Paper Conference and Trade Show 2012 (PaperCon 2012)

Growing the Future

Co-located with Control Systems 2012

New Orleans, Louisiana, USA
22-25 April 2012

Volume 1 of 2

ISBN: 978-1-62276-843-1
# TABLE OF CONTENTS

## VOLUME 1

### NTS I: COATING NEW TECHNOLOGY SHOWCASE

- **Performance and Cost Optimization of Coating Formulations using a Design-of-experiment Approach** .......................................................... 1  
  David J.E. Vidal, Sylvie St-Amour, Sylvie Sauriol, Xuejun Zou, Jean Hamel
- **Non-Contact, Laser-Based Technology for Accurately Measuring the Length and Speed of Product in Web Coating and Lamination** ........................................... 29  
  Mike Cooley
- **APE-Free Emulsions for Paper Coatings** .................................................................................................................................................. 34  
  Rick Cazenave
- **SpeedRod M™ - The New Innovative Metering Bed System for Film Presses** ........................................................................................................... 38  
  Martin Schmid
- **Wastewater Treatment with MBR & RO for Pulp & Paper Mills** ..................................................................................................................... 46  
  Vetrivel Dhagumudi
- **Energy Saving Opportunity in Pulp and Paper Industry** ............................................................................................................................. 55  
  Andrew Dcnaciwcz
- **Studies Reveal Costly Mill Leakage - The Unnecessary Loss of Fiber, Energy and Water** ................................................................. 65  
  Ross Elliot
- **Roll Profile and Straightness Measurement With ROTALIGN® Ultra** ........................................................................................................ 69  
  Pedro Casanova
- **Effective Condition Monitoring of Slow-Speed Mechanical Assets** ................................................................................................ 82  
  David Kevin McCall

### C3: COATING BEST PAPERS I

- **Binder Depletion During the Coating Process and Its Influence on Coating Strength** ................................................................. 93  
  Janet S. Preston, John C. Husband, S. Booth, R. Coldicutt
- **Recent Advancements in Vinyl Acetate Ethylene Copolymers for Use in Paperboard and Paper Coating** ............................................. 108  
  Chris L. Lazaroff, Rajeev Farwaha
- **Renewable Xylan-based Barrier Coating for Packaging** ..................................................................................................................... 116  
  Hakan B. Grubb

### M3: FUTURE PRODUCTS FOR THE PULP AND PAPER INDUSTRY

- **Lignin - To Infinity and Beyond** ......................................................................................................................................................... 126  
  Michael A. Lake
- **Future Products for the Pulp and Paper Industry** ............................................................................................................................. 135  
  Harry T. Cullinan

### PB1: INSIDE & OUTSIDE OF THE BOX KICK-OFF

- **The Turnaround at Longview** .................................................................................................................................................. 143  
  Brian Peterson, Paul Duncan

### PQ1: ADVANCES IN STOCK SYSTEM ADDITIVES I

- **Investigation of Retention Aid Polymer Degradation on a Pilot Scale Flow Loop** ........................................................................... 167  
  Paul Krochak, Susanne Schuck, Giuseppe Fasci
- **The Effect of Sequential Polymer Addition on Wet and Dry Web Mechanical Characteristics - Laboratory and Semi-Pilot Studies** ........................................................................ 180  
- **Paper and Board Mill Profits from Mixing Starch and Filler Simultaneously Close to the Headbox** ......................................... 187  
  Jouni P. Matula, Jussi Matula

### C4: COATING BEST PAPERS II

- **First Commercial Curtain Coater Application for Wood-Free Paper Grades** ..................................................................................... 196  
  Peter Dahlvik, KangYoung Choi, IckSeo Joo, BoaHyun Koo
- **Replacement of Air Knife with Curtain Coating - Impact on End-Use Properties of Double-Coated Paperboard** ......................................... 209  
  Brian J. Ninness, Pekka J. Salminen, Don A. Ventresca, Gregory W. Welsch
On the Mechanisms of Wet and Dry Strength of Paper Coatings - Part 1 - Experimental Studies
Etiene Lazarus, Martti Toivakka, Parvez Alam, Pekka J. Salminen

