2012 International Conference on Computing Sciences

ICCS 2012

Table of Contents

Foreword .....................................................................................................................................................xii
Organizing Committee ..............................................................................................................................xiv
Technical Committee ................................................................................................................................xvi
Keynotes ...................................................................................................................................................xvii

Session 1

A Novel Approach Based on Wavelet and Non-linear Transfer Function-Based Local Approach for Real Color Image Enhancement .................................................................1

Sunanda S. Alur and M.C. Hanumantharaju

Efficient Application of Gabor Filters with Nonlinear Support Vector Machines ...........................................7

Ajitesh Srivastava, Pritish Mohapatra, and A.S. Mandal

On the Design of Interpretable Evolutionary Fuzzy Systems (I-EFS) with Improved Accuracy .........................................................11

Praveen Kumar Shukla and Surya Prakash Tripathi

Analysis of Joins and Semi-joins in Centralized and Distributed Database Queries ..........................................................15

Manik Sharma and Gurdev Singh

Session 2

Theory of Markov’s Normal Algorithms ......................................................................................................21

Ch. Raja, G. Sathya, and E.G. Rajan

Symbol Manipulating Techniques .............................................................................................................27

T.V. Subramanyam, S. Selvarajan, and E.G. Rajan

Normal Algorithmic Signal Processing ...................................................................................................31

Leela Priya Inturu, G. Prashanthi, and E.G. Rajan

SPL(A) - An Elementary Formal System for Signal Processing ....................................................................37

G. Sathya, G. Ramesh Chandra, and E.G. Rajan
End Justified Post Turing Rewriting Systems and M-Grammar ............................................................43
Y. Narasimha Rao, Yashaswi Vemuganti, and E.G. Rajan

Session 3
Rewriting Cyclic Normal Automata and Their Applications ...............................................................47
U.M. Fernandes Dimlo, Yashaswi Vemuganti, and E.G. Rajan
Constructive Sets and Extended Topological Filters .................................................................52
Towheed Sultana, Ajay Sankar Singh, and E.G. Rajan
Cellular Automata and Their Realizations ............................................................58
S. Shanthi, P. Srinivasa Rao, M. Madhavi Latha, and E.G. Rajan
Normal Algorithmic Implementation of Cellular Automata .....................................................64
G. Ramesh Chandra, V. Dhana Lakshmi, and E.G. Rajan

Session 4
A User Friendly GUI Based Benchmark for Image Watermarking ........................................70
Rajwant Kaur, Gursharanjeet Singh Kalra, and Manie Kansal
DWT, DCT and SVD Based Digital Image Watermarking ..........................................................77
Manie Kansal, Gursharanjeet Singh, and B.V. Kranthi
Efficient Genetic Algorithm Based Image Watermarking Using DWT-SVD Techniques .........................82
Poonam, Shakti Kundu, Sanyam Kumar, and Kailash Chander
Complexity Analysis of Image-Based CAPTCHA ..............................................................................88
Riyanka Manna, Rahul Saha, and G. Geetha
CAPTCHINO - A Gamification of Image-Based CAPTCHAAs to Evaluate
Usability Issues .................................................................................................................................95
Rahul Saha, Riyanka Manna, and G. Geetha

Session 5
MEU Analysis of DECICLUS Approach for Multilingual Text Categorization ......................................100
Gulshan Kumar and Mritunjay Kumar Rai
Palmprint Identification Using Transform Domain and Spatial Domain Techniques .....................................105
K.P. Shashikala and K.B. Raja
Palmprint Matching Using LBP ........................................................................................................110
Promila and V. Laxmi
Semantic Image Retrieval by Combining Color, Texture and Shape Features ................................116
Nishant Singh, Shiv Ram Dubey, Pushkar Dixit, and Jay Prakash Gupta
A Novel Approach for Color Image Enhancement Using Double Window Concept

Sreenivasa Setty, N.K. Srinath, and M.C. Hanumantharaju

Session 6

Analysis and Synthesis of an Ant Colony Optimization Technique for Image Edge Detection

