2012 International Conference on Image Analysis and Signal Processing

(IASP 2012)

Huangzhou, Zhejiang, China
9 – 11 November 2012
# Table of Contents

**Section 1 – Image Analysis and Graphics**

A Semi-Automated Methodology for Rock Mass Discontinuity Trace Map Construction  
Liqian Guo, Junbi Liao, Fangping Zhong, Kaiying Dong, Xu Liu, Jun Tao, Jianjie Chen .......................... 1

A Novel Geometrically Invariant Blind Robust Watermarking Algorithm Based on SVD and DCT  
Hu Guan, Zhi Zeng, Jie Liu, Shuwu Zhang, Peiyu Guo ...................................................................... 6

Novel Neighbor Embedding Super Resolution Method For Compressed Images  
Tao Yu, Zongliang Gan, Xiuchang Zhu ................................................................................................. 11

Content-Based Image Retrieval using Fractional Distance Metric  
Hai Wang, Shuwu Zhang, Wei Liang, Fangyuan Wang, Yingying Yao .................................................. 15

Mutual Information Based Video Shot Boundary Detection  
Na Lv, Zhiquan Feng, Jingliang Peng .................................................................................................. 20

Color Image Encryption Algorithm Based on Tangent-Delay Ellipse Reflecting Cavity Map System  
Zhang Kun, Fu Xing-an ...................................................................................................................... 25

Building a Plane Equation Solver Based on Random Sample Consensus and its Application  
Yu Jinyang, Li Lijuan .......................................................................................................................... 28

A Line Drawing Method of the 3D Models Based on Partial Sharpening  
Qiuqing Meng, Guohua Geng, Jing Zhang ........................................................................................... 33

Low-Cost Interactive Whiteboard Using the Kinect  
Shuai Zhang, Wenrui He, Qiao Yu, Xiaojuan Zheng ........................................................................... 38

A Novel Location and Matching Algorithm for Rapid Logo Recognition in Video Advertisements  
Yuan Zhang, Shuwu Zhang, Wei Liang, Jinchun Liang ......................................................................... 43

Towards Automatic Building Extraction: Variational Level Set Model Using Prior Shape Knowledge  
Jian Yang, Yu-Heng Wang ............................................................................................................... 48

Three Components for Large Scale Image Retrieval  
Hai Wang, Shuwu Zhang, and Wei Liang ............................................................................................. 54

Image Retrieval Using Multiple Orders of Geometry-Preserving Visual Phrases  
Fangyuan Wang, Shuwu Zhang, Heping Li, Naiguang Zhang ............................................................. 59

Denoising 3D Biomedical Images with Fractional-Order Integral Calculus  
Yu Ma, Yanning Zhang ....................................................................................................................... 64

A PCA-based Smoothed Projected Landweber Algorithm for Block Compressed Sensing Image  
Reconstruction  
Ran Li, Xiuchang Zhu .......................................................................................................................... 68

Real-time Simulation of Infrared Scene  
Zhu Wang ............................................................................................................................................ 74

Outdoor Camera Calibration Method Using GPS Coordinate Based on Two-stage Optimization  
Shi Yujie, Hu Dong ............................................................................................................................. 79

Image Denoising Study on Nonlocal-Means Filter  
Deng Shi-wo, Jin Ling-yu, Xu Xiong-qiang, Ma Wei-bin .................................................................... 84
Fast Mosaic Detection for Real-time Video Based on Template Matching Strategy

Huabing Zhang, Jian Ling, Yiqun Lian ........................................................................................................... 88

Simulation for Surveillance Radar Ground Clutter at Low Grazing Angle

Xiaojun Wang, Helei Wang, Shusheng Yan, Lianhua Li, Cangzeng Meng ......................................................... 92

The Rapid Method for Road Extraction from High-Resolution Satellite Images Based on USM Algorithm

Liu Xu, Tao Jun, Yu Xiang, Cheng Jianjie, Guo LiQian ................................................................................... 96

A Detection Method of Infrared Target Based on the Ridgeline Extraction

Hu Zhu, Lizhen Deng, Xiaodong Bai, Gang Zhou .............................................................................................. 101

Experiments on the Effect of the Geometric Distortion on Phoebe’s Positional Measurement

Chunyi Yang, Qingyu Peng, Qinfeng Zhang ...................................................................................................... 105

Segmentation of Small Defects in Final Optics Damage Online Inspection Images

Feng Bo, Chen Fengdong, Liu Bingguo, Liu Guodong ...................................................................................... 110