C5: FUNDAMENTALS OF COATING STRENGTH AND NEW TEST METHODS

On the Mechanisms of Wet and Dry Strength of Paper Coatings - Part 2 - Modeling and Simulation
Parvez Alam, Martti Toivakka, Etiene Lazarus, Pekka J. Salminen

Psychophysical Tests for Visual-Numerical Correlation of Whiteness Formulas
Awadhoot Shendye, Burak Aksoy, Paul D. Fleming III, Margaret Joyce

Roll to Roll Printed Electronics on Paper
Roger C. Bollstroom, Daniel Tobiork, Peter Dollete, Tommi Remonen, Carl-Johan Wikman, Sari Viljantie, Jawad Sarfraz, Pekka Salminen, Mikka Linden, Carl-Eric Wilen, Johan Bobacka, Ronald Osterbacka, Martti Toivakka

Toward a Laboratory Simulation of Tail Edge Pick
Catherine Ridgway, Patrick A. C. Gane

M5: IT'S NEVER TOO EARLY – OR – TOO LATE TO BECOME A SAFETY LEADER (VP)

New Leaders in Safety
Selina Hall

Success in Safety through Safety Leadership Development
Vince Somody

Caring Leadership - Commitment to Excellence
Matthew Kanneberg

PB3: OPTIMIZING CONTAINERBOARD PRESSING – PANEL DISCUSSION

Improving Wet Press Operations with Tune-Ups and Targeted Rebuilds
Frank X. Swietlik

Optimizing Paperboard Pressing - Panel Discussion
David C. Burton

Nip Venting and Fabric/Belt Interaction
Steve Spencer

Advances in Press Roll Dewatering
Jerry Vandoros

PQ3: FLUID MECHANICS OF FIBROUS AND NANO-FIBROUS SUSPENSIONS

Processability of Microfibrillated Cellulose
Juha Salmela, Ari Jasberg, Jarmo Kudo, Yeli-Matti Luokkainen

Optimizing the Dewatering Pressure Profile for Papermaking Furnishes
Juha Salmela, Antti Koponen, Johanna Liukkonen, Sanna Haavisto

Experiences of New Shoe and Blade Type Initial Dewatering on Water Removal Efficiency and on Paper Quality on a Full Scale Production Machine
Jukka Muhonen, Ari Puurtinen, Antti Leinonen

Characterizing the Drainage and Filtration of Pulp and Microfibrillar Suspensions
Bandaru V. Ramarao, Nataliya Lavrykova-Marrein

C6: BEST STUDENT PAPERS

Rheological Properties of Starch Latex Dispersions and Starch Latex-containing Coating Colors
Jae Young Shin, Nathan Jones, Do Ik Lee, Paul D. Fleming, Margaret K. Joyce, Ralph DeJong, Steven Bloembergen

Influencing the Inflections in Quickset Ink Setting Profiles to Improve Sheet-fed Print Quality & Efficiency
Ting Chen, David A. Smith, Margaret K. Joyce, Paul D. Fleming

Atomic Force Microscope Techniques to Measure Latex Properties and Correlation to Coating Strength
Douglas W. Bousfield, Nick G. Triantafillopoulos, Brian Scott, W. N. Unerll, Pavan Kumar Sridhe

PB4: STRENGTH ADDITIVES – LIGHTER, STRONGER, FASTER

Next Generation of Dry Strength Additives for Packaging Grades
Rosy M. Covarrubias, Daniel E. Glover, Chip Hill

Enhancement of Dry Strength in High Performance Linerboard Using a Dual Additive Approach
Michael R. St. John

The Effects of Guar Gum on Wet Web Runnability - Laboratory and Pilot-Scale Studies
Kristian Erik Salminen, J. Kataja-aho, H. Lindqvist, E. Retulainen, T. Rantanen, A. Sundberg
## PQ4: FUNDAMENTAL ANALYSIS OF FLUID MECHANICS FOR FORMING

