2013 National Conference on Communications

(NCC 2013)

New Delhi, India
15 – 17 February 2013
# TABLE OF CONTENTS

## SESSIONS

**Saturday, February 16, 2013**

### 1.1. Cooperative Communications

- **Optimal Design of Timer-Based, Distributed Selection with Unknown Number of Nodes**  
  Rajat Talak; Neelesh B. Mehta  
- **Performance Analysis of Double Correlated Selection Combining for Cooperative Diversity Systems**  
  Swaminathan Ramabadran; Mandha Damodaran Selvaraj; Rajarshi Roy  
- **Precoder Design for Asymmetric Two-way AF Shared Relay**  
  Rohit Budhiraja; Bhaskar Ramamurthi  
- **Performance Analysis of Two-Way AF Relaying Systems Over Cascaded Generalized-K Fading Channels**  
  Suneel Yadav; Prabhat Kumar Upadhyay  
- **On the Computation of Exact Moments and Performance Metrics or Multihop Transparent Weibull Relay Channels**  
  Cibile K. Kanjirathamukal; S. M. Sameer; Lillykutty Jacob  
- **Co-ordinate Interleaved Non-orthogonal Amplify and Forward Relaying Protocol**  
  Sreekanth V. P.; K. V.Srinivas; Srikrishna Bhashyam

### 2.1. Optical Communications

- **Experimental Study on Aperture Averaging in Free Space Optical Communication Link**  
  Nikhil Mehta; Hemani Kaushal; V K Jain; Subrat Kar  
- **Study on FEC Schemes for Optical Communication Systems**  
  Prabhmandeep Kaur; Divya Dhawan; V. K. Jain; Subrat Kar  
- **Energy Efficient Design for Green Optical Core Network**  
  Partha Biswas; Abhishek Singh; Devi Chadha  
- **All-Optical Packet Power Equalizer for DPSK Signal Using Nonlinear Micro Ring Resonator**  
  Bishanka Brata Bhowmik; Sumanta Gupta; Ranjan Gangopadhyay  
- **The Architecture of a Ring Based TDM PON to Improve Survivability and Robustness**  
  Gopal Mishra; Goutam Das; Anirban Kanungoe  
- **Effect of Phase Noise on All-Optical Wavelength Conversion of DQPSK Data Using FWM**  
  Aravind Anthur; Deepa Venkitesh; Regan Watts; John Carroll; Liam Barry
3.1. Audio and Speech Processing I

• A Cepstrum Based Approach for Identifying Tonic Pitch in Indian Classical Music  59
  Ashwin Bellur; Hema A. Murthy
• Development and Evaluation of Unit Selection and HMM-Based Speech Synthesis Systems for Tamil  64
  Ramani Boothalingam; Sherlin Solomi V.; Anushiya Rachel Gladston; Lilly S.; P. Vijayalakshmi; Nagarajan Thangavelu; Hema A. Murthy
• Analysis of Lombard and Angry Speech Using Gaussian Mixture Models and KL Divergence  69
  Shubham Mittal; Swati Vyas; S. R. Mahadeva Prasanna
• Melodic Pitch Extraction From Music Signals Using Modified Group Delay Functions  74
  Rajeev Rajan; Hema A. Murthy
• Speech Based Emotion Recognition Based on Hierarchical Decision Tree with SVM, BLG and SVR Classifiers  79
  Vipul Garg; Harsh Kumar; Rohit Sinha

4.1. Wireless Access Networks

• Power-Optimal Scheduling for a Green Base Station with Delay Constraints  84
  Anusha Lalitha; Santanu Mondal; Satya Kumar V.; Vinod Sharma
• Tradeoff of Average Power and Average Delay for a Point-to-Point Link with Fading  89
  Vineeth Bala Sukumaran; Utpal Mukherji
• Call Admission Control for Real-Time Traffic in OFDMA Based Cellular Networks  94
  Subhendu Batabyal; Suvra Sekhar Das
• Novel Transport Layer Aware Uplink Scheduling Scheme for LTE Based Networks  99
  Hemant Kumar Rath; Munmun Sengupta; Anantha Simha
• Optimal Power Allocation Auction for H.264/SVC Coded Wireless Video Transmission  104
  Garlapati Sekhar; Aditya K. Jagannatham
• Cross-Layer Strategies for Throughput Maximization in a Data Aggregating Wireless Network  109
  Easwar Vivek Mangipudi; Venkatesh Ramaiyan; Srikrishna Bhashyam

