Structures Congress 2013

Bridging Your Passion with Your Profession

Pittsburgh, Pennsylvania, USA
2-4 May 2013

Volume 1 of 4

Editors:

Brian J. Leshko
Jonathan McHugh

ISBN: 978-1-62748-406-0
## TABLE OF CONTENTS

**Volume 1**

**BLAST**

**MULTI-HAZARD ROBUSTNESS ASSESSMENT OF BUILDING STRUCTURAL SYSTEMS 1**

- Collapse Resistance Mechanisms in Steel Frame Buildings ................................................................. 1  
  Honghao Li, Sherif El-Tawil
- Collapse Test of a 3-Story Half-Scale RC Frame Structure ................................................................. 11  
  Y. Xiao, Y. B. Zhao, F. W. Li, S. Kunnath, H. S. Leu
- Probabilistic Analysis of Vulnerability of Reinforced Concrete Buildings Against Progressive Collapse .......... 20  
  Jia-Liang Le, Bing Xue
- Large-Scale Experimental Evaluation of Steel Gravity Framing Structural Integrity ............................... 32  

**MULTI-HAZARD ROBUSTNESS ASSESSMENT OF BUILDING STRUCTURAL SYSTEMS 2**

- Robustness of Prototype Steel Frame Buildings Against Column Loss: Assessment and Comparisons .......... 43  
  J. A. Main, J. Liu

**RECENT RESEARCH ADVANCES IN DISPROPORTIONATE COLLAPSE**

- Structural Integrity of Composite Steel Gravity Frame Systems ............................................................. 55  
  A. Jamshidi, R. G. Driver
- Static and Dynamic Disproportionate Collapse Testing of a Reinforced Concrete Frame ............................. 67  
  Sarah Orton, Stephen Stinger, Joseph Kirby

**ANALYSIS METHODS FOR BLAST LOADS**

- Numerical Simulation of Blast Wave Mitigations on RC Buildings via Improved Structural Configuration and Column Cross-Section Properties ................................................................. 78  
  Oruba Rabie, Yahia M. Al-Smadi

**PREDICTION OF BLAST LOADS 1**

- Effect of Inertia Forces on Support Reactions of Beams Subjected to Uniform Blast Loads ........................ 93  
  Macarena Schachter Adaros, Scott Wood, Peggy Van Eepoel
- Are You Positive About Negative Phase? .................................................................................................. 103  
  Larry M. Bryant, J. Mikhael Erekson, Kenneth W. Herrle

**PREDICTION OF BLAST LOADS 2**

- Breach Evaluation of Structures Using the Applied Element Method ....................................................... 115  
  Arturo Montalva, Hollice Stone, Ayman El-Fouly, Michael Hahn

**TESTING METHODS FOR BLAST RESPONSE**

- Effect of Window Sizes and Glazing Panel Aspect Ratios on Mitigating the Injuries from Flying Glass due to Air Blast ................................................................. 125  
  Hossein Ataei, James C. Anderson
Experimental Evaluation of Static Resistance Function Using a Vacuum Chamber
H. Salim, S. Roberts, A. Saucier

Behavior of Spliced Steel Girders under Impact
Musab Aied Qissab Al-Janabi, Thamir K. Mahmoud

BLAST RESISTANT GLAZING AND CURTAINWALL

Innovative Blast Resistant Glazing System
Yousef Alostaz, Robert Pyles, Jim Lorenzo, Ashish Bhargava

Modeling and Testing of Laminated Curtain Wall Systems under Blast Loading
M. Nawar, H. Salim, B. Lusk, K. Perry, S. Kiger, G. Miller

Blast Design Considerations for Double-Façade Curtain Walls
A. M. Coughlin, C. J. Field

Quantification of Aluminum Increase Factors for Curtain Wall Design Using Finite Element Methods
Lara D. Leininger, Sharon M. Gallant

High Strength Glass Testing and Model Validation for Static and Dynamic Loading
Ryan M. Alberson, Carrie E. Davis, Kirk A. Marchand

EVALUATING NEW MATERIALS AND METHODS FOR BLAST PROTECTION

Blast and Earthquake Resistant Bridge Pier Concept: Retrofit and Alternative Design Options
Pierre Fouché, Michel Bruneau, Vincent Chiariito, Jared Minor

Design and Detailing of Metal Stud Wall Systems in Response to Air-Blast Loading Effects
Jessica Godinho, Sharon Gallant, Leslie Quiter, Ady Aviram, Ronald L. Mayes, Ronald O. Hamburger

Evaluation of Mechanical Anchoring System to Improve Performance of CFRP Mitigated Concrete Slabs under Close-In Blasts
Sarah Orton, Matthew Wheeler, Vincent Chiariito

PROGRESSIVE COLLAPSE AND STRUCTURAL ROBUSTNESS: AN INTERNATIONAL PERSPECTIVE

Robustness Assessment of a Steel Truss Bridge
P. Olmati, F. Brando, K. Gkoumas

Design for Disproportionate Collapse Prevention of Precast and Prestressed Structures
C. Naito, N. Cleland, J. Brewe

Progressive Collapse Susceptibility of a Long Span Suspension Bridge
Pierluigi Olmati, Luisa Giuliani

Pancake-Type Collapse—Energy Absorption Mechanisms and their Influence on the Final Outcome
Nikolay Laikovski, Uwe Starossek

Collapse Analysis of a Metal Structure
C. Crosti, F. Bontempi

BRIDGE PRACTICE

STRUCTURAL HEALTH MONITORING OF FULL-SCALE BRIDGES

Critical Issues, Condition Assessment and Monitoring of Movable Bridges: Image Processing for Open Gear Monitoring
M. Gul, F. N. Catbas

Structural Identification Methods for Full-Scale Bridges
Ian F. C. Smith, James-A. Goulet, Irwanda Laory

Uncertainties in Identification of a Steel Bridge Dynamic Characteristic
Siavash Dorvash, Shamim Pakzad

