ICSEA 2012

The Seventh International Conference on Software Engineering Advances

November 18-23, 2012

Lisbon, Portugal

ICSEA 2012 Editors

Herwig Mannaert, University of Antwerp, Belgium
Luigi Lavazza, Università dell'Insubria - Varese, Italy
Roy Oberhauser, Aalen University, Germany
Elena Troubitsyna, Åbo Akademi University, Finland
Michael Gebhart, Gebhart Quality Analysis (QA) 82, Germany
Osamu Takaki, Japan Advanced Institute of Science and Technology (JAIST) – Ishikawa, Japan
# TABLE OF CONTENTS

## ICSEA 1: SOFTWARE DEPLOYMENT AND MAINTENANCE

**Enhancing Contexts for Automated Debugging Techniques** ................................................................. 1  
Yan Lei, Chengsong Wang, Xiaoguang Mao, Quanyuan Wu  

**Leveraging Traceability between Code and Tasks for Code Review and Release Management** ........................................... 8  
Nitesh Narayan, Alexander Delater, Jan Finis, Yang Li  

**A Multiple View Environment for Collaborative Software Comprehension** .......................................................... 15  
Glauco De F. Carneiro, Carlos F. R. Conceição, José M. N. David  

**Assisting bug Triage in Large Open Source Projects Using Approximate String Matching** ........................................ 22  
Amir H. Moin, Günter Neumann

## ICSEA 2: SPECIALIZED SOFTWARE ADVANCED APPLICATIONS I

**Using Normalized Systems Patterns as Knowledge Management** ................................................................................... 28  
Peter De Bruyn, Philip Huysmans, Gilles Oorts, Dieter Van Nuffel, Herwig Mannaert, Jan Verelst, Arco Oost  

**An UML-based Authoring Approach of S1000D Procedural Data Modules and Tool Support** ............................................. 34  
Youhee Choi, Jeong-Ho Park, Byungtae Jung, Dongsun Lim  

**Algorithmic Software Adaptation Approach in Mobile Augmented Reality Systems** .......................................................... 40  
Oleksii Yekshyn, Mykola Tkachuk  

**A Case Study in Modeling a Fault-tolerant Satellite System Through Implementation of Dynamic Reconfiguration via Handshake** .......................................................................................................................... 44  
Kashif Javed, Elena Troubitsyna  

**Transformation of Medical Service Ontology to Relational Data Models** ........................................................................ 50  
Osamu Takaki, Izumi Takeuti, Koichi Takahashi, Noriaki Izumi, Koichiro Murata, Mitsuru Beda, Koiti Hasida

## ICSEA 3: ADVANCED DESIGN TOOLS FOR DEVELOPING SOFTWARE I

**BrainTool: A Tool for Generation of the UML Class Diagrams** ............................................................................................... 60  
Oksana Nikiforova, Konstantins Gusarovs, Olegs Gorbiks, Natalija Pavlova  

**Decoupled Model-Based Elicitation of Stakeholder Scenarios** ............................................................................................... 70  
Gregor Gabrysjak, Regina Hebig, Holger Giese  

**A Formal High-level Modeling Approach to Develop Reliable Components in Visionbased Robotics** ........................................ 78  
Andrea Laziana, Mattia Rossetti, Patrizia Scandurra  

**Aligning the Normalized Systems Theorems with Existing Heuristic Software Engineering Knowledge** ......................... 84  
Peter De Bruyn, Geert Dierckx, Herwig Mannaert  

**A Description Language for QoS Properties and a Framework for Service Composition Using QoS Properties** ...................... 90  
Chiaen Lin, Krishna Kavi, Sagarika Adepu

## ICSEA 4: SPECIALIZED SOFTWARE ADVANCED APPLICATIONS II

**Context Awareness in Learning Human Habits** ......................................................................................................................... 98  
Szymon Bobek, Weronika Adrian  