1.2. Microwaves and Antennas I

• A Design of Microstrip Bandpass Filter with Narrow Bandwidth Using DGS/DMS for WLAN  114
  Arjun Kumar; Machavaram V. Kartikeyan
• Investigation of Fractal DGS Microwave Filters  118
  Arjun Kumar; Ashwini Sawant; Machavaram V. Kartikeyan
• Printed Egg Curved Monopole Antenna for Ultrawideband Applications  122
  Sudhanshu Verma; Preetam Kumar
• Miniaturized Planar Branch-Line Coupler with Asymmetrical n-Shaped Structure  127
Debaditya Dasgupta; Biswajit Sarkar; Manimala Pal; Rowdra Ghatak
• Broadband Sectoral Antenna Array Using Printed Dipole with Reflector for Wider Beam Coverage in H-Plane 131
Prashant Kumar Mishra; Girish Kumar
• Modified Sierpinski Carpet Fractal Shaped Slotted UWB Monopole Antenna with Band Notch Characteristic 136
Balaka Biswas; Dipak Poddar; Rowdra Ghatak; Anirban Karmakar

2.2. Information Theory and Coding I
• An Efficient Methodology for Parallel Concatenation of LDPC Codes with Reduced Complexity and Decoding Delay 141
Pravin Kumar; R. S. Kshetrimayum
• Power Allocation for Interference Channels 146
Krishna Chaitanya A; Utpal Mukherji; Vinod Sharma
• On 2-adically Extended Projective Geometry Based Codes and Their Efficient Decoding Architecture 151
B. S. Adiga; Sandhya Sree Thaskani; Girish Chandra; B. Venkateshulu
• On the Secret Key Capacity of the Harary Graph PIN Model 156
Navin Kashyap; Manuj Mukherjee; Yogesh Sankarasubramaniam
• Null-Space of Block Convolution Matrix 161
T. Gopi Krishna; Istdeo Singh; K. Giridhar

3.2. Audio and Speech Processing II
• Unified Pitch Markers Generation Method for Pitch and Duration Modification 166
S. R. Mahadeva Prasanna; Govind D.
• Speech Enhancement Using Spectral Subtraction and Cascaded-Median Based Noise Estimation for Hearing Impaired Listeners 171
Santosh Kumar Waddi; Prem C. Pandey; Nitya Tiwari
• Single Channel Speech Dereverberation Using the LP Residual Cepstrum 176
Harish Padaki; Karan Nathwani; Rajesh M. Hegde
• Confidence Measures for Detecting Speech Recognition Errors 181
Jigar Gada; Preeti Rao; Samudra K. Vijaya
• Significance of the MUSIC-Group Delay Method in an ICABeamforming Framework for Speech Separation in Multi Source Environments 186
Lalan Kumar; Kushagra Singhal; Rohit Sinha; Rajesh M. Hegde
• Non-Negative Subspace Projection During Conventional MFCC Feature Extraction for Noise Robust Speech Recognition 191
Pavan Kumar D. S.; Raghavendra Bilgi; Umesh S.
• Subspace Modeling Technique Using Monophones for Speech Recognition 196
Bhargav Srinivas Ch; Neethu Joy; Raghavendra Bilgi; Umesh S.

4.2. Network Performance Studies
• Tradeoff of Average Service Cost and Average Delay for the State Dependent M/M/1 Queue 201
Vineeth Bala Sukumaran; Utpal Mukherji
• Statistics Based Energy Efficient Caching Decisions for IPTV
Services 206
Amardeep Dewangan; Devendra Jalihal
• Optimizing Transport Technology Choices for Virtual Machines (VMs) in Data-Center and Cloud Environments 211
Anjana Shankar; Deval Bhamare; Mohan Krishnamoorthy; Ashwin A Gumaste
• MIXD-TCP: Completely Decoupled End to End Congestion Control Algorithm 216
Vishal Sawant; Prasanna Chaporkar; Madhu Belur
• Novel Rate-Jitter Control Algorithms for TDMoIP 221
Madhu Sikha; Manivasakan R.
• Development of a Remote Lab with Microprocessor & DSP with FPGA Accelerator 226
Anup Kulkarni; Ashok Jhunjhunwala

