2012 Sixth International Conference on Genetic and Evolutionary Computing

(ICGEC 2012)

Kitakyushu, Japan
25 – 28 August 2012
# Table of Contents

**Preface**

**Organizing Committee**

**Program Committee**

**Reviewers**

## Multimedia and Cloud Computing Security

- **Stereo Matching with Semi-limited Belief Propagation**
  - Chengzhi Luo, Jianjun Lei, Guanglong Hu, Kefeng Fan, and Shupo Bu
  
- **A Testing Method for the Image Crosstalk of Stereoscopic Television**
  - Kefeng Fan, Jianjun Lei, Guanglong Hu, and Shupo Bu

- **Advance on Trust Model and Evaluation Method in Social Networks**
  - Lijun Yang, Zhiyong Zhang, Weili Tian, and Qingli Chen

- **Application of Belief Learning Model Based Socio-rational Secret Sharing Scheme on Cloud Storage**
  - Tao Zheng, Haitong Wu, Hao Wen Lin, and Jeng-Shyang Pan

## Innovative Intelligent Multimedia Computing

- **Target-Preserving Content-Aware Image Resizing**
  - Cheng-Hung Chuang and Zhong-Yan Shi

- **Improved Reversible Data Hiding Based on Residue Histogram Shifting**
  - Wen-Chuan Wu and Yu-Chieh Wu

- **Joint Fingerprinting and Decryption for VQ Images through Bipartite Matching**
  - Panyaporn Prangjarote, Chih-Yang Lin, Li-Wei Kang, and Chia-Hung Yeh

- **Analyze the Digital Watermarking Security Demands for the Facebook Website**
  - Wei-Fan Hsieh and Pei-Yu Lin
Extraction and Analysis of Structural Features of Lateral Ventricle in Brain
Medical Images ...........................................................................................................................................35
  Hui-Fuang Ng, Cheng-Hung Chuang, and Chih-Hsueh Hsu

An Image Hiding Method by Linking Multiple Pixels with XOR Operator .....................................................39
  Chiao-Chih Huang, Yi-Hui Chen, Yuan-Yu Tsai, and Chi-Shiang Chan

Directional Discriminant Analysis for Image Feature Extraction .....................................................................43
  Dong Zou and Li-Yan Zhao

Advances in Information Security

An Information Hiding Method Based on Grouping Color Palette Indices by K-means Clustering and Similar Pairs ........................................................47
  Chyuan-Huei Thomas Yang, Yu-Wei Hsu, and Che-Lun Chun

The Study of Automate Locate Special Fiducial Marks .................................................................................51
  Yu-Ching Lin, Yu-Ying Chiu, Hau-Wei Lee, Bo-Yan Jhan, and Chuen-Horning Lin

Enhancement of Dynamic ID Based User Authentication for Multi-server Environment ..................................55
  Hui-Feng Huang and Pin-Han Lin

Comments on a Dynamic-ID-Based Remote User Authentication Scheme for Multi-server Environment Using Smart Cards ........................................................59
  Ya-Fen Chang and Pei-Yu Chang

An Efficient and Flexible Mobile Payment Protocol .........................................................................................63
  Chin-Chen Chang, Jen-Ho Yang, and Kai-Jie Chang

Payment Status and Service Level Agreement Based Access Control Method in Cloud Service Business ........67
  Chi-Lun Liu

A Security Flaw of a Bilinear-Pairing-Based Electronic Cash Scheme with Trustee-Based Anonymity Revocation ..................................................71
  Yuan-Fu Li and Ya-Fen Chang

The Case Study of Adaptive Network-Based Fuzzy Inference System Modeling for TAIEX Prediction ........75
  Min-Hsuan Fan, Mu-Yen Chen, Hui-Feng Huang, and Tai-Ying Huang

An Improvement to Lee and Hwang’s Scheme .........................................................................................79
  Shao-Fan Tseng and Chao-Wen Chan

Analysis to Wen and Li’s Scheme ........................................................................................................82
  Chun-Hong Lin and Chao-Wen Chan
Innovation in Computer Networking

On Decoding of Binary Cyclic Codes up to Error-Correcting Capacity Five .........................................................87
   Tsung-Ching Lin, Pei-Yu Shih, Wen-Ku Su, and Trieu-Kien Truong

Semantic Clustering-Based Community Detection in an Evolving Social Network .......................................................................................................................................................91
   Hsun-Hui Huang and Horng-Chang Yang