Development of Carbon Nanofiber Aggregate
Rachel Howser, Y. L. Mo
STRUCTURAL HEALTH MONITORING OF FULL SCALE BRIDGES 2

Identification of Physically Simulated Damage on a Footbridge Based on Ambient Vibration Data
A. Kody, X. Li, B. Moaveni

Identification of Truck Types using Strain Sensors include Co-located Strain Gauges.
Navid Zolghadri, Marvin Halling, Paul Barr, Steven Petroff

BRIDGE MONITORING AND ASSESSMENTS

PARameter Identification System (PARIS) for Automated Finite Element Model Updating of Full-Scale Structures
Masoud Sanayei, Peeyush Rohela

Seismic Vulnerability of Select Critical Bridges in North Mississippi
M. Miah, K. Bethay, C. Mullen

Health Monitoring and Bayesian Updating of Deteriorating Bridge Infrastructures
A. A. Taflanidis, I. Gidaris

STRUCTURAL HEALTH MONITORING

A Prototype Imaging and Visualization System for Robotic Infrastructure Inspection
David A. Lattanzi, Greg Miller

Evaluation of Low Cost Dynamic Exciters for Controlled Dynamic Testing of Bridges
J. L. Carreiro, E. V. Fernstrom, K. A. Grimmelsman

Comparison of Sparse Representation and Fourier Discriminant Methods: Damage Location
Classification in Indirect Lab-Scale Bridge Structural Health Monitoring
Z. Wang, S. Chen, G. Lederman, F. Cerda, J. Bielak, J. H. Garrett, P. Rizzo, J. Kovacevic

BRIDGE SUBSTRUCTURE ANALYSIS

C-STM Modeling of Bridge Piers without and with ASR/DEF Deterioration
Madhu M. Karthik, John B. Mander, Stefan Hurlebaus

Performance Assessment of Pile-Supported Bridges in Extreme Flood Conditions
J. V. Klinga, A. Alipour

BRIDGE ANALYSIS

Multi-Scale Analysis of the Steel Cable Anchorage System of Self-Anchored Suspension Bridges
Meng Zhou, Jian-Guo Nie, Jian-Sheng Fan

Thermal Effects on Load Rating of Reinforced Concrete Arch Bridges
Lung-Yang Lai

Cross-Frame Forces in Skewed Steel I-Girder Bridges: Field Testing and Analytical Results
Jennifer McConnell, Kelly Ambrose, Matija Radovic

Non-Linear Time History Analysis of A Highly Horizontally Curved Bridge on Yerba Buena Island (YBI) WB On-Ramps, Bay Bridge, San Francisco, CA
Yong Deng

BRIDGE SEISMIC AND DYNAMIC BEHAVIOR

Dynamic Response of a Floating Bridge to a Moving Light Rail Train
Hassan Sedarat, Iman Talebinejad, Alexander Kozak, Alex Krimoia, Tom Cooper, John A. Harrison, John Sleavin, Paul Cornish

Effects of Different Support Modeling Assumptions on the Seismic Response of Ordinary Bridges
A. Hajjashemi, S. Pezeshk, E. G. Burdette
STRUCTURAL BEHAVIOR

Experimental Characterization of Aging Effects on Steel Bridge Bearings under Cyclic Loads ........................................... 541
Xiaohu Fan, Jason McCormick

Structural Behavior of HFRP-UHPFRC Composite Girders .................................................................................................. 553
H. Nguyen, H. Mutsuyoshi, W. Zatar

Behavior of FRP Composite Wrapped Concrete Cylinders with Embedded Debonds .......................................................... 566
Udaya B. Halabe, Shasanka S. Dutta, Hota V. S. Gangarao

BRIDGE RESEARCH AND IMPLEMENTATION

AESTHETICS OF AMERICAN SIGNATURE BRIDGES

The Golden Gate Bridge Art Deco Suspension Bridge Masterpiece .................................................................................................................. 576
Reinhard Ludke

The New San Francisco-Oakland Bay Bridge .............................................................................................................................................. 588
Marwan Nader, Brian Maroney

BRIDGE PRACTICE AND CASE STUDIES

Main Street Bridge Project, Danville, VA—Open Spandrel Concrete Arch Bridges: New and Old ....................................................... 599
W. M. Davidge, James M. Fariss Jr.

Rehabilitation of TDOT’S SR56 Deck Truss Bridge Crossing Center Hill Lake ................................................................................................. 611
Todd J. Stephens, Michael C. Irwin, Edward P. Wasserman, John M. Kulicki, Adnan Kurtovic, Wayne J. Seger

Assessment of Extent of Capacity Loss in Deteriorated Highway Bridges ............................................................................................................... 622
B. Shafei, A. Alipour

THE BRIDGES OF PITTSBURGH

Rankin Bridge Rehabilitation .............................................................................................................................................................................. 632
Glenn D. Stickel

BRIDGING THE PITTSBURGH AREA WITH STEEL

Homestead Grays Bridge Rehabilitation and Widening ............................................................................................................................... 644
Daniel W. Wills

UNIQUE BRIDGE ENGINEERING

A Rapidly Deployable Bridge System ............................................................................................................................................................... 656
Gareth R. Thomas, Bernard J. Sia

Bridge Load Rating of a Super Load using AASHTO LRFR ................................................................................................................................. 668
David J. Lawson, Cheng Lok Hing, Jason A. Carota

Fundamentals of Highway Bridge Demolition .................................................................................................................................................. 680
Matthew Barsottelli, Onur Avci

BRIDGE SIMULATIONS AND FATIGUE STUDY

Impact Behavior of Concrete Bridge Deck on Girders Due to Moving Vehicles ................................................................................................. 689
Dongzhou Huang

Fatigue Reliability of Stiffened Panels using Finite Element Monte Carlo Simulations ......................................................................................... 699
H. N. Mahmoud, G. A. Riveros

Reliability and Remaining Life Assessment of Fatigue Critical Steel Structures: Integration of Inspection and Monitoring Information ............................................................................................................. 709
Mohamed Soliman, Dan M. Frangopol
BRIDGE DESIGN

