International Mine Water Association Symposium 2012

Mine Water and the Environment

Bunbury, Australia
29 September - 4 October 2012

Editors:

Clint D. McCullough
Lorraine Wyse

Mark A. Lund

Contents

Keynotes

Water in mining challenges for the Australian and international mining industry 10 A
  David Jones

Maximising use of waters produced by mining 11
  Martin Schultze

Protecting Water Values

Coal mines – managing groundwater and impacts for open pit underground mines

Inrush and mine inundation - A real threat to Australian coal mines? 25
  Detlef Bringemeier

Overview of managing groundwater and impacts at Loy Yang open cut. 31
  Genevieve Foley, Chris Nicol, Jon Missen

Simulation of Water Balance in Dump Slopes of Open-Cast Mining Pits for Geo Mechanical Stability Prognosis 37
  Peter-Wolfgang Graeber, Martin Meyer, Issa Hasan, Jana Sallwey, René Blankenburg

Predicting the acid production potential of Mpumalanga coal mines 47
  Gideon Steyl, Danie Vermeulen, Lore-Mari Cruywagen

Experience-based approaches to coal mine groundwater evaluation in Kalimantan, Indonesia 55
  John Waterhouse and Craig Wicenciak

Uranium mining and water

Dewatering of an underground uranium mine in Saskatchewan, Canada 63
  Rashid Bashir, James Hatley

Conclusions from using an active production well for mine drawdown compliance 73
  Gabor Bekesi, Murray Tyler, John Waterhouse

Improved calculation of groundwater heads for environmental management in the Great Artesian Basin, Australia 79
  Gabor Bekesi, Murray Tyler, John Waterhouse

Remediation strategy for a waste rock dump at a former uranium leach operation 85
  Marcus Frenzel, Andrea Schramm, Carsten Wedekind, Michael Paul, Ulf Jenk

Review of solute selection for water quality and bioaccumulation monitoring at a northern Australian uranium mine 91
  Alison Frostick, David Jones, Kate Turner
Characterisation of hydrogeological conditions and solute transport pathways in the region of the Ranger uranium mine tailings storage facility, Northern Territory, Australia  
Alan Puhalovich, Andrew Thomas, Nathaniel Toll, Philippe Puig, Alana O’Neill  

101

One- and three-dimensional modelling of sub-surface solute transport processes in the region of Ranger uranium mine’s tailings storage facility, Northern Territory, Australia  
Alan Puhalovich, Keely Mundle, Russell Pol, Nathaniel Toll  

107

Groundwater and coal seam gas developments  

Development of a management tool to support optimization of the beneficial reuse of associated or produced water in eastern Australia  
Ryan T. Jakubowski, Nathan W. Haws, David A. Ellerbroek, John Murtagh, and David Macfarlane  

115

Hydrochemical compatibility assessments of aquifer injection of treated coal seam gas water into Surat Basin aquifers.  
Matt Landers, David Harris, Brent Usher, Ryan Morris and Andrew Moser  

131

Leading practices for assessing the integrity of confining strata: application to mining and coal-seam gas extraction  
Wendy Timms, Ian Acworth, Adam Hartland, David Laurence  

139

A South African perspective on shale gas hydraulic fracturing  
P.D. Vermeulen  

149

Mine Water and Mine Closure  

Deriving surface water quality closure criteria for natural waterbodies adjacent to an Australian uranium mine  
Chris Humphrey, David Jones, Alison Frostick, Lisa Chandler  

159

Pit lakes as evaporative ‘terminal’ sinks: an approach to best available practice mine closure  
Clint D. McCullough, Geneviève Marchant, Jörg Unseld, Michael Robinson, Ben O’Grady  

167

The importance of having an agreed plan  
Jamie Robertson  

175

Acid Mine Drainage – processes and treatment  

Application of a jet loop reactor to enhance removal of sulphates from mine water using coal fly ash, lime and aluminium hydroxide  
Godfrey Madzivire, Wilson M. Gitari, Viswanath, R.K, Vadapalli and Leslie F. Petrik  

183

Research on the applicability of anaerobic passive bioreactor for mine water treatment in Japan  
Hisatoshi Furuya, Takuya Kodera, Kousoke Takamoto, Nobuyuki Masuda, Mikio Kobayashi, Atsushi Osame, Hideo Asano, Hajime Ikeda, Takeshi Sakata, Hidekatsu Nakamura, Masao Okumura, Tatsuru Takahashi, Kazuya Sunada and Manami Ikeda  

200 A

Treatment plant to allow mine water release from Morro Da Mina, Brazil  
Sam Hawker, Jamie Robertson  

201
Combined numerical and analytical modelling as a means to assess closure options for open-pit mines, Pilbara region

Niall Inverarity, Shawan Dogramaci, Iain Rea

Ettringite Precipitation vs. Nano-Filtration for Efficient Sulphate Removal from Mine Water

Eberhard Janneck, Mitch Cook, Christian Kunze, Klaus Sommer, Laurentiu Dinu

Review of sulfate reduction based bioprocesses for acid mine drainage treatment and metals recovery

Anna H Kaksonen, Erkan Sahinkaya

Acid metalliferous leaching of a mineral sands deposit: From field to laboratory.

