audio and Hearing Common Goals and Common Language in Different Dialects ................................................................. 1
    S. Benjamin Kanters

Musical Instrument Recognition in Combined Electric and Acoustic Cochlear Implant Simulations .................................................. 5
    Shaikat Hossain, Peter Assmann

A Pilot Study of Changes in Otoacoustic Emissions After Exposure to Live Music ................................................................. 11
    Rodrigo Ordonez, Dorte Hammershoi, Carsten Borg, Jon Voetmann

New Measurement Techniques for Portable Listening Devices: Technical Report .................................................... 20
    Cory D. F. Portnuff, Brian Fligor, Kathryn Arehart

Electroacoustic Performance Requirements for Assistive Listening Systems for Hard of Hearing and Hearing Impaired Listeners ................................................................. 25
    Peter Mapp

Dietary Supplements for Protection of the Inner Ear .......................................................................................... 36
    Colleen Le Prell

Value of DPOAEs in Detecting Changes Associated with Music Overexposure ................................................................. 44
    Sridhar Kishnamurtie, Leslie Rolph

Protection and Measurement Methods and Devices for Occupationally Hazardous Sound Levels in Pro Audio ........................................................................................................ 58
    Thom Fiegle

Verification of Flat Attenuation Characteristics of Musicians Earplugs™ ................................................................. 62
    Brian Fligor

Modeling Hearing Impairment and Its Effect on Auditory Quality by Auralization .................................................... 71
    Birger Kollmeier, Thomas Brand, Rainer Huber, Volker Hohmann

Noise Monitoring System Employing Psychoacoustic Noise Dosimetry ............................................................................. 80
    Bozena Kostek, Jozef Kotus, Andrzej Czyzewski

New Tools for Hearing Loss Screening and Tinnitus Diagnosing .................................................................................. 92
    Bozena Kostek, Andrzej Czyzewski, Lukasz Kosikowski, Jozef Kotus, Pitor Schomski

Workplace Noise Regulations in the Music Industry: A Square Peg and a Round Hole .................................................. 102
    Robert M. Ghent Jr.

Potential Errors of Real-Ear-to-Coupler-Difference Method Applied for a Prediction of Hearing Aid Performance in an Individual Ear .................................................. 110
    Oleg Saltykov, Anton Gebert

Estimating Individual Sound Pressure Levels at the Eardrum in Music Playback Over Insert Headphones .................................. 118
    Ville Sivonen, Sami Oksanen, Marko Hiipakka
