# TABLE OF CONTENTS

## PRESENTATIONS

**Partnership to Build a Better Future, and Leading Edge Collaboration**
Gishi Chung

**Assessment of Industry Readiness for Defectivity Challenges of 16nm HP Node and Beyond**
Abbas Rastegar

**Effect of Composition of Post Etch Residues (PER) on Their Removal in Choline Chloride-Malonic Acid Deep Eutectic Solvent (DES) System**
Jenny Taubert, Srini Raghavan

**Chemical Methods to Mitigate Roughness Caused During Wet Cleans of Low-k Films**
R.F. Reidy, O. Okobiah, N. Martinez, E. Osei-Yiadom, L. Cao, M. Bischof

**UV-Induced Modification of Fluorocarbon Polymer for Improvement of Wet Removal**
Q.T. Le, I. Simms, H. Yue, E. Kesters, G. Vereecke, H. Struyf, S. De Gendt

**TiN Metal Hardmask Etch Residues Removal for Cu Dual Damascene Devices with TiN Mask Corner Rounding Scheme**
Hua Cui

**Si Wet Etch and Clean to Enable TSV 3D Integration**
Stephen Olson, Akira Fujita, Atsushi Yamashita

**Development of Aluminum and Copper Compatible Stripper for TSV Technology**
Libbert Peng, Victor Luo, David Wei Zhang

**Dynamics of the Defects Left by a Residual Droplet on Photoresist Coated Substrates**

**An Environment Friendly Wet Strip Process for 193 nm Lithography Patterning in BEOL Applications**
G. Vereecke, E. Kesters, Q.T. Le, M. Claeys, M. Lux, H. Struyf, R. Carleer, P. Adriaensens

**Advanced Particle Removal Techniques for <20nm Device Node**
Jim Snow, Soichi Nadahara

**Progressive Defects on EUV Substrates**
Emilio Stinziani, Arna John Kadaksham, Jenah Harris-Jones, Ranganath Teki, Vlhuba Jindal, Jaehyuck Choi, Milton Godwin, Anne Rudack, Frank Goodwin

**Effect of Ozonated Water Cleaning on Ru-Capped Extreme Ultraviolet Lithography Photomask**
Sangwoo Lim

**An Innovative Solution To Prevent Wafer Cross-Contamination During Fabrication and Storage**
Fernando Herran, Catherine Le Guet, Arnaud Favre, Sandrine Andre, Yannick Borde

**A Comparative Study of the HF Sorption and Outgassing Ability of Different Entegris Foup Platforms and Materials**
Jim Ohlsen, Paola Gonzalez-Aguirre, Hervé Fontaine, Carlos Beittia, Jorgen Lundgren, Poshin Lee

**Advances in Semiconductor Metallization Technologies for new Applications and Device Scaling**
Robert Preisser

**FDSOI Ready for sub22 nm Nodes: A “Surf. Prep.” View**

**Impact of Charge at Gate Oxide Patterning on Yield for an Advanced Technology Node**
Jungtae Park, Wissok Kang, Pilwoong Bang, Taewoong Hwang, Sungjin Cho, Jaeyoung You, Ingrid B. Peterson, Jeffrey Hawthorne

**MOVPE Growth of III-V Compounds on Si by MOVPE Applying Volume Production Tools**
Dietmar Schmitz

**Evaluation of III-V Semiconductor Compatibility with Photoresist Stripping Formulations**
Jeffrey Hawthorne

**Molecular Monolayer Doping Technology for FinFET Ultra-Shallow Junction Application**
Independent Spiking of Hydrogen Peroxide and Ammonium Hydroxide in Hot Ammonium Hydroxide Peroxide Mixture ............................................................ 231
   Allan Upham

The Effect of Pulsative and Continuous Chemical Supply on Oxide Wet Etching and Cleaning .................................................. 238
   Jung-Soo Lim, R. Prasanna Venkatesh, Jin-Goo Park

POSTERS

Studies of Corrosion Elimination on AlCu line for Post Etch Residue Removal Process using Fluoride Containing Stripper .......................................................... 247
   Victor Luo, Jason Chang, Kevin Shi, Libbert Peng, Jason Zhang, David Wei Zhang

Removal of UV Cured Resin Mold on Quartz Using UV/O3 Cleaning for Nanoimprinting Lithography ...................... 255
   Min-Su Kim, Bong-Kyun Kang, Jae-Kwan Kim, Byung-Kyu Lee, Jin-Goo Park

SPCC Sealing Science & Design ............................................................................................................................... 263
   Dalia Vernikovsky

Removing BTA and Oxide from Copper with Laser Radiation and Gas ........................................................ 271
   Kenneth J. Harte, David Elliott, Ronald P. Millman Jr., Donald H. Winning, Victoria Chaplick, Erin Flaherty

Post CMP Laser Edge Cleaning .......................................................................................................................... 279

An Accurate Calculation of Electrical Double Layer Force for Particle Adhesion and Removal .......................... 287

Understanding Pattern Collapse in Wet Clean Process in Nanometer CMOS Fabrication ............................. 295
   Li-Ying Wang, Chu-Ya Yang, Hung-Min Lin, Andreas Kuehner

Combining Ozone with Organic Solvents for Greener Photoresist Stripping Process .................................. 303
   Robert Matthews, Peter Avila

Ensuring Semiconductor Tool and Part Cleanliness: Comparing and Lowering Metallic Contamination on Wipers for Ultra-Clean Environments ......................................................... 311
   Albert Dato, Fuhe Li, Victor Chia, Scott Anderson

Improved Dry Etching of SiO2 with HF/H2O in Supercritical CO2 ........................................................................... 319
   Kwon Taek Lim
