2012 International Conference on Social Informatics

(SocialInformatics 2012)

Alexandria, Virginia, USA
14 – 16 December 2012
2012 International Conference on Social Informatics

SocialInformatics 2012

Table of Contents

SocialInformatics 2012 Message from the Organizing Committees ................................................................. x
SocialInformatics 2012 Program Committee Members .................................................................................. xi

2012 ASE International Conference on Social Informatics (SocialInformatics 2012)

Session A1: Social Networks, Media, and Services

Stability vs. Diversity: Understanding the Dynamics of Actors in Time-Varying Affiliation Networks ................................................................. 1

Hossam Sharara, Lisa Singh, Lise Getoor, and Janet Mann

Organizational Intrusion: Organization Mining Using Socialbots ................................................................. 7

Aviad Elishar, Michael Fire, Dima Kagan, and Yuval Elovici

Shaping Operations to Attack Robust Terror Networks .................................................................................. 13

Devon Callahan, Paulo Shakarian, Jeffrey Nielsen, and Anthony N. Johnson

Network Reconstruction under Compressive Sensing .................................................................................. 19

Payam Siyari, Hamid R. Rabiee, Mostafa Salehi, and Motaharch Eslami Mehdiaabadi

Session A2: Social Networks, Media, and Services

Resting Time Activeness Determines Team Performance in Call Centers ......................................................... 26

Jun-ichiro Watanabe, Marina Fujita, Kazuo Yano, Hideo Kanesaka, and Tomoyuki Hasegawa

Two Species Evolutionary Game Model of User and Moderator Dynamics ..................................................... 32

Christopher Griffin, Douglas Mercer, James Fan, and Anna Squicciarini

Online Learning of User-Specific Destination Prediction Models ..................................................................... 40

Erfan Davami and Gita Sukthankar

Forming Effective Teams from Agents with Diverse Skill Sets ..................................................................... 44

Kirill Osipov and Gita Sukthankar

Session A3: Social Networks, Media, and Services

An Information Extraction Attack against On-Line Social Networks ............................................................. 49

Lijie Zhang and Weining Zhang
Game Theoretic Formation of a Centrality Based Network .................................................................56
  Ryan Tatko and Christopher Griffin

Monitoring Academic Conferences: Real-Time Visualization and Retrospective Analysis of Backchannel Conversations ........................................................................................................62
  Awalin Sopan, P.J. Rey, Brian Butler, and Ben Shneiderman

Session A4: Social Networks, Media, and Services
IARank: Ranking Users on Twitter in Near Real-Time, Based on Their Information Amplification Potential ........................................................................................................................................70
  Rafael Cappelletti and Nishanth Sastry

  Qi Xuan, Mohammad Gharehyazie, Premkumar T. Devanbu, and Vladimir Filkov

An Exploratory Analysis of Browsing Behavior of Web News on Twitter ..........................................................................................................................86
  Hao Han, Hidekazu Nakawatase, and Keizo Oyama

Session A5: Social Signal Processing
Analysing the Factors That Influence Tag Choice Based on Semiotic Analysis and Activity Theory ..................................................................................................................96
  Mariam Elhussein and Keiichi Nakata

Sampling from Diffusion Networks ........................................................................................................106
  Motahareh Eslami Mehdiabadi, Hamid R. Rabiee, and Mostafa Salehi

Socialize or Perish: Relating Social Behavior at a Scientific Conference to Publication Citations ........................................................................................................................................113
  Mathias Funk, Jun Hu, and Matthias Rauterberg

Supporting Ubiquitous Interaction in Dynamic Shared Spaces through Automatic Group Formation Based on Social Context .........................................................................................121
  Juwel Rana, Johan Kristiansson, and Kåre Synnes

Role of Sentiment in Message Propagation: Reply vs. Retweet Behavior in Political Communication ......................................................................................................................................131
  Jihie Kim and Jaebong Yoo

Nodding without Understanding: An Explorative Study of How Adolescents Listen to Their Teachers .........................................................................................................................137
  Giovanna Leone

Session A6: Social Networks, Media, and Services
Tweeque: Spatio-Temporal Analysis of Social Networks for Location Mining Using Graph Partitioning ..........................................................................................................................145
  Satyen Abrol, Latifur Khan, and Bhavani Thuraisingham
Visually Exploring Social Participation in Encyclopedia of Life .................................................................149
   Jae-Wook Ahn, Jennifer Hammock, Cynthia Parr, Jennifer Preece, Ben Shneiderman,
   Katja Schulz, Derek Hansen, Dana Rotman, and Yurong He

Extracting Agent-Based Models of Human Transportation Patterns ..............................................................157
   Rahmatollah Beheshti and Gita Sukthankar

