<tbody>
<tr>
<td>Preface</td>
<td>xvi</td>
</tr>
<tr>
<td>Conference Organization</td>
<td>xvii</td>
</tr>
<tr>
<td>Program Committee</td>
<td>xviii</td>
</tr>
<tr>
<td>Reviewers</td>
<td>xx</td>
</tr>
<tr>
<td><strong>Intelligent Computation</strong></td>
<td></td>
</tr>
<tr>
<td>A Filled Function Method with One Parameter for Box Constraint</td>
<td>1</td>
</tr>
<tr>
<td>Jiao Shuqing</td>
<td></td>
</tr>
<tr>
<td>A Modified PSO Method Based on Cultural Algorithm and Quantum Computing</td>
<td>5</td>
</tr>
<tr>
<td>Xiao-Zhi Gao, Ying Wu, Xiaolei Wang, Xianlin Huang, Kai Zenger, and Xiaofeng Wang</td>
<td></td>
</tr>
<tr>
<td>A New Objective Reduction Algorithm for Many-Objective Problems: Employing Mutual Information and Clustering Algorithm</td>
<td>11</td>
</tr>
<tr>
<td>Xiaofang Guo, Xiaoli Wang, Mingzhao Wang, and Yuping Wang</td>
<td></td>
</tr>
<tr>
<td>A New TOPSIS with Triangular Fuzzy Number and Uncertain Weight Based on Cosines Similar Degree</td>
<td>17</td>
</tr>
<tr>
<td>Zhenghai Ai</td>
<td></td>
</tr>
<tr>
<td>A Niching Harmony Search Method for Multi-modal Optimization</td>
<td>22</td>
</tr>
<tr>
<td>Xiao-Zhi Gao, Xiaolei Wang, Kai Zenger, and Xiaofeng Wang</td>
<td></td>
</tr>
<tr>
<td>A Study on Magnetic Force of the Large Displacement Hybrid Suspension System Based on Finite Element Method</td>
<td>28</td>
</tr>
<tr>
<td>Tao Wen, Zhengfeng Ming, Youqing Liu, and Jinxin Gu</td>
<td></td>
</tr>
<tr>
<td>A Weak Filled Function Algorithm for Unconstrained Searching Optimization</td>
<td>31</td>
</tr>
<tr>
<td>Guiyu Li, Jioncheng Li, Henghui Xiao, and Shengpei Ding</td>
<td></td>
</tr>
<tr>
<td>Ant Colony Algorithm for Waste Collection Vehicle Arc Routing Problem with Turn Constraints</td>
<td>35</td>
</tr>
<tr>
<td>Jie Liu and Yanfeng He</td>
<td></td>
</tr>
<tr>
<td>A Filled Function with Two Parameters for Unconstrained Global Optimization</td>
<td>40</td>
</tr>
<tr>
<td>Jiao Shuqing</td>
<td></td>
</tr>
</tbody>
</table>
An Optimization Design Method of Integrated Radar and Jammer Signal Modulated by Bi-phase Sequences of Chaos .................................................................44
   Guoxi Han, Jun He, and Jianqing Qi

Differential Evolution Algorithm for the Optimization of the Vehicle Routing Problem in Logistics .................................................................48
   Huan Xu and Jiechang Wen

Extracting Main Content of a Topic on Online Social Network by Multi-document Summarization .................................................................52
   Chunyan Liu, Conghui Zhu, Tiejun Zhao, and Dequan Zheng

Hybrid Artificial Bee Colony Algorithm for Solving Nonlinear System of Equations .................................................................56
   Ruimin Jia and Dengxu He

Oil Well Placement Optimization Using Niche Particle Swarm Optimization .................................................................61
   Guojian Cheng, Yao An, Zhe Wang, and Kai Zhu

Preference Based Multiobjective Evolutionary Algorithm for Constrained Optimization Problems .................................................................65
   Ning Dong, Fei Wei, and Yuping Wang

Preference-Based Evolutionary Multi-objective Optimization .................................................................71
   Zhenhua Li and Hai-Lin Liu

Resource Allocation for OFDM System Based on Evolutionary Algorithm .................................................................77
   Qiang Wang, Hai-Lin Liu, and Jiong-Cheng Li

Saddle-point Condition for Fractional Programming .................................................................82
   Xiangyou Li

The Effects of Different Representations on Malware Motif Identification .................................................................86
   Ajit Narayanan, Yi Chen, Shaoning Pang, and Ban Tao