Matt Landers, Brent Usher

Mineralogical and geochemical studies on pyrite and chalcopyrite oxidations in the Sarcheshmeh copper mine tailings

Sajjad Jannesar Malakooti, Mohammad Noaparast, Saied Ziaeddin Shafaei Tonkaboni, Faramarz Doulati Ardejani, Esmaeil Soleimani, Esmat Esmaeilzadeh

A novel approach to exploit indigenous mining algal-microbes in a photo-rotating biological contactor for heavy metal removal from acid mine drainage

Sanaz Orandi, David M. Lewis, Afsar Esfami, Ali Mohebbi

Biological sulphate reduction of acid mine drainage using primary sewage sludge

Johann Poinapen

Oxidation process and hydrology of tailings dams: Implication for acid mine drainage from TSFs management -The Witwatersrand experience, South Africa

Bisrat Yibas, W Pulles, S Lorentz, B Maiyana, C Nengovhela

Stream sediment geochemistry of the Olifants catchment, South Africa: Implication for acid mine drainage

Robert Netshitungulwana, B. Yibas

Approaches to predetermine the variables affecting the efficiency for the design of mining effluents and acidic drainage treatment systems

Nora Paños, Luis Gutierrez, Ana Senese

Liming of acid surface waters: Effect of water constituents and material impurities on calcite dissolution kinetics

Mandy Schipek and Broder J. Merkel

Abandoned Mine Issues

The Collie Pit Lake District, Western Australia: An Overview

Mark A. Lund, Clint D. McCullough, & R. Naresh Kumar

Role of private sector and national policy for rehabilitation of abandoned mines in Portugal

Hossain M. Anawar

Is Water Conservation and Water Demand Management a real option?

Fanie Botha, Karen Chetty

Antimony contamination of surface water at abandoned Sardinian mine sites

Rosa Cidu, Riccardo Biddau, Elisabetta Dore

Water security and engineering innovation for the Southdown Project
Daniel Visser, Ross Carpenter

Mine water and climate change

Climate science in mine water system design
Jennifer Ahern, Mark Gibbs

The Impact of Climate Change on a Mine Water Source
Conor O’Hara, Jaco Grobler, Greg Hookey, Jan Vermaak

Modeling the impact of a possible climate change on the water balance in post-mining areas
Rene Blankenburg, Dietrich Sames, Holger Mansel, Bernd Pfützner

Heat storage potential of a flooded mine in the Siegerland-Wied district, Germany
Georg H. E. Wieber, Hagen Deckert, Frieder Enzmann, Michael Kersten

Geochemistry of mine waters

Geochemical Assessment of Mineral Waste through the Mine Life Cycle
Rosalind Green

Groundwater modelling meets geochemistry: Building the bridge between FEFLOW and PHREEQC with IFMPhreeqc
Eduardo Reckziegel de Sousa

Zn-Al sulphate layered double hydroxide for Mo uptake
Franco Frau, Carla Ardau, Elisabetta Dore, Pierfranco Lattanzi

Revegetation of historic acidic mine waste with Agrostis capillaris – Impact on leachate composition in pot experiments
Stefan Karlsson, Viktor Sjöberg, Anna Grandin and Bert Allard

A critical review of static geochemical test methods applied to mining wastes, including their applicability to field conditions
Pierre D S Rousseau

Getting rid of chemical analysis – Mine water management with indicator parameters
Christian Wolkersdorfer

Maximising use of waters produced by mining

Pit Lakes

Post-closure mining pit lake water quality modelling
David Dettrick, Brian Barnett, Damon Grace, Hiro Toki

Upper and lower concentration thresholds for bioremediation of acid mine drainage using bulk organic substrates
R. Naresh Kumar, Clint D. McCullough, Mark A. Lund

Riverine breach and subsequent decant of an acidic pit lake: evaluating the effects of riverine flow-through on lake stratification and chemistry
Clint D. McCullough, R. Naresh Kumar, Mark A. Lund, Michelle Newport, Elmien Ballot, Digby Short
Pit lake modelling – The total system approach
Dave Richers, C. (Doc) Richardson, Dwaine Edington, Guy Roemer, and Brad Bijold

The implications of redox conditions for the perpetual management of mine pit lakes
Phillip Whittle, Amie Leggett

Mine dewatering – maximising value and minimising costs
An alternative approach to managing dewatering in an open pit mine
Keith Brown, Shane Trott and Aadil Nabi

Shallow anthropogenic aquifers may provide a solution to reduce nitrate in dirty mine water?
Fanie Botha and Lebogang Maleka

Mine of the Future™: The automated mine dewatering design module of PBM0™
Eddy Lim, Larry M. Deschaine, and Peter S. Huyakorn

Dewatering of Opencast Mines using Horizontal Wells
Holger Mansel, Carsten Drebenstedt, Peter Jolas, Rene Blankenburg