Bridging the Divide in Democratic Engagement: Studying Conversation Patterns in Advantaged and Disadvantaged Communities .........................................................165
   Samah Gad, Naren Ramakrishnan, Keith N. Hampton, and Andrea Kavanaugh

Power and Politeness in Interactions: ADMIRE - A Tool for Deriving the Former from the Latter ............................................................177
   Christopher A. Miller and Jeffrey Rye

Ranking Given Names: Algorithms and Evaluation Paradigms .................................................................185
   Folke Mitzlaff and Gerd Stumme

Session A7: Social Networks, Media, and Services

Evolution of Social Encounters in Ad-Hoc Mobile Face-to-Face Interaction Networks ........................................192
   Rahman O. Oloritun, Anmol Madan, Alex Pentland, and Inas Khayal

Mining Stack Exchange: Expertise Is Evident from Initial Contributions .......................................................199
   Daryl Posnett, Eric Warburg, Premkumar Devanbu, and Vladimir Filkov

SIN: A Platform to Make Interactions in Social Networks Accessible ..........................................................205
   Roozbeh Nia, Fredrik Erlandsson, Prantik Bhattacharyya, Mohammad Rezaur Rahman,
   Henric Johnson, and S. Felix Wu

Sentiment Analysis of Social Issues ...........................................................................................................215
   Mostafa Karamibekr and Ali A. Ghorbani

Automatic Detection of Compromised Accounts in MMORPGs .............................................................222
   Jehwan Oh, Zoheb Hassan Borbora, and Jaideep Srivastava

Session A8: Social Networks, Media, and Services

Robust Reputation Mechanisms for Achieving Fair Compensation and Quality Assurance in Crowdcomputing ...........................................................................................................228
   Shailesh Vaya

User Taglines: Alternative Presentations of Expertise and Interest in Social Media ..................................236
   Hemant Parohit, Alex Dow, Omar Alonso, Lei Duan, and Kevin Haas

GameRank: Ranking and Analyzing Baseball Network ...........................................................................244
   Zifei Shan, Shiyingxue Li, and Yafei Dai

SocialCube: A Text Cube Framework for Analyzing Social Media Data ..................................................252
   Xiong Liu, Katzi Tang, Jeffrey Hancock, Jiawei Han, Mitchell Song, Roger Xu,
   Vikram Manikonda, and Bob Pokorny

Predict Whom One Will Follow: Follower Recommendation in Microblogs ............................................260
   Hao Wu, Vikram Sorathia, and Viktor K. Prasanna
A Case Study of Community Privacy ......................................................................................................................... 265
  Sherley Codio, Dennis Kafura, Manuel Pérez-Quiñones, Denis Gracanin, and Andrea Kavanaugh

Social-Aware DNS: First Step towards Future Internet ............................................................................................. 275
  Mohammad Rezaur Rahman, Yuxi Hu, S. Felix Wu, and Chen-Nee Chuah

Session A9: Social Networks, Media, and Services

Collaboration without Rules - A New Perspective on Stability Operations ................................................................. 281
  David Walker, Simon Reay Atkinson, and Liaquat Hossain

Towards an NLP-Based Topic Characterization of Social Relations .............................................................................. 289
  Jan Hauffa, Tobias Lichtenberg, and Georg Groh

Tourist Tour Planning Supported by Social Network Analysis ....................................................................................... 295
  Lule Ahmedi, Korab Rrmoku, and Kadri Sylejmani

Do You Know the Way to SNA?: A Process Model for Analyzing and Visualizing Social Media Network Data ........... 304
  Derek L. Hansen, Dana Rotman, Elizabeth Bonsignore, Nataša Milic-Frayling, Eduarda Mendes Rodrigues, Marc Smith, and Ben Shneiderman

Session A10: Social Networks, Media, and Services

Social Computing: Its Evolving Definition and Modeling in the Context of Collective Intelligence .................................. 314
  Yoshifumi Masunaga

Analyzing the Intertwining of Social and Technical Aspects in Agile Methods .............................................................. 320
  Francielle S. Santos and Hermano P. Moura

Towards Next Generation Requirements Engineering .................................................................................................. 328
  Terrill Fancott, Pankaj Kamthan, and Naolie Shahmir

Gender, Representation and Online Participation: A Quantitative Study of StackOverflow ........................................ 332
  Bogdan Vasilescu, Andrea Capiluppi, and Alexander Serebrenik

A Computational Framework for Detecting Malicious Actors in Communities ............................................................. 339
  Xing Fang and Justin Zhan

SocialInformatics 2012 Author Index ............................................................................................................................. 344