 Intelligent Systems and Complex Systems

A Method for Judging Web-page Type .................................................................91
   Xue Hong-Jun, Chen Tao, and Xue Li-Min

Analyzing Sequence Data Based on Conditional Random Fields with Co-training .................................................................94
   Leilei Yang, Guiquan Liu, Qi Liu, Lei Zhang, and Enhong Chen

Application of Improved Logarithm Logistic Models in Population Prediction .................................................................99
   Bin Li, Tianfei Wang, and Liping Jia

Class Assignment Algorithms for Performance Measure of Clustering Algorithms .................................................................103
   Jie Zhang, Xingsi Xue, and Yuping Wang

Energy Efficient and Cluster Based Routing Protocol for WSN .................................................................107
   Hairong Zhao, Wuneng Zhou, and Yan Gao

Experimental Comparison of Geometric, Arithmetic and Harmonic Means for EEG Event Related Potential Detection .................................................................112
   Jarno M.A. Tanskanen, X.Z. Gao, Jing Wang, Ping Guo, Jari A.K. Hyttinen, and Vassil S. Dimitrov
Finding the Provenance of k-anonymous Data and Adding It to Association-rule Mining .................................................................117  
   Liu Yilong and Liu Guohua

Multi-Agent Evolutionary Clustering Algorithm Based on Manifold Distance ..............................................................................123  
   Xiaoying Pan and Hao Chen

The Hilbert Boundary Value Problem in the Unit Ball in Clifford Analysis ..................................................................................128  
   Si Zhongwei, Liang Lina, and Du Jinyuan

TV OS-SART with Fractional Order Integral Filtering .....................................................................................................................132  
   Ji Dong-Jiang, He Wen-Zhang, and Zou Xiao-Bing

TVPDe: A Model for Secure Managing Virtual Infrastructure in IaaS Cloud ..................................................................................136  
   Xin Wan, Xinfang Zhang, Liang Chen, and Hao Jin

Using Information Content to Evaluate Semantic Similarity on HowNet .......................................................................................142  
   You Bin, Liu Xiao-Ran, Li Ning, and Yan Yue-Song

Neural Networks and Neural Systems

A Data Placement Strategy Based on Genetic Algorithm for Scientific Workflows .................................................................146  
   Zhao Er-Dun, Qi Yong-Qiang, Xiang Xing-Xing, and Chen Yi

A Fuzzy Decision Based Intelligent QoS Multicast Routing Algorithm .......................................................................................150  
   Junwei Wang and Haifeng Wang

A Kind of Nonlinear and Non-convex Optimization Problems under Mixed Fuzzy Relational Equations Constraints with Max-min and Max-average Composition ........................................154  
   Shuang Feng, Yingqiu Ma, and Jinquan Li

A New Plan Recognition Algorithm and its Implementation ........................................................................................................159  
   Dan Zhang, Longmei Jie, and Guoqiang Shao

A Robust Instance-based Video Search Method by Re-ranking for Multiple Visual Codebooks ..................................................................................................................163  
   Wen Wang and Zhicheng Zhao

Cluster Synchronization of Complex Networks with Non-delayed and Delayed Coupling under Pinning Control .........................168  
   Ze Tang, Jianwen Feng, and Yi Zhao

Computer Realization of Solving n-order Incomplete Four Angles Problem ..............................................................................173  
   Feng Tianxiang

Design of Computer Measurement and Control System of Test Device for Grain Drying Based on Virtual Instrument ................177  
   Liu Yang, Junwen Deng, and Yuyao Song

Design the Desktop Backup System Based on Cloud Computing .................................................................................................183  
   Jing Nie

DTMS: A Driving Training Management System Based on the Internet of Things .........................................................................186  
   Hu Lingling, Wu Dazhou, Xu Xu, and Yao Jie
Further Research on Group Consensus of Multi-agent Systems ..........................................................190
   Xin-Lei Feng and Liping Jia

Improving the Recommendation of Collaborative Filtering by Fusing Trust Network ..........................195
   Bo Yang, Pengfei Zhao, Shuqiu Ping, and Jing Huang

Neuron-MOS Based Schmitt Trigger with Controllable Hysteresis .........................................................200
   Guoqiang Hang, Yonghui Liao, Yang Yang, Danyan Zhang, and Xiaohui Hu