Study on the Method to Process the Images of the Laser Initiative Illumination

Cai Lei, Zhang Ji-hua, Zhang Shi-qiang, Guan Xiao-wei ................................................................................. 114

Research of the Matlab Application in the Fingerprint Identification System

Jiya Tian, Yanqin Peng ........................................................................................................................................ 118

A Research of Progressive Association Rules Mining Algorithm Based on Image Content

Tang Junfang ....................................................................................................................................................... 123

Section 2 – Signal Processing, Broadcasting, and Digital Media Technology

Research on Chaotic Character of Ship-Radiated Noise Based on Phase Space Reconstruction

Meng Qingxin, Yang Shie, Piao Shengchun, Zhang Haigang ............................................................................. 127

Landmine Feature Extraction in UWB SAR Based on Sparse Representation

Jun Lou, Tian Jin, Zhimin Zhou ......................................................................................................................... 132

Speaker Identification with Whispered Speech Using Unvoiced-Consonant Phonemes

Juan Xu, Heming Zhao ...................................................................................................................................... 136

A Multi-User Quasi-Orthogonal Space-Time-Frequency Block Coding Scheme Based Beamforming

Yuehua Li, Shulan Liu ....................................................................................................................................... 140

Optimal FIR Filter Design for Uncertain 2-1 Sigma-Delta Modulator via Curve Fitting Method

Jun Peng, Jianhui Wang .................................................................................................................................... 146

The Processing of the Rolling Bearing’s Fault Signal Based on Wavelet Analysis

Qiong Lu .............................................................................................................................................................. 150

An Improved CDKF Algorithm Based on RBF Neural Network for Satellite Attitude Determination

Dong Xinyuan, Wu Jinjie, Wang Sufeng, Chen Ting ......................................................................................... 155

Transmitter Individual Identification Based on Local Surrounding-line Integral Bispectrum

Tang Tongwei, Tao Wanglin .............................................................................................................................. 162

Time Delay Estimation of UAV-Mounted UWB SAR

Liang Fu-lai, Song Qian, Zhang Han-hua, Zhou Zhi-min ............................................................................... 167

An Improved Wavelet Denoising Method Used in Electrical Throttle Performance Testing

Xiaomin Yang, Zailiang Chen ............................................................................................................................ 171
Eigenvalue-Based Memoryless MIMO Channel Decomposition
Qiudong Dong, Jinhua Song, Sun Yongjiang, Yuhua Ma ................................................................. 175

Research of Speech Style Evaluation System
Chaozhou, Yu Huang, Jian Jiao ................................................................. 179

A New Approach for Landmine Discrimination in SAR Images
Yuming Wang, Qian Song, Hanhua Zhang, Xiaotao Huang, Zhi-min Zhou ........................................ 184

Adaptive Threshold based Video Shot Boundary Detection Framework
Huoyi, Zhang Pengzhou, Wang Yanfeng ................................................................. 188

Research on Adaptive Beamforming Algorithm
Sun Yongjiang, Qiudongdong, Rui Hia-ren, Zong Peng, Darwin R. Becerra ........................................ 193

Gyro Fault Prediction Algorithm Based on UKF
Chun, Tian Lu ................................................................................................. 196

The Simulation of the Influence of Two-Compartment Model Parameters on the Plasma Drug Concentration and Drug Effect
Lei Zhao, Xinling Shi, Yufeng Zhang, He Sun ................................................................. 200

An Effective Improvement on 3D SPIHT
ZhongCuixiang, Huaying Minghe ........................................................................ 204

Application of EBG and DGS structure on Antenna Array
Jinhua Song, Qiudongdong, Rui Hia-ren, Zong Peng, Darwin R. Becerra ........................................ 208

A Fast Echo Construction Method in Through-The-Wall Application: Simulation and Analysis
Sun Xin, Lu Biying, Jin Tian, Zhou Zhi Min ................................................................. 212

The Design of Cable Television IP Access Network Based on Hot Standby Router Protocol
Zhang Yanhua, Ma Wei Zhe .................................................................................. 216

The Design of An Omnimedia Release Operation Platform Based on LAMP Architecture
HuYiliang, Zhu Jinjin, Zhang Xiuyang, Li Liang ................................................................. 220

A CS-Based Adaptive Sampling Rate Surveillance Video Codec Framework
Zheng Hong, Zeng Wenda, Li Zhen ........................................................................ 225

