# TABLE OF CONTENTS

## Volume 1

**SPE 164045** Thermodynamic Model Improvements for Common Minerals at High Temperature, High Pressure and High TDS with Mixed Salts  
Zhaoyi Dai, Wei Shi, Amy T. Kan, Nan Zhang, Mason B. Tomson  
.......................... 1

**SPE 164046** Delayed Crosslink Polymer Gel System for Water Shutoff in Conventional and Unconventional Oil and Gas Reservoirs  
S. Jayakumar, R. H. Lane  
.......................... 24

**SPE 164047** The Use of Inhibition Kinetics and NMR Spectroscopy in Thermal Stability Study of Scale Inhibitors  
Wei Wang, Amy T. Kan, Chao Yan, Mason B. Tomson  
.......................... 33

**SPE 164048** Novel Scale Remediation for Steam Assisted Gravity Drainage (SAGD) Operations  
Timothy Cheung, Michael Scheck  
.......................... 48

**SPE 164049** Lubricants and Drag Reducers for Oilfield Applications - Chemistry, Performance, and Environmental Impact  
Arvind Patel, Joyce Hui Zhang, Mingjie Ke, Balakrishnan Panamarathupalayam  
.......................... 58

**SPE 164050** Interactions of Sandstone Acid Systems with Aluminosilicates  
L. Zhou, H. A. Nass-El-Din  
.......................... 70

**SPE 164051** Structure, Stoichiometry, and Modelling of Calcium Phosphonate Scale Inhibitor Complexes for Application in Precipitation Squeeze Processes  
S. S. Shaw, K. S. Sorbie  
.......................... 92

**SPE 164052** Scale Inhibitor Consumption in Long-Term Static Barium Sulphate Inhibition Efficiency Tests  
S. S. Shaw, K. S. Sorbie  
.......................... 118

**SPE 164053** Experimental Study of Friction Reducer Flows in Microfracture During Slickwater Fracturing  
Yongpeng Sun, Hao Zhang, Qihua Wu, Mingzhen Wei, Baojun Bai, Yinfa Ma  
.......................... 144

**SPE 164055** Calcium Naphthenate Solid Deposit Identification and Control in Offshore Nigerian Fields  
Clement Igwebueze, Lukman Oduola, Olubaseun Smith, Pieter Vijn, Andrew G. Shepherd  
.......................... 156

**SPE 164056** Inorganic Scaling and Chemical Inhibition Challenges Associated with Production of Reservoir Equilibrated Spent Acid Stimulation Fluids  
Timothy Morrow, Mohammad Farooqui, Leozarin Morshidi, Russell Vannuis, Gordon Graham, Sam Kidd, Sarah Dyer, Caroline Simpson  
.......................... 169

**SPE 164058** Scale and Scale Inhibitor Challenges for an Alkaline Surfactant Polymer Flood in a Seawater Flooded Reservoir  
Noraliza Alwi, Intan Khalida Salleh, Jamie Irvine-Fortescue, Gordon Graham, Sarah Dyer, Rob Wright, Caroline Simpson, Sam Kidd, Robert Stalker  
.......................... 188

**SPE 164059** Application of a New Class of Chemical Tracers to Measure Oil Saturation in Partitioning Interwell Tracer Tests  
S. O. Virg, H. Juilla, P. Renouf, R. Kleven, B. Krognes, Ø. Dugstad, Ø. K. Huseby  
.......................... 199

**SPE 164061** Sacrificial Agent for Reducing Adsorption of Anionic Surfactants  
Hadi Shamsi-Jazeyi, George J. Hirasaki, Rafael Verdezco  
.......................... 214

**SPE 164062** Laboratory Studies for Surfactant Flood in Low-Temperature, Low-Salinity Fractured Carbonate Reservoir  
Aparna Raju Sagai, Maura Puerto, Yu Bian, Clarence A. Miller, George J. Hirasaki, Mehdi Salehi, Charles P. Thomas, Jonathan T. Kwan  
.......................... 230

**SPE 164064** Solids-Free Fluid Loss Pill for High Temperature Reservoirs  
Pubudu Gamage, Jay P. Deville, John Sherman  
.......................... 250

**SPE 164066** On the Partitioning of Hydrogen Sulfide in Oilfield Systems  
E. D. Burger, G. E. Jenneman, J. J. Carroll  
.......................... 257