Prateek Agrawal, Simranjeet Kaur, Harjeet Kaur, and Amita Dhiman

Hybrid Approach of Haar Cascade Classifiers and Geometrical Properties of Facial Features Applied to Illumination Invariant Gender Classification System

Priyanka Goel and Suneeta Agarwal

Extraction of Panic Expression Depending on Lip Detection

Md. Alamgir Hossain, Debabrata Samanta, and Goutam Sanyal

Lung Cancer Detection on CT Images by Using Image Processing

Anita Chaudhary and Sonit Sukhraj Singh

Session 7

QoS Aware Routing Scheme Based on Traffic Priority for Wireless Sensor Networks

Sunil Kumar Kaushik, Ruchil Aggarwal, and Rakesh Sharma

Energy Efficient Reliable Data Aggregation Technique for Wireless Sensor Networks

Basavaraj S. Mathapati, Siddarama R. Patil, and V.D. Mytri

An Advance Approach to Reduce Handover Delay by Reducing Scanning Delay Using Media Independent Handover in 802.11

A. Gami Nitesh Kumar, K. Buddhdev Prasann, Deepesh Kaushal, and Varun Agarwal

Hierarchical Cluster Based Routing for Wireless Mesh Networks Using Group Head

Deepesh Kaushal, A. Gami Nitesh Kumar, K. Buddhdev Prasann, and Varun Agarwal

DTDS: Dynamic Traffic Diversion Scheme for High Dense 802.11 WLAN

K. Buddhdev Prasann, A. Gami Nitesh Kumar, Deepesh Kaushal, and Varun Agarwal
Session 8
High Performance Computing into Cloud Computing Services .................................................................172
Amit Batra and Arvind Kumar

Single Sign on for Cloud ................................................................................................................................176
Pratap Murukutla and K.C. Shet

Task Scheduling Algorithm with Fault Tolerance for Cloud .................................................................180
Simy Antony, Soumya Antony, A.S. Ajeena Beegom, and M.S. Rajasree

Paradigms in Fault Tolerant Checkpointing Protocols in Distributed Mobile
Systems ....................................................................................................................................................183
Tejinder Thind, Rachit Garg, Uminder Kaur, and Dinesh Kumar

Reliable Task Allocation in Heterogeneous Distributed System with Random
Node Failure: Load Sharing Approach ........................................................................................................187
Vinod Kumar Yadav, Mahendra Pratap Yadav, and Dharmendra Kumar Yadav

Session 9
Analysis of TCP Performance over Mobile Ad Hoc Networks with Varying
Speed .......................................................................................................................................................193
Sunil Kumar Kaushik, Kavita Chahal, Sandeep Dhariwal, Amit Kumar,
and Pushkar Raj

Impact of Transmission Range and Mobility on Routing Protocols over Ad Hoc
Networks ..................................................................................................................................................201
Rajneesh Kumar Gujral, Jitender Grover, Anjali, and Sanjeev Rana

Performance Evaluation of AntHocNet Routing Algorithm in Ad Hoc Networks .....................................207
T. Nishitha and P. Chenna Reddy

Effect of Scheduling Policies on Resource Allocation in Market Oriented Grid ............................................212
Neeraj Mangla and Manpreet Singh

Reducing Web Page Post Backs through jQuery Ajax Call in a Trust Based
Framework ................................................................................................................................................217
Rohit Dhand

Session 10
Performance Comparison of Grøestl, JH and BLAKE - SHA-3 Final Round
Candidate Algorithms on ARM Cortex M3 Processor .................................................................................220
Rajeev Sobti, G. Geetha, and Sami Anand

Optimizing Server Response Time through Routing Tables ......................................................................225
Akash Bhardwaj and Neha Tewari

Power Abuse Alert System Using WSN .......................................................................................................229
S. Eashwar
Transient Correction Using EDFA: In-Line Optical Fiber with Feedback .......................... 233
  Zahid Gulzar Khaki and Harpreet Singh Bedi

Virtual Topology Design and Comparative Cost Analysis of Light Paths in a Small Optical WDM Network .......................................................................................................................... 239
  Harmandar Kaur and Amanjot Singh