Hybrid Simulation of Curved Four-Span Bridge: Comparison of Numerical and Hybrid Experimental/Analytical Results and Methods of Numerical Model Calibration ........................................................ 721
Thomas Frankie, Adel Abdelnaby, Pedro Silva, David Sanders, Amr Elnashai, Billie Spencer, Daniel Kuchma, Chai-Ming Chang

Use of Aggressivity Functions in the Dimensioning of Simple-Span HSR Bridges ........................................................... 733
Chiara Rosignoli, Raja Tenneti, Marco Rosignoli

FIRE RISKS AND IMPACTS TO BRIDGES

Fire Risks for Highway Bridges: A Statistical Investigation ........................................................................................................... 744
Michael Woodworth, William Wright, Brian Lattimer, Elisa Sotelino

Volume 2

Evaluating Fire-Damaged Components of Timber Bridges and Structures ............................................................................ 758
Brian Kukay, Robert H. White, Charles S. Todd, Tyler Jahn

Parameter Study of Highway Bridge Fires via Combined Fire Dynamics and Finite Element Modeling ...................... 768
Michael Woodworth, Mohamed Nahid, William Wright, Brian Lattimer, Elisa Sotelino

PERFORMANCE BASED DESIGN OF BRIDGES: PRACTICAL APPLICATIONS

The Gerald Desmond Cable-Stayed Bridge—A Case Study in Performance-Based Seismic Design ........................................ 781
Michael H. Jones, Semyon Treyger, Patrick W. Pence, Ayman Shama

Performance-Based Seismic Evaluation and Retrofit of Suspension Bridges ........................................................................... 793
Qi Ye, Quan Nguyen, Guang-Nan Fanjiang

The New Performance Based Seismic Design Criteria for New York City .............................................................................. 807
Jagtar S. Khinda

ASSESSMENT OF THE SEISMIC RESPONSE OF STRUCTURES CROSSING FAULT-RUPTURE ZONES

The Response of the Seismically Isolated Bolu Viaduct Subjected to Fault Crossing .......................................................... 817
Alper Ucak, George P. Mavroeidis, Panos Tsopelas

Seismic Performance of Highway Bridges with Seat-Type Abutments Subjected to Near-Fault Ground Motions .............. 827
J. Wieser, M. Maragakis

Validation and Implementation of a Simplified Analysis Procedure for Bridges Crossing Earthquake Fault Ruptures .................. 839
Jennifer Tures, Rakesh K. Goel, Bing Qu

BUSINESS

CHALLENGES FOR THE PRACTICE OF STRUCTURAL ENGINEERING

Current Status of BIM Benefits, Challenges, and the Future Potential for the Structural Discipline .............................. 849
Ryan Solnosky

Vegas High Roller 3D Modeling and Integration ..................................................................................................................... 860
Matthew Reid, Stephen Corney, Jason Krolicki

Monitoring Procedures for the Application of the Concept of Pre-Allocation of Total Float ..................................... 873
Aslam Amirahmad, A. Rahman Al-Sinaidi
BUSINESS AND PROFESSIONAL PRACTICE

THE STRUCTURAL ENGINEERING PROFESSION FROM A YOUNG PROFESSIONAL’S PERSPECTIVE: DIVERSITY, CHALLENGES AND RETENTION

Gender and Racial Diversity in the Structural Engineering Profession ................................................................. 885

WHAT'S THE MATTER WITH ENGINEERING

Engineers Don't Think Enough About Engineering .................................................................................. 897
  Jon A. Schmidt

Engineers Shouldn't Think Too Fast ............................................................................................................. 908
  William M. Bulleit

Engineers Need to Get Real, But Can't: The Role of Models ....................................................................... 916
  Irfan A. Alvi

BIM BEYOND DESIGN

SmartCodes and BIM ............................................................................................................................... 928
  Nawari O. Nawari

Defragmenting the AEC Industry through a Single, Component-Based Building Information Model .......... 938
  Anton C. Hartmann, Jennifer Bray, Christine Carlo, Samuel Carl, Tyler Gentry, Joseph Russell

EXTREME LOADING

EXTREME LOADS ON COLD-FORMED STEEL FRAMING—ANALYSIS AND DESIGN FOR EARTHQUAKE, BLAST AND FIRE

Axial Hysteretic Modeling of Cold-Formed Steel Members for Computationally Efficient Seismic Simulation ............................................................................................................................... 948
  D. A. Padilla-Llano, M. R. Eatherton, C. D. Moen

Investigation of Cold-Formed Steel Wall Reinforcement Systems to Resist Progressive Collapse .......... 960
  Ismail Mohamed, Nabil A. Rahman, R. Seracino

NATURAL DISASTERS AND EXTREME LOADING

Structural Hardening of Critical Facilities for FEMA and ICC Compliance .................................................. 970
  Joel Figueroa-Vallines

Accuracy of EF Ratings Following a Tornado Event: An Engineer's Perspective ............................................. 980
  Vincent F. Fratinardo, Scott A. Schroeder

INNOVATIVE ENGINEERING

INNOVATIVE ENGINEERING 1: CASE STUDIES OF SUCCESSFUL PROJECTS

Design and Fabrication of Precast Segmental Concrete Foundations in the U.S. and Erection in the Remote Arctic ....................................................................................................................................... 991
  Cory R. Brett, Scott J. Difiore, Dominic J. Kelly, Paul J. Cheever

Waste Not Thy Hour: The Innovative, Fast-Tracked Reconstruction and Seismic Rehabilitation of Whatcom Middle School .................................................................................................................. 1002
  Erik S. Bishop, David B. Swanson, Paul N. Crocker, Suzie R. Brendle

Removal of Steel Tie Rods in a Segmental Tied Arch Floor System .................................................................. 1014
  J. Lan, R. Gilsanz, M. Lo

