# Table of Contents

## Exploration and Characterization

### Reinforced Soil

**Numerical Modeling of Three Dimensional Geosynthetic Soil Reinforcement by Using Alternative Parameters**

A. Emersleben and D. Groeger

**Numerical Modeling of the Pull-out Test of Steel Grid Soil Reinforcement Using FLAC2D**

Md. Jahid Iftekhar Alam and S. C. R. Lo

**Performance Monitoring of Rail Tracks Stabilized by Geosynthetics and Shock Mats: Case Studies at Bulli and Singleton in Australia**

Buddhima Indraratna, Sanjay Nimbalkar, Pongpipat Anantanasakul, Cholachat Rujikiatkamjorn, and Tim Neville

**Deformation of Slurry Filled Permeable Geosynthetic Tubes**

Wei Guo, Jian Chu, and Shuwang Yan

**Pullout Resistance Factors for Steel Reinforcements Used in TxDOT MSE Walls**

William D. Lawson, Priyantha W. Jayawickrama, Timothy A. Wood, and James G. Surles

### Characterization of Alternative Materials

**A Constitutive Equation for Compression Behaviors of Artificially Cemented Composite Geo-Materials**

Jaehun Ahn, Yusuk Kim, Yun-Tae Kim, and Hosung Shin

**Interface Shear Testing of GCL Liner Systems for Very High Normal Stress Conditions**

Stuart S. Thielmann, Patrick J. Fox, and Chris Athanassopoulos

**Effect of Reinforcement Coverage Ratio on Cellular Reinforced Fly Ash Walls**

B. Ram Rathan Lal and J. N. Mandal

**Triaxial Testing on Saturated Mixtures of Sand and Granulated Rubber**

Rami El-Sherbiny, Ahmed Youssef, and Hani Lotfy

**Evaluation of Shear Creep Response of Recycled Asphalt Shingle Mixtures**

A. Soleimanbeigi and T. B. Edil

**Numerical Modeling of Cellular Reinforced Fly Ash Walls - Effect of Reinforcement Coverage Ratio**

B. Ram Rathan Lal and J. N. Mandal

### Characterization of Soil and Rock

**Estimating Undrained Strength of Clays from Direct Shear Testing at Fast Displacement Rates**

Andrew D. Bro, Jonathan P. Stewart, and Daniel Pradel

**Quantifying Surface Roughness of Weathered Rock – Examples from Granite and Limestone**

The Hydro-Mechanical Behavior of Infilled Rock Joints with Fill Materials in Unsaturated Conditions
Ali Khosravi, Mohammad Khosravi, and Christopher L. Meehan

Laboratory Investigation of the Pre- and Post-Cyclic Volume Change Properties of Sherman Island Peat
Ali Shafiee, Scott J. Brandenberg, and Jonathan P. Stewart

Potential Value of Outcrop Confidence for Characterizing Geologic Variability
Jeffrey R. Keaton

Field Characterization

Back-Analysis and In-situ Shear Testing Studies to Estimate Shear Strength Parameters on an Actual Slope
Ricardo Moffat and Diego Rivera

Shear Strength Characterization and Stability Assessment of Urban Open-Pit Mine Slopes
Donald P. Coduto, Jock M. Scott, Kent McMillan, James J. Weaver, and Kwok Tam

Integrated Geophysical Exploration for Safety Assessment of Levee Systems
Koichi Hayashi and Tomio Inazaki

Soil Migration and Piping Susceptibility by the VisCPT
Roman D. Hryciw and Hyon-Sohk Ohm

Refraction Microtremor Characterization of a Landslide SR 14, Cedar Canyon, Utah
Michael L. Rucker, David K. Fadling, Kenneth C. Fergason, and Sean Hulburt

Characterizing Low Plastic Fine-Grained Foundation Soils under Strong Earthquake Shaking
Thuraisamy Thavaraj, Garry Stevenson, James Williams, and David Siu