- Forming of Paper Sheets: A Numerical Simulation Based on Hydrodynamics of Fibrous Suspensions ................................................. 483  
  Bandara P. Ramarao, Kapil M. Singh, S. Lavrykov, S. B. Lindstrom
- The Effect of Non-woven Base on Press Felt Properties and Dewatering ..................................................................................... 490  
  John Xu, Roger Banks, Bob Hauk, Daniel Hedou, Rick Phillips

## NTS II: PAPERMAKERS NEW TECHNOLOGY SHOWCASE

- New Forming Concept - The Green Approach to the Wet End Zone .......................................................................................... 504  
  Fernando Cabrera
- New Inline Wet End Brightness and Fluorescent Measurement ............................................................................................... 512  
  Michael Moller
- HYBRID Technology Designed for Performance ................................................................................................................. 517  
  Laura M. Sherman
- Paper Machine Hood Supply Optimization Using Computational Fluid Dynamics ................................................................. 522  
  Michael C. Postle

## C8: ADVANCES IN COATING AND DRYING TECHNOLOGY

- Curtain Coater for Board and Packaging ......................................................................................................................... 527  
  Martin Schmid, Martin F. Kustermann
- Changes in Solid Particle Fraction of Coating Colors in High Speed Blade Coating ............................................................... 542  
  Anne Rutanen, Martti Toivakka
- Best Practices for Coat Drying .............................................................................................................................................. 554  
  A. Wils, G. Dumortier

## PB5: MINERAL OIL MIGRATION FROM FOOD PACKAGING GRADES – PANEL DISCUSSION

- Mineral Oil Migration from Packaging into Food .................................................................................................................. 584  
  Anne Goldsmith, Paul Noc, Deju Koziol, Norm Harbin

## PQ5: OPTIMIZING YOUR FIBER THROUGH EFFECTIVE REFINER CONTROL

- Experimental Study of Low Consistency Refiner No-load Power .............................................................................................. 606  
  Nina Rajabianasab, Jens Heymer, Mark Martinez, J. A. Olson
- Optimal Fibre Development and Energy Saving During Refining of High Kappa Softwood Chemical Pulp for Kraft Linerboard Products in a Fully Closed Mill .................................................. 619  
  Ajit Kumar Ghosh, Gary Le Roux
- Refining Case Study - Using Improved Refiner Control to Increase Pulp Quality and Paper Machine Performance .................. 631  
  Christopher L. Demler, Sandra E. Beder-Miller, Rick Aldridge

## M8/P6: SUPERINTENDENT’S ROUNDTABLE AND PAPERMAKERS ROUNDTABLE (YP)

- A Practical Papermakers Guide to Defect Troubleshooting ........................................................................................................ 645  
  Doug Howard

## C10: ADVANCED COATING MATERIALS

- Development of a Coating to Prevent Oil Migration through Board ............................................................................................. 649  
  Graham O’Neill, Janet Preston, Jon Phipps, Yang An, Aleks Tedstone, Carol Hammond
- The Coating of Nanofibrillated Cellulose Onto Paper Using Flooded and Metered Size Press Methods .................................................. 662  
  Douglas W. Bousfield, Finley Richmond

## PB7: FORMING INNOVATIONS

- Wet End Forming Equipment Rebuilds on Containerboard Machines for Cost Savings ............................................................. 693  
  Dean Miller, Claus Holmquist, Ken Steger, Vaughn Wildfang, Jay Shands
- Different Approaches on Fourdrinier Dewatering - What is the Most Suitable Strategy? ............................................................. 702  
  Juan Carlos Cecchini, Ari Puurtinen, Teuvo Virkkunen, Antti Poikolainen

## VOLUME 2

- Advances in Raw Materials Skid Resistant Overprints Offering Abrasion Resistance ................................................................. 682  
  John J. Damore
Improved Efficiency with a Hybrid Blade Former Enhanced Performance and Extended Fields of Application .................712
Thomas R. Kast, Juergen Proessl