On Synchronizability of Kleinberg Small World Networks ........................................................................204
   Yi Zhao, Jianwen Feng, and Jingyi Wang

Parallelization and Optimization of Molecular Dynamics Simulation on Many Integrated Core ..................209
   Qian Yin, Ruiyi Luo, and Ping Guo

Research on Data Recording in Seismic PSD Experiment ........................................................................214
   Peng Sun, Xin Guo, Kang Chen, and Ziyan Wu

Research on Vision-based Intelligent Vehicle Safety Inspection and Visual Surveillance ..........................219
   Weijun Dai and Ji Ge

Study on Numerical Integration Algorithm for PSD Test ........................................................................223
   Peng Sun and Xin Guo

The AIS-SoL Optimization: An Artificial Immune System with Social Learning ..................................228
   Zhonghua Li and Chunhui He

Urban Water Consumption Forecast Based on QPSO-RBF Neural Network .............................................233
   Xingtong Zhu and Bo Xu

Learning Algorithms

A High-Speed SHA-1 IP Core for 10 Gbps Ethernet Security Processor ..................................................237
   Yang Liu, Liji Wu, Yun Niu, Xiangmin Zhang, and Zhiquang Gao

An Improved Mandarin Voice Input System Using Recurrent Neural Network Language Model ................242
   Yujing Si, Ji Xu, Zhen Zhang, Jielin Pan, and Yonghong Yan

Analysis and Forecasting on the Relationship between Port Logistics Capacity and Coastal Marine Economic Growth Based on PKNN in Case of Zhejiang Province .................................................................247
   Zhibin Li, Lingling Wang, and Haichuan Lou

BP Neural Networks with Harmony Search Method-based Training for Epileptic EEG Signal Classification ..........................................................................................................................252
   Xiao-Zhi Gao, Jing Wang, Jarno M.A. Tanskanen, Rongfang Bie, and Ping Guo

Prediction of Prosodic Word Boundaries in Chinese TTS Based on Maximum Entropy Markov Model and Transformation Based Learning ...............................................................................258
   Ziping Zhao and Xirong Ma
Projective Synchronization Control of Delayed Recurrent Neural Networks with Markovian Jumping Parameters

Siming Ma, Wuneng Zhou, Shicao Luo, and Rui Chen

Robust Stability of Uncertain Neutral Systems with Time-varying and Distributed Delays

Ruliang Wang and Dongmei Gao

Ultrasonic Target Recognition Based on Wavelet Packet and Neural Network

Xueqin Kou and Lichen Gu

Information Security, Computer Security and Integrity

3D Model Retrieval Method Based on Single View

Zhi Liu, Qihua Chen, Xiang Pan, and Yipan Feng

A Multi Modal Content-Based Copy Detection Approach

Siyuan Wu and Zhicheng Zhao

An Adaptive Image Denoising Model Based on Nonlocal Diffusion Tensor

Sun Xiao-li, Xin Chen, and Li Min

An Improved Community Detection Algorithm Based on Local Information in Social Networks

Xia Lei, Zhang Lejun, Zhang Jianpei, Yang Jing, and Guo Lin

Based on Image Salient Features Network Image Retrieval Method

Kai Yan, Kefeng Feng, Ying Wang, and Bo Pan

Design of University Teacher’s Files Management System

Dong Kang, Haihua Xing, Shulei Wu, Juntao Chen, and Jinmei Zhan

Fault Model Libraries for Safety Analysis and their Ontology-based Reuse

Juguo Wang, Yun Pu, and Guoqi Li

Image Completion with Automatic Structure Propagation

Peipei Pan, Xin Zheng, Qingqing Xu, and Ping Guo

Image Denoising Based on Wave Atoms and Cycle Spinning

Zhang Wei-Qiang, Song Yi-Mei, and Feng Ji-Qiang

Image Fusion Based on NSCT and Bandelet Transform

Qiguang Miao, Jingjing Lou, and Pengfei Xu

Image Haze Removal of Wiener Filtering Based on Dark Channel Prior

Yanjuan Shuai, Rui Liu, and Wenzhang He

Multilayer-Pseudopolar Fractional Fourier Transform Approach for Image Registration

Zhenhong Li, Jianwei Yang, Rushi Lan, and Xiaoxia Feng

Optimization for Fire Station Location Planning Based on Travel Time of Fire Vehicles

Yan-Fei Yu
Real-Time Auto-Focus System Design Based on Climbing Algorithm and its FPGA