Session 11

A 15 Bit 95 dB Low Power Discrete Time Sigma Delta Modulator ........................................ 245
  Mohammed Arifuddin Sohel, K. Chenna Keshava Reddy, Syed Abdul Sattar, and Salma Jabeen

Design and Fabrication of Dual-Band Coplanar Antenna Using EBG Structures .................. 249
  Shakeel Tarigonda and B. Bharath

Fault Tolerant ALU System ........................................................................................................ 255
  Ayon Majumdar, Sahil Nayyar, and Jitendra Singh Sengar

A Survey of Key Factors Affecting Software Maintainability ................................................ 261
  Balraj Kumar

Generalization of Software Metrics on Software as a Service (SaaS) .................................. 267
  Ram Singh, Avinash Bhagat, and Navdeep Kumar

Session 12

A Simple and Efficient Mechanism to Detect and Avoid Wormhole Attacks in Mobile Ad Hoc Networks .................................................................................................................. 271
  V. Karthik Raju and K. Vinay Kumar

E-Banking Security: Mitigating Online Threats Using Message Authentication Image (MAI) Algorithm ........................................................................................................ 276
  K. Thamizhchelv and G. Geetha

A Trust Based Approach for AODV Protocol to Mitigate Black Hole Attack in MANET .............................................................................................................................. 281
  Fidel Thachil and K.C. Shet

Algorithmic Review of WTLS and TLS for Recommending Measures for Implementing CSP in the Network Gateway ....................................................................................... 286
  Kamini and Parteek Sharma

Detection of Malicious Node in Wireless Sensor Network Based on Data Mining .......................................................................................................................... 291
  Mandeep Singh, Gaurav Mehta, Chetna Vaid, and Parul Oberoi
Session 13

Digital Signature ..............................................................................................................................................295
Ravneet Kaur and Amandeep Kaur

A Survey on Cloud Computing Security ........................................................................................................302
Rajeev Kanday

Mitigating DoS Using Sensing Keys ....................................................................................................................312
V. Ragavi and G. Geetha

New Directions in Quantum Chaotic Crypto Schemes ..........................................................................................316
G. Geetha

On the Security of Reduced Key Tiny Encryption Algorithm .............................................................................322
Amandeep and G. Geetha

Session 14

Adaptive Multi Constraint Multipath Routing Protocol in Wireless Multimedia
Sensor Network .........................................................................................................................................................326
Jayashree Agrakhed, G.S. Biradar, and V.D. Mytri

Timer and Distance Based Routing Protocol for Continuous Monitoring
Application in WSN ...............................................................................................................................................332
Glitto Mathew, Abhinav Kumar Gupta, and Mudit Pant

Simulators for Wireless Networks: A Comparative Study ................................................................................338
Amit Kumar, Sunil Kumar Kaushik, Rakesh Sharma, and Pushkar Raj

Impact of Scalability with Respect to Mobility and Zone Size on Zone Routing
Protocol over MANETs ........................................................................................................................................343
Rajneesh Kumar Gujral, Jyoti Kalra, and Manpreet Singh

Dual Gateway Routing Protocol ..........................................................................................................................350
Gursimran Singh and M. Vijaya Raju

Session 15

Visualizing Clouds on Different Stages of DWH - An Introduction to Data
Warehouse as a Service ........................................................................................................................................356
Harjeet Kaur, Prateek Agrawal, and Amita Dhiman

An Architecture to Maintain Materialized View in Cloud Computing
Environment for OLAP Processing ......................................................................................................................360
Soumya Sen, Debabrata Datta, and Nabendu Chaki

Inherent Dangers in Database Security ..............................................................................................................366
Sartaj Singh
Automatic Recommendation of Web Pages for Online Users Using Web Usage Mining ...............................................................371
    Ravi Bhushan and Rajender Nath

Aggregate TCP Congestion Management for Internet QoS .................................................................375
    D. Hemkumar and K. Vinaykumar

A Cryptographic Hashing Solution for Mitigating Persistent Packet Reordering Attack in Wireless Ad Hoc Networks .................................................................379
    P. Raghavendra Raju and K.C. Shet

Author Index .........................................................................................................................................................384