Treatment and Disposal of mine waters
Zero Discharge Desalination Technology – Achieving Maximum Water Recovery
Brad Biagini, Bernie Mack, Phil Pascal, Thomas A. Davis, Malynda Cappelle

Removal of zinc and lead from a neutral mine water using iron tailings and iron oxyhydroxide coated iron tailings
Linnéa Fahlgqvist, Lotta Sartz, Mattias Bäckström

Effective desorption of metals from loaded biomass using response surface methodology based on Box-Behnken design
E Fosso-Kankeu, AF Mulaba-Bafubiandi, TG Barnard

The next step in the bioremediation of heavy metal polluted water: development of suitable microbial-sorbent
E Fosso-Kankeu, AF Mulaba-Bafubiandi, G Tlou and L Piater

Concomitant removal of iron and NAPLs within a mine water treatment system
Jennifer N. Geroni, Devin J. Sapsford

A case study of underground brine disposal
Terry Harck, Jennifer Pretorius, and Peter Gunther

Ecotoxicology of actively treated mine waters
Andrew J Harford, David R Jones, Rick A van Dam

Novel application of membrane distillation for acid and water recovery from mining waste waters
Uchenna K. Kesiemea, Nicholas Milne, Hal Aral, Chu Yong Cheng, Mikel Duke

Membrane based water and wastewater treatment solutions
Tim Lilley

Study on the mining influenced water and a possibility to extract copper metal from tailings deposition in Bor, Serbia
Nobuyuki Masuda, Daizo Ishiyama, Atsushi Shibayama, Yasushi Takasaki, Hiroshi Kawaraya, Hinako Sato, Zoran O. Stevanovic, Ljubisa Obradovic
Treatment of acidic and neutral metal-laden mine waters with bone meal filters

*Lotta Sartz, Mattias Bäckström*

New salt extractor system for salt removal from mine water and calcium sulfate removal on the International Space Station

*Benjamin Sparrow, Malcolm Man, and Joshua Zoshi*

The impact of co-disposal of sulphate brines on a fly-ash dam, a study of the physical-chemical influence on drainage patterns

*Gideon Steyl, Francois Fourie, and Lukas Marais*

Strategies to reduce AMD liability treatment costs at Stockton Coal Mine, New Zealand.

*Dave Thomas, Joe Wildy, Paul Weber, Phil Rossiter, Phil Lindsay, Mark Pizey*

---

**Posters**

Former Pit Mine Dive Parks

*Peter Buzzacott, David Paine*

Influence of acid mine drainage on river water quality in the vicinity of the Osamu Utsumi uranium mine, Caldas-Minas Gerais, Brazil

*Carlos Alberto de Carvalho Filho, Cristina Fonseca da Silva, Rubens Martins Moreira, Pedro Henrique Dutra, Vinicius Verna Magalhães Ferreira, Peter Marshall Fleming, Otávio Eurico de Aquino Branco*

A vertical flow reactor for removal of iron from zinc-rich AMD

*K. Florence*

Manganese and vanadium uptake by Cynodon Dactylon grass species: A case study in New Union gold mine tailings, Limpopo, South Africa

*N. Makuya, J.R. Gumbo, C. Muzerengi, F.A. Dacosta*

Seawater desalination of the Chilean coast for water supply to the mining industry

*Frans Knops, Manuel Garcia de la Mata, Cristian Mendoza Fajardo, Estanislao Kahne*

The influence of mine water on surface water in the Milek catchment (Intrasudetic Basin, SW Poland).

*Chudy Krzysztof, Worsa-Kozak Magdalena*

Investigation of the quality of water samples in the entrance and effluents from the Sarcheshmeh copper mine tailings dam

*Sajjad Jannesar Malakooti, Seyed Ziaedin Shafaei, Mohammad Noaparast, Faramarz Doulati Ardejani, Reza Naseh, Hosein Saadloo*

Investigation of phosphatic-vermiculite-heavy metal interaction and the implication to pollution of Solati River in Limpopo Province, South Africa

*Haile Mengistu, Bisrat Yibas, Souleymane Diop, Tamiru Alemayehu and Molla Demile*

Optimisation of a floating sulphur biofilm reactor in a passive acid mine drainage treatment system

*N. Mooruth and R.P. Van Hille*

Treatment of acid mine drainage (AMD) using iron oxides

*James D. Navratil, Andrew C. Akin and Justin Feis*
Removal of vanadium from neutralized acid mine drainage (AMD) by adsorption to saw dust  

**Viktor Sjöberg, Stefan Karlsson and Bert Allard**  

An evaluation on coal mining safety above high pressure confined aquifers in a deep coalmine  

**Sui Wanghua, Gao Yue, Feng Fuyuan**  

Tailing dam management practices - A review of 3 case studies  

**Gary Thorne, and Vanessa Personnaz**  

Evaluating the environmental impacts after the closure of mining activities, using Remote Sensing methods-The case study of Aliveri mine area.  

**Vasileiou E., Stathopoulos N., Stefouli M., Charou E., Perrakis A.**