King Abdullah Financial District Conference Center ..................................................................................... 1025
  Charles Besjak, Preetam Biswas, Georgi I. Petrov, Blake Altshuler
INNOVATIVE ENGINEERING II: CASE STUDIES OF SUCCESSFUL PROJECTS

Center for Character and Leadership Development at the United States Air Force Academy ........................................ 1036
Charles Besjak, Preetam Biswas, Raymond Sweeney

Seismic Retrofit of a 1960's Steel-Frame Industrial Building in Washington State Using Viscous Dampers ............................................................... 1046
D. Gonzalez, C. Ash, W. Brown, J. Ahlport, M. Abdi

Dr. Phillips Center for the Performing Arts, Orlando, Florida .......................................................... 1058
Michael C. Head, Laura A. Lewis

HIGH-RISE/TALL BUILDINGS TOPICS

Design of Diagrid Structural System for High Rise Steel Buildings as per Indian Standards .................. 1070
Khushbu D. Jani, Paresh V. Patel

Tuning Structural Properties of High-Rise Buildings to Control Wind Response ........................................ 1082
Rafik Gerges, Kal Benuska

Performance-Based Engineering of Core Wall Tall Buildings .............................................................................. 1094
M. Sarkisian, E. Long, W. Hassan

RESPONSE OF TALL BUILDINGS TO FIRE

Out-of-Plane Full-Field Strain and Curvature Behavior of Two RC Bearing Walls under Fire ....................... 1109

Guidelines for Achieving Optimum Fire Resistance in FRP-Strengthened Reinforced Concrete Beams ........ 1120
V. K. R. Kodur, A. Ahmed

Structural Design for Fire Conditions: Reliability-Based Resistance Criteria .............................................. 1131
Therese P. McAllister, Bruce R. Ellingwood

Observations from the Fire and Collapse of the Faculty of Architecture Building, Delft University of Technology .................................................................................................................. 1138
Michael D. Engelhardt, Brian Meachum, Venkatesh Kodur, Adam Kirk, Haejun Park, Ijsbrand Van Straalen, Johan Maljaars, Kees Van Weeren, Rene De Feijter, Kees Both

MASONRY AND WOOD

USING HYBRID MASONRY TO BRACE STEEL-FRAMED BUILDINGS

Design of Hybrid Masonry Systems ........................................................................................................... 1150
Robert Asselin, Larry Fahnestock, David Biggs

Ductile Fuse Connectors for Hybrid Masonry Systems .............................................................................. 1159
Ian Robertson, Gaur Johnson, Steven Mitsuyuki, James Aoki

ADVANCES IN MASONRY TESTING AND DESIGN

A Combined Experimental and Numerical Study: Linking Vibration Response to Load Carrying Capacity of a Masonry Dome ................................................................. 1169
Sez Atamturkturk, Ismail Farajpour

Investigation of the Post-Cracking Dynamic Behavior of Masonry Structures Retrofitted with CFRP ........ 1181
N. Goudarzi, H. Vajakhat, Y. Korany

Rapid and Affordable Seismic Retrofit of Substandard Confined Masonry .............................................. 1193
R. Ghorbani, F. Matta, E. Garbin

ADVANCES IN THE DESIGN AND ANALYSIS OF WOOD BUILDING SYSTEMS

Low-Cost Shape Memory Alloy Devices for Seismic Response Modification of Light-Frame Wood Buildings ............................................................................................................... 1205
Elaina N. Jennings, John W. Van De Lindt
Direct Displacement Design of Vertically and Horizontally Irregular Woodframe Buildings
Pouria Bahmani, John W. Van De Lindt

ADVANCES IN WOOD TESTING AND DESIGN

Seismic Performance of Mid-Rise Hybrid Light Wood Frame Buildings and Influence of Diaphragm Flexibility
Zhiyong Chen, Ying H. Chui, Chun Ni

Modelling the Roof-to-Wall Connections and Roof Failures in Residential, Wood-Frame Buildings under Realistic Wind Loads
T. K. Guha, G. A. Kopp

Wood Truss Installation Loads Due to OSHA Fall Protection
D. P. Hindman, L. M. Koch, J. Morris, T. Smith-Jackson

Raising the Height Limit of Wood-Framed Apartment Buildings
Rahim Abbasi

NON BUILDING STRUCTURES

DESIGN AND ANALYSIS OF POWER PLANTS

Revisiting the Design, Construction and Damage Assessment of Large Hyperbolic Cooling Towers
Phillip L. Gould

Checking the Flexural-Torsional Stresses in Power Plants Pipe Supports Steel Frames
Hazim Sharhan

A Discussion of Power Plant Loads and Load Combinations
David F. Six

ART AND CREATIVITY OF STRUCTURAL ENGINEERING

Wind Comfort Studies for the Vegas High Roller Observation Wheel
Ibrahim Almufti, Michael Willford, Mary Ferguson, Andrew Allsop, Jason Krolicki

The Structure of Art
S. A. Jorgensen

Vegas High Roller: Giant Observation Wheel Design
Jason Krolicki, Brandon Sullivan, Michael Willford

ANALYSIS AND MODELING OF NONBUILDING STRUCTURES

Wind Effects on Four Steel Stacks in Square Arrangement
T. G. Mara, B. J. Vickery

Calculation of Response Modification Factor for an Existing All-Concrete Elevated Tank Pedestal
C. T. Kevit, A. A. Liepins

Limitations of Equivalent Lateral Force Procedure for Nonbuilding Petrochemical Structure Configurations
Eric Wey, Dawar Naqvi, Ankur Sepaha

Shaking Response of Tall High-Voltage Equipment Retrofitted with Friction Dampers
P. Dasicka, M. J. Riley, K. Kraxberger, S. Knowles

FOUNDATIONS AND OTHER DESIGN ISSUES FOR WIND AND SOLAR TOWERS

Response of Wind Turbine Towers to Seismic Loading at Different Damping Ratios
S. Jerath, S. Austin

