IADIS International Conference on Cognition and Exploratory Learning in Digital Age

(CELDA 2005)

Porto, Portugal
14-16 December 2005

TABLE OF CONTENTS

Advanced Multiple Representation Concept Maps For Constructing Shared Conceptual Artifacts
Pasi Silander, Jorma Tarhio, Erkki Sutinen .............................................................................. 3

New Fundamental Profiling Characteristics For Designing Adaptive Web-Based Educational Systems
Panagiotis Germanakos, Nikos Tsianos, Constantinos Mourlas, George Samaras ................... 10

Social And Biological Model Of Cognitive Development And Learning Pattern
Toshi Nishimiyta, Toshiaki Honda, Toshio Okamoto ............................................................... 18

Emotionality Considerations In Virtual Reality And Simulation Based Learning
Miika Lehtonen, Tom Page, Gisli Thorsteinsson ..................................................................... 26

Improving Student Modeling: The Relationship Between Learning Styles And Cognitive Traits
Sabine Graf, Taiyu Lin, Kinshuk ............................................................................................... 37

The Effects Of The Structure Of Digits On The Learning Of Bilingual Children
Eshaa M. Alkhalifa .................................................................................................................. 45

Professional Development For Tertiary Educators: An Online Model For Pedagogical And
Instructional Improvement
Lynne Schrum, Mary Burbank, Jonathan Engle, Kelly F. Glassett ......................................... 52

Fostering Discussions With Forum Tools Based On E-Learning Standards
Sebastien George, Herve Labas .............................................................................................. 60

Factors Influencing And Supporting Key Knowledge Processes In Online Knowledge Communities -
Results Of A SEM-Based Exploratory Case Study
Felix J. Schmidt-Husten, Adalbert F. X. Wilhelm .................................................................. 69

Bridging Over Problems Of Learning In Finding Strongly Connected Components
M. Ashraf Jafal, Yasser Hashmi ................................................................................................ 78

Discrepancies Between Reality And Expectation: Can Adaptive Hypermedia Meet The Expectations
Of Teachers? ............................................................................................................................... 88

Rachada Monthienvichienchais, Owen Conlan, Faezeh Seyedavarbi ........................................ 96

Prospects For Using Learning Objects And Learning Design As Staff Development Tools In Higher
Education
John Casey, Kevin Brosnan, Wolfgang Greller ........................................................................ 105

Design And Evaluation Of An Adaptive Learning Support Agent
Dejan Ljubezejic, John Cook, Tom Boyle .............................................................................. 113

The Feasibility Of Automatic Assessment And Feedback
Mikko-Jussi Laakso, Tapio Salakoski, Ari Korhonen ............................................................... 123

Developing, Implementing, And Testing Mixed Reality And High Interaction Media Applications In
Schools
Andre Melzer, Lia Hadley, Thomas Winkler, Michael Herczeg ............................................... 139

Observe, Discuss, And Reason With Evidence In Science: Scaffolding Conceptual Change With
O.D.R.E.S.™
Charoula Angeli, Nicos Valanides, Demetris Lazarou, Athena Sarri ........................................ 148

Student's Perception Of A Semantic Search Engine
Monique Reichert, Serge Linckels, Christoph Meinel, Thomas Engel ..................................... 156

The Role Of Attention In The Design Of Learning Management Systems
Claudia Roda, Thierry Nabeth ............................................................................................... 167

Modular Robotics As A Tool For Education And Entertainment
Jacob Nielsen, Henrik Hautop Lund ........................................................................................ 175

Exploratory And Experimental Learning For Teachers And Researchers Too!
Ruddy Lelouche ..................................................................................................................... 183

An Artistic Approach To Designing Visualisations To Aid Instrumental Music Learning
Andrew Johnston, Benjamin Marks, Ernest Edmonds ............................................................ 191

Choice Of Feedback Strategies
Erica Melis .................................................................................................................................. 200

Teachers’ Views On Learning And Teaching In Rich Technology-Based Classrooms: A
Developmental Perspective
Tamar Levin, Rivka Wadman ................................................................................................ 208