The Relevant Research of Mobile Learning Mode and Information Ability Indicator in Countrified Area .......................................................................................................................................................95
   Tzong-Song Wang

Design of Document Access Control Mechanism on Cloud Services ..................................................................99
   Chun-Wei Tseng, Feng-Jung Liu, and Shih-Hao Huang

An Efficient Packet Forwarding Mechanism Based on Bandwidth Prediction with Consideration of V2I and V2V Communications ...........................................................................................................................................103
   Wei Kuang Lai, Mei-Tso Lin, Yuh-Chung Lin, and Ya-Lin Jhuang

An Novel Scheduling Algorithm for Video Stream in LTE ..........................................................................................107
   Yuh-Chung Lin, Wei Kuang Lai, Kai-Ting Yang, and Mei-Tso Lin

Cooperative Transmission Scheme in Metropolitan Environment ..................................................................................111
   Kai-Ting Yang, Wei Kuang Lai, Chen-Da Tsai, and Chuan-Wang Chang

Improving Harmony Search by Zipf Distribution .........................................................................................................115
   Shih-Pang Tseng and Wuu-Wen Lin

Access Point Design with a Genetic Algorithm .............................................................................................................119
   Marco Antônio S. Barbosa and Maury Meirelles Gouvêa Jr.

Hybrid Evolutionary Algorithms in Forecasting Models

Seasonal Support Vector Regression with Chaotic Genetic Algorithm in Electric Load Forecasting .........................................................124
   Wei-Chiang Hong, Yucheng Dong, Li-Yueh Chen, and Shih-Yung Wei

Two-Stage Multi-objective Unit Commitment Optimization under Future Load Uncertainty .........................................................128
   Bo Wang, You Li, and Junzo Watada

Improving Expert Knowledge in Dynamic Process Monitoring by Symbolic Regression .........................................................132
   Ingo Schwab, Melanie Senn, and Norbert Link

Gene Expression Programming-Fuzzy Logic Method for Crop Type Classification .........................................................136
   S.N. Omkar, Nikhil Ramaswamy, J. Senthilnath, S. Bharath, and N.S. Anuradha

A Peer-Peer Particle Swarm Optimizer ..........................................................................................................................140
   Hrishikesh Dewan and V. Susheela Devi
Multiple Feature Selection for Pattern Recognition Using ID3 Ensemble System .......................................................... 145
Koichiro Nakatsu, Hitoshi Furuta, Kyousuke Takahashi, Ken Ishibashi, and Shigeki Yasuda

**Intelligent Computing and Its Applications in Multimedia**

An Efficient Fragile Watermarking Scheme for Pixel-Wise Tamper Detection .............................................................. 149
Yang-Kuo Lee, Jen-Chun Chang, Hsin-Lung Wu, and Rong-Jaye Chen

A Reversible Data Hiding Scheme Using Cartesian Product for HTML File ................................................................. 153
Yung-Chen Chou, Chun-Yi Huang, and Hsin-Chi Liao

A Reversible Data Hiding Scheme for Block Truncation Compressions Based on Histogram Modification .......................................................... 157
Chia-Chen Lin and Xiao-Long Liu

Two Phased Decompression Scheme for Quality Improvement of Vector Quantized Images ...................................................... 161
Jinn-Ke Jan, Jau-Ji Shen, and Chun-Hsiu Yeh

A Cloud-User Access Control Mechanism Based on Data Masking ........................................................................... 165
Ting-Kuang Wu, Yung-Wang Lin, and Iuon-Chang Lin

A High Capacity Reversible Data Hiding Scheme Based on SMVQ ........................................................................... 169
Chia-Chen Lin and Xue-Bai Zhang

A Robust Information Hiding Scheme with Range Coding on Color-Image ...................................................................... 173
Yung-Chen Chou, Chih-Chao Wang, and Jau-Ji Shen

**Innovative Mobile Services**

Design of an Augmented Reality Application Framework to Mobile Device .............................................................. 177
Yong-Yi Fanjiang, Shih-Chieh Lin, and Yu-Zuo Lin

A Model-Based Testing Tool for Embedded Software .................................................................................. 180
Chien-Hung Liu, Shu-Ling Chen, and Tien-Chi Huang

A Cloud Service Design for Quality Evaluation of Design Patterns ..................................................................... 184
Nien-Lin Hsueh, Ju-Yun Wang, and Der-Hong Ting

The Study of Plagiarism Detection for Object-Oriented Programming .............................................................. 188
Jong Yih Kuo, Fu Chu Huang, Chien Hung, and Liu Hong Zhan Yang