Haifeng Zhang, Zhaohui Zhang, Hongtao Yang, Li Wu, Linao Tang, Qing Zhu, Sen Dong, Maoyuan Qin, and Yangjie Lei

Research of Web Portable Technology Application

Haihua Xing, Shulei Wu, Dong Kang, Juntao Chen, and Jinmei Zhan

Research on Evaluation Method Used to Quality Performance of Missile Weapon Based on Rough Set Rule Extraction

Li Jun, Meng Tao, Zhang Li-Xin, and Zhao Shao-Ping

Scene Recognition via Combining Information of Neighbors

Minguang Song and Ping Guo

Segmentation Algorithm Study for Infrared Images with Occluded Target Based on Artificial Immune System

Dongmei Fu, Xiao Yu, and Tingting Wang

Statistical Image Upsampling Method Based on CUDA

Xin Zheng, Qingqing Xu, Peipei Pan, and Ping Guo

Study of an RFID Based Object-Relationship Recognition System

Tiancheng Zhang, Xiaonan Yu, Dejun Yue, Yu Gu, and Ge Yu

Unsupervised Segmentation in 3D Planar Object Maps Based on Fuzzy Clustering

Xin Liu, S.Y. Cheng, X.W. Zhang, X.R. Yang, Thach Ba Nguyen, and Sukhan Lee

Vehicle Segmentation and Speed Detection Based on Binocular Stereo Vision

Xin Li, Zenggang Zhou, Xiaoyuan Li, and Yan Wan

Security Methodologies and Management

A New Algorithm to Estimate Mixing-Matrix of Underdetermined Blind Signal Separation

Cui Zhi-Tao and Jian Ke

A Product Integration Method for Eigenvalue Problems of a Class of Non-compact Operators

Guangqing Long, Xiaoyuan Huang, and Aimei Tan

A Special XQuery Program Dealing with Nested Loop Structure

Shen Jianqiao and Nie Huabei

Analyses the Financial Data of Stocks Based Rough Set Theory

Wang Ruizhong

Canonical Polyadic Decomposition: From 3-way to N-Way

Guoxu Zhou, Zhaoshui He, Yu Zhang, Qibin Zhao, and Andrzej Cichocki

Fast Multiple Scattering in Participating Media with Beamlet Decomposition

Yuanlong Wang and Ping Guo

Fast Static Particle Swarm Optimization Based Feature Selection for Face Detection

Fan Lei, Yao Lu, Wei Huang, Lujun Yu, and Lin Jia
Key-Phrase Extraction Based on a Combination of CRF Model with Document Structure ..............................................................406
Feng Yu, Hong-Wei Xuan, and De-Quan Zheng

New Bounds of the Nordhaus-Gaddum Type of the Laplacian Matrix of Graphs .................................................................411
Tianfei Wang, Bin Li, Jin Zou, Feng Sun, and Zhihe Zhang

Prediction of Gold Price Based on WT-SVR and EMD-SVR Model ...............................................................................415
Yang Jian-Hui and Dou Wei

Robust Image Hash Function Based on Polar Harmonic Transforms and Feature Selection ..................................................420
Y.N. Li

Ship CAE Modeling Based on Tribon XML File .............................................................................................................425
Liu Pei-Lin and Jin Jian-Hai

Study on Portfolio La-VaR Analysis Based on Copula-Kernel Model .............................................................................429
Jianhui Yang and Bin Yang

Text-independent Speaker Identification Using Fisher Discrimination Dictionary Learning Method ...........................................435
Xia Wang, Qian Yin, and Ping Guo

The Algebraic Method with Computerized Symbolic Computation for Travelling Wave Solutions of the Generalized KP-BBM Equation ..............................................................................439
Shuangyan Quan and Jing Zhang

Network & Wireless Security

A Highly Efficient Correlation Power Analysis on PRINT Cipher ..........................................................................................442
Kan Yuan, Dawu Gu, Zheng Guo, and Sigang Bao

A Key-policy Attribute-based Encryption Scheme with Constant Size Ciphertext ...............................................................447
Chang-Ji Wang and Jian-Fa Luo

A Novel Biometric Authentication Scheme with Privacy Preserving ..................................................................................452
Dexin Yang, Baolin Xu, Bo Yang, and Jianping Wang

A Permanent Secure QKD Protocol Realized with Asymmetric Key Authentication ............................................................457
Heyu Yin and Qiuliang Xu

