2013 IEEE International Underwater Technology Symposium

(UT 2013)

Tokyo, Japan
5 – 8 March 2013
Integration of Science and Technology for evolutions of Ocean Science and Natural disaster mitigation (UT2013-1136)  1
Yoshiyuki Kaneda, JAMSTEC, Japan

Developments in Underwater Technologies – Indian Scenario (UT2013-1035)  4
M. A. Atmanand, National Institute of Ocean Technology, India

Laser-Induced Breakdown Spectroscopy for in situ chemical analysis at sea (UT2013-1028)  9
Blair Thornton, The University of Tokyo, Japan

Challenges to Dril Through Seismogenic Zone (UT2013-1143)  16
Masanori Kyo, JAMSTEC, Japan

Japan Trench earthquake and tsunami monitoring network of cable-linked 153 ocean bottom observatories and its impact to earth disaster science (UT2013-1147)  23
Toshihiko Kanazawa, National Research Institute for Earth Science and Disaster Prevention, Japan

Multiple Vehicle Operation - One Researcher One Customized AUV - N/A
Tamaki Ura, The University of Tokyo, Japan
Species classification of submerged aquatic plants using acoustic images in shallow lakes (UT2013-1015)  28
K. Mizuno, C. XU, A. Asada, K. Abukawa and M. Yamamuro

Diagnostic evaluation of quay wall using three-dimensional acoustic measurement systems (UT2013-1025)  33
K. Abukawa, A. Asada, K. Mizuno, T. Igarashi, N. Kishi, and K. Akimoto

Submarine topography and sediment distribution after the 11 March 2001 tsunami impact in Kesen-numa Bay, Miyagi, Japan (UT2013-1044)  37
K. Akimoto, K. Yakita, T. Hokamura, T. Yoshinaga, M. Yoshioka, Izumi Sakamoto, Yoshiyuki Takino

A Numerical Study for Relationship between Coastal Tsunami and Bottom Pressure Fluctuation in the Ocean Generated from Near-Field Earthquake (UT2013-1045)  40
T. Baba, N. Takahashi and Y. Kaneda

Citizen Science and marine community monitoring by video-cabled observatories: the OBSEA Citizen Science Project (UT2013-1051)  43
Joaquin del Rio, Jacopo Aguzzi, Alberto Hidalgo, Ikram Bghiel, Antoni Manuel, Valerio Sbragaglia, Francesc Sardà

New Type of Plug-In Electric Boat "RAICHO-S" (UT2013-1066)  46
T. Hazuku, T. Takamasa, T. Oode, E. Shimizu, H. Kifune and S. Takeda

Background seismic noise level in DONET seafloor cabled observation network (UT2013-1073)  51
Eiichiro Araki, Takashi Yokobiki, Katsuyoshi Kawaguchi, and Yoshiyuki Kaneda
Small Scale Reciprocal Sound Propagation Analysis in Hashirimizu Port (UT2013-1086)  55  
H. Ogasawara, S. Kamimura, K. Mori, and T. Nakamura

Preliminary Analysis of Background Noise Distribution in the Ocean Experiment 2010 of Ambient Noise Imaging (UT2013-1102)  62  
K. Mori, H. Ogasawara and T. Nakamura, T. Tsuchiya and N. Endoh

Implementation of machine learning algorism to autonomous surface vehicle for tracking and navigating AUV (UT2013-1131)  66  
Junichiro Osaku, Akira Asada and Fumitaka Maeda, Yozo Yamagata and Takashi Kanamaru

The positioning system integrated LBL and SSBL using seafloor acoustic mirror transponder (UT2013-1132)  70  
Toru Kashima, Akira Asada, Tamaki Ura

Docking Method for Hovering Type AUVs by Acoustic and Visual Positioning (UT2013-1137)  74  
Toshihiro Maki, Reyes Tatsuru Shiroku, Yoshiki Sato, Takumi Matsuda, Takashi Saka-maki, Tamaki Ura
An Efficient Sidescan Sonar Image Denoising Method Based on a New Roughness Entropy Fractal Dimension (UT2013-1048)  80
Hsiao-Wen Tin, Shao-Wei Leu, Chan-Chuan Wen, and Shun-Hsyung Chang