**SPE 164068** The Impact of Dissolved Organic-Carbon Type on the Extent of Reservoir Sourcing  
E. D. Burger, G. E. Jenneman, X. Guo  
.......................... 270

**SPE 164069** Calcium Naphthenate Mitigation at Sonangol's Gimboa Field  
Jorge Junior, Luis Borges, Carlos Carmelino, Pedro Hango, John Duncan Milliken, Sam Asomaning  
.......................... 283

**SPE 164070** The Influence of Turbulence (or Hydrodynamic Effects) on Barium Sulphate Scale Formation and Inhibitor Performance  
Louise Sutherland, Clare Johnston, William Taylor  
.......................... 292
SPE 164071 Improvements in Environmental Profile and Cost Effectiveness of Scale Squeeze Inhibitors A Case Study From the North Sea ................................................................. 301
Clare Johnston, Morag Elrick

SPE 164072 Novel Associative Acrylamide-based Polymers for Proppant Transport in Hydraulic Fracturing Fluids ................................................................. 324
N. Guillard, A. Thomas, C. Favero

SPE 164073 Environmentally Friendly Emulsion Breakers: Vision or Reality? ................................................................................................................................. 335
Anton Kaiser

SPE 164074 The Application of Nanoparticle-Stabilized CO2 Foam for Oil Recovery ................................................................. 341
Jianjia Yu, Di Mo, Ning Liu, Robert Lee

SPE 164077 Laboratory Development of a Novel, Non-Triazine-Based Hydrogen Sulfide Scavenger and Field Implementation in the Haynesville Shale ................................................................................................................................. 350

SPE 164078 Polymeric and Alkali-Surfactant Polymer Enhanced Oil Recovery Chemical Treatment: Chemistry and Strategies Required After Breakthrough into the Process ................................................................................................................................. 360
Jonathan J. Wylde, Jubal L. Slayer, Victor Barbu

SPE 164079 Determination of Multiple Scale Inhibitor Residuals in Single Produced Waters: A Case History from the North Sea Differentiating Four Chemistries ................................................................................................................................. 375
Jonathan J. Wylde, Adam Savin, Jamie Kerr, Audrey McLean, Marion Duncan

SPE 164080 When to Batch and When Not to Batch: An Overview of Integrity Management and Batch Corrosion Inhibitor Testing Methods and Application Strategies ................................................................................................................................. 390
Jonathan J. Wylde, Melanie Reid, Alistair Kirkpatrick, Nihal Obeyshekere, David Glasgow

SPE 164081 Halite Scale Formation Mechanisms, Removal and Control: A Global Overview of Mechanical, Process and Chemical Strategies ................................................................................................................................. 402
Jonathan J. Wylde, Jubal L. Slayer

SPE 164082 Long-Term Dynamic Flow Testing of Propants ................................................................................................................................. 411
Neil Kunnath Aven, Jim Weaver, Tingli Tang

SPE 164083 Impact of Polymer Mechanical Degradation on Shear and Extensional Viscosities: Towards Better Injectivity Forecasts in Polymer Flooding Operations ................................................................................................................................. 430

SPE 164084 Quantifying Increased Corrosion Risks in Chemical Injection Lines and Gas Lift Systems Due to Partial Evaporation Effects ................................................................................................................................. 441
Deborah Bowering, Neil Goodwin, Matthew McCall, Robert Stalker, Gordon Graham

SPE 164086 Synthesis and Sorption Study of AOOOH Nanoparticle Cross-Linked Polymeric Scale Inhibitors and Their Squeeze Performance in Porous Media ................................................................................................................................. 448
Chao Yan, Amy T. Kan, Wei Wang, Fei Yan, Lu Wang, Mason B. Tomson

SPE 164087 Prevention of Acid Induced Asphaltene Precipitation: A Comparison of Anionic vs. Cationic Surfactants ................................................................................................................................. 460
Bill O’Neil, Darren Maley, Chris Lalchan

SPE 164088 Development of Peracetic Acid (PAA) as an Environmentally Safe Biocide for Water Treatment During Hydraulic Fracturing Applications ................................................................................................................................. 479
Renato M. De Paula, Victor V. Keasler, Junzhong Li, Dave McSherry, Rich Staub

SPE 164089 Identification of Sustainable Chemistries for Microbial Control in a Deep Offshore Waterflood ................................................................................................................................. 489
E. Sianawati, H. McGinley, B. Yin, A. Prisco, R. Lévy