**Automated Construction of Data Integration Solutions for Tool Chains** ................................................................................. 102  
Matthias Biehl, Jiarrui Hong, Frédéric Loiret

## ICSEA 5: BUSINESS TECHNOLOGY I

**A Neurolinguistic Method for Identifying OSS Developers’ Context-Specific Preferred Representational Systems** .................. 112  
Methanias Colaço Júnior, Manoel Mendonça, Mario Farias, Paulo Henrique, Daniela Corumba
Architecture Centric Tradeoff - A Decision Support Method for COTS Selection and Life Cycle Management
Subhankar Sarkar ............................................................................................................................... 122

Implementation of Business Processes in Service Oriented Architecture ........................................ 129
Krzysztof Sacha, Andrzej Ratkowski

On Re-Architecting Legacy Software Systems: The Case of Systems at Umm Al-Qura University ........ 137
Basem Alkazemi

ICSEA 6: BUSINESS TECHNOLOGY II

Business Process Modeling in Object-Oriented Declarative Workflow ............................................ 141
Marcin Dabrowski, Michal Drabik, Mariusz Trzaska, Kazimierz Subieta

Data Transformations Using QVT Between Industrial Workflows and Business Models in BPMN2 ........ 147
Corina Abdelahad, Daniel Riesco, Alessandro Carrara, Carlo Comin, Carlos Kayka

A Data-driven Workflow Based on Structured Tokens Petri Net ............................................................ 154
Nahta Haddar, Mohamed Tnær, Faez Gargouri

Bankruptcy and Financial Standing Models Application for SMEs ..................................................... 161
David Plandor, Lenka Landryová

ICSEA 7: ADVANCED DESIGN TOOLS FOR DEVELOPING SOFTWARE II

Automated Test Code Generation Based on Formalized Natural Language Business Rules .................. 165
Christian Bacherler, Ben Moszkowski, Christian Facchi, Andreas Huebner

Using SS/UCD to Develop Consistent Use Case Models: An Industrial Case Study ............................. 172
Mohamed El-Attar

A Systematic Mapping Study on Domain-Specific Languages ............................................................ 179
Leandro Nascimento, Daniel Viana, Paulo Silveira Neto, Dhiego Martins, Vinicius Garcia, Silvio Meira

Specifying and Designing Exception Handling with FMEA ............................................................... 188
Tsuneo Nakanishi, Kenji Hisazumi, Akira Fukuda

Orchestration Definition from Business Specification ............................................................................ 197
Charif Mahmoudi, Fabrice Mourlin

ICSEA 8: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT I

Value-Based Technical Debt Model and Its Application ....................................................................... 205
Marek G. Stochel, Mariusz R. Wawrowski, Magdalena Rabiej

An Advanced Interactive Visualization Approach for Component-Based Software: A User Study .......... 213
Jaroslav Snajberk, Lukas Holy, Kamil Jezek, Premek Brada

Representing Topic Event-Based Systems using Pluggable Units ...................................................... 220
Fernando Barros

Towards an Approach to Represent Safety Patterns ............................................................................ 228
Pablo Oliveira Antonino, Thorsten Keuler, Elisa Yumi Nakagawa

ICSEA 9: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT II

Process Modeling-based Assessment of Software Release Planning: Case Study Results and Experiences ............................................................................................................................... 238
Jos Trienekens, Robbert Slooten

Distributed Software Framework: For Biosphere 2 Land Evolution Observatory (LEO) Autonomic Cyber-Physical System (ACPS) ............................................................................................................................... 243
Shafiul Islam

Understanding the Relationships Within the Medi SPICE Framework ................................................ 254
Derek Flood, Fergal McCaffery, Valentine Casey

Mapping Between Service Designs Based on SoaML and Web Service Implementation Artifacts ........ 260
Michael Gebhart, Jaouad Bouras
ICSEA 10: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT III

Constructing Tool Chains Based on SPEM Process Models ........................................ 267
Matthias Biehl, Martin Törngren