Estimation and Analysis of the Underwater Noise during Construction of offshore wind farm in the West Coast of Taiwan (UT2013-1087)  85
Henry Tsai, Sheng-Fong Lin, Chi-Fang Chen, Tien-Siang Ling, Cheng-Cyuan Fan, Wei-Chun Hu

Modeling of Shallow Water Ambient Noise based on Adiabatic Mode Theory (UT2013-1097)  91
Andrea Chang, Yu-Chen Cheng, Chi-Fang Chen, Hsiang-Chih Chan and Sheng-Fong Lin

Limitations in Measurements of Acoustic Scattering from Fish at Rather High Frequencies (UT2013-1034)  96
Masahiko Furusawa
Evaluation of Sound Speed Profile Estimation by Single Sonar (UT2013-1031) 104
Hisashi Shiba

Linear and Bilinear Approximations of Sound Speed Profiles in GPS/Acoustic Seafloor Geodesy (UT2013-1125) 110
Hsin-Hung Chen, Chau-Chang Wang, Wen-Ning Chuang, Bi-Hua Lin, Kun-Hung Li, and Jia-De Su

Estimation and Reduction of Effects of Sea Surface Reflection on Underwater Vertical Channel (UT2013-1092) 118
Linus Y.S. Chiu and Hwei-Ruy Chen

Soft Acoustic Modem Development for Shallow Water Environment (UT2013-1041) 126
Tri Budi Santoso, Endang Widjiati, Wirawan, Gamantyo Hendrantoro
APPLICATION OF ACOUSTICS

Motion parameter estimation of a radiating point source with multiple tonals using acoustic Doppler analysis (UT2013-1062)  131
R. Gupta, A. Kumar, R. Bahl

Realization of Acoustic Monitoring of Rip Currents based on Passive Reciprocal Sound Transmissions (UT2013-1040)  137
I. Nakano and H. Ishida

Inversion of Ocean Currents Using NTU-RAY (UT2013-1084)  141
Jeff Chih-Hao Wu, Kao-Chao Wu, and Chi-Fang Chen

Event Detection of Underwater Acoustic Data from MACHO hydrophone (UT2013-1107)  145
Yin-Ying Fang, Meng-Chu Liu, Shih-En Chou, Chifang Chen, Chien-Kang Huang
Automated acoustic detection of fin whale calls off Kushiro-Tokachi at the deep sea floor observatory (UT2013-1085)  151
I. Matsuo, T. Akamatsu, R. Iwase and K. Kawaguchi

Automatic Detection and Classification of Cetacean Tonal Sounds from a Long-term Marine Observatory (UT2013-1024)  154
Tzu-Hao Lin, Hsin-Yi Yu, Chi-Fang Chen, Lien-Siang Chou

Counting Animals Using Vocalizations; a Case Study in Dolphins (UT2013-1055)  160

Development and deployment of the long-term in-situ observation system of the Irrawaddy dolphins (Orcaella brevirostris) in Borneo (UT2013-1020)  164

Off-line Observation System Based on Acoustic Video Camera for Understanding Behavior of Underwater Life (UT2013-1033)  171
Masashi Mochizuki, Akira Asada, Tamaki Ura, Masumi Yamamuro, Miguel D. Fortes, Lea A. Jimenez

Observation of aquatic biota in eutrophied pond using stationary acoustic monitoring system. (UT2013-1013)  175
Underwater repair method for shunt fault on submarine cable (UT2013-1124) 180
Takashi Yokobiki, Ryoichi Iwase, Yukio Takahashi, Hiroyasu Momma

Precise Laying of Observation Cable System (UT2013-1069) 184
Yasuharu Okatake, Yukihiro Fujii, Masakazu Nasu, Akira Ikeuchi, Hiroo Takahashi and Eiichi Asakawa

Development of an Automated Cable-laying System for DONET Construction (UT2013-1008) 188
Jin-Kyu Choi, Shuhei Nishida, Takashi Yokobiki and Katsuyoshi Kawaguchi
xFOCE: An Open Source Technology Consortium for Ocean Acidification Research (UT2013-1002)  194

The new synthesis of cabled observatory science: technology meets deep-sea ecology (UT2013-1019)  203
Aguzzi J. Costa C., Company J.B., Fujiwhara Y., Favali P., Tunnicliffe V., Mata-bos M., Canals M., Menesatti P.