1.3. Wireless Communications I
• Best-Fit Mobile Recharge Pack Recommendation 231
Shyju Thomas; Jobin Wilson; Santanu Chaudhury
• Communicating Under Channel Phase Uncertainty 236
Naqueeb Warsi; Rahul Vaze; Tapan Shah
• Uplink Power Allocation Schemes for Heterogeneous Cellular Networks 241
Shristi N Pradhan; Rajiv Devarajan; Satish Chandra Jha; Vijay Bhargava
• Survey of Techniques for Achieving Topological Diversity 246
Rudra P. Singh; Poonacha G
• A New Technique for Derivation of LCR and AFD in Wideband Wireless Channel 251
Sayantan Hazra; Ratnajit Bhattacharjee
• Frame Alignment and Interference Cancellation Strategies for Cell Search in HetNets 256
Neelakandan Rajmohan; Arun Pachai Kannu
• Data Combining Scheme for ICI Conjugate Cancellation Scheme in OFDM Systems 261
Ashish Goel; Monika Agrawal

2.3. Information Theory and Coding II
• On the Sum Capacity of Multipath Fading MAC with Distributed CSI 266
Vijay Anavangot; Bikash K Dey; Sibi Raj B. Pillai
• EXIT Chart Based Design of LDPC Codes for Higher Order Constellations 271
Bhargav Joshi; Andrew Thangaraj
• An Improved Technique to Find the Trapping Sets of the Irregular LDPC Codes 276
Kuntal Deka; Alentattil Rajesh; Prabin Kumar Bora
• Achieving Adaptive Sum-Capacity of Fading MACs with Distributed CSI and Non-identical Links by Rate-splitting 281
Sreejith Sreekumar
• Novel Hardware Implementation of LLR-based Non-binary LDPC Decoders 286
Lava Bhargava; Ranjan Bose; Balakrishnan M.
3.3. Speaker Analysis

- Speaker Verification in Noisy Environment Using GMM Supervectors
  Sourya Sarkar; Sreenivasa Rao
- Analysis of Glottal Signals for Speaker Information
  Ramesh K; Gayadhar Pradhan; S. R. Mahadeva Prasanna
- A Two-Level Approach for Speaker Recognition Using Speaker-Specific-Text
  B Bharathi; Nagarajan Thangavelu
- Speaker Dependent, Speaker Independent and Cross Language Emotion Recognition From Speech Using GMM and HMM
  Manav Bhaykar; Jainath Yadav; Sreenivasa Rao
- Classification of Infant Cries Using Epoch and Spectral Features
  Avinash Kumar Singh; Jayanta Mukhopadhyay; Sreenivasa Rao

4.3. Wireless Sensor Networks

- Information Theoretic Self-Management of Wireless Sensor Networks
  Sankar Narayan Das; Sudip Misra
- Energy Efficient Elliptic Curve Point Multiplication for WSN Applications
  Ravi Kishore Kodali; Kashyap Kumar H. Patel; N. V. S. N. Sarma
- Revisiting Distributed Transmit Power Control in Ad Hoc Wireless Networks with ODC Capability
  Mayur M Vegad; Swades De; Brejesh Lall
- MobiL: A 3-Dimensional Localization Scheme for Mobile Underwater Sensor Networks
  Tamoghna Ojha; Sudip Misra
- Weight Based Clustering in Wireless Sensor Networks
  Ravi Tandon; Biswanath Dey; Sukumar Nandi
- Feasibility Analysis on Integrated Recharging and Data Collection in Pollution Sensor Networks
  Pooja Gupta; Kaushik Kandakatla; Swades De; Soumya Jana