Research on Digital Audio Watermark Technology for Broadcast Information Security
Xiuli Wang, Xuan Wang, Shouxun Liu ........................................................................ 230

Video Shot Segmentation and Key Frame Extraction Based on SIFT Feature
Jinlong Li ........................................................................................................ 236

A Video Summarization Method Based on Key Frames Extracted by TMOF
Xiaohua He, Jian Ling ................................................................................................. 244

The Cloud Video Material Transfer Code System Design in the Global Station Network Environment
Li Liang ........................................................................................................ 248

Support Vector Machine-based Image Segmentation Approach for Automatic Agriculture Vehicle
Yonghua Han, Yuming Wang, Yun Zhao ................................................................. 251

An Improved Fast Root-MUSIC Algorithm for DOA Estimation
Xiong Jing, Zi Cheng Du ................................................................................................. 256

Affine Projection Sign Subband Adaptive Filter
Jingen Ni, Xiaoping Chen, Jianyang ................................................................. 259

Section 3 – Computer Science, Technology, and Application

A Research of Public Opinion on a Small World Network
Xiaolan Qian, Xiaoping Yuan, Binbin Ren, Xuelan Zou ................................................................. 353

Kriging-Based Study on the Visualization of Magnetic Method Data
Huang Hao, Liu Qiang, Wang Jun, Chen Jianjie, Yu Xiang ............................................................. 357

The KD-Tree-Based Nearest-Neighbor Search Algorithm in GRID Interpolation
Liu Qiang, Huang Hao, Wang Yongmin, Liu Xu, Guo Liqian, ......................................................... 363

Self-Adaptive Marching Cubes 3D Surface Reconstruction Method for 3D-GIS Spatial Raster Volume Data
Tao Jun, Liu Xu, Wang Yongming, Chen Jianjie .................................................................................. 369

The Research on End-to-End Delay Upper Bound in Wireless Sensor Network
Li Cui, Ju Yong-feng .......................................................................................................................... 373

A Low Power Testing Architecture for Test-per-Clock BIST
Sun Haijun, Wang Xuanming, Lei Shaochong, Shao Zhibiao ......................................................... 377

Kinect-Based Automatic 3D High-Resolution Face Modeling
Qi Sun, Yanlong Tang, Ping Hu, Jingliang Peng ................................................................................. 382

Research on the Agriculture Intelligent System Based on IOT
FuBing ............................................................................................................................................... 386

Dots-Array Photogrammetry of Flexible Antenna Surfaces
Tang Feng, Liu Bingguo, Chen Fengdong, Liu Guodong ................................................................. 390

Research on Data Fusion Method for Archaeological Site Identification
Yu Lijun, Nie Yueping, Liu Fang, Zhu Jianfeng, Yao Yueyin, Gao Huaguang .............................. 395

Computer-Assisted Hand Rehabilitation Assessment Using an Optical Motion Capture System
Jian Li, Jiushan Yang, Zhanwang Xu, Jingliang Peng ................................................................. 399

Effect of MTF on Depth Resolution in Imaging Three-dimensional Ladar System
Yanbing Jiang ................................................................................................................................. 404

Dead-time Compensation Strategy of Three-Phase SVPWM Inverter
Xu Zhengwen, Yuan Qiping ............................................................................................................. 408

The Design Of Photovoltaic Maximum Power Automatic Tracking And Controlling System
MingLiang Wang, HuiBin Qin, JiJun Zhou, GuiHua Hu ................................................................. 411

Power Factor Correction Controlled by DSP and its Matlab Simulation
Xin-ge Lv, Hui-bin Qin, Pei-liang Wang ......................................................................................... 415

Design of LED Street Lamps Intelligent Control System Based on PIC MCU
Ming-huan Niu, Hui-bin Qin ............................................................................................................. 419
The Design of Data Mutual Conversion System Between Serial Port and Ethernet Based on W5100
Dong Wu, Lu Likun, Li Yeli ........................................................................................................ 423

A New Scene Matching Algorithm During Optical Aided Navigation of Aircraft
Sun Bin, Yan Wei-dong, Ma Xin-lu, Bian Hui, Ni Wei-ping, Zheng Gang........................................ 428

A Method of Target Tracking
Li Li, Xiong Wei-Wei, Huang Mei-zhi, Qiao Zhi-gang, Zhou Ling, Li Wen-yan ............................... 432

Harmonic Generator
Xuanwei Zhu, Buping Jin, Huibin Qin ............................................................................................ 435