PQ7: ENHANCING FIBER QUALITY AND CONTROL

ETMP - A New Approach in Mechanical Pulp Manufacture .................................................................717
Harald G. Grossmann, Toni Handke, Paul-Gerhard Weber, Tilo Gailat, Roland Zeln
Advancements in Papermaking - New Technologies and Processes Revolutionizing the Industry ....................725
Ian Lifshitz
Maintaining Environmental Quality - Fiber Characterization as a Tool for Verifying Pulp Fiber Composition ..........733
Sri Nugroho Marsoem, Joko Salsito, Vendy Eko Prasetyo, Yus Andhini, Fajar Setiaji
Challenges and Demands Towards Higher Filler Levels in White Top Liner and Fine Paper .............................743
Patrik Simonson, Joakim Carlen, Michael Persson

C11: GROWING TRENDS IN CALENDARING

A Study of the Influence of Pre- and Post-Calendering on the Structural Parameters of a Coating Layer Applied with a Curtain Coater ............................................................748
Wolfgang M. Bauer, Johannes Kritzinger
Metal Belt Calendering of Uncoated Fine Paper - Pilot and Mill Trial Results ...........................................758
Henri Vaatinen, Reijo Pietikainen, Timo Valkama

M10: MILL MANAGER’S ROUNDTABLE

Sustainability - The Broader Goal ..............................................................................................................781
Tom Detwiler
Growing Talent for the Future ...............................................................................................................787
Paul Duncan
Growing the Future - MWV Evadale Mill ...............................................................................................794
Jim Gresham
Growing a Sustainable Future by Using Influence ................................................................................806
Bob Grygotis

PB8: PAPERMAKING SUCCESS STORIES

Operations Training Supports the Transformation at Longview ..................................................................811
Bruce Warrick
Making it with Less (Equipment, Energy, Water and Other Stuff) ............................................................814
Douglas F. Sweet

PQ8: DEPOSIT CONTROL

The Management of Hydrophobic Particle Size for Improved Paper Machine Wet End Stability ...............824
Mari Zahabian, Christopher M. Lewis, Henri Villanen, Juhnt Rintala
How Management of Mill Process Water Impacts Colloidal Stability ........................................................836
R. Daniel Haynes

PB9: PACKAGING PAPER MACHINE INNOVATIONS

100% Recycle Linerboard Manufacturers Use Advanced Specialty Chemicals to Save Money and Overcome Multiple Challenges ..................................................................................................857
Brian Atherr
Excellent Runnability and Ropeless Tail Threading by EV Drying Section Optimization in Kraft Liner Mill in Austria ..................................................................................................................863
Kenneth Wiik
Utilizing High Pressure Modular Cleaning to Maximize Sheet Quality and Coating Efficiency .....................866
Daniel Strom, Pat Boucher, Steve Fielding

PQ9: ADVANCES IN MICROBIOLOGICAL CONTROL

Novel Method for Creating Biocides from Process Waters ........................................................................871
Jani Kuuru, Atsushi Tanaka
The Use of On-line Monitoring Tools and Advanced Analytical Techniques to Optimize Biocontrol Treatment Strategies for Papermaking Systems ...........................................................................882
Liliya Land, Laura Rice, Elisa Luth, Dave Strois
### POSTER SESSION: PAPERCON AND CONTROL SYSTEMS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mechanical Property Analysis and Optimal Design of the Frame of Papermachine Dry Section Based on Finite Element Method</td>
<td>891</td>
</tr>
<tr>
<td>The Negative Impact of Calendar Barring on Paper Strength and Properties</td>
<td>892</td>
</tr>
<tr>
<td>Frederic Parent, Bob Rourke</td>
<td></td>
</tr>
<tr>
<td>New Concepts for Polyamido-amine-epichlorohydrin Resin</td>
<td>893</td>
</tr>
<tr>
<td>Yuping Luo, Harold Goldsberry, Junhua Chen</td>
<td></td>
</tr>
<tr>
<td>Understanding Coating Layer Attributes Affecting the Deinkability of LEP Papers</td>
<td>900</td>
</tr>
<tr>
<td>Casey Kick, Margaret Joyce, Paul Flemming III, Veronika Husovska, Roland Gong</td>
<td></td>
</tr>
</tbody>
</table>