Ocean bottom measurements of the Earth’s electric field using long cable installed by ROV (UT2013-1014)  211
H. Utada, K. Baba, H. Shimizu, H. Shiobara and N. Tada

Some Characteristics of Bottom Pressure Sensors of DONET (UT2013-1081)  217
H. Matsumoto, E. Araki, K. Kawaguchi, S. Nishida, and Y. Kaneda

An evaluation about the performance of a hydrophone on seafloor (UT2013-1103)  224
S. Nishida, K. Kawaguchi, T. Imaizumi, T. Akamatsu

Detection of deep-sea current associated with tsunami and possible biogenic acoustic signals – Several topics of multidisciplinary observation with JAMSTEC cabled observatory (UT2013-1130)  226
R. Iwase and I. Takahashi
Leakage and Oil Spill Detection Utilizing Active Acoustic Systems (UT2013-1119) 230
P. K. Eriksen

Risk management strategy of DONET installation and the utilization of real-time data for disaster prevention (UT2013-1053) 238
N. Takahashi, T. Baba, M. Takaesu, S. Kamiya, K. Kawaguchi and Y. Kaneda

Development of DONET2 - Off Kii Channel Observatory Network - (UT2013-1054) 240

Long-term monitoring at C0002 seafloor borehole in Nankai Trough seismogenic zone (UT2013-1100) 245
K. Kitada, E. Araki, T. Kimura, M. Kinoshita, A. Kopf and D. Saffer

Extended GPS/Acoustic geodetic observation near the Japan Trench axis for the study of the giant 2011 Tohoku-oki earthquake (UT2013-1064) 248

Continuous mapping of radionuclides on the seafloor using a towed gamma ray spectrometer (UT2013-1030) 252
Blair Thornton, Seiki Ohnishiy, Yusuke Yanoz, Shun Sasaki, Tamaki Ura, Naoteru Odanoy, and Tsuneo Fujita
Assessment of yearly available days for wind turbine installation in the western sea of Taiwan (UT2013-1093) 259
Hsiang-Chih Chan, Meng-Hung Chang, Ai-Tsz Liu, Cheng-Hsien Chung, Chen-Hsing-Cheng, Forng-Chen Chiu

Developing Near-bottom Magnetic Measurements Using a 3D Forward Modeling Technique: Application to Hydrothermal Vent Fields (UT2013-1076) 263
Masakazu Fujii, Kyoko Okino, Chie Honsho, Jerome Dyment, Szitkar Florent, Nobutatsu Mochizuki

M. Rioiblanc

Discovery and Characterization of a New Hydrothermal Vent based on Magnetic and Acoustic Surveys (UT2013-1032) 274
Kyoko Okino, Kentaro Nakamura, Yoshifumi Nogi, Masakazu Fujii, Nobutatsu Mochizuki, Miho Asada, and Chie Honsho

Towards Real-time Control of a Double Gimbaled Acoustic Probe for Measurement of Manganese Crusts Thickness (UT2013-1098) 279
Takumi Sato, Blair Thornton, Adrian Bodenmann, Akira Asada, Tamaki Ura
Coral Identification Information System (UT2013-1042) 284

Development of Two Underwater Imaging Apparatuses for Suspended Particulate Matter (UT2013-1101) 290
T. Akiba and Y. Tanaka

The uROV PICASSO, the Visual Plankton Recorder, and other attempts to image plankton (UT2013-1067) 294
Observation of in situ tuna behavior around the fisheries aggregating devises (FADs) by using passive and active acoustic methods (UT2013-1095) 297

Classification of fish schools based on acoustic features associated with tilt angle (UT2013-1083) 301
M. Ito, I. Matsuo, T. Imaizumi, T. Akamatsu, Y. Wang, Y. Nishimori

Fish Population Estimation and Species Classification from Underwater Video Sequences using Blob Counting and Shape Analysis (UT2013-1094) 305
NEW MONITORING TOOL

Super-deep-sea Ocean Bottom Seismometers Using Ceramic Spheres
(UT2013-1133) 311
Yosaku Maeda, Kenichi Asakawa, Koichiro Obana, Ikumasa Terada