Fully Softened Shear Strength: Laboratory Characterization

Fully Softened Strength of Natural and Compacted Clays for Slope Stability
Daniel R. VandenBerge, J. Michael Duncan, and Thomas L. Brandon

Measurement of Fully Softened Shear Strength
Bernardo Castellanos, Thomas L. Brandon, Isaac Stephens, and Lucas Walshire

Effect of Fast Shearing on the Residual Shear Strengths Measured Along Pre-Existing Shear Surfaces in Kaolinite
Mohammad Khosravi, Christopher L. Meehan, Daniel V. Cacciola, and A. Khosravi

Post-Peak Fully-Softened Strength and Curved Strength Envelope in Shallow Slope Failure Analysis
Garry H. Gregory and Kristi K. Bumpas

Remote Sensing

Deformations of a Rapidly Moving Landslide from High-Resolution Optical Satellite Imagery
Oscar E. Suncar, Ellen M. Rathje, and Sean M. Buckley
Joint Pixels InSAR for Health Assessment of Levees in New Orleans
Xiaolei Lv, Birsen Yazici, Victoria Bennett, Mourad Zeghal, and T. Abdoun

Omar A. Conte and Richard A. Coffman

Slope Stability and Rock-Fall Monitoring with a Remote Interferometric Radar System
Patrick K. Miller, Mark Vessely, Larry D. Olson, and Yajai Tinkey

Julien Cohen-Waeber, Nicholas Sitar, and Roland Bürgmann

Ground-based Interferometric Radar for Monitoring Slopes and Embankments
B. L. Rosenblad, F. Gomez, J. E. Loehr, J. Legarsky, W. Jenkins, and B. Held

Design, Analysis, and Performance

Unsaturated Soil Mechanics

Numerical Modeling of Wetting-Induced Settlement of Embankments
Yewei Zheng, Kianoosh Hatami, and Gerald A. Miller

Impact of Heat Exchange on the Thermo-Hydro-Mechanical Response of Reinforced Embankments
Charles J. R. Coccia and John S. McCartney

Comparisons of Data from a Complex-Impedance Measuring Instrument and Conventional Compaction Control Tests
Jason S. Hertz and Christopher L. Meehan

Integrated Slope Stability Analyses of Wastewater Storage Structure Extending the Capillary Barrier Technique
W. T. Oh and S. K. Vanapalli

Field Monitoring of Embankment Constructed by Volcanic Soil and Its Evaluation
S. Kawamura, S. Miura, S. Yokohama, A. Kudo, and N. Kaiya

Slope Stability Assessment Using Field Moisture Data for North Texas Clay Soil

Slope Stability Characteristic of Unsaturated Weathered Granite Soil in Korea Considering Antecedent Rainfall
Yun-Tae Kim and Ji-Sung Lee

Modelling Suctions in a Cutting with a Bimodal Soil Water Characteristic Curve and Hydraulic Conductivity Function
A. J. Booth, A. El-Hamalawi, and N. Dixon

An Evaluation of Specification Methodologies for Use with Continuous Compaction Control Equipment
Daniel V. Cacciola, Christopher L. Meehan, and Mohammad Khosravi

Effect of Rainfall on Stability of Unsaturated Earth Slopes Constructed on Expansive Clay
J. Hossain, M. S. Hossain, and L. R. Hoyos

Sazzad Bin-Shafique, Mohammad Sadat, Saidur Rahman, and Jie Huang

Uplift Behavior of Anchor Plates in Slope
S. Bildik, M. Laman, and M. T. Suleiman

Advances in Design Methodology for Landslide Repair Using Launched Soil Nails
Colby Barrett, Runing Zhang, and Alan Rock

Column Supported Embankments

Stability Failure Modes of Rigid Column-Supported Embankments
Gang Zheng, Yu Diao, Shuai Li, and Jie Han
Consolidation of Column-Reinforced Soft Foundations under Embankments 1825
Yan Jiang, Jie Han, and Gang Zheng