EQUIPMENT CONTAINMENT STRUCTURE AND FOUNDATION DESIGN

Design of Foundations for Large Dynamic Equipment in a High Seismic Region
Zhong Liu
Innovative Design of High Speed Balancing Bunkers ................................................................. 1415
Yousef Alostaz, Erlend Scott

Mass Concrete Foundation Design for Precision Manufacturing of Large-Scale Equipment .................. 1425
Marco T. Lo Ricco, Robert J. Schumacher

Vibratory Machine Foundation Design: When to Perform a Dynamic Analysis .................................. 1437
Eric Wey, Silky Wong, William Bounds

NON STRUCTURAL COMPONENTS

FULL-SCALE BUILDING-NCS EARTHQUAKE AND FIRE TEST PROGRAM: A NEES-LANDMARK PROJECT

Shake Table Testing of a Full-Scale Five-Story Building: Performance of the Major Nonstructural Components—Egress and Façades ........................................................................................................ 1447
E. Pantoli, X. Wang, M. Chen, T. Hutchinson, B. Meacham, H. J. Park

Shake Table Testing of a Full-Scale Five-Story Building: Pre-test Simulation of the Test Building and Development of an NCS Design Criteria ........................................................................................................ 1460
Xiang Wang, Hamid Ebrahimian, Rodrigo Astroza, Joel P. Conte, Jose I. Restrepo, Tara C. Hutchinson

Shake Table Testing of a Full-Scale Five-Story Building: System Identification of the Five-Story Test Structure .......................................................................................................................... 1472
R. Astroza, J. P. Conte, J. I. Restrepo, H. Ebrahimian, T. C. Hutchinson

Overview of the Building Nonstructural Components and Systems (BNCS) Project .......................... 1485
Tara Hutchinson, Jose I. Restrepo, Joel Conte, Brian Meacham

Shake Table Testing of a Full-Scale Five-Story Building: Post-Earthquake Fire Performance ............. 1499
B. J. Meacham, J. K. Kim, H. Park

Volume 3

ESTABLISHMENT OF SEISMIC DEMAND ON NONSTRUCTURAL COMPONENTS

Simulation and Control of Floor Motions in Structures ................................................................. 1511
K. P. Ryu, A. M. Reinhorn, G. Maddaloni

Seismic Evaluation of Suspended Ceiling Systems using Static and Dynamic Procedures .................. 1523
Amir S. J. Gilani, Shakhzod Takhirov, Lee Tedesco

RESPONSE OF CEILING SYSTEMS, SPRINKLER PIPING, AND NONSTRUCTURAL PARTITIONS TO EARTHQUAKE LOADING

Seismic Fraility Study of Fire Sprinkler Piping Systems ................................................................. 1533
Siavash Soroushian, Arash E. Zaghi, Manos Maragakis, Alicia Echevarria, Yuan Tian, Andre Filiatrault

WIND LOADING ON ROOF MOUNTED SOLAR SYSTEMS

Wind Loads on Solar Collectors and PV Panels on Roofs ............................................................. 1545
Ted Stathopoulos, Eleni Xypoutou, Ioannis Zisis

Aerodynamic Loads on Solar Panels ............................................................................................... 1555
Aly Mousaaid Aly, Girma Bitsuamlak

PITTSBURGH UNIQUE STRUCTURES

PITTSBURGH'S PROFESSIONAL SPORTS FACILITIES

Heinz Field: A Showcase in Steel ..................................................................................................... 1565
William B. Wallis

Consol Energy Center Design and Construction ................................................................................ 1599
W. Steven Hofmeister
REINFORCED CONCRETE

NEW DEVELOPMENTS FOR ANALYSIS AND DESIGN OF STRUCTURAL CONCRETE BEAM-COLUMN CONNECTIONS

High-Strength Concrete and Reinforcing Steel in Beam-Column Connections .................................................. 1606
H.-J. Lee, S.-J. Hwang

Development of a Parametric Equation to Predict the Joint Shear Strength .................................................... 1616
Burcu Burak

Seismic Vulnerability of Gravity-Load-Designed Beam-Column Connections .................................................. 1629
Bing Li

TWO-WAY SLABS—CURRENT DESIGN AND CONSTRUCTION ISSUES

Voided "Two-Way" Flat Slabs ............................................................................................................................... 1640
Mike Mota

Finite Element Modeling of Punching Shear in Two-Way Slabs Reinforced with High-Strength Steel ............... 1650
R. Hawileh, M. Naser, F. Malhas

Behavior of Concrete Columns Confined with Cross Spirals under Different Loads ....................................... 1662
Riyadh Hindi

Experimental Study on the Seismic Response of L-Shaped Reinforced Concrete Columns ............................... 1673
Bing Li, Thanh Phuong Pham

RESEARCH

EMERGING STEEL FRAMING SYSTEMS TOWARDS DAMAGE RESISTANT SEISMIC DESIGN
AND REHABILITATION

Research Needs for Seismic Rehabilitation of Sub-Standard Buildings using Stiff Rocking Cores ...................... 1683
M. Pollino, S. Sabzehei, B. Qi, G. Mosqueda

Full-Scale Testing of Self-Centering Steel Plate Shear Walls ......................................................................... 1694
Patricia M. Clayton, Daniel M. Dowden, Chao-Hsien Li, Jeffrey W. Berman, Michel Bruneau, Laura N. Lowes,
Keh-Chuan Tsai

Self-Centering Beams for Seismically Resilient Moment Frames ..................................................................... 1701
S. C. Darling, M. R. Eatherton, A. Maurya

Seismic Design Parameters for the Link Column Frame System ...................................................................... 1713
M. Malakoutian, J. W. Berman, P. Dusicka, A. Lopes

STRUCTURAL CONTROL AND VIBRATION MITIGATION

Modeling and Optimal Semi Active Control Strategies for Adaptive MR-TMD ............................................ 1722
Alessia Ussia, Alessio Bonelli, Oreste S. Bursi

Performance Assessment of a Highway Bridge Structure Employing Adaptive Negative Stiffness for
Seismic Protection .................................................................................................................................................. 1736