Tracing Requirements and Source Code during Software Development ........................... 274
Alexander Delater, Nitesh Narayan, Barbara Paech

An Empirical Study Identifying High Perceived Value Requirements Engineering Practices in Global Software Development Projects ........................................ 283
Mahmood Niazi, Mohamed El-Atta, Muhammad Usman, Naveed Ikram

Towards Automated Process Assessment in Software Engineering ................................. 289
Gregor Grambow, Roy Oberhauser, Manfred Reichert

ICSEA 11: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT IV

Specification of Formalized Software Patterns for the Development of User Interfaces ................. 296
Danny Ammon, Stefan Wendler, Teodora Kikova, Ilka Philippow

Lowering Visual Clutter of Clusters in Component Diagrams ........................................ 304
Lukas Holy, Jaroslav Snajberk, Premek Brada

A Framework for Characterizing Usability Requirements Elicitation and Analysis Methodologies (UREAM) ................................................................. 308
Jos Trienekens, Rob Kusters

A Multilevel Contract Model for Quality-Driven Service Component Architecture ............... 314
Maryem Rhanoui, Bouchra El Asri

ICSEA 12: SOFTWARE ENGINEERING TECHNIQUES, METRICS, AND FORMALISMS I

Call for Software Tenders: Features and Research Problems ........................................... 320
Jorge Hochstetter, Carlos Carles

BPEL-RF Tool: An Automatic Translation from WS-BPEL/WSRF Specifications to Petri Nets .................. 325
Maria Diaz, Valetin Valero, Hermenegilda Macia, Jose Antonio Mateo, Gregorio Diaz

Automated Reuse of Software Reuse Activities in an Industrial Environment – Case Study Results .......................... 331
Marcas Zinn, Klaus-Peter Fischer-Hellmann, Ronald Schoop

Learning Best K analogies from Data Distribution for Case-Based Software Effort Estimation .. 341
Mohammad Azzeh, Yousef Elsheikg

Predicting Risky Program Source Files ........................................................................ 348
Syed Nadeem Akhan, Syed Haider Abbas Naqvi, Kamran Raza

ICSEA 13: SOFTWARE ENGINEERING TECHNIQUES, METRICS, AND FORMALISMS II

Supporting Time Planning Aligned with CMMI-DEV and PMBOK .................................. 352
Rafael Gonçalves, André Pereira, Christiane Wangenheim

Specification of UML Classes by Object Oriented Petri Nets ........................................ 361
Radek Koci, Vladimir Janousek

A Report on Using Simplified Function Point Measurement Processes ............................ 367
Luigi Lavazza, Geng Liu

An Empirical Evaluation of Effort Prediction Models Based on Functional Size Measures ........ 373
Luigi Lavazza, Sandro Morasca, Gabriela Robiolo

Mapping ASM Specifications to Spec Explorer: Guidelines, Benefits and Challenges ....... 380
Jameleddine Hassine

ICSEA 14: SOFTWARE ENGINEERING TECHNIQUES, METRICS, AND FORMALISMS III

Object Segmentation by Edges Features of Graph Cuts .................................................. 388
Weiwei Du, Yuki Masumoto, Nobuyuki Nakamori

Product Development Time Improvement with Requirements Reuse ............................ 394
Semra Yilmaz Tastekin, Yusuf Murat Erten, Semih Bilgen

Specifying Class Hierarchies and Moose Metrics in Z .................................................. 401
Younès El Amrani
Applying Algebraic Specification To Cloud Computing -- A Case Study of Infrastructure-as-a-Service
GoGrid... 407
Dongmei Liu, Hong Zhu, Ian Bayley

A Holistic Approach to Energy Efficiency Management Systems 415
Ignacio González, María Rodríguez Fernández, Juan Jacobo Peralta, Adolfo Cortés

ICSEA 15: SOFTWARE ENGINEERING TECHNIQUES, METRICS, AND FORMALISMS IV

Structuring Software Reusability Metrics for Component-Based Software Development 421
Danail Hristov, Oliver Hummel, Mahmudul Huq, Werner Janjic

