2012 International Conference on Management of e-Commerce and e-Government

(ICMeCG 2012)

Beijing, China
20 – 21 October 2012
## Session 1: Theory and Developments of E-commerce

Research on E-commerce Applied Talent Training in Higher Vocational Colleges ............................................... 3  
*Hui Zhou and Jinhua Liu*

Electronic Commerce Applications Based on Virtual Reality Technology .......................................................... 7  
*Xiaohe Yu and Lantian Pan*

Realization of Individualized Recommendation System on Books Sale ............................................................... 10  
*Zhenghua Luo*

An Optimized SVM Model for Detection of Fraudulent Online Credit Card Transactions .............................................. 14  
*Wei Xu and Yuan Liu*

Comparative Analysis of E-commerce Professional Employee Needs and University Curriculum Setting ........................................ 18  
*Lei Zhu and Wei Zhang*

Research on Recommendation Model of Technology Literature Based on User Preference ........................................ 22  
*Xuefeng Li and Baowen Sun*

Domestic E-commerce Research Topics Evolution Analysis .................................................................................. 26  
*Lei Zhu, Xue Feng Li, and Hong Wei Wang*

Can Average Score of Online Reviews Reveal Product’s Real Quality? ................................................................. 30  
*YanChun Zhu and Wei Zhang*
Analysis of the Impact of Social Network on College Students—An Empirical Study of renren.com .................................................................................................................................................................................. 34
  Jia Liu

Research on the Influence of Online Reviews on Internet Consumer Purchasing Decision ........................................................................................................................................................................ 38
  Lei Zhu, Wei Zhang, and Yanchun Zhu

Design of a Recommendation System Based on Top-k Query in a Pure P2P Environment ................................................................................................................................................................. 42
  Ying Gao and Jiang Zhan

Impact of Online Review on Sales: An Empirical Investigation of Experience Products with Different Popularities ........................................................................................................................................... 48
  Jinhong Cui, Yingzhi Pan, and Lingyun Wang

**Session 2: Information Security and Risk Management**

An Improved Self-Adaptive Digital Watermarking Algorithm for RGB Images Based on W-SVD .................................................................................................................................................................... 57
  Suwen Zhu, Bingxin Liu, and Yanmei Chai

Study of Authentication Mechanism of E-evidence in the E-commerce Litigation ........................................................................................................................................................................ 63
  FuXiong Sun and Lili Zhou

A Novel LSB Matching Steganalysis Detection Algorithm Based on Characteristics of the Second Order Difference Markov ...................................................................................................................... 68
  Yanli Zhao and Yan Liu

An Anonymization Method Based on Tradeoff between Utility and Privacy for Data Publishing ........................................................................................................................................................................ 72
  Ping Xiong and Tianqing Zhu

Secure E-business Transactions by Securing Web Services ........................................................................................................................................................................ 79
  Ahmad Tasnim Siddiqui and Arun Kumar Singh

The Effectiveness and Limitations of Internet Anti-corruption: A Perspective of Institutional Analysis ........................................................................................................................................................................ 85
  Guoying Chen and Qiong Xu

A Social Label Automatic Tagging Based Method on Situation Semantics in Web Service Discovery ........................................................................................................................................................................ 91
  Sheng Li and Jing Hu

Analysis of Security Models Based on Multilevel Security Policy .................................................................................................................................................................................. 95
  Jing Jin and Meihui Shen

Improved Web Page Watermarking ........................................................................................................................................................................ 98
  Ping Zhu and Ming Lu

Improving WTLS Protocol Using Identity-Based Cryptography .................................................................................................................................................................................. 103
  Dai-Rong Yu, Zhen-Hua Qi, Yan Wang, and Bing-Xian Ma

Session 4: Enterprise Information Systems

The Exploration for Using E-commerce Platform to Optimize Insurance Business .................................................. 191
Erhao Zhong, Cuncong Zhong, and Huijuan Yang

Hybrid Approach Using RBR and CBR to Design an Automated Negotiation Model for Tourism Companies .............................................................................................................................................. 197
Xiaowen Liu and Jin Yu

Network Human Resources Platform Strategies Research with Two-Sided Market Theory ......................................................................................................................................................................... 202
Wenxi Yao

Price-Matching for Sales Service Coordination with Free-Riding between Retailers ................................. 206
Jie Li

Improving M-commerce through Enterprise Mobility ............................................................................................... 211
Heng Wang and Qi Xu

Research on Bilateral Market Pricing Strategies for Trading Platform of Digital Media Content Products ......................................................................................................................................................... 216
Peiyi Song and Zhaowen Huang

Research on Continuous Auditing Based on Multi-agent and Web Services ..................................................... 220
Huanzhuo Ye, Jingwei Yang, and Yanping Gan

Comparative Analysis of the Workflow Modeling .................................................................................................... 226
Yan Cai

Research on the Internet of Things in the Automotive Industry ........................................................................... 230
Tenghong Liu, Rong Yuan, and Huating Chang

Research on the Model for Crop Water Requirements in Wireless Sensor Networks ................................... 234
Shaohua Wan

Research on Human Capital in Knowledge-Intensive Business Services .......................................................... 238
Jun Tao

Knowledge Innovation System and Customer Impact of Knowledge-Intensive Business Services .................................................. 242
Jun Tao

Research on the Construction of Logistics Finance Information System .......................................................... 246
Yanhui Ju

Session 5: Knowledge Management and Business Intelligence

The Drives of E-Marketplace Adoption in China: The Mediation Effect of Trust ......................................................... 253
Yongrok Choi