From Old to New: Vibration Issues with Old Buildings and Their New Office Spaces .................................. 1747
Richard E. Lindenberg, John Fraczek

Solving Floor Vibration Problems Using Dynamic Analysis and Testing ........................................................... 1759
Brad Davis, Di Liu, Thomas M. Murray

SEISMIC INPUT AND STRUCTURAL MODELING

Producing Broadband Synthetic Time Histories for Central and Eastern North America ............................... 1767
Alireza Shahjouei, Shahram Pezeshk

Life-Cycle Cost Based Optimal Retrofitting of Structures by Fluid Dampers ............................................... 1777
A. A. Taflanidis, I. Gidaris

SEISMIC

SEISMIC RETROFIT AND ENHANCEMENT 1

Structural Performance Assessment and Retrofit of Reinforced Concrete Buildings Under Seismic Loads ............................................................. 2044
J. P. Palacio, A. J. A. Pablo, E. A. J. Tingatinga, W. L. Mata

ASCE 31/41 Evaluation of Damaged Chilean Walled Buildings .............................................. 2056
Anna C. Birely, Laura N. Lowes, Dawn E. Lehman, Ady Aviram, Dominic J. Kelly

SEISMIC RETROFIT AND ENHANCEMENT 2

Seismic FRP Bond Strengthening of the Critical Splice Region in Wide Reinforced Concrete Columns .......... 2068
Elie G. Hantouche, Mohamed H. Harafli

Seismic Performance and Global Ductility of Reinforced Concrete Frames with CFRP Laminates
Retrofitted Joints .............................................................................................................. 2080
Mostafa Fakharifar, Mohammad Kazem Sharbatdar, Zhibin Lin

Comparison of Modeling Strategies to Capture Component Level Damage in Non-Ductile Reinforced
Concrete Buildings ...................................................................................................... 2094
Blaine Fuselier, Jamie E. Padgett

CASE STUDIES USING NONLINEAR DYNAMIC ANALYSIS

Evaluation of Computational Tools for Performing Nonlinear Seismic Analyses of Structural Collapse .......... 2106
K. K. F. Wong

Response of Structures with Viscous Dampers Subjected to Large Earthquakes ................................... 2118
H. Kit Miyamoto, Amir S. J. Gilani

Nonlinear Seismic Analysis of a Round Concrete Tower with a Post-Tensioned Self-Centering System .......... 2128
Susendar Muthukumar, Rafael Sabelli

COLLAPSE ASSESSMENT OF CONVENTIONAL AND HIGH-PERFORMANCE STRUCTURES
DESIGNED IN SEISMIC REGIONS

Dynamic Stability Testing of Isolation Systems Composed of Elastomeric Bearings and Implications
for Design ......................................................................................................................... 2140
Xing Han, Gordon P. Warn, Amarnath Kasalanati

Effect of Composite Action on the Dynamic Stability of Special Steel Moment Resisting Frames
Designed in Seismic Regions ............................................................................................ 2151
Ahmed Elkady, Dimitrios G. Lignos
SEISMIC ANALYSIS AND PERFORMANCE BASED DESIGN

Consideration of Mainshock-Aftershock Sequences into Performance-Based Seismic Engineering ................................................................. 2161
Ruiqiang Song, Yue Li, John W. Van De Lindt

Modal Displacement Based Seismic Design of Multi-Story One Way Asymmetric Plan Buildings ................................................................. 2168
P. Wilkinson, O. Lavan

Experimental Evaluation of Ground Motion Scaling Methods for Nonlinear Analysis of Structural Systems ................................................................. 2180
A. P. O'Donnell, Y. C. Kurama, E. Kalkan, A. A. Taflanidis

Two Stage Analysis: Implementation Challenges ................................................................................................................................. 2192
Michael Allen, Ngai-Chi Chang, Alfred Tran, Daniel Zepeda

Practical Application of Experimental Subassembly Data to Nonlinear Analysis ................................................................................................. 2203
A. M. Shuck, T. J. Graf, M. M. Hachem, G. G. Wray

PROPOSED SEISMIC PERFORMANCE FRAMEWORK FOR DESIGN OF NEW BUILDINGS

ATC-84 Project: Improved Seismic Performance Factors for Design of New Buildings ................................................................................................. 2215
Charles A. Kircher, John L. Harris, Jon A. Heintz, Ayse Hortacsu

SUPPLEMENTAL DAMPING SYSTEMS

Comparison of Dynamic Characteristics and Response Analysis of Building Structures Incorporating Viscous Fluid Dampers and Buckling Restrained Braces ................................................................................................................................. 2229
Bulent N. Alemdar, Yili Huo, Rakesh Pathak

Experimental Testing of a Large 9-Story Structure Equipped with Multiple Nonlinear Energy Sinks Subjected to an Impulsive Loading ................................................................................................................................. 2241

Volume 4

Linear or Nonlinear Fluid Viscous Dampers? A Seismic Point of View ................................................................................................................................. 2253
A. Bahnasy, O. Lavan

FLOOR DIAPHRAGMS: BEHAVIOR AND DESIGN

Inelastic Seismic Response of Hysteretic-Parametric In-Plane Analysis of Concrete Floor Diaphragms ................................................................................................................................. 2265
M. T. Al Harash, N. Panahshahi

Collective Chord Behavior in Large Flexible Diaphragms ................................................................................................................................. 2274
J. W. Lawson, C. N. Yarber

Effect of Diaphragm Flexibility on Tall Building Responses ................................................................................................................................. 2286
Mohammad T. Bhuiyan, Roberto T. Leon

SEISMIC INNOVATION

INNOVATIONS IN SEISMIC BRACED FRAMES

Incremental Dynamic Analysis of Existing Steel Braced Frame Buildings in Moderate Seismic Zones ................................................................................................................................. 2298
Lucia Tirca, Ovidiu Serban, Ming Zheng Wang, Domenic Di Modica