1.4. Communication Theory and VLSI for Communications

- An Adaptive Notch Filter for Narrow Band Interference Removal
  Neeraj Varshney; Roop C. Jain
- Sequential Change Detection Using Estimators of Entropy & Divergence Rate
  Deekshith Rao Juvvadi; Rakesh K. Bansal
- UWB CMOS Transmitters for UWB Communications
  Rui Xu; Yalin Jin; Meng Miao; Cam Nguyen
- Low-Cost Integrated-Circuit Transmitter and Receiver for UWB Communications
  Han Jeongwoo; Cam Nguyen
• Dual-Injection-Locked 1/2 Divider with Optimized VCO Loaded Q and Current 367
Sanghun Lee; Sunhwan Jang; Cam Nguyen
• A Time Reversal Technique for Minimizing Equalizer Complexity in High Rate Multi-antenna UWA Link 369
Sharbari Banerjee; Monika Agrawal
• An Alternate Method for Calculating Average Probability of Error in Log-Normal Channel for UWB 374
Chinmoy Kundu; Ranjan Bose

2.4. Cooperative Communications and MIMO Systems
• Joint Power Allocation and Routing Optimization in BER Constrained Multihop Wireless Networks 379
Sabyasachi Gupta; Ranjan Bose
• Outage Analysis of Full Duplex Decode and Forward Relaying Over Nakagami-m Channels 384
Prabhat Kumar Sharma; Parul Garg
• Power Allocation Strategy Using Node Cooperation for Transmit Power Minimization Under Correlated Fading 389
Sarbanish Ghose; Ranjan Bose
• Outage Performance of Two-Way Amplify-and-Forward Relaying with Multiple Co-channel Interferers 394
Anup Kumar Mandpura; Shankar Prakriya; Ranjan K. Mallik
• Multi-Level SINR Thresholding for Reduced Complexity MIMO Detection 399
Atul Kumar Sinha; Mohit Agarwal; Ajit K. Chaturvedi
• An Iterative MIMO-DFE Receiver with MLD for Uplink SC-FDMA 404
Baskaran Dhivagar; Kiran Kuchi; K. Giridhar
• Performance Analysis of Alamouti Transmit Diversity with A Sub-Optimum Joint Transmit-Receive Antenna Selection Scheme 408
Jatin Chakravarti; Yogesh N Trivedi

3.4. Signal Processing in Communications
• Low-complexity DFT-pair Carrier Acquisition 413
Sriram Jayasimha; Jyothendar Paladugula; Satish Bhargav Balantrapu
• Overmodulation Protection in FM Transmitters 417
Sriram Murali; Pankaj Gupta
• Performance Enhancement of GMSK and LDPC Based VLF Communication in Atmospheric Radio Noise 422
Arun Kumar; Rajendar Bahl; Rinki Gupta; Hemlata Choudhary
• Overcoming the SNR-Wall for Energy Detection Using the Autocorrelation of Cyclic Prefix Based OFDM Signal 427
Sandip Karar; Abhirup Das Barman
• Algorithms for Change Detection with Unknown Number of Affected Sensors 432
P Sarath Kumar; B Sai Kiran; Arun Pachai Kannu; Srikrishna Bhashyam
• Dynamic Allocation for Watermark Payload in MC-CDMA System Under Fading Attack 437
Santi Prasad Maity; Seba Maity; Jaya Sil; Claude Delpha
• Principal Architectural Changes in Polar Transmitter in DRP
4.4. Optical Switching and Networking

- Effect of Link Margin on Spectrum Saving and Advantages of Flexgrid Optical Networking 447
  Abhijit Mitra; Subrat Kar; Andrew Lord
- A Novel Optical Control Plane for Switching a Limited Range Wavelength Converter Based Electro-Optical Hybrid Node in Translucent WDM Optical Networks 452
  Sridhar Iyer; Shree Prakash Singh
- Power Impairment Aware Methodology with Segment Based Shared Path Protection in Survivable Optical Packet Switched Networks 457
  Rahul Pandya; Vinod Chandra; Devi Chadha
- 4x4 Optical Data Vortex Switch Fabric: BER Analysis 462
  Sangeetha Gopalan; Devi Chadha; Vinod Chandra