Load Distribution on Geosynthetic Reinforcement in Column-Supported Embankments 1829
George M. Filz and Joel A. Sloan

Dutch Research on Basal Reinforced Piled Embankments 1838
Suzanne J. M. van Eekelen and Adam Bezuijen

Erosion and Slope Stability

Reducing Erosion Along the Surface of Sloping Clay-Sand Liners 1848
Muawia A. Dafalla, Mosleh A. Al-Shamrani, and Ali Obaid

Computer Simulation of Levee Erosion and Overtopping 1858
Mehrdad Kamalzare, Tianning Steven Han, Matt McMullan, Chris Stuetzle, Thomas F. Zimmie, Barbara Cutler, and W. Randolph Franklin

Concave Slopes for Improved Stability and Erosion Resistance 1868
Isaac A. Jeldes and Eric C. Drumm

Modeling the Internal Erosion Behavior of Lignosulfonate Treated Soil 1872
Rasika Athukorala, Buddhima Indraratna, and Jayan S. Vinod

Slope Stability Analysis of Three Earthen Levee Strengthening Systems under Hurricane Overtopping Flow Conditions 1882
Farshad Amini, Lin Li, and Yingzi Xu

Erosion Resistance of Earthen Levee Strengthened by HPTRM System under Combined Wave and Surge Overtopping Conditions 1892
Lin Li, Farshad Amini, and Yi Pan

Influence of Slope Morphology on the Stability of Earthen Slopes 1902
D. H. Gray

Comparison of Erosion Susceptibility and Slope Stability of Repaired Highway Embankment 1912
Auckpath Sawangsuriya, Apiniti Jotisankasa, Jiraroth Sukolrat, Montri Dechasakulsom, Vichian Mahatumanrongchai, Pakorn Milindalekha, and Sekchait Anuvech-risirikat

Case Study of Rapid Levee Armoring During 2011 Mississippi River Flood and Potential Future Applications 1922
Amanda C. Bilberry, C. Fred Pinkard Jr., and Isaac L. Howard

Fundamental Study on Surface Erosion in Levee Systems 1932
Y. Abdelhamid and U. El Shamy

Deep Foundations for Slope Stabilization

Long-Term Performance of Landslide Shear Piles 1936
Kenji Yamasaki, Ralph W. Strom, Richard A. Gunsolus, and D. Andrew Vessely

Application of the Strain Wedge Model in Soil-Pile Interaction Analysis of Pile-Stabilized Slopes 1951
Hamed Ardalan and Mohamed Ashour

Analysis of Alternative Landslides Remediation Measures Using Sliding Force Concept 1963
Bill X. Yu

**Design Method for Slide-Stabilizing Micropile Walls** 1971
John P. Turner and Martin Halvorson

**A Study of Effects of Pile Depth and Stiffness on a Homogeneous Soil Slope Stabilized with Pile** 1984
Hong Yang

**Yield Acceleration of a Slope Reinforced with a Row of Drilled Shafts** 1994
Arash Erfani Joorabchi, Robert Y. Liang, and Lin Li

**Reliability Based Design for Drilled Shafts for Slope Stabilization** 2004
Robert Y. Liang and Lin Li

**Numerical Analysis of Pile-Reinforced Slopes** 2014
Andrew Daggett and Sunil Sharma

**Design Method for Drilled Shaft Stabilization of Unstable Slopes** 2024
Robert Y. Liang, Arash Erfani Joorabchi, and Lin Li

**A Procedure for Predicting Micropile Resistance for Earth Slope Stabilization** 2034
Andrew Boeckmann and J. Erik Loehr

**Ground Improvement**

**Modeling Mechanical Response of Cemented EPS-Backfill** 2038
An Deng and Jinrong Feng

**Mechanical Behavior of Cement- and Cement-Fiber-Improved Soft Soils** 2048
Ryan D. Starcher and Chunyang Liu

**Pervious Concrete Pile: An Innovation Ground Improvement Alternative** 2058
Lusu Ni, Muhammad T. Suleiman, and Anne Raich