INNOVATIONS IN SEISMIC STEEL MOMENT FRAMES

Evaluation of the Response of Partially Restrained Bolted Beam-to-Column Connection Subjected to Cyclic Pseudo-Static Loads ................................................................................................................................. 2310
E. Brunesi, R. Nascimbene, G. A. Russati
Effect of Powder Actuated Fasteners on the Seismic Performance of Steel Moment Frame Connections ................................................................. 2322
C. E. Watkins, B. W. Toellner, K. Laknejadi, E. Abbas, M. R. Eatherton
Evaluation of HSS-to-HSS Moment Connections for Seismic Applications ................................................................. 2334
Matthew Fadden, Jason McCormick

SEISMIC TESTING AND EVALUATION

ADVANCED TESTING METHODS IN EARTHQUAKE ENGINEERING RESEARCH

Reliability Assessment of Real-Time Hybrid Simulation Results for Seismic Hazard Mitigation ........................................... 2346
Cheng Chen, Jose Valdovinos, Hector Santillano
Nonlinear Effective Force Testing Using Loop Shaping Controller ................................................................. 2358
Narutoshi Nakata, Erin Krog
A Benchmark Testing System for Real-Time Hybrid Simulation Development ................................................................. 2370
Adam Mueller, Chelsea Griffith, Xiaoyun Shao, Griffin Enyart
An Enhanced Hydraulic Actuator Control Method for Large-Scale Real-Time Hybrid Simulations .................................... 2382
Yunbyeong Chae, Brian Phillips, James M. Ricles, Billie F. Spencer Jr.

APPLICATION OF EXPERIMENTAL TECHNIQUES FOR SYSTEM-LEVEL SEISMIC EVALUATION OF STRUCTURES

1-g Scale Hydraulic Flume-Based Soil-Fluid-Structure Model Testing and Evaluation of Surging and Scouring Effects ................................................................. 2394
Ryan Homles, Zhiqiang Chen, Rahul Tripathi, Jianfei Chen
Hybrid Simulation of Semi-Rigid Partial-Strength Steel Frames ......................................................................................... 2410
Hussam Mahmoud, Amr Elnashai
Hybrid Simulation of a Wood Shear Wall Frame ......................................................................................................................... 2421
C. Griffith, X. Shao, J. Van De Lindt, P. Bahmani, W. Pang, E. Ziaei, T. Dao

SPECIAL BUILDING TOPICS

FLOOR VIBRATIONS SERVICEABILITY

Vibrations Assessment of a Hospital Floor for a Magnetic Resonance Imaging Unit (MRI) Replacement ................................................................. 2433
Ashish Bhargava, Jeremy Isenberg, Peter H. Feenstra, Yahia Al-Smadi, Onur Avci
A Review of Structural Health Monitoring of a Football Stadium for Human Comfort and Structural Performance ......................................................................................... 2445
M. Gul, F. N. Cattas
Surface Train and Subway-Induced Ground Vibration Characteristics for Full-Scale Buildings ................................................................. 2455
Pradeep Maurya, Masoud Sanayei, James A. Moore, Anish Kayiparambil P.
Factors to Consider in Design for Rhythmic Crowd Loading for Vibration Serviceability ................................................................. 2466
K. A. Salyards
Investigation of Floor Vibration Evaluation Criteria Using an Extensive Database of Floors ................................................................. 2478
Scott Pabian, Aaron Thomas, Brad Davis, Thomas M. Murray

STRUCTURAL OPTIMIZATION IN FRAMED BUILDINGS—SPANNING FROM THEORY TO PRACTICE

Shape Optimization of Energy Dissipation Devices for Passive Seismic Control of Building Frames ................................................................. 2487
Hidekazu Watanabe, Makoto Ohsaki, Junki Nozoe
Applications of Structural Optimization in Architectural Design ......................................................................................... 2499
Alessandro Beghini, Lauren L. Beghini, William F. Baker
Optimization of Large Steel Frames Using a Design-Driven Harmony Search ......................................................................................... 2508
Patrick Murren, Kapil Khandelwal
Mixed Variable Plate Girder Cost Optimization Using Mesh Adaptive Direct Search ......................................................................................... 2520
S. M. Wilkerson
FIRE LOADING: MODELING TECHNIQUES AND BUILDING RESPONSE

Bridging Disparities in Scale across the Fire and Structural Domains ................................................................. 2534
Xiaojun Yu, Ann E. Jeffers

Symmetric and Asymmetric Collapse Mechanisms of a Multi-Story Steel Structure Subjected toGravity and Fire ................................................................................................................................. 2545
Sami Kilic, Serdar Selamet

Effects of Fire Following Earthquakes on Steel Frames with Reduced Beam Sections ................................................. 2555
Mehrdad Memari, Collin Turbert, Hussam Mahmoud

Probability-Based Structural Fire Load .................................................................................................................. 2566
Leo Razdolsky

Parameters Influencing Collapse Resistance of Building Structures Subjected to Fire Loading ......................... 2578
Anil Agarwal, Amit H. Varma, Kristi L. Selden

ADVANCES IN REINFORCED CONCRETE TESTING AND DESIGN

Non-Linear Behavior of Multi-Story Walls Using Unbonded Post-Tensioned Concrete Coupling Beams................................................................. 2590
Theresa C. Aragon, Brad D. Weldon

Strengthening Square Reinforced Concrete Columns by Shape Modification and CFRP ............................................. 2602
Thong M. Pham, Le V. Doan, Muhammad N. S. Hadi

Seismic Testing of the Slotted Beam Detail for Reinforced Concrete Structures .......................................................... 2614
C. A. Muir, D. K. Bull, S. Pampanin

Seismic Displacement Demands for Hybrid Precast Concrete Shear Walls ................................................................ 2626
B. J. Smith, Y. C. Kurama

Aftershock Probabilistic Seismic Demand Model of Damaged Non-Ductile Reinforced Concrete Frames in California ......................................................................................... 2638
J. S. Jeon, R. Desroches, I. Brilakis, L. N. Lowes