A Rotation Resistant Image Watermarking Algorithm via Circle ..........................................................................................461
Tan Yuxi, Tang Lei, Gao Zhinian, Sun Peng, Yang Xiaoyuan, and Li Yu

A Secure Public Key Encryption from Computational Linear Diffe-Hellman Problem .........................................................464
Fengqing Tian, Haili Xue, and Xue Haiyang

Cryptanalysis and Improvement of an Efficient CCA Secure PKE Scheme ...................................................................469
Xuan Wang, Liqiang Wu, Jinting Nie, and Wei Wang

Cryptanalysis and Improvement of HIBS without Random Oracle .......................................................................................473
Xiaoming Hu, Wenan Tan, and Cunli Jiang

Efficient Revocable Key-Policy Attribute Based Encryption with Full Security .................................................................477
Fengli Zhang, Qinyi Li, and Hu Xiong
Fault Analysis of the Piccolo Block Cipher .............................................................. 482
Sheng Li, Dawu Gu, Zhouqian Ma, and Zhiqiang Liu

Improved Differential Fault Analysis of SOSEMANUK ........................................... 487
Zhouqian Ma and Dawu Gu

Improved Impossible Differential Cryptanalysis of SMS4 ....................................... 492
Tao Shi, Wei Wang, and Qiuliang Xu

On Generic Construction for Private Designated Verifier Signatures ......................... 497
Wei Gao, Zhenyou Wang, and Fei Li

One-round Tripartite Authenticated Batch-Keys Agreement Protocol from Paring ........ 500
Wei Gao and Zhenyou Wang

Research on the First Class M Subsequence ............................................................. 503
Yingni Duan, Haifeng Zhang, Hong Lv, and Junchu Fang

Security Analysis of Several Chosen Ciphertext Secure Group-oriented Encryption Schemes ............................................................. 507
Xu An Wang, Jinting Nie, and Wei Wang

Authentication and Authorization

A Multi-server Architecture Authentication Protocol Using Smart Card ...................... 511
Jie Yu and Qingqi Pei

A Simple and Effective Scheme of Ciphertext-Policy ABE ...................................... 516
Minda Yu and Qiuliang Xu

An Improved File System Synchronous Algorithm .................................................. 520
Qiang Li, Ligu Zhu, Saifeng Zeng, and Wen Qian Shang

Constitution of Linear Combinations of Idempotent Matrices and its Properties ........ 525
Xingxiang Liu

Design of Monitor and Protect Circuits against FIB Attack on Chip Security .............. 530
Mengmeng Ling, Liji Wu, Xiangyu Li, Xiangmin Zhang, Jinsong Hou, and Yong Wang

Osiris: A Malware Behavior Capturing System Implemented at Virtual Machine Monitor Layer .................................................................................................................. 534
Ying Cao, Jiachen Liu, Qiguang Miao, and Weisheng Li

Probabilistic Authentication with Very Lightweight Short Hash ................................ 539
Pekka Jäppinen

Research on Intrusion Detection System Based on IRBF ........................................... 544
Peng Yichun, Niu Yi, and Hu Qiwei

Cryptography and Cryptanalysis

A Digital Watermarking Algorithm Based on Region of Interest for 3D Image ............... 549
Fan Sheng-Li, Yu Mei, Jiang Gang-Yi, Shao Feng, Peng Zong-Ju, and Fan Sheng-li

A DWT Ordering Scheme for Hiding Data in Images Using Pixel Value Difference .......... 553
Awad Kh. Al-Asmari, Ahmed Salama, Abdullah M. Iliyasu, and Mohammed A. Al-Qodah
A Print-Scan Modeling Scheme Based on BP Neural Network ............................................................... 558
    Nan Luo, Quan Wang, and Kefeng Zhang

A Simulation Platform for RFID Application Deployment Supporting Multiple Scenarios .............................................. 563
    Tiancheng Zhang, Yifang Yin, Dejun Yue, Qian Ma, and Ge Yu

Constructing the On/Off Covert Channel on Xen .............................................................................. 568
    Xia Yetian, Zi Xiaochao, Yao Lihong, Pan Li, and Li Jianhua

Customers E-trust for Online Retailers: A Case in China ........................................................................ 573
    Wang Ruimei, Wang Shengxiong, Wu Tianzhen, and Zhang Xiling