Applying Software Effort Estimation Model Based on Work Breakdown Structure ...................................................... 192
Wen-Tin Lee, Kuo-Hsun Hsu, Jonathan Lee, and Jong Yih Kuo

An Intelligent Data Fusion Algorithm with Fusion Benefit Pattern Tree for Wireless Sensor Networks .......................................................... 196
Chien-Chang Hsu and Wei-Yi Wang
Position Correction on Consumer-Grade GPS Using Genetic Programming ........................................200
   Jung Yi Lin, Ming Chih Tung, Chia Hui Chang, Chao Chung Liu, and Ju Fu Peng

PSO and APSO Evolutionary Computing in Indoor Wireless Communication ........................................204
   Chien-Hung Chen, Min-Hui Ho, Chien-Ching Chiu, and Shu-Han Liao

A Wireless Sensor Network Topology Design Method Based on Negotiable Evolutionary Algorithm .................................................................207
   Hao Wen Lin, Li Zhang, Xinchang Hao, and Tomohiro Murata

Medical Physics, Medical Informatics, Medical Electronics

The Application of Bioimpedance Method for Foot Sole Blood Perfusion Characterization .................................................................211
   Kuo-Sheng Cheng, Yen-Fen Ko, and Ting Wang

Fractal Dimension Characteristic Analysis for Dose Verification in Intensity Modulation Radiation Therapy ..........................................................214
   Jia-Ming Wu, Tsair-Fwu Lee, Ching-Jiang Chen, Chung-Ming Kuo, and Shyh-An Yeh

Using Kalman Filter with Morphological Image Operation Tracking a Moving Target in Radiotherapy ..........................................................219

Analysis of Vibroarthrographic Signals for Knee Osteoarthritis Diagnosis .................................................................223
   Tsair-Fwu Lee, Wei-Chun Lin, Li-Fu Wu, and Hung-Yu Wang

Evaluation of the Opposition Ability for Hand Intrinsic Damage Using a Simple Self-Constructing Electromyography ..........................................................229
   Chi-Heng Lu, Tsair-Fwu Lee, Szi-Wen Chen, Shih-Yao Lin, and Chiu-Ching Tuan

Symbolic Small-Signal Analysis of Various Amplifiers .................................................................233
   Hung-Yu Wang, Tsair-Fwu Lee, Cing-Wen Yang, Edward Soto, Wei-Chun Lin, and Shun-Hsyung Chang

Medical Image Diagnosis of Liver Cancer by Revised GMDH-type Neural Network Using Feedback Loop Calculation ..........................................................237
   Tadashi Kondo, Junji Ueno, and Shoichiro Takao

Classification of Leukemia Gene Expression Data Using Particle Swarm Optimization .................................................................241
   Yajie Liu, Xinling Shi, and Zhenzhou An
Multimedia Innovative Computing

Novel Detection of Image Forgery for Exchanged Foreground and Background Using Image Watermarking Based on Alpha Matte ..........................................................245
  Wu-Chih Hu, Wei-Hao Chen, Deng-Yuan Huang, and Ching-Yu Yang

Application of Support Vector Machine for Emotion Classification ..................................................249
  Chuan-Yu Chang, Chuan-Wang Chang, and Yu-Meng Lin

Path Planning Based on Bezier Curve for Robot Swarms ....................................................................253
  Chien-Chou Lin, Wei-Ju Chuang, and Yan-Deng Liao

Reducing the Cost of Regression Testing by Identifying Irreplaceable Test Cases ................................257
  Chu-Ti Lin, Kai-Wei Tang, Cheng-Ding Chen, and Gregory M. Kapfhammer

A Fast Algorithm of the Discrete Cosine Transform for the Fermat Prime-Length ................................261
  Tsung-Ching Lin, Wen-Ku Su, Pei-Yu Shih, and Trieu-Kien Truong

Modified 2-D Cepstrum Using Soft-Computing .....................................................................................265
  Himanshu Chaurasiya

Printable Optical Logic Gates with CIELAB Color Coding System for Boolean Operation-Mediated Handling of Colors .................................................................270
  Tomonori Kawano

Evolutionary and Intelligent Computing in Social Networks

Generalized Structural Holes Finding Algorithm by Bisection in Social Communities ................................276
  Ende Zhang, Guoren Wang, Kening Gao, Xiangguo Zhao, and Yu Zhang

A Four-Party Password-Based Authentication Key Exchange Protocol ..............................................280
  Xiumei Liu, Junjiang Liu, and Guiran Chang