STEEL TOPICS

STABILITY ANALYSIS AND DESIGN: THEORY IS PRACTICAL

Seismic Stability Response of Columns in Multi-Tiered Braced Steel Frames for Industrial Applications ................................................................................................................................. 2650
Ali Imanpour, Christopher Stoakes, Robert Tremblay, Larry Fahnestock, Ali Davaran

Stability of X-Bracing Systems with Traditional Bolted Connections ........................................................................ 2662
R. Tremblay, A. Davaran, A. Gélinas

DESIGN INNOVATIONS FOR STEEL BRACED FRAMES AND STEEL PLATE SHEAR WALLS

Evaluation of Collapse Potential and the Response Modification Coefficient of SCBFs ................................................. 2675
P. C. Hsiao, D. E. Lehman, C. W. Roeder

SUSTAINABILITY IN STRUCTURES

SUSTAINABLE SYSTEMS AND MATERIALS

Sustainable Concrete: The Role of Performance-Based Specifications ........................................................................ 2693
Lionel Lemay, Colin Lobo, Karthik Obha

Service-Load Deflection Behavior of Reinforced Concrete Beams with Recycled Concrete Aggregate ......................... 2705
Adam M. Knaack, Yahya C. Kurama

Disaster Resilience and Sustainable Design: Quantifying the Benefits of a Holistic Design Approach ................. 2717
Matthew V. Comber, Chris D. Poland
SUSTAINABLE BUILDING SYSTEMS

GREEN GIANTS: TALL AND SUSTAINABLE

Achieving Enhanced Seismic Design Using Viscous Damping Device Technologies ................................................. 2729
M. Sarkisian, P. Lee, L. Hu, R. Garai, A. Tsui, E. Reis

Innovation in Sustainable Engineering Design: Sustainable Form-Inclusion System (SFIS) ........................................ 2745
M. Sarkisian, E. Long, D. Shook, L. Hu

AESTHETICS OF SUSTAINABLE STRUCTURES

Sustainable Structures through Morphogenetic Design .................................................................................................. 2755
M. Sarkisian, D. Shook

Comparing Adaptability—A Case Study of Three Historic Buildings ................................................................. 2767
L. Maclise, T. Nelson, M. Kyler, G. Kang, S. Hohenes, P. Littler, A. Nudel

Structure as Aesthetic in Sustainable Design Case Study ......................................................................................... 2779
S. J. Means, D. W. Cocke

In the Looking Glass of Sustainable Architecture .................................................................................................. 2789
Russ Miller-Johnson

POSTER

POSTER SESSION 1

Test on Torsion Behavior of CFST Columns Subjected to Complex Load ................................................................. 2795
Yu-Hang Wang, Jian-Guo Nie, Jian-Sheng Fan

Experimental Research on Seismic Performance of K-Style Steel Outrigger Truss to Concrete Core Tube Wall Joints .......................................................................................................................... 2802
Jianguo Nie, Ran Ding

Vulnerability of Disproportionate Collapse in Older Flat Plate Buildings Subjected to Sudden Removal of a Bearing Column .......................................................................................................................... 2814
Jinrong Liu, Ying Tian, Sarah L. Orton

Disaster Resilience of Hospitals Considering Emergency Ambulance Services ..................................................... 2824
G. P. Cimellaro, V. Arcidiacono, A. M. Reinhorn, Michel Bruneau

Polyester Rope, an Alternative to Steel Cable for Pedestrian Suspended Bridges .................................................. 2837
E. M. Segal, S. Adriaenssens, T. P. Zoli, J. F. Florý

Collapse Behavior of Steel Columns under Lateral Loading ....................................................................................... 2848
J. Fogarty, S. El-Tawil

Response Analysis of a Long-Span Arch Bridge under the Seismic Traveling Excitation ........................................ 2860
Menglin Lou, Qiang Li, Shan Gao

Shear Buckling Behavior of Steel Plate Girders at Elevated Temperatures ........................................................... 2872
Jonathan D. Glassman, Maria E. Moreyra Garlock

Perforated Steel Plate Shear Walls for Tunable Seismic Resistance ........................................................................ 2884
M. Koppal, M. R. Eatherton

Seismic Analysis of Integral Abutment Bridges Considering Soil-Structure Interaction ......................................... 2895
Yasser Khodair, Ahmed Ibrahim

POSTER SESSION 2

Prediction of Bridge Behavior Through Failure: A Case Study of the Minnesota I-35W Bridge Collapse .......................................................... 2904
Hamed Salem, Huda Helmy, Ayman El Fouly

Constitutive Model for Compressive Strength and Elastic Modulus for Concrete under Elevated Temperature .......................................................................................................................... 2916
Samson Ezekiel, Robert. Y. Xiao, Chee Seong Chin

Investigation Correlations between Strong-Motion Duration and Structural Damage .......................................... 2926
M. Sarieddine, L. Lin

Predictive Seismic Load History Comparison of AEM Model Prediction vs. Empirical Results ............................ 2937
Ahmed Khalil, Hamed Salem, Huda Helmy, Michael Hahn
Failure of Unreinforced Masonry Under Compression ................................................................. 2949
  Kaspar William, Amir Mohammadi, Reza Mousavi, Ashraf S. Ayoub

Modeling of Nonlinear Soil-Foundation-Structure Interaction in Response History Analysis—An
Existing-Building Evaluation Case Study ................................................................................. 2962
  Silvia Mazzoni, Mark Sinclair

Development of Ring-Shaped Steel Plate Shear Walls ............................................................... 2971
  A. Maurya, N. Egorova, M. R. Eatherton

Evaluation of Liquefaction Screening Criterion Based on Standard Penetration Test Values ........ 2983
  Ravi Kant Mittal, N. Mahakalshimi, S. Singh

Geometric Optimization of Kuwait University Stadium and Tennis Centre .............................. 2989
  Charles Besjak, Preetam Biswas, Georgi I. Petrov

Real-Time TDR Field Bridge Scour Monitoring System ............................................................. 2996
  Junliang Tao, Xinbao Yu, Xiong Yu
