9th International Conference on Performance-Based Codes and Fire Safety Design Methods 2012

Hong Kong
20-22 June 2012

Volume 1 of 2

ISBN: 978-1-62276-918-6
# TABLE OF CONTENTS

## VOLUME 1

### PERFORMANCE-BASED CODES

**Developing a Performance Based Building Regulation and Paving the Way Toward Electronic Submission of Building Permits and Automated Code Compliance Checks** .................................................. 1

*Bjorn Karlsson, Bodvar Tomasson*

**The Development of Performance-Based Design in China & the Influence of International Best Practices** ............................................................................................................................... 25

*Bo Hu, Fang Li, Martin Reiss*

**Outcomes of a 6 Year French Research Project on FSE** .......................................................... 25

*Joel Kruppa, Dhionis Dhima, Nicolas Henneton*

**Enforcement of Performance Based Building and Fire Codes in a Privatised Building Control System** ............................................................................................................................... 37

*Greg du Chateau*

**Performance-Based Design - Limits of Practice** .............................................................................. 49

*Leong Poon*

**The BCA and Performance Based Fire Engineering in Australia - 15 Years On** ........................................ 60

*Peter Johnson, David Barber*

**A New Framework for Performance Based Fire Engineering Design in New Zealand** ........................ 71

*Nic Saunders, Paula Beever, Colleen Wade, Charles Fleischman, Martin Feeney, Debbie Scott, Peter Thorby*

**New Swedish Building Regulations and a Framework for Fire Safety Engineering** ........................ 83

*Caroline Cronsoie, Michael Stromgren, David Tonegran, Henrik Bjelland*

**Safety Factors for Advanced Fire Simulation** ................................................................................... 95

*Simon Weaver, Jeremy Ockenden*

**Development of a Risk-Informed Performance-Based Approach to Addressing Fire Safety in Existing Buildings** ............................................................................................................................... 107

*Brian J. Meacham, Juan B. Echeverria*

**Education as Support for Performance - Based Fire Safety: A Joint International Effort** .................. 120

*B. Merci, P. van Hees, L. Taerwe, R. Jonsson, J.L. Torero*

**Fourteen Years of Experience with Performance Based Fire Safety Engineering in Norway - Lessons Learned** ............................................................................................................................... 132

*Henrik Bjelland, Ove Nja*

**Design of Flow and Holding Capacity of Escape Routes in Buildings** ............................................ 144

*P.H.E. van de Leur, N.P.M. Scholten*

**Can Building Sustainability be Enhanced through Fire Engineering of Structures?** .......................... 155

*David Barber*

**Optimum Performance - Based Fire Protection of Cultural Heritage** ................................................. 166

*Iordanis Naziris, Kyriakos Papaoannou*

**Alternative Solutions and Acceptable Risk - A Canadian Context** .................................................. 178

*Peter Senez, Keith Calder, Andrew Coles*

**The Effect of New Detailed Regulations on Fire Safety Engineering and Societal Risk Acceptance** .......... 187

*J. Noren, J. Bengtsson, T. Rantatalo*

**A Study of the Nature of Fire Risks in Tall Buildings** ........................................................................ 199

*David Charters, Carl Sherwood, Emma Warren*

**Occupation Load in Multi-Use Buildings - Evaluation Based on Standard Requirements Vs. Real Data and Performance-Based Approach** ................................................................. 209

*Marcin Cisek, Tadzus Cisek, Paweł Klimczak*

**Performance Basis for the Development of Fire Safety Standard for Three-Storey Wooden School Building** ............................................................................................................................... 219

*Yuji Hasemi, Noboru Yiasui, Eisuke Hori, Kotofumi Kato, Atsuyuki Ida, Jun’ya Inagaki, Michiyuki Hirai, Tatsuya Nakata, Asami Suzuki, Mizuho Yasukawa, Hirotaka Kushida*

**Applying the Air Jet Smoke Prevention System in the Places with Large Inconvenient Evacuees** ........ 229

# FIRE SAFETY DESIGN METHODS

<table>
<thead>
<tr>
<th>Topic</th>
<th>Page</th>
</tr>

CASE STUDIES

New Zealand Case Study: Building Specifications - A New Zealand Approach ................................................................. 562
  Mahesh Andhe, Charles Fleischman, Carol Caldwell, Anthony Parkes, Paul Richards

Australian Case Study: Performance Based Fire Engineering - Fire Safety Strategy Report ........................................ 605
  Philip Chun

Korean Case Study: Performance-Based Codes and Fire Safety Design Method for High-Rise Building Case Study by Korean Team ........................................................................................................... 722
  Won K. Kim, Jae Yon Nam, Woo Jung Park, Ha Young Kim, Woon Hyung Kim, Jong Sung Kim, Jong Hoon Kim,
  Eun Kyung Hwang, Ho Ju Youn, Hong Yeol Kim, Jin Su Kim

Finnish Case Study by L2 Fire Safety Ltd........................................................................................................................... 732
  Juha-Pekka Laaksonen

Swedish Case Study: Fire Safety Design of a Super Tall Building ..................................................................................... 825
  Johan Lundin

USA Case Study: Performance-Based Life Safety Assessment of the Four Corners World Tower ................................. 901
  William Koffel

Japan Case Study: Fire Safety Design of Super Tall Building ............................................................................................. 1024
  Kiyoshi Fukui