Driving Do-178C Requirements Within the Appropriate Level of Hierarchy 430
Jamie White, Hassan Reza

Abstract State Machines Mutation Operators 436
Jameleddine Hassine

Towards a Knowledge-Based Representation of Non-Functional Requirements 442
Mohamad Kassab, Ghizlane El-Boussaidi

ICSEA 16: SOFTWARE ENGINEERING TECHNIQUES, METRICS, AND FORMALISMS V

Towards Better Comparability of Software Retrieval Approaches Through a Standard Collection of Reusable Artifacts 450
Oliver Hummel, Werner Janjic

Improving IT Infrastructures Representation: A UML Profile 459
Luís Ferreira Da Silva, Fernando Brito e Abreu, Victor Moreira

An Investigation into Reference Architectures for Mobile Robotic Systems 465
Daniel Feitosa, Elisa Yumi Nakagawa

ICSEA 17: SOFTWARE ECONOMICS, ADOPTION, AND EDUCATION

Human Computer Interaction Teaching Method to Encourage Creativity 472
Deller Ferreira

Future Chances of Software Customization: An Empirical Evaluation 479
Michaela Weiss, Norbert Heidenbluth

Experimentation Package for Evaluation of Problems Applied to the Software Project Subject Using PBL 486
Jacson Rodrigues Barbosa, Fabrizzio Alphonsus Alves De Melo Nunes Soares, Auri Marcelo Rizzo Vincenzi

Improving Undergraduate Students' Programming Skills 493
Sukhamay Kundu

ICSEA 18: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT V

Requirements Engineering: A Process Model and Case Study to Promote Standardization and Quality Increase 499
Jose Andre Dorigan, Rodolfo Miranda Barros

Annotated Component-Based Description for Application Composition 506
Christian Brell, Philippe Reneyer, Anne-Marie Pinna-Dery, Michel Rivell

Cognitive Engineering meets Requirements Engineering: Bridging the Traceability Gap 512
Alexandra Mazak, Horst Kargl

Knowledge Management Practices in GSD: A Systematic Literature Review 516
Smeea Arshad, Muhammad Usman, Naveed Ikram

ICSEA 19: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT VI

Modelling the Strategic Alignment of Software Requirements using Goal Graphs 524
Richard Ellis-Braithwaite, Russell Lock, Ray Dawson, Badr Haque

A Constraint-based Method to Compute Semantics of Channel-based Coordination Models 530
Behnaz Changizi, Natallia Kokash, Farhad Arbab
Predicting Quality Requirements Necessary for a Functional Requirement Based on Machine Learning ............................................................................................................................... 540
Ken Tanaka, Haruhiko Kaiya, Atsushi Ohnishi
Abductive Logic Programming with Tabled Abduction .................................................................................................................. 548
Luis Moniz Pereira, Ari Saptawijaya

ICSEA 20: ADVANCES IN FUNDAMENTALS FOR SOFTWARE DEVELOPMENT VII
Towards a Methodology for Hardware and Software Design Separation in Embedded Systems .......................................................... 557
Gaetana Sapienza, Tiberiu Seceleanu, Ivica Crnkovic
Automatic Synthesis of Hardware-Specific Code in Component-Based Embedded Systems ................................................. 563
Luka Lednici, Ivica Crnkovic, Mario Zagar
Modeling Crosscutting Concerns with Roles .................................................................................................................. 571
Fernando Barbosa, Ademar Aguiar
Towards a Glue-Code Specification Framework for Component-Based Systems .......................................................................... 577
Sajjad Mahmood, Mohammed Alqadhi
AO-WAD: A Generalized Approach for Accessible Design within the Development of Web-based Systems .................................................. 581
Adriana Martín, Santa Cruz, Viviana Saldaño, Gabriela Miranda, Gabriela Gaetán