Preliminary Study of Long Endurance Moorless Non-drifting Buoy (UT2013-1026) 315
Jason Seungjoo Lee and Son-Cheol Yu

Underwater Glider ‘SOARER’ for Ocean Environmental Monitoring (UT2013-1096) 321
M. Arima, H. Tonai and Y. Kosuga
Development of an Underwater Gravimeter and the First Observation by Using Autonomous Underwater Vehicle (UT2013-1082)  326

Towards AUV-based Iceberg Profiling and Gouging Survey in Arctic Sea: The First Japanese Under-Ice AUV Deployment in Okhotsk Sea (UT2013-1088)  332
A Compact and High-performance INS for Underwater Vehicle Developed with Homegrown Technology (UT2013-1126)  337
Shojiro Ishibashi

Optimal positioning of autonomous marine vehicles for underwater acoustic source localization using TOA measurements (UT2013-1129)  342
Bruno Ferreira, An’ibal Matos, Nuno Cruz

Hemlata Choudhary, Arun Kumar and Rajendar Bahl

Underwater precise navigation using multiple sensor fusion (UT2013-1068)  355
Kihun Kim, Hyun-Taek Choi, Chong-Moo Lee
Energy Efficient Signaling Strategies for Tracking Mobile Underwater Vehicles (UT2013-1050) 359
*Diba Mirza, Paul Roberts, Jinwang Yi, Curt Schurgers, Ryan Kastner and Jules Jaffe*

*Kangsoo Kim, Tamaki Ura*

Mapping the Bayonnaise knoll caldera and the Hakurei hydrothermal deposit with autonomous underwater vehicle using side-scan and multi-beam sonars (UT2013-1060) 375
*Chie Honsho, Tamaki Ura and Akira Asada*

Field Experimental Results of Path Re-planning Method for an AUV to Visualize Complicated Surface in 3D (UT2013-1122) 383
*Yoshiki Sato, Toshihiro Maki, Ayaka Kume, Takumi Matsuda, Takashi Sakamaki, Tamaki Ura*

Cross-range imaging of a cooperative source using passive inverse synthetic aperture technique (UT2013-1063) 390
*H. Parmeswaran, R. Bahl, A. Kumar, R. Gupta*
Development of Long Range Color Imaging for Wide Area 3D Reconstructions of the Seafloor (UT2013-1029) 397
Adrian Bodenmann, Blair Thornton and Tamaki Ura

Optical methods to monitor temporal changes at the seafloor: The Lucky Strike deep-sea hydrothermal vent field (Mid-Atlantic Ridge) (UT2013-1046) 402
J. Escartin, R. Garcia, T. Barreyre, M. Cannat, N. Gracias, A. Shihavuddin, E. Mittelstaedt

Fraser Dalgleish, Bing Ouyang and Anni Vuorenkoski

Benthic monitoring with robotic platforms - the experience of Australia (UT2013-1144) 415
O. Pizarro, S. B. Williams, M. V. Jakuba, M. Johnson-Roberson, I. Mahon, M. Bryson, D. Steinberg, A. Friedman, D. Dansereau, N. Nourani-Vatani, D. Bongiorno, M. Bewley, A. Bender, N. Ashan1, B. Douillard

Post-drilling hydrothermal vent and associated biological activities seen through artificial hydrothermal vents in the Iheya North field, Okinawa Trough (UT2013-1146) 425
Developments in Sonar Technologies and their Applications (UT2013-1047) 429
L. Bjørnø

3D Forward Looking Sonar Technology for Surface Ships and AUV: Example of Design and Bathymetry Application (UT2013-1109) 437
George Yufit and Eric P. Maillard

A Preliminary Study on Multi-view Video Streaming over Underwater Acoustic Networks (UT2013-1039) 442
Takuya Fujihashi, Hai-Heng Ngy, Ziyuan Pan, Shunsuke Saruwatari, Hwee-Pink Tanz and Takashi Watanabe
Communication characteristics of UHF band under the sea through inflected propagation channel (UT2013-1022)  447
Masayoshi Ozawa, Etsuro Shimizu, Takuya Saito, Azumi Takahashi

