International Conference on Marine Simulation and Ship Manoeuvrability 1996

(MARSIM’ 96)

Copenhagen, Denmark
9 - 13 September 1996

Editors:

M.S. Chislett

Table of contents

Preface
Organization

1 Simulation
1.1 Safety in navigation
Twenty years of marine simulator (CAORF) operations: Lessons learned during these years
*H. Eda, F.E.Guest & J.J.Puglisi*

Effective representation of light aids to navigation in ship handling simulator
*M.Nuxano*

Safety analysis for the Port of Barcelona (flammable products basin) using a real time manoeuvring simulator
*J.R.Iribarren, J.M.Montero & I.Garcia-Carrasco*

1.2 Navigation technology
The simulation of tug operations in a multiple simulator environment
*B.K.Jakobsen, E.R.Miller, J.H.Wulder & H.Hensen*

The potential application of virtual reality based simulators to shiphandling and marine operations
*E.R.Miller, M.Fitch & R.Castillo*

A study on a support of decision-making for collision avoidance in INS
*Y.Ishioka, K.Kose, H.Kobayashi, C.Yang, S.Nakamura & H.Yamada*

A multi vessel training system for high speed craft
*A.S.Christensen & P.Schjeldal Jensen*

1.3 Curriculum/training
The need for improved curriculum development in marine simulation training
*P.Barber*
Inland waterways training using simulation piloting
L.L. Daggett
89
A study of trainees’ learning attitudes towards shiphandling simulator training
D.-L. Fang
97
Simulator time and its sea time equivalence (phase I and II)
J.H. Walder, J.M.C. Schraagen, M. van Hattem & F.L.A. Bloot
109
Instruction, training and expertise advancement of pilots: The key elements in obtaining
the highest possible quality of certified pilots in the Netherlands
H.A. Dijkhuizen, Pden Butten & B.R. Koning
125
Methodology for bridge simulator skills assessment
S.J. Cross
145

1.4 Human factors / design

Keynote lecture: Human factors and ergonomics for maritime safety
N. Moray
155
Development of harbor capability assessment simulation system by the application of fuzzy
algorithm
161
A statistical study of mariners’ behaviour in collision avoidance at sea
I. Zhao, W.G. Price, P.A. Wilson & M. Tan
169
Cognitive aspects of the captain’s work in a critical situation
T. Clemmensen
177
Beyond bridge resource management: The risk management culture of the U.S. Coast Guard
W.E. Hanson
191

1.5 Full mission and PC simulators

Insurance and simulation: The next accident that does not happen could be yours
P. Pols & S. Aggевall
203
Computer system of simulation of ship’s motion
Z. Kitowski, J. Garus, B. Zak
213
Full integration simulation using both engine room and bridge simulators, design
and experiences
M. J. van der Marel, F. S. H. Verkerk & M. Harms
221
Applying prototype ship transit data to simulator validation
D. Webb & R. T. Wooley
225
The selection and training of simulator instructors
J. D. Douglas
237
1.6 The STCW Convention

Simulation and the revised 1978 STCW Convention  
D.F.Drawn  

257

The revised STCW Convention and the new simulator performance standards:  
Some implications for simulator designers, operators and instructors  
P.M.Muirhead  

267

An analysis of marine simulator instructors qualifications and training needs  
R.M.Mercer & D.Sharpe  

The role of simulators and the qualifications of instructors and assessors under the STCW Convention  
M.L.Barnett  

275

STCW 1995 redemption or receivership  
C.R.Pillsbury  

285

2 Manoeuvring

2.1 Manoeuvring standards

Assessment of ship manoeuvrability based on IMO resolution No. A.751  
C.-G.Kang & J.-H.Kim  

293

On ship manoeuvrability estimation based on IMO resolution No. A.751(18)  
E.Nikolaev, T.Inatina & M.Lebedeva  

303

A classification society's experience with IMO resolution No. A.751(18)  
A.E.Raastad  

309

2.2 New technologies in manoeuvring

Shiphandling at low speed in deep and shallow water  
K.Martinsen  

321

New manoeuvring sea trial system using DGPS  

333

Development of a collision avoidance system considering the navigation plan  
K.P.Rhee & H.J.Lee  

341

Ability of berthing assisted by joy stick controller  
M.Endo, H.Kobayashi & Y.Murayama  

349

A study of supporting system for berthing maneuver  
H.Kobayashi  

357

2.3 Prediction of hydrodynamic forces

Keynote lecture: Prediction of ship manoeuvrability: State of the art  
M.Fujino  

371
Measurements of stern flow field of a ship in oblique towing motion
K. Nonaka, T. Nimura, T. Haraguchi & M. Ueno

Non-linear hydrodynamic hull forces derived from segmented model tests
J. P. Hoeft & F. H. A. Quadvlieg

On a prediction method of hydrodynamic forces acting on ship hull including the effect of hull form
K. Kijima, Y. Furukawa & K. Yukiwa

Calculation of manoeuvring hydrodynamic force including the effect of viscosity
Liu Zuyuan, Zhang Xiedong & Wu Xiuheung

Performance of an enhanced rudder force prediction model in a ship manoeuvring simulator
A. F. Molland, S. R. Turnock & P. A. Wilson

Hydrodynamic forces on a ship moving with constant rudder angle: A theoretical treatment of rudder angle test
H. Yasukawa, Y. Yoshimura & K. Nakatake

2.4 Performance under special conditions

Experimental determination and modelling of restricted water effects on bulkcarriers
E. LeForce & M. Vannorke

Squat predictions for manoeuvring applications
V. Ankudinov, L. Daggett, C. Huwall & C. Hewlett

Hydrodynamic analysis of a ship collision accident: A triple-play scenario
P. Kaplan

A neural network to identify ship hydrodynamic coefficients
P. Waclawek

On the influence of speed on the manoeuvring behaviour of a container carrier
P. Olthmann

2.5 Manoeuvring prediction

Further notes on the dynamic stability parameter and the prediction of manoeuvring characteristics
N. H. Norrbom

Systematic approach for ship manoeuvrability prediction
K. Kose, W. A. Misag & X. Xiong

A study on the accuracy of the recent prediction technique of ship's manoeuvrability at early design stage
T. Ishiguro, S. Tanaka & Y. Yoshimura

Applications of the manoeuvring prediction program SIMSUP to meet the new IMO standards
G. Capurro & P. Sodomaco
Neural networks applied on identification of ship motions
C.Caux & P.Jean

2.6 Mathematical modelling of ships’ steering and manoeuvring behaviour

A generalized math model for manoeuvring
M.S.Chislett

Study on ship manoeuvring mathematical model in shiphandling simulator
Yang Yansheng

An advanced physical-mathematical model of ship-hull hydrodynamic forces deduced from simplified vortex model during manoeuvring motion in slow speed
K.Karasuno & K.Maekawa

Hydrodynamic modelling for ship manoeuvring simulation
J.S.Pawlowski

Full scale measurements of a set of yaw/sway manoeuvring Q-indices
C.G.Biancardi, D.Cavazzi, G.Graziano & M.T.Masullo