Scalable Influence Maximization in Social Networks Using the Community Discovery Algorithm ........284
  Jinshuang Li and Yangyang Yu

A Lightweight Group-Key Management Protocol for Ad Hoc Networks ............................................288
  Changsheng Miao, Fengling Cao, Dong Chen, and Guiran Chang

Exploring Learning Effectiveness through Windows Live Social Network for Elementary School ........292
  Yuh-Ming Cheng
Ubiquitous Biomedical Systems and Applications
A Smartphone-Based Chinese DAISY Digital Talking Book Player for Visually Impaired ................................................................. 296
Yuan-Hsiang Lin, Yuan-Chang Hsu, and Yuan-Ya Kao
An Energy Efficient Binarization Algorithm Based on 2-D Intelligent Block Detection for Complex Texture and Gradient Color Images ................................................................. 300
Chia-Shaud Hong, Yen-Hsiang Chen, and Shanq-Jang Ruan
Ability of Density Feature in Low-Dose Computed Tomography for Evaluating Screened Lung Tumor .................................................................................................................. 304
Wei-Chih Shen, Yang-Hao Yu, Shwn-Huey Shieh, Guan-Chin Tseng, Wu-Huei Hsu, and Chih-Yi Chen
Mutation in Compressed Encoding in Estimation of Distribution Algorithm .................................................................................... 308
Orawan Watchanupaporn, Worasait Suwannik, and Prabhas Chongstitvatana
Analysis of Evolution Mechanism for Multi-agent Optimization Method .......................................................................................... 312
Koichiro Nakatsu, Hitoshi Furuta, Kyosuke Takahashi, Ken Ishibashi, and Masahiro Uchida
Examining the Performance of Evolutionary Many-Objective Optimization Algorithms on a Real-World Application ............................................................................................... 316
Kaname Narukawa and Tobias Rodemann
Stock Index Forecasting for Vietnam’s Stock Market ......................................................................................................................... 320
Juifang Chang and Son Van Duong
MASP: A Multi-attribute Secretary Problem Approach to Multi-objective Optimization with Fair Decision Maker ........................................................................................................... 324
Mario Köppen, Rodrigo Verschae, and Masato Tsuru
A Novel Diversity Induction Method for Bacterial Memetic Algorithm by Hibernation of Individuals ................................................................................................. 328
János Botzheim

Intelligent Video Processing
Image Restoration for Linear Local Motion-Blur Based on Cepstrum ................................................................................................. 332
Chao-Ho Chen, Zhang Rui, Kuo-Kun Tseng, and Jeng-Shyang Pan
An Efficient Hole-Filling Approach Using Adaptive Rendering ........................................................................................................ 336
Chao-Ho Chen, Chun-Yi Sung, Tsong-Yi Chen, Bo-Ting Guo, and Chin-Hsing Chen
Semi-automatic Depth Map Extraction Method for Stereo Video Conversion ......................................................................................... 340
Tsung-Han Tsai, Chen-Shuo Fan, and Chih-Chi Huang
An Improved Method of Constructing a Data Aggregation Tree in Wireless Sensor Networks ......................................................................................................................... 344
Bing-Hong Liu, Ying-Hong Jhuang, Li-Ping Tung, and Jyun-Yu Jhang
### Security Techniques and Applications

Optical Verification System Based on a Correlator Using Image Manipulations as Locks .................................................. 368  
*Hsuan-T. Chang, Chien-Yi Lu, Mn-Ta Lee, and Mu-Liang Wang*

Robust Audio Watermarking Based on MDCT Coefficients .................................................................................. 372  
*Mu-Liang Wang, Hong-Xun Lin, and Mn-Ta Lee*

A Moving Object Detection Algorithm for Vehicle Localization ........................................................................ 376  
*Chieh-Ling Huang and Heng-Ning Ma*

Using Incremental Addition to Evaluate the Grouping Quality of Document Classification ........................................ 380  
*Yi-Jen Su, Chuan-Wang Chang, Jian-Cheng Wun, Wei-Lin Hsu, and Yue-Qun Chen*

Card Fraud Detection by Inductive Learning and Evolutionary Algorithm ..................................................... 384  
*Liang Lei*

### Integrated Systems Engineering

Exploring Humanity-Oriented Content Producing Process in Providing Valuable E-learning Applications .................. 389  
*Jiann-Gwo Doong*

