Invited Papers

Using Social Simulation for Aid and Development Analytics during Armed Conflict: Experiences from Uruzgan .................................................................1
  Armando Geller, Maciej M. Łatek, and Seyed M. Mussavi Rizi

Individual and Collective Rationality in Complex Economic Systems ..........................................................9
  Alan Kirman

Social Simulation, Seeing Ahead .....................................................................................................................15
  Helder Coelho

An Overview of Social Simulation Research in Brazil ....................................................................................18
  Jaime Simão Sichman, Antônio Carlos da Rocha Costa, Diana Adamatti, Graçaliz Pereira Dimuro, Fernando Buarque, and Pierre Bommel

Technical Papers

Elementary Social Functions: Concept and Interrelation to Social Dependence Relations ..............................................23
  Antônio Carlos da Rocha Costa and Graçaliz Pereira Dimuro

A Study on Socio-spatial Segregation Models Based on Multi-agent Systems ..................................................31

A Proposal for Interoperability to Agent Communication Using Synonyms ..................................................39
  Fabio Aiub Sperotto and Diana F. Adamatti
Stock Prices Assessment: Proposal of a New Index Based on Volume
Weighted Historical Prices .........................................................................................................................44

Tiago Colliri and Fernando F. Ferreira

Competitiveness and Social Inclusion within National Programme
for Production and Use of Biofuels: Negative Feedbacks on Profitability
Awareness in Sharp Institutional Settlements in Brazil South Region
Concerning Soybean Oil ........................................................................................................................................52

André Luiz Miranda Silva Zopelari and Aldara da Silva César

An Evolutionary Learning Approach for Robot Path Planning with Fuzzy
Obstacle Detection and Avoidance in a Multi-agent Environment ..........................................................................60

Taúá M. Cabreira, Graçaliz P. Dimuro, and Marilton S. de Aguiar

How Coalitions Enhance Cooperation in the IPD over Complex Networks ................................................................68

Ana Peleteiro, Juan C. Burguillo, and Ana L.C. Bazzan

A New Model of Agent Self-Regulation Based on Profile Discovery in Social
Networks Applied to the Ultimatum Game ........................................................................................................75

Murian dos Reis Ribeiro and Marilton Sanchotene de Aguiar

Analyzing the Evolution of Social Exchange Strategies in Social
Preference-Based MAS through an Evolutionary Spatial Approach of
the Ultimatum Game ........................................................................................................................................83

Luis F.K. Macedo, Graçaliz P. Dimuro, Marilton S. Aguiar, Antônio C.R. Costa,
Viviane L.D. Mattos, and Helder Coelho

An ABM to Monitor Landscape Dynamics and to Undertake Collective
Foresight Investigations in the Amazon .............................................................................................................91

Pierre Bommel, René Poccard-Chapuis, Amaury Burlamaqui Bendahan,
and Emilie Coudel

A Multiagent Based Road Pricing Approach for Urban Traffic Management .........................................................99

Anderson Rocha Tavares and Ana L.C. Bazzan

An Agent-Based Model Suitable for Discussion of Institutions, Welfare
and Capitalism ...................................................................................................................................................106

Luciano Mattar and Bruno Pinheiro Wanderley Reis

Reduction of Coalition Structure’s Search Space Based on Domain
Information: An Application in Smart Grids .......................................................................................................112

Gabriel de Oliveira Ramos and Ana L.C. Bazzan

Replicating Hofstede’s Cultured Negotiation: A First Update .............................................................................120

João Graça and Helder Coelho

Comparing Complex Networks: An Application to Emergency Managers’
Mental Models .....................................................................................................................................................128

Nuno Caseiro and Paulo Trigo

vi
Position Papers
Conduct, Cooperation and Alliances: An Analysis of Interaction among Firms
Using an ABS .................................................................................................................................132
   Rogerio Scabim Morano and Edmilson Alves de Moraes

Modeling Role Interactions in a Social Organization for the Simulation of
the Social Production and Management of Urban Ecosystems: The Case
of San Jerónimo Vegetable Garden of Seville, Spain ......................................................................136
   Flávia Santos, Thiago Rodrigues, Diana F. Adamatti, Graçaliz P. Dimuro,
   Antônio C.R. Costa, Glenda Dimuro, and Esteban de Manuel Jerez

Author Index .......................................................................................................................................140
