Research in Engineering Education Symposium 2008

Davos, Switzerland
7 – 10 July 2008

ISBN: 978-1-62748-183-0
# TABLE OF CONTENTS

## SESSION 1A

**Engineering Students Define Diversity: An Uncommon Thread** ......................................................... 1  
*L. Fleming, D. Williams*

**The Engineer of 2020: Case Studies of Organizational Features of Effective Engineering Education** ............ 6  
*N/A*

**Exploring Gender Disparities in Engineering** ................................................................................. 9  
*C. Cosentino*

## SESSION 1B

**Using Inquiry-Based Activities to Promote Understanding of Critical Engineering Concepts** .................... 14  
*M. Prince, M. Vigeant, K. Nottis*

**Learner Centered? How Engineering Faculty Talk About Students When Reporting Teaching Decisions** ........ 19  
*N/A*

**Seeing the Forest and the Trees: Holistic Learner Development** ..................................................... 24  
*J. Karlin, S. Kellogg*

## SESSION 1C

**The Practice of Critical Thinking: Preliminary Data and Analysis** .......................................................... 29  
*E. Douglas*

**Learning To Think Critically In And About Engineering: A Liberative Perspective** ............................... 34  
*L. Claris, D. Riley*

**Learning Community Effects on Writing and Critical Thinking Skills of First-Year Engineering Students** ... 39  
*R. Damron, K. High*

## SESSION 2A

**From Research to Practice: Redesigning AP Science Courses to Promote Advanced Learning and Conceptual Understanding** ................................................................. 44  
*J. Pellegrino, J. Pemberton, M. Reckase, J. Eggebrecht, K. Huff, M. Bertenthal*

**Age Related Gender Differences in Interests in Engineering** ............................................................. 49  
*M. Habashi, W. Graziano, D. Evangelou, I. Ngambeki*

**Interests In Engineering: A Developmental Perspective** ................................................................. 54  
*D. Evangelou, W. Graziano, M. Habashi, I. Ngambeki*

## SESSION 2B

**Work In Progress: Engineering Identity Markers In Faculty Members** ................................................. 58  
*A. Pawley*

**Engineering Students’ External and Internal Frames of Reference for the Construction of Professional Identity** ................................................................................. 63  
*M. Eliot, J. Turns, K. Xu*

**Early Career Learning by Novice Engineers** ..................................................................................... 68  
*S. Tilli, J. Trevelyan*
SESSION 2C

Investigating the Linkages Between Unethical Professional Behaviors and Engineering Undergraduate Cheating ............................................................................................................................... 72
D. Carpenter, T. Harding, C. Finelli

The Impact of a Week-Long Second Year Industrial Field Trip ............................................................................................................................... 77
D. Fraser, L. Kotta

Using Hybrid Data to Model Student Success in Engineering With Artificial Neural Networks ................................................................. 82
P. Imbrie, J. Li, K. Reid, A. Malyscheff

SESSION 3A

D. Williams, L. Fleming, V. Dover

Contingent Immersion: A Naturalistic Methodology for Discovering the Socio-technical Realities of Engineering Practice ............................................................................................................................... 93
D. Radcliffe

Real Engineering Is Not What You Learned At School.....Or Is It? ............................................................................................................................... 98
J. Trevelyan

SESSION 3B

The Influence of Problem Structure on Students’ Use of Innovative Learning Strategies ............................................................................................................................... 103
N/A

A Cognitive Study of Problem-solving Statics ............................................................................................................................................................... 108
T. Litzinger, P. Meter, C. Firetto, L. Passmore, C. Masters, F. Costanzo, G. Gray, S. Turns, K. Higley

Situating Complex Systems as Preparation for Future Innovation ............................................................................................................................................................... 113
S. Brophy

SESSION 3C

Effect of Pedagogy on Learning by Conceptual Change for Deformation-Processing Misconceptions in Structure-Property Relationships in Materials Engineering Classes ............................................................................................................................................................... 118
S. Krause

Investigating Levels Of Conceptual Understanding: A Case Study From Thermal And Transport Science ............................................................................................................................................................... 123
R. Streveler, R. Miller, D. Evangelou, B. Olds

Student Understanding Of "Surface Area To Volume Ratio" And Its Relationship To Property Change In The Nano-Science Engineering Context ............................................................................................................................................................... 128
G. Light, S. Swarat, E. Park, D. Drane

SESSION 4A

The Many Homes of Engineering Education Research: Historical Analysis of PhD Dissertations ............................................................................................................................................................... 133
J. Strobel, D. Evangelou, R. Streveler, K. Smith

Understanding Fundamental Assumptions Underlying Educational Research Through The Lens Of A Cultural ‘Verfremdungseffekt’ ............................................................................................................................................................... 138
J. Walther, C. Boonchais, D. Radcliffe

Engineering Education Research: Global Trends and Collaborative Opportunities ............................................................................................................................................................... 144
B. Jesiek, M. Borrego, K. Beddoes

SESSION 4B

Producing a Globally Competent Engineer: Evaluation and Assessment of the Georgia Tech International Plan ............................................................................................................................................................... 150
J. Gordon, J. Lohmann

</tbody>
</table>
Teaching and Assessing Systems Thinking in Engineering ........................................... 230
R. Hadgraft, A. Carew, S. Therese, D. Blundell

SESSION 6B

A Longitudinal Study of the Ethical Development of Engineering and Non-engineering Students at a National Research University ......................................................... 236
C. Finelli, J. Sutkus, D. Carpenter, T. Harding

Linking Reflection And Professional Preparedness: The Course-Based Professional Portfolio ......................................................... 240
J. Turns, Z. Guan, J. Yellin

Designing For Insightful Learning In Mechanics Through Labwork ......................................................... 245
J. Bernhard

SESSION 6C

Engaging Faculty & Students Across & Beyond Disciplines through an Innovative Graduate Level Curriculum: A Multi-year, Multi-Method Study of Associations ......................................................... 250
P. Theroux

Ways Of Experiencing Cross-Disciplinary Practice In Engineering Contexts ......................................................... 257
R. Adams, L. Mann, T. Forin, S. Daly, S. Jordan

Investigating Engineering Students' and Practitioners’ Mathematical Thinking ......................................................... 262
M. Cardella