### BEGINNING OF CONTROL SYSTEMS SESSIONS

#### CS 1: WEB IMAGING & INSPECTION

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential of Imaging Measurements in Paper Machine Control</td>
<td>901</td>
</tr>
<tr>
<td>Markku Ohenoja, Kauko Leiviska</td>
<td></td>
</tr>
<tr>
<td>Variability of Crepe Frequency in Tissue Paper; Relationship To Basis Weight Profiles</td>
<td>910</td>
</tr>
<tr>
<td>Jukka Pekka Raunio, Mikko Mäkinen, Risto Ritala</td>
<td></td>
</tr>
</tbody>
</table>

#### CS 2: MILLWIDE APPLICATIONS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Process State Dependent Calculations</td>
<td>921</td>
</tr>
<tr>
<td>Jarmo T. Kahala, Pasi Niemeläinen, Miia Saajärvi</td>
<td></td>
</tr>
<tr>
<td>Energy Savings with Process Control</td>
<td>932</td>
</tr>
<tr>
<td>Chris McAnarney</td>
<td></td>
</tr>
<tr>
<td>Start-Ups Do Not Have to be Difficult</td>
<td>938</td>
</tr>
<tr>
<td>Michel Ruel</td>
<td></td>
</tr>
</tbody>
</table>

#### CS 3: PAPER MACHINE OPTIMIZATION AND GRADE CHANGE

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automatic Nonlinear Grade Change Control for Paper Machines</td>
<td>949</td>
</tr>
<tr>
<td>Stephen Chu, Johan U. Backstrom, Joyce Choi, Michael G. Forbes</td>
<td></td>
</tr>
<tr>
<td>Operational Optimization of Flow Management in Papermaking</td>
<td>967</td>
</tr>
<tr>
<td>Aino Ropponen, Risto Ritala</td>
<td></td>
</tr>
</tbody>
</table>

#### CS 4: PAPER MACHINE CD APPLICATIONS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Closed-loop Alignment Identification with Adaptive Probing Signal Design</td>
<td>974</td>
</tr>
<tr>
<td>Daniel Chu, Cristian Gheorghe</td>
<td></td>
</tr>
<tr>
<td>Improving Reel-Building with Multivariable CD Control</td>
<td>984</td>
</tr>
<tr>
<td>Shih-Chin Chen, Rambo Naimamohasses, Andreas Zehnpfund</td>
<td></td>
</tr>
<tr>
<td>Variable Speed Scanning - A Fundamently Better Way to Scan</td>
<td>1003</td>
</tr>
<tr>
<td>Dave W. Lang, Calvin Fu</td>
<td></td>
</tr>
</tbody>
</table>

#### CS 5: SHEET QUALITY MEASUREMENTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Experiences with Online Measurement of Tissue Weight Using Infrared Technology</td>
<td>1011</td>
</tr>
<tr>
<td>Dave W. Lang, Piotr Wasowski</td>
<td></td>
</tr>
<tr>
<td>IR vs Nuclear Fiber Weight Measurement - Field Trial Results on Tissue</td>
<td>1019</td>
</tr>
<tr>
<td>Reena Meijer Drees, Frank M. Harun, Keith G. Lantz, Ross MacHattie, Sebastien Texier</td>
<td></td>
</tr>
<tr>
<td>New Online Porosity Sensor for Paper Industry</td>
<td>1031</td>
</tr>
<tr>
<td>Justi Graeffe, Marko Toskala</td>
<td></td>
</tr>
</tbody>
</table>

#### CS 6: CONTROL SYSTEMS-NEW TECHNOLOGY SHOWCASE

<table>
<thead>
<tr>
<th>Title</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proactive Camera Systems - Eliminating Wet End Picking and Edge Cut Issues with On-Line Disturbance Detection</td>
<td>1042</td>
</tr>
<tr>
<td>Mikko Ruuska, Brian F. Hayes</td>
<td></td>
</tr>
<tr>
<td>Improved Performance Management Through Automated Reporting and Electronic Notification</td>
<td>1057</td>
</tr>
<tr>
<td>Devin P. Cole</td>
<td></td>
</tr>
<tr>
<td>Improve Your Process, Safely, With Cristini On-line Diagnostic Systems</td>
<td>1065</td>
</tr>
<tr>
<td>Luca Canali, Giovanni Cristini, John Feola</td>
<td></td>
</tr>
</tbody>
</table>
Reliable On-Line Measurement of Paper Formation ........................................................................................................ 1082
Les Frackowiak