Underwater Electromagnetics and Its Application to Unmanned Underwater Platforms (UT2013-1106)  451
Hiroshi Yoshida

New Concept of an Electromagnetic Usage for Contactless Communication and Power Transmission in the Ocean (UT2013-1127)  456

Electromagnetic imaging for near-shore and shallow depth investigations (UT2013-1017)  460
Jean François D’Eu, Pascal Tarits, Kevin Balem, Anne Maisonneuve, Sophie Hautot
Field Test of a Practical Test Model of Maintenance Examination System for Mooring Facilities and Additional Installation of Chain Grasping Frame in the Vehicle (UT2013-1078) 465
Toshinari Tanaka and Muneo Yoshie

Development of unmanned inspection equipment for underwater damages of harbor facilities (UT2013-1071) 473
Changjoo Shin, Sang Hun Han, In Sung Jang, Kihun Kim, and Won Dae Baek

AUV Tri-TON – A Hover-Capable Platform for 3D Visualization of Complicated Surfaces – (UT2013-1091) 476

Deformable Camber-line Foil and its Applications (UT2013-1003) 482
Shinichi Takagawa

Development of Low Cost PVDF Pressure Sensors for Sensing the Motion of a Robot Fish (UT2013-1141) 487
Sheng-wei Huang, Jui-yi Wang, Hao-hsuan Liu, Po-wei Wu, Edward Chen, Forng-chen Chiu, Jenhwa Guo

Modular Building Blocks for the Development of AUVs – from MARES to TriMARES (UT2013-1128) 493
Nuno A. Cruz, An’ibal C. Matos and Bruno M. Ferreira

Working-AUV "Otohime" and its sea trials at Sagami Bay (UT2013-1135) 501

MIR submersibles historic Dive Under the Ice Dome at the Geographical North Pole (UT2013-1012) 506
Anatoly M. Sagalevitch

Experience of scientific research and special operations with the Mir submersibles (to 25th Anniversary of the creation) (UT2013-1011) 512
Anatoly M. Sagalevitch
Customizing an Autonomous Underwater Vehicle and Developing a Launch and Recovery System (UT2013-1038)  517
E. Hayashi, H. Kimura, Christina Tam, James Ferguson, Jean-Marc Lafremboise, Gina Miller, Chris Kaminski, Alex Johnson

An Analysis of a Hybrid-Driven Underwater Glider Motion Control System based on Neuroendocrine Controller Algorithm (UT2013-1148)  524
Khalid Isa, M.R. Arshad

Online System Identification of the dynamics of an Autonomous Underwater Vehicle (UT2013-1056)  530
Eng You Hong, Teo Kwong Meng and Mandar Chitre

R&D of the maneuver control techniques for Autonomous Surface Vehicle using "Dual-Extended Kalman Filte" for the Actual Harbor Area Surveillance (UT2013-1075)  540
F. Maeda, J. Osaku, A. Asada, Y. Yamagata and T. Kanamaru

Challenges in realizing robust systems for deep water submersible ROSUB6000 (UT2013-1077)  546
N Vedachalam, R Ramesh, S Ramesh, D Sathianarayanan, A N Subramaniam, G Harikrishnan, SB Pranesh, VBN Jyothi, T Chowdhury, GA Ramadass, MA Atmanand

Performance Qualification of Instrumentation, Telemetry & Data Acquisition System for Underwater Mining Machine with Manganese Nodule Collection and Crushing System (UT2013-1089)  556

Deep sea qualification of Remotely Operable Vehicle (ROSUB 6000) (UT2013-1090)  566
D Sathianarayanan, R Ramesh, AN Subramanian, G Harikrishnan, D Muthukumaran, MMurugesan, E Chandrasekaran, S Elangovan, V Doss Prakash, A Vadivelan, M Radhakrishnan, S Ramesh, GA Ramadass, M A Atmanand

Accurate Altitude Control of Autonomous Underwater Vehicle(UT2013-1118)  573
C. C. Wang, Y. R. Lin and H. H. Chen

Toward Wide Seafloor Surveys Using Multiple Autonomous Underwater Vehicles (UT2013-1116)  576
Takumi Matsuda, Toshihiro Maki, Takashi Sakamaki, Tamaki Ura
