Keynote/Plenary Presentations

Rethinking Context for Pervasive Computing: Adaptive Shared Perspectives .................................................................1
Christine Julien, Agoston Petz, and Evan Grim

Computing Capacity and Connectivity in Cognitive Radio Ad-Hoc Networks .................................................................9
Qiang-Sheng Hua, Haisheng Tan, Yuexuan Wang, Hongxing Li, Dongxiao Yu, Francis C.M. Lau, and Chuan Wu

Big Data Processing in Cloud Computing Environments ..................................................................................................17
Changqing Ji, Yu Li, Wenming Qiu, Uchechukwu Awada, and Keqiu Li

A Network Model for Ranking Groups by Their Actions .................................................................................................24
Kiran B. Chilakamarri and Nathaniel Dean

EHA: The Extremely Heterogeneous Architecture ........................................................................................................30
Shaoshan Liu, Won W. Ro, Chen Liu, Alfredo C. Salas, Christophe Cérin, Jian-Jun Han, and Jean-Luc Gaudiot

Feature Selection and Combination for Stress Identification Using Correlation and Diversity ..............................................37
Yong Deng, D. Frank Hsu, Zhonghai Wu, and Chao-Hsien Chu

Making High-Speed OQ Switches with QoS Guarantees Practical ..................................................................................44
S.-Q. Zheng, Jianping Wang, and Yaohui Jin

Session 1A: Graphs and Networks 1

Extremal Functions on Cayley Digraphs of Finite Cyclic Groups ......................................................................................53
Jordan F. Blocher, Samantha M. Hampton, and Christopher E. Linden

On the Conditional Diagnosability of Cayley Graphs Generated by 2-trees and Related Networks ........................................58
Eddie Cheng, László Lipták, Ke Qiu, and Zhizhang Shen
Successive Generalizations of Star Graphs .................................................................65
Eddie Cheng and Nart Shawash

Session 1B: Ad-hoc and Sensor Networks
Monitoring Schedules for Randomly Deployed Sensor Networks Without Geographic
Information ..................................................................................................................70
G. Calinescu
Ant-Colony Optimization Based In-Network Data Aggregation in Wireless Sensor
Networks .....................................................................................................................77
Meng Xie and Hongchi Shi
Handoff Determination for a Hybrid Channel Allocation Algorithm in Wireless
and Mobile Networks ...............................................................................................84
Yuhong Zhang, Wei Wayne Li, and Ezzatollah Salari

Session 2A: Network Routing
Bandwidth Aggregating over VANET Using the On-Demand Member-Centric
Routing Protocol (OMR) .................................................................................................89
Chung-Ming Huang, Tzu-Hua Lin, and Kuan-Chang Tseng
Fault-tolerant Routing for Irregular Faulty Patterns in 2D-Mesh Without Virtual
Channel .....................................................................................................................96
Savio S.H. Tse, Jipeng Zhou, and Francis C.M. Lau
Network ......................................................................................................................104
Tseng-Yi Chen, Hsin-Wen Wei, Che-Rung Lee, Fu-Nan Huang, Tsan-Sheng Hsu, and Wei-Kuan Shih

Session 2B: Intelligent Systems and Software Development
Product Design Parameters Optimization Using Constrained Mixture Design
and Combinatorial Fusion Analysis ..............................................................................114
Yulian Fei, Manman Jiang, and D. Frank Hsu
StopWatcher: A Stop Sign Awareness Mobile Application for Driving Safety ..................122
Carl Tucker, Rachel Tucker, and Jun Zheng
A Novel View of Risk Management in Software Development Life Cycle ..........................128
Hussein Hashimi, Alaaedh Hafez, and Mutaz Beraka

Session 3A: Graphs and Networks II
Topology Construction of Near-Optimal Covert Communications Networks ..................135
Timothy Nix and Riccardo Bettati
Attainability of the Chromatic Number of Functigraphs .................................................143
Weizhen Gu and George Qi
Generalizing Fourier Calculus on Evolutionary Trees to Splits Networks ................................................................. 149
  Cayla D. Mcbee

Session 3B: Multimedia Communication
Scheduling Media Transmission for Cooperative Video Streaming over the Hybrid Vehicular Networks ........................................................... 156
    Chao-Hsien Lee, Chia-Ching Yang, Wan-Ping Tsai, and Chung-Ming Huang
Weight-Based Video Multicast over Broadband Wireless Access Networks ........................................................... 162
    Chia-Yu Yu, Cheng-Han Lin, Wen-Shyang Hwang, and Ce-Kuen Shieh
A Comparative Study on the Combination of Multiple Retrieval Systems ........................................................... 169
    Chun-Yi Liu, Chuan-Yi Tang, and D. Frank Hsu

Session 4A: Load Balancing
Rotating Escalators upon Deletions for Improving Online Bicriteria Load Balancing ........................................ 182
    Savio S.H. Tse
Arrangement Graph-Based Overlay with Replica Mechanism for File Sharing .................................................... 192
    Ssu-Hsuan Lu, Kuan-Ching Li, Kuan-Chou Lai, and Yeh-Ching Chung
Load Balancing with Cell Breathing in EPON-WiMAX Integrated Network .................................................... 201
    Hung-Chi Lai, Hung-Yi Teng, and Ren-Hung Hwang

Session 4B: Security and Privacy
A Novel Time-Obfuscated Algorithm for Trajectory Privacy ........................................................... 208
    Ren-Hung Hwang, Yu-Ling Hsueh, and Hao-Wei Chung
A Case for Low-level Jamming Attacks on Mobile CPS in Target Tracking Applications .................................................... 216
    Emad Guirguis, Mina Guirguis, and Nikhil Halkude
Coverage in Multi-antenna Tiered Macro/Femto Networks ........................................................... 222
    Yi Huang, Wenjian Zhang, Lei Fang, and Hao He

Author Index .................................................................................................................................................. 228