A Fuzzy Support Vector Machine with Qualitative Regression Preset .......................................................... 393  
*Yicheng Wei, Junzo Watada, and Witold Pedrycz*

Comparative Study on Fitness Landscape Approximation with Fourier Transform ........................................... 400  
*Pei Yan and Hideyuki Takagi*

Stochastic Global Optimization Method for Solving Constrained Engineering Design Optimization Problems ............. 404  
*Jui-Yu Wu*
Pure and Hybrid Optimizers Applicable to Large-Scale Design Problem .................................................409
   Kazuhsa Chiba

A Hierarchical Approach for Clustering and Pattern Matching of Gene Expression Data .................................................................413
   Soriful Hoque, Salim Istyaq, and Md. Mushir Riaz

Application of Sensitivity Analysis for an Improved Representation in Evolutionary Design Optimization ...................................................................417
   Lars Graening, Stefan Menzel, Thomas Ramsay, and Bernhard Sendhoff

Design and Simulation of a Ku-band MMIC Power Amplifier .................................................................................................421
   Chen Li, Zheng-Liang Huang, Wei Chen, Yong-Heng Shang, and Fa-Xin Yu

Innovative Computing and Its Applications

Applying Feature Selection Combination-Based Rough Set Classifiers to Forecast Credit Rating Status ...................................................................425
   You-Shyang Chen, Ching-Hsue Cheng, Da-Ren Chen, and Wei-Yu Chen

An Expandable Genetic Cell System for Solving Global Optimization Problem on Continuous Multimodal Functions ........................................429
   Ting-Hua Chang

A Memetic Algorithm with Random Key Crossover and Modified Neighborhood Search for the Solution of Capacitated Arc Routing Problems ................................................433
   Min Liu and Tapabrata Ray

Packing Unequal Disks in a Circular Container Using a Population Based Algorithm ..................................................................................437
   Wenqi Huang, Zhizhong Zeng, Ruchu Xu, and Zhanghua Fu

Feature Weighting for Clustering by Particle Swarm Optimization ...........................................................................................441
   K.P. Swetha and V. Susheela Devi

Differential Evolution with Graph-Based Speciation by Competitive Hebbian Rules ..................................................................................445
   Tetsuyuki Takahama and Setsuko Sakai

Design of Fuzzy Quality Control Charts for Attributes Based on Triangular Fuzzy Numbers ........................................................................449
   Tien-Tsai Huang, Liang-Ho Chen, Yen-Wen Wang, and Yi-Syuan Su

A New Approach for Solving Linear bilevel Programming Using Differential Evolution ........................................................................453
   Kejia Pan, Yan Yang, and Jianli Liu
Intelligent Applications for Home and Medical Treatment

An Intelligent Hand Gesture Extraction and Recognition System for Home Care Application ................................................................. 457
  Wen-Pinn Fang

An Efficient Data Gathering System for Home Medical Treatment .................................................................................. 460
  Jen-Chu Liu, Kuo-Yu Chuang, and Yi-Lun Wen

Verifiable Visual Cryptography ................................................................................................................................. 464
  Shuo-Fang Hsu, Yu-Jie Chang, Ran-Zan Wang, Yeuan-Kuen Lee,
  and Shih-Yu Huang

Image Hiding by LSB Matching of Higher Payload ........................................................................................................... 468
  Shang-Kuan Chen and Ja-Chen Lin

Evolutionary Computation in Vision, Image, and Signal Processing

Evolvable Hardware Image Filters with Discriminations of Noise Patterns ............................................................ 472
  Chih-Hung Wu, Chien-Jung Chen, and Wei-Chih Yeh

Image Watermarking Scheme Using Genetic Algorithm ...................................................................................... 476
  Chih-Chin Lai, Chih-Hsiang Yeh, Chung-Hung Ko, and Chin-Yuan Chiang

A Robust Texture-Based Background Subtraction Algorithm for Moving Object Detection in Video Sequences ........................................................................................................... 480
  Chen-Sen Ouyang and Ping-Wei Chen

Robust Image Watermarking Based on Coevolutionary Genetic Algorithm ................................................................. 484
  Yueh-Hong Chen and Hsiang-Cheh Huang

An Empirical Study on Fuzzy Image Clustering with Various Clustering Validity Indexes ......................................................................................................................................................... 488
  Chih-Hung Wu, Li-Wen Chen, and Li-Wei Lu

Vision-Based Coordinate Transformation with Back Propagation Neural Networks on Mobile Robots ............................................................................................................................................................ 492
  Chiung-Hui Tsai, Chih-Hung Wu, and You-Dong Huang