ICSEA 21: AGILE SOFTWARE TECHNIQUES
An Evaluation Framework for Requirements Elicitation in Agile Methods ................................................................................................................. 588
Waleed Helmy, Amr Kamel, Osman Hegazy
An Evaluation Framework for Requirements Envisioning in Agile Methods ............................................................................................... 594
Waleed Helmy, Amr Kamel, Osman Hegazy
AgileKDD: An Agile Business Intelligence Process Model .................................................................................................................. 598
Givanildo Nascimento, Adicinéia Oliveira
The Dilemma of Tool Selection for Agile Project Management .................................................................................................................. 605
Gayane Azizyan, Miganoush Magarian, Mira Kajko-Mattsson

ICSEA 22: ADVANCES IN SOFTWARE TESTING
Framework for Better Efficiency of Automated Testing .............................................................................................................................. 615
Martin Filipsky, Miroslav Bures, Ivan Jelinek
MobiTest: A Cross-Platform Tool for Testing Mobile Applications .................................................................................................................. 619
Ian Bayley, Derek Flood, Rachel Harrison, Clare Martin
Requirement-based Software Testing With the UML: A Systematic Mapping Study .................................................................................. 623
Nesa Asoudeh, Yvan Labiche
Simulation-Based Management for Software Dynamic Testing Processes ..................................................................................................... 630
Mercedes Ruiz, Javier Tuya, Daniel Crespo
A Systematic Approach to Risk-Based Testing Using Risk-annotated Requirements Models ................................................................. 636
Marc-Florian Wendland, Marco Kranz, Ina Schieferdecker

ICSEA 23: SOFTWARE SECURITY, PRIVACY, SAFENESS
An Automatic Security Testing Approach of Android Applications .......................................................................................................................... 643
Stassia Resondry Zafimiharisoa, Sébastien Salva, Patrice Laurencot
An Integrated Process for Developing Safety-critical Systems using Agile Development Methods .................................................................................. 647
Zhensheng Guo, Claudia Hirschmann
ESAC-BPM: Early Security Access Control in Business Process Management ............................................................................................... 650
Mahmoud Fouad Ayoub, Riham Hassan, Hicham Galal Elmongui
Intrusion Detection Using Ensembles ............................................................................................................................................................. 656
Alexandre Balon-Perin, Björn Gambäck, Lillian Røstad
ICSEA 24: ADVANCED MECHANISMS FOR SOFTWARE DEVELOPMENT

Linear Constraints as a Modeling Language for Discrete Time Hybrid Systems .......................................................... 664
   Federico Mari, Igor Melatti, Ivano Salvo, Enrico Tronci

ME-DiT: A Middleware Extension for Digital TV .......................................................... 672
   Victor Hazin Da Rocha, Felipe Silva Ferraz, Heitor Nascimento De Souza, Carlos Ferraz

The Dynamic Composition of Independent Adaptations including Interferences Management .................................. 678
   Sana Fathallah Ben Abdenneji, Stéphane Lavrille, Jean-Yves Tigli, Gaëtan Rey, Michel Riveill

Mission-oriented Autonomic Configuration of Pervasive Systems .......................................................... 685
   Guillaume Grondin, Matthieu Faure, Christelle Urtado, Sylvain Vauttier

ICSEA 25: SOFTWARE PERFORMANCE

The Consolidated Enterprise Java Beans Design Pattern for Accelerating Large-Data J2EE Applications .......................................................... 691
   Reinhard Klemm

Explicit use of Working-set Correlation for Load-balancing in Clustered Web Servers .................................. 699
   Stoyan Garbatov, João Cachopo

Evaluating Performance of Distributed Systems With MapReduce and Network Traffic Analysis .................... 705
   Thiago Vieira, Paulo Soares, Marco Machado, Rodrigo Assad, Vinicius Garcia

Fall Detection of Remote Excavator Control System (POSTER) .......................................................... N/A
   Sun Lim

Author Index