SPE 164090 Stability Investigation of Low-Tension Surfactant Floods ................................................................................................................................. 498
Jan Lu, Gary A. Pope, Upali P. Weerasooriya

SPE 164091 Application of Quantitative Structure-Property Relationship (QSPR) Method for Chemical EOR Surfactant Selection ................................................................................................................................. 510
Patrick Moreau, F. Oukhemaneou, A. Maldonado, B. Creton

SPE 164092 Shale Drilling: The Impact of Shale-Chemo-Physical Constituents on the Issue of Poor Drilling Performance at Depth ................................................................................................................................. 525
A. Hayatdavoudi, Y. Sardooee Nasab, G. Mensa-Wilmot, V. Hover, F. Boukadi

SPE 164093 The Effect of Shale Chemistry on Gas Production Decline in Hydraulically Fractured Shale Gas Wells ......................................................................................................................................................... 549
D. Hassanpoor, A. Hayatdavoudi, F. Boukadi

SPE 164121 Effective Propagation of HPAM Solutions Through the Tambaredjo Reservoir During a Polymer Flood
R. N. Manichand, K. P. Moe Soe Lei, L. Gil, B. Quillien, R. S. Seright ................................................................. 916

SPE 164122 Evaluation of Environmentally Acceptable Surfactants for Application as Flowback Aids
Tanhee Galindo, Shawn Rimassa ................................................................. 930

SPE 164123 Quantitative and Visual Characterization of Asphaltenic Components of Heavy-Oil and Bitumen Samples after Solvent Interaction at Different Temperatures and Pressures
L. Moreno, T. Babadagli ................................................................. 942

SPE 164124 The Development and Application of Techniques for the Detailed Characterization of a Novel Series of P-Functionalized Polymeric Scale Inhibitors
J. Kerr, J. Goulding, K. S. Sorbie ................................................................. 962

SPE 164126 Improving Oil Recovery in Gas-Flooded, Oil-Wet Carbonate Reservoirs by Wettability Altering Surfactants
Leizheng Wang, Kishore K. Mohanty ................................................................. 979

SPE 164127 Interrelationship of CO₂, Weak Acids, Bases, and pH in Scale Prediction and Control
Amy T. Kan, Nan Zhang, Wei Shi, Kevin Wang, Lu Wang, Chao Yan, Fei Yan, Mason B. Tomson, Ross C. Tomson, Haiguan Zhu, Syed M. A. Razavi ................................................................. 996

SPE 164128 Factors Affecting the Stability of Scale Inhibitors Used for Capillary Injection in High Temperature Wells
J. Rick Griffin, James R. Johnstone, Terry E. Cotter, Ashleigh E. O’Brien ................................................................. 1013

SPE 164129 Laboratory Evaluation of H₂S Bioscavenging in Produced Water at 60°C
J. B. Harris, A. Stepp, T. Pierce, R. Webb, G. E. Jenneman, E. D. Burger ................................................................. 1033

SPE 164130 A New Finding in the Interaction Between Chelating Agents and Carbonate Rocks During Matrix Acidizing Treatments
A. I. Assem, H. A. Nasr-El-Din, C. A. De Wolf ................................................................. 1044

SPE 164131 Enhanced Oil Solubilization Using Microemulsions with Linkers
Gianna Pietrangeli, Lirio Quintero ................................................................. 1058

SPE 164132 Risk Assessment of Concurrent Hydrate and Wax Formation for Deepwater Production Restart Modeling and Experimental Results
H. Oschmann, R. Alapati, K. Paso ................................................................. 1068

SPE 164133 The Evaluation and Optimization of Hydrogen Sulfide Scavenger Applications Using Ion Mobility Spectrometry
Ron Matherly, Grahame Taylor ................................................................. 1080

SPE 164134 The Formation and Chemical Nature of Amorphous Dithiazine Produced From Use of Hexahydrotriazine Based Hydrogen Sulfide Scavengers and the use of an Alternative Scavenger to Minimize Solid Formation in Sour Gas Applications
Grahame N. Taylor, Philippe Prince, Ron Matherly, Ramakrishna Ponnappan, Rose Tompkins, Vaithilingam Panchalingam, Vladimir Jovancevic, Sunder Ramachandran ................................................................. 1090

SPE 164135 Mechanical and Thermal Stability of Polyacrylamide-Based Microgel Products for EOR
G. Dupuis, R. S. Al-Maamari, A. R. Al-Hashmi, H. H. Al-Sharji, A. Zaitoun ................................................................. 1104