**Mixtures of Clay/EPS Particulates and Undrained Shear Strength** 2066
Nicholas T. Rocco and Ronaldo Luna

**Soil Improvement for Seismic Retrofit of Tuttle Creek Dam** 2076

**Monitoring the Embankment Stabilization of Cantagalo Park, Brazil** 2087
Mário S. S. Almeida, Maria Esther S. Marques, and Marcelo A. Mello

**Physicochemical Characterization of Cement Stabilized Highly Expansive Soil** 2091
Honghua Zhao, Zhao Chun-Ji, Zheng Xiao, and Liu Chan

**Centrifuge Model Tests on Influence of Slope Height on Stability of Soft Clay Slope** 2101
Masaki Kitazume and Tomohide Takeyama

**Stiffness Nonlinearities of SCP-Inserted Clay Specimens with Various Replacement Ratios in Triaxial Compression Tests** 2105
Yoon-Sik Choo, Sung-Ha Baek, Wanjei Cho, and Choong-Ki Chung

**Analytical and Numerical Model of Electro-Osmotic Consolidation for Soft Soil** 2114
**Improvement**
Hui Wu and Liming Hu

**Long-term Viscoplastic Behaviour of Embankments Built on Improved Soft Soil Using Vertical Drains**
Babak Azari, Behzad Fatahi, and Hadi Khabbaz

**Investigation and Liquefaction Mitigation of Landfill Perimeter Levee**
Robbie M. Warner, Gary L. Lass, Anthony M. Pelletier, and Frank J. Turk

**Quality Control and Quality Assurance Methods for Cutoff Walls in Dams and Levees**
Donald Bruce and George Filz

**Design and Construction of Deep Mixing at Orleans Avenue Canal, New Orleans**

**Partial Stabilization of an Active Slide Area Utilizing Soil Mixed Shear Keys installed Using Cutter Soil Mixing: Results of a Test Section**
Brian Wilson and Emilie Lapointe

**Keynotes**

**Keynote Session 1**

**Slope Stability Then and Now**
J. Michael Duncan

**Keynote Session 2**

**Remote Sensing Applications for Landslides, Slopes, and Embankments**
Scott A. Anderson

**Instrumentation and Monitoring of Slope Stability**
W. Allen Marr

**Keynote Session 3**

**Issues of Reliability in Stability of Slopes**
John T. Christian

**Seismic Slope Stability**
W. D. Liam Finn

**Keynote Session 4**

**Lessons Learned from Troubleshooting Dams**
Francisco Silva-Tulla and Steve J. Poulos

**Advances in Shear Strength Measurement, Assessment, and Use for Slope Stability Analysis**
Thomas L. Brandon

**Keynote Session 5**

**Toppling—A Fundamental Failure Mode in Discontinuous Materials—Description and Analysis**

**Keynote Session 1**

Slope Stability Then and Now
J. Michael Duncan

**Keynote Session 2**

Remote Sensing Applications for Landslides, Slopes, and Embankments
Scott A. Anderson

Instrumentation and Monitoring of Slope Stability
W. Allen Marr

**Keynote Session 3**

Issues of Reliability in Stability of Slopes
John T. Christian

Seismic Slope Stability
W. D. Liam Finn

**Keynote Session 4**

Lessons Learned from Troubleshooting Dams
Francisco Silva-Tulla and Steve J. Poulos

Advances in Shear Strength Measurement, Assessment, and Use for Slope Stability Analysis
Thomas L. Brandon

**Keynote Session 5**

Toppling—A Fundamental Failure Mode in Discontinuous Materials—Description and Analysis
Richard E. Goodman

**Case Studies of Offshore Slope Stability**

Suzanne Lacasse, Farrokh Nadim, Maarten Vanneste, Jean-Sébastien L'Heureux, Carl Fredrik Forsberg, and Tore J. Kvalstad