Sunday, February 17, 2013

1.5. Cognitive Radio

- Robust Dual Cumulative Sum Algorithm for Cooperative Spectrum Sensing 467
  Sachin Kadam; Govind Sharma; Rakesh K. Bansal
- Cooperative Spectrum Sensing Under Noisy Control Channel for Cognitive Radio Network 472
  Srinu Sesham; Samrat Sabat; Siba Kumar Udgata
- Cooperative Spectrum Sensing with Censoring of Cognitive Radios in Rayleigh Fading Under Majority Logic Fusion 477
  Srinivas Nallagonda; Sanjay Dhar Roy; Sumit Kundu; Gianluigi Ferrari; Riccardo Raheli
- On the Performance of Generalized Energy Detector Under Noise Uncertainty in Cognitive Radio 482
  Sanket Sanjay Kalamkar; Adrish Banerjee
- Subcarrier and Power Allocation Schemes for Multiuser OFDMbased Cognitive Radio Systems 487
  Shoubhik Chakraborty; Praveen Dhanuka; Anand Kumar; Santi Prasad Maity
- Cognitive Radio Implementation for a Frequency Hopping Primary Signal 492
  Prasanna R.; Bharadwaj Amrutur Amrutur

2.5. Microwaves and Antennas II

- Implantable CPW Fed Circular Slot Antenna for ISM Band 497
  S Ashok Kumar; Thangavelu Shanmuganantham
- A Compact and High Performance Band-Stop Filter Using Open Complementary Split Ring Resonator 501
  Kanaparthi V Phani Kumar; Sholampettai Subramanian Karthikeyan
- Concurrent 85GHz/94GHz Slotted Gap Coupled Parasitic
3.5. Pattern Recognition and Machine Intelligence

• Statistical Analysis of Protein Molecules 530
  Kushal Shah

• An Efficient Multiclassifier System Based on Convolutional Neural Network for Offline Handwritten Telugu Character Recognition 535
  Soumya Soman; Asha Kranthi Nandigam; Srinivasa Chakravarthy

• Handwritten Assamese Numeral Recognizer Using HMM & SVM Classifiers 540
  Bandita Sarma; Kapil Mehrotra; Krishna Naik Rathlavath; S. R. Mahadeva Prasanna; Swapnil Belbe; Chitralekha Mahanta

• Least Significant Bit Matching Steganalysis Based on Feature Analysis 545
  Lalit Vashishtha; Tanima Dutta; Arijit Sur

• Assamese Spoken Query System to Access the Price of Agricultural Commodities 550
  Syed Shahnawazuddin; Deepak Thotappa; Biswajit Dev Sarma; Aniruddha Deka; S. R. Mahadeva Prasanna; Rohit Sinha

• Chronology of Sanskrit Texts: An Information-Theoretic Corroboration 555
  Aniket Anand Deshmukh; Soumya Jana

4.5. Network Systems and Security

• Performance Analysis of BitTorrent Protocol 560
  Parul Sharma; Anuja Bhakuni; Rishabh Kaushal

• Comprehensive Multimedia Encryption System Generalization and Comparison 565
  Ganesh Ramani; Niraj Kumar; Binoy Das

• A Rule Relation Calculus for Verification and Validation of Firewalls 570
  Shobhanjana Kalita; Shyamanta M. Hazarika

• A More Accurate Completion Condition for Attack-Graph Reconstruction in Probabilistic Packet Marking Algorithm 575
  Samant Saurabh; Ashok Singh Sairam

1.6. Wireless Communications II
• Bandwidth Partitioning and SINR Threshold Design Analysis of Fractional Frequency Reuse 580
Subbarao Boddu; Atri Mukhopadhyay; Bigi Varghese Philip; Suver Sekhar Das
• Impact of Reduced Antenna Spacing on the Post-processing SINR of Interference Rejection Combining in Cellular Downlink Receivers 585
Karthik K. S.; Bhaskar Ramamurthi
• Multirate Schemes for WH-spread-CI/MC-CDMA Over Correlated Frequency Selective Channel 590
Mithun Mukherjee; Preetam Kumar
• Pilot Aided Joint Estimation of Doubly Selective Channel and Carrier Frequency Offset in High Mobility OFDMA Uplink 595
Muneer P.; S. M. Sameer
• Power Allocation for OFDM-based Cognitive Radio Systems Under Average Interference Constraint 600
Kedar Prakash Kulkarni; Adrish Banerjee
• A FICA Based Contention Scheme for WLAN with Non Cooperation 605
Tanmay Sarkar; Tejas Prakash Bodas
• Performance Analysis of Dual-’Switch and Stay’ Combiner Over Correlated KG Fading Channels 610
Manoj B. R.; Pravas Ranjan Sahu