Design of Original Search Model Based on Broadcast and DHT in Peer to Peer Environment .......................................................... 258
Ying Gao and Jiang Zhan
Analyzing Semantic Heterogeneity in XBRL Taxonomies: An Ontology Perspective ..............................................................264
   JiMei Li, HuiZhou Zhao, and MeiJie Du

Research on the Integration Application of Business Intelligence and ERP ..............................................................269
   Lianqiu Zhou

Research on an Optimized C4.5 Algorithm Based on Rough Set Theory ..............................................................272
   Zhuoyuan Xiang and Lei Zhang

Research on Temperature Control Algorithm Based on Outlier Mining in RFID .....................................................275
   Guang Yang, Ting Xiong, and Hou-Ling Ji

Genetic Optimization of BP Neural Network in the Application of Suspicious Financial Transactions Pattern Recognition ..............................................................280
   Jun Tang and Lei He

Research on XML Element Search Results Clustering .....................................................................................285
   Min-Juan Zhong, Chang-Xuan Wan, De-Xi Liu, and Xian-Pei Jiao

A Novel Usability Matrix for ERP Systems Using Heuristic Approach ..............................................................291
   Chaudhry Muhammad Nadeem Faisal, Sohail Tariq, Tooba Ahtram, Muhammad Shabbir Abbasi, Sameet Sarwer, and Ali Selamat

Research on Enhancement of the Service Outsourcing Enterprises’ Innovation Ability Based on the Absorption Capacity ..............................................................................................297
   Xiangming Wei and Haimei Liu

Vector Space Model Based Internet Contextual Advertising .....................................................................................301
   Tian Xia, Yanmei Chai, Hong Lu, and Tong Wang

Session 6: E-government and E-governance

A Research Review of E-government Systems Outsourcing .....................................................................................307
   Youshi He and Shizhao Song

Game Analysis of Harnessing Collusion in the Government Procurement Field ..............................................................311
   Wenying Han, YanMei Chai, and XueFeng Li

Review of Forming Model of Emerging Industries Driven by Information Technology ..............................................................315
   Gaoyi Wu

A Method of XML Containing Data State in Emergency Plan Management Information System ..............................................................................................319
   Xin Chen, Bin-ge Cui, and Feng Zhang

Countermeasure Study on E-government in China on the View of Public Satisfaction ..............................................................323
   Yan Shi

Co-word Analysis of Domestic Network Virtual Society Research Hotspots and Evolution ..............................................................................................327
   Peng Cui and Wei Zhang
Research for Promoting Employment of Minimum Livelihood Guarantee Citizens for Beijing

Xin Wang

An Electronic Document Tracking Method Based on Ant Colony Algorithm

Xian Jing Zhou and Peng Zhu

Service-Oriented Integration Framework

JiaQi Wu and Wenjing Yang

Research on Dynamic Allocation Based on Carbon Management Certification

Liu Wei and Qiu Yue

Session 7: Operations and Services Management

Research of E-commerce Supply Chain Management with CreditRisk + Model

Lili Chen

The Risk of Loan Consuming by SMEs Based on the Supply Chain

AnYu Li and QiuWen Sun

Communication Performance Model in the Context of Social Communication Technology

Qingfei Min and Yuan Li

Supplier Control and Firm Performance in Service Supply Chain: The Role of Cooperation Risk and Knowledge Sharing Intention

Jinliang Chen

Evaluation of Sustainable Competitiveness of the Textile Industry Based on AHP

Jiang Xiao

Research on Location Based Service via Technology Acceptance Model

Qingjie Zhang, Donglai Xue, and Jianming Zhu

Analysis on the Impact of Short-Selling Mechanism to Chinese Stock Markets Based on Complex Network Theory

Zheng Gong and Zhixin Chen

The Effect of Demand Information on Carbon Emission in Low Carbon Green Supply Chain

Xinwu Li

Risk Assessment on Agricultural Products Logistics Financial Based on FAHP

Jie Zheng and Jing He

Based on the Outskirts of Beijing Cultural Tourism Development of the Tourist Market-Oriented Probe—Analysis about the Artistic Conception Tourism Analysis of the Shangzhuang-Nalan Culture Park

Yong-Gang An, Ge Chen, Kai Huang, and Guang-Jie Cao

Research on the Profit Modes and Issues of Chinese Group-Buying Websites

Fan Yang and Yali Qian
Analysis of the Topology Structure of Network of Chinese Stock Market ................................................................. 403

Peng Wang

Empirical Study Based on ARMA-GARCH Tempered Stable Lévy Processes:
Evidence from Chinese Financial Markets .................................................................................................................. 408

Hengyu Wu, Fuming Zhu, and Genhua Hu

Bayesian Network-Based Online Shopping Satisfaction Evaluation and Empirical Analysis of the Third-Party Logistics ......................................................................................................................... 415

Yijie Zhuang

Dynamic Performance Optimization of the Supply Chain with Nonlinear Constraints ....................................................... 419

Jing Wang, Mingchao Yu, and Yegui Xiao

Interests Distribution Mechanism of Passenger Travel Organizing Model Based on Tourism Industry Chain ............................................................................................................................... 425

Yulei Gu

Performance Analysis about Chinese Service Industry Manufacturization ........................................................................ 429

Peng Ye, Ting Xiao, and Hua Liu

Research on Contribution of Information Productivity to Economic Growth ................................................................ 433

Mingming Wang and Bo Liao

Author Index .................................................................................................................................................................. 437