CS 7: PULP MILL MEASUREMENTS

Adaptive Kappa Number Prediction via Reduced-Order Dynamic PLS Soft Sensor for the Control of a Continuous Kamyr Digester ........................................................... 1092
Hector J. Galicia, Jin Wang, Q. Peter He

Advanced On-Line Sensor for Pulp Mill Control ................................................................................................................. 1107
Thanh Trung, Bruce Allison

On-Line Cyclic Voltammetry Sensor for the Continuous Measurement of TTA, EA and AA .............................................. 1120
Sebastien Tixier, Michael T. Brown, Ted Jasinski, Ulysse Dos Santos

Study of Consistency Modeling and Control in Chemical and Mechanical Pulping Processes ........................................... 1132
Manne Tervaskanto, Antti Yli-Korpela, Enso Ionen, Olli Timonen

CS 8: PULP MILL CONTROL APPLICATIONS

Causticizing Process Optimization - Sustained Benefits from Causticizing Advanced Process Control .......................... 1142
Jeff M. Butler

Identification of Runnability Failures in Continuous Cooking .......................................................................................... 1147
Antti Yli-Korpela, Olli Timonen, Sampo Luukkainen, Enso Ionen, Manne Tervaskanto

Optimization using a New On-Line Brightness Measurement ......................................................................................... 1156
James Goldman

CS 9: DIAGNOSTICS AND ANALYSIS

Paper Machine Transition Troubleshooting from Stock Blending to the Reel ................................................................. 1163
Timothy F. Murphy, Kevin D. Starr

Traffic Light Application for Tail Threading ....................................................................................................................... 1181
Kimmo Konkarikoski, Jorma Kemppainen

Performance Improvements and Sustainability Through a Remote Monitoring, Analysis, and Warning System - Benchmarking Performance for Long-Term Stability ........................................... 1188
Antti Nissinen, Seyhan Nuyan

CS 11: PROCESS CONTROL POSTERS

Finding the Root Cause of Basis Weight Cycles .................................................................................................................. 1202
George Buckbee

Enhanced Cascade Weight Control for Paper Machines .................................................................................................. 1209
Michael G. Forbes, Charles Zhan, Johan U. Backstrom, Joyce Choi, Pezhman Nafissi

BEGINNING OF RPTA SESSIONS

RPTA SESSION I: ENERGY CONSERVATION

Doctoring the Energy Efficient Way ................................................................................................................................. 1219
Jerry Vandoros

Using Heat Exchangers to Capture Lost BTUs ...................................................................................................................... 1237
Tom Frey

RPTA Machine Efficiency Benchmarking Template ............................................................................................................. 1246
Greg Wedel

RPTA SESSION II: MAINTENANCE AND RELIABILITY

Safe, Practical Solutions for Trim Roll Handling on the Winder Deck ................................................................................ 1254
Steve Uttenbrock

Operator Driven Reliability (ODR) ..................................................................................................................................... 1266
Jim Davis

Recovered Fiber Global Outlook ............................................................................................................................................. 1287
Barbara Wright Hudson

RPTA SESSION III: FIBER QUALITY AND SUPPLY

Fiber Substitution ................................................................................................................................................................. 1299
Tom Wood
Hydraflow Continuous Detrashing System ................................................................. 1321
  Chris Demler
Monitoring and Controlling Stickies Part 1 ............................................................. 1328
  Mahendra Doshi
Stickies Detackification and Monitoring Tool .......................................................... 1340
  Brian Altherr
New One-Two Punch Gives Mills the Upper Hand Against Stickies ......................... 1349
  Dexter B. Monroe

RPTA SESSION IV: INDUSTRY HOT TOPICS

Corrugated Industry Wax Alternative Protocol ......................................................... 1354
  Brian O’Bannon
Mineral Oil Hydrocarbons ....................................................................................... 1363
  Paul Noc

Author Index
