2013 IEEE-IAS/PCA Cement Industry Technical Conference

Orlando, Florida, USA
11 – 19 April 2013
# TABLE OF CONTENTS

Optimizing Cost And Quality Of Finished Cement Using Near Infra-Red Gypsum On Line Analysis And Model Predictive Control ....................................................... 1

L. Blahous, C. Potocan, F. Kolb, E. Gallestey, T. Marx

Condition Based Monitoring – Kiln And Ball Mill Girth Gear Audit ........................................... 8

T. Shumka

Electrical AC Drive Conversion Strategies For Optimizing Cement Production – A Case Study .................................................................................................. 22

A. Varava, J. Schaadt

Hydraulic Drive Systems For Clinker Coolers .................................................................................. 28

A. Amin, J. Kutz

The Selection And Application Of Lubricants For Rotary Kiln Girth Gears And Pinions ............... 53

R. Hankes

Advancements In Meeting New Regulations With Activated Carbon: Results From Full Scale Cement Plant Field Tests ........................................................................ 62

J. Satterfield

California's Climate Change Program & Implications For The Cement Industry ..... 72

J. Bloom Jr., M. Stevens

Catalytic Ceramic Filter Reduces Emission Of Organic Air Pollutants From A Cement Plant ............................................................. 86

K. Poulson, S. Miller

Filter Bag Seams As A Source Of Particulate Matter (PM) Emissions ...................................... 92

J. Tomanovich, J. Knotts

Mercury Balances In Modern Cement Plants ............................................................................... 113

J. Kline, R. Schreiber

Reduce Operating And Energy Costs And Simultaneously Assure EPA Regulatory Compliance With Integration Of Intelligent Baghouse Control And Sensing ..................................................................................... 129

G. Kaelin

The Changing U.S. Regulatory Landscape For Alternative Fuels ............................................ 139

C. Yonley, C. Kellett

Waste Heat Recovery Power Generation Systems For Cement Production Process .................. 149

A. Amiri, M. Vaseghi

Breakthrough In Clinker Grinding ........................................................................................................ 162

R. Bohan, J. Kline

Efficiency And Grinding Media Filling Level ..................................................................................... 172

D. Longhurst, M. Wilczek

Fly Ash Carbon Separation and Ammonia Removal in Florida .................................................... 187

S. Ziegler, J. Bittner

From Coal To Natural Gas: Its Impact On Kiln Production, Clinker Quality And Emissions ........ 194

S. Akhtar, E. Ervin, S. Raza, T. Abbas

Plug And Play - Modular Building Solutions To Reduce Lead Time, Cost And Increase Flexibility ................................................................. 218

F. Olivas, O. Aragonez

Pneumatic Conveying System Optimization ................................................................................... 232

C. Toomey

Recycling Kiln Bypass Dust Into Valuable Materials ...................................................................... 238

J. Forinton

Contractor Safety Management ....................................................................................................... 244

J. Jerrels, K. Walden

Maintenance Of Continuous Emissions Mercury Monitoring Systems (HgCEMS) Under The U.S. EPA Portland Cement (PC) MACT Rules ......................................................... 252

K. Wilber

Motor Vibration Problems – Understanding and Identifying ......................................................... 265

W. Finley, M. Louifi, R. Sauer

The Journey Of An Enterprise In A Process Industry Toward Improved Electrical Workplace Safety ............................................................................................................ 285

G. Kemper, W. Vilcheck, D. Durocher

Commissioning And Periodic Maintenance Of Microprocessor-Based Protection Relays At Industrial Facilities .................................................................................. 295

C. Wester, T. Smith, T. Fahey

NEMA and IEC Standards: A Practical Approach ........................................................................ 308

T. Dang, N. Sainato