Vision-Based Human Following and Obstacle Avoidance for an Autonomous Robot in Intersections ............................................................................................................................................................................. 496
  Jau-Woei Perng and Cheng-Kang Chuang

A PSO-based Algorithm with Subswarm Using Entropy and Uniformity for Image Segmentation ........................................................................................................................................................................ 500
  Jzau-Sheng Lin and Shou-Hung Wu
# High Speed Computation and Applications in Information Security Systems

Self-Checking Gaussian Normal Basis Multiplier over GF(2m) Using Multiplexer Approach .......................................................... 505  
*Che Wun Chiou, Jim-Min Lin, Hung Wei Chang, Wen-Yew Liang, Jenq-Haur Wang, and Yun-Chi Yeh*

Super Digit-Serial Systolic Multiplier over GF(2^m) .............................................................................................................. 509  
*Chiou-Yng Lee*

Development and Validation on Integrated Dynamic Security Monitoring Platform .................................................................................................................. 514  
*Ming-Zhi Wu, Wei-Tsong Lee, Ren-Ji Liao, and George Chang*

SSTreasury+: A Secure and Elastic Cloud Data Encryption System .......................................................................................... 518  
*Kuan-Ying Huang, Guo-Heng Luo, and Shyan-Ming Yuan*

A P2P Auto-Recover Method for the Factory Data of Cable Modem over the HFC Network ........................................................... 522  
*Yu-Liang Chen, Guo-Heng Luo, Yi-Ming Chang, and Shyan-Ming Yuan*

Application of Social Harmony Search Algorithm on Composite Web Service Selection Based on Quality Attributes ................................................................................. 526  
*Pegah Majlesi Esfahani, Jafar Habibi, and Touraj Varaae*

A Hybrid Congestion Control for TCP over High Speed Networks .......................................................................................... 530  
*Yi-Cheng Chan and Hon-Jie Lee*

A Dynamic Routing Scheme to Support Reliable TCP Connections on Wireless Mesh Networks .......................................................................................... 534  
*Mong-Fong Horng, Bo-Chao Chang, Pei-Yin Chen, Chin-Shiuh Shieh, and Bin-Yih Liao*

# Artificial Intelligence Applications for E-services Workshop(AIAE 2012)

Development of Context Awareness Learning System for Elementary Chinese Language Learning ................................................................................................................. 538  
*David Tawei Ku and Chia-Chi Chang*

The Optimal Deployment of Wi-Fi Wireless Access Points Using the Genetic Algorithm ................................................................................................................. 542  
*Chen-Shu Wang and Li-Fang Kao*

Base Station Deployment with Capacity and Coverage in WCDMA Systems Using Genetic Algorithm at Different Height .......................................................................................... 546  
*Chen-Shu Wang and Yi-Dung Chen*

Activities and Event-Driven-Based Role Engineering .................................................................................................................. 550  
*Mei-Yu Wu*
An Adaptive E-service for Bridging the Cloud Services ..............................................................554
   Chih-Kun Ke, Shih-Fang Chang, and Zheng-Hua Lin

Network-Enabled Knowledge Discovery Service Design—Medical Online Texts .................................................................558
   Wei-Feng Tung and Wen-Kai Liu

A Study of Taiwan Political Elections and Stock Market Dynamism ..................................................562
   Deng-Yiv Chiu, Ming-Hsiung Ying, and Ping-Chung Yu

Combining Fuzzy AHP and Association Rule to Evaluate the Activity Processes of E-learning System .................................................................566
   Chen-Shu Wang and Shiang-Lin Lin

Handover Strategy in HIP-based LTE Femtocells Networks with Hybrid Access Mode .................................................................571
   Shih-Jung Wu

Enhancing Sales Forecasting by Using Neuro Networks and the Popularity of Magazine Article Titles ........................................................................577
   Hani A. Omar and Duen-Ren Liu

A Double Blocking Dynamic Framed Slotted ALOHA Anti-collision Method for Mobile RFID Systems .................................................................581
   Chi-Chung Lee and Sheng-Yue Lin

The Antecedents of Reflection in Online Learning Environments by Using a Social Network Perspective ........................................................................585
   Hsiu-Hua Cheng and Ju-Chun Lin

Development of a Multiplayer Online Game-Based Learning System Based on ARCS Motivation Model ........................................................................589
   Ming-Hsiung Ying, Kai-Ting Yang, and Guang-Hong Deng

Author Index ........................................................................................................................................595