Detecting Spam in Chinese Microblogs - A Study on Sina Weibo .......................................................... 578
    Lin Liu and Kun Jia

Digital Copyright Protection Scheme Based on JUNA Lightweight Digital Signatures ................................ 582
    Hailin Hao and Shenghui Su

Innovative Teaching and Learning Experiences in Network Attacks and Defense ....................................... 587
    Weimin Wei and Liping Sun

Security Information Flow Control Model and Method in MILS ................................................................ 591
    Zhou Yinping, Shen Yulong, Pei Qingqi, Cui Xining, and Li Yahui

Security System for Internal Network Printing ....................................................................................... 596
    Ding Xiaodong, Wang Quan, Yang Pengfei, Zhou Haijing, Huang Yuyan, Weng Haitao, and Pan Zhongbin

Services Selection of QoS-based Skyline Computation for Web Service Composition ......................... 601
    Liping Chen

Services Selection of Transactional Property for Web Service Composition ............................................. 605
    Guojun Zhang

The Analysis of University Network Information Security System Based on Level Protection Model ........................................ 609
    Xian Weiquan, Wang Houkui, He Haoyi, and Zheng Donghong

The Design Principles for User-centered Remote Data Possession Checking .......................................... 615
    Lanxiang Chen and Zhen Peng

The Development and Implementation of a Network-Faxing Service System .......................................... 619
    Guo Jianlan, Chen Yuqiang, and Dong Chongjie

TrustVP: Construction and Evolution of Trusted Chain on Virtualization Computing Platform .................... 623
    Xue Dongliang, Wu Xiaolong, Gao Yunwei, Song Ying, Tian Xinhui, and Li Zhaopeng

Access Control and Protection

A Novel Blind Evaluation Method on Image Scrambling Degree .............................................................. 631
    Congli Wang, Zhibin Chen, Mingxi Xue, and Chao Zhang
A Provably Secure Identity-Based Key Agreement Protocol from Key Encapsulation
Yang Cai, Qiuliang Xu, and Zhihua Zheng .................................................................636

An Indexed Bottom-up Approach for Publishing Anonymized Data
Anh-Tu Hoang, Minh-Triet Tran, Anh-Duc Duong, and Isao Echizen ..................641

Building the Bridges – A Proposal for Merging Different Paradigms in Mobile NFC
Ecosystem
Raja Naeem Akram, Konstantinos Markantonakis, and Keith Mayes .............646

Design and Implementation of a Fault Attack Platform for Smart IC Card
Jun Guo, Liji Wu, Xiangming Zhang, and Xiangyu Li ........................................653

Laboratory Test and Mechanism Analysis on Electromagnetic Compromising
Emanations of PS/2 Keyboard
Litao Wang, Changlin Zhou, and Bin Yu .................................................................657

The Method for Parallel Approach to Sensitive Point Based on Dynamic Symbolic
Execution
Yan Cao, Qiang Wei, and Qingxian Wang ..............................................................661

Pattern Recognition and Knowledge Discovery
Analysis on Operating Mechanism of SecurityKISS
Jie Cui and Qiaoyan Wen ....................................................................................666

Anti-jamming Scheme Based on Zero Pre-shared Secret in Cognitive Radio Network
Lu Zhang, Qingqi Pei, and Hongming Li .................................................................670

Length Identification of Unknown Data Frame
Li Fen, Li Tong, Zhang Chun-Rui, Wang Yong, and Song Jiang .......................674

Mutual Authentication and Ownership Transfer Scheme Conforming to EPC-C1G2
Standard
Li Huixian, Hu Jinshun, He Liwei, and Pang Liaojun .........................................678

Out-of-Order-Delivery-Tolerant Secure Code Dissemination with Fountain Codes
in Wireless Sensor Networks
Zeng Yong, Wang Xin, Dong Lihua, Ma Jianfeng, and Liu Zhihong ..................683

Data Mining
Adaptive Finite Element Analysis in the Application of Electromagnetic Mechanics
Tao Wen, Zhengfeng Ming, and Mengchu Zhou ................................................687

Epileptic EEG Signal Classification with ANFIS Based on Harmony Search Method
Jing Wang, X.Z. Gao, Jarno M.A. Tanskanen, and Ping Guo ..........................690

Research on Reliable On-chip Network using Asynchronous Logic
Guo Jianlan, Liu Yijun, and Chen Yuqiang ..........................................................695