2.6. Microwaves and Antennas III
• Broadband Sectoral Slot Cut Microstrip Antenna 615
Amit Deshmukh; Ankita Rajendra Jain; Kamala Prasan Ray
• Broadband Gap-Coupled Slot Cut Rectangular Microstrip Antennas 620
Amit Deshmukh; Apurva Joshi; Tejal Tirodkar; Kamala Prasan Ray
• Adaptable Concurrent Dual-Band Symmetrical Stubbed T-Junction Power Splitter 625
Vivek Sharma; Nagendra Prasad Pathak
• Design and Analysis of Fractal Based UWB Monopole Antenna 630
Anirban Karmakar; Utsab Banerjee; Rowdra Ghatak; Dipak Poddar
• Design of a Compact Reconfigurable RDRA 635
Ravi Dutt Gupta; Sonu Agrawal; Santanu Behera

3.6. Image and Video Processing I
• Low Complexity Detail Preserving Multi-Exposure Image Fusion for Images with Balanced Exposure 640
Ashish V. Vanmali; Sanket Deshmukh; Vikram M. Gadre
• An Adaptive Wavelet Thresholding Image Denoising Method 645
Mantosh Biswas; Hari Om
• A Robust Compressed Domain Video Watermarking in P-frames with Controlled Bit Rate Increase 650
Tanima Dutta; Arijit Sur; Sukumar Nandi
• Contrast Enhancement of Medical Images Using Type II Fuzzy Set 655
Tamalika Chairia
• Enhancement of Inscription Images 660
Indu S; Rishi Pandey; Jayanthi N; Geetanjali Bhola; Santanu Chaudhury
4.6. MANETs and Social Networks
• Mobile Agent Based Node Monitoring Protocol for MANETs  665
  Mallikarjun B. Channappagoudar; Venkataram Pallapa
• Traffic Patterns Affecting Disruption in Vehicular Communication  670
  Syed Faraz Hasan; Nazmul Haq Siddique; Shyam Chakraborty
• Tracking On-line Radicalization using Investigative Data Mining  674
  Pooja Wadhwa; Mps Bhatia
• Rumor Dynamics with Inoculations for Correlated Scale Free
  Networks  679
  Anurag Singh; Yatindra Nath Singh
• A Method of Designing an Access Mechanism for Social Networks  684
  Swapnil S. Ninae; Venkataram Pallapa
• Bridging the Digital Gap in Rural India VIVEKDISHA: A Novel Experience  689
  Partha Goswami; Rajarshi Mahapatra; Sw. Divyasukananda

1.7. Image and Video Processing II
• Sparsity Based Segmentation in Hybrid Color Space  694
  Raju Ranjan; Rajesh Bhatt; Sumana Gupta; Venkatesh K Subramanian
• Dynamic Texture Synthesis for Video Compression  699
  Shruti Bansal; Santana Chaudhury; Brejesh Lall
• Noise Induced Segmentation of Noisy Color Image  704
  Onkar Krishna; Rajib Kumar Jha; Anil Tiwari; Badal Soni
• Parameterized Estimation of Common Motion for Image and
  Depth Sequences  709
  Modem Sudhakar; Kiran Kumar Vupparaboina; Soumya Jana

2.7. Advanced Signal Processing
• Low Complexity Architecture of Linear Periodically Time Varying
  Filter Based on a Switching Representation  714
  Sridevi S.; Ravindra Dhuli; Saketh K.; Laxmi Hanumantha Vara Prasad Puvvada
• Matrix Adaptive Synthesis Filter for Uniform Filter Bank  719
  Sandeep Patel; Ravindra Dhuli; Brejesh Lall
• Wavelet Regularization for Frequency Domain Volume Rendering  724
  Chinmay Marathe; Vikram M. Gadre
• Improving the Performance of the LMS Algorithm Via Cooperative
  Learning  729
  Rajib Lochan Das; Bijit Kumar Das; Mrityunjoy Chakraborty
• Multi Stage Adaptive Filter for Identification of the Systems with
  Variable Sparsity  734
  Bijit Kumar Das; Rajib Lochan Das; Mrityunjoy Chakraborty
• An Algorithm to Mitigate Channel Distortion in Blind Modulation
  Classification  739
  Gaurav Jyoti Phukan; Prabin Kumar Bora
