2011 3rd International Conference on Environmental Science and Information Application Technology

(ESIAT 2011)

Procedia Environmental Sciences Volume 10

Beijing, China
18-19 June 2011

Part A

ISSN: 1878-0296
Contents

Editorial
Y. Wu ................................................................. 1
A Probabilistic Computing Approach of Attack Graph-based Nodes in Large-scale Network
Y. Ye, X. Xu, Z. Qi ........................................... 3
The Study of Japan Earthquake Deformation based on GPS
Y. Wang, Y. Liu, Y. Su ........................................ 9
Spatial Distribution of Soil Nutrients and their Response to Land Use in Eroded Area of South China
Y.F. Li, Z.B. Chen, H.B. Chen, Z.Q. Chen ....................... 14
Optimization Control of SBR Wastewater Treatment Process based on Pattern Recognition
L. Fan, X. Ying .................................................. 20
The Enhancement of Naphthalene Degradation in Soil by Hydroxypropyl-β-Cyclodextrin
J. Dou, S. Li, L. Cheng, A. Ding, X. Liu, Y. Yun ................ 26
Research and Application on Energy Saving of Port Belt Conveyor
M. Dong, Q. Luo .................................................. 32
The Changes of Electrical Signals in Corn at Different Temperatures
L. Kai, G. Xi, L. Fan, X. Meng, X. Gao, Q. Liu ................ 39
Study on General Impact of Territorial Water Diversion on Improvement of Water Environment in Wuchengxiu Zone in Taihu Lake Basin
L. Jin, P. Yong .................................................... 45
Research on Evaluation of the MANET System Survivability
W. J. Lu, Y.Z. Wei ................................................ 51
Informatization Construction of Investigation and Assessment of Groundwater Contamination
Research on the Influence Factor and Innovation System of Environment Sound Technology Innovation
Y. Feng, L. Wang .................................................. 66
Heterotrophic Denitrification of Nitrate-Contaminated Water using Different Solid Carbon Sources
Y. Xu, T.-L. Qiu, M.-L. Han, J. Li, X.-M. Wang .................... 72
Analysis and Software Development of LiMin’s Production Decreasing Method
H.-R. Zhang ....................................................... 78
Study on Mechanism of Simultaneous Nitrification and Denitrification with Four Kinds of Fillers in Simulated Situ Bioremediation in Taihu Lake
Y. Xu, J. Liu, A. Wang, S. Yu ..................................... 84
Study on Biodegradation Characteristics of Simulated In-Situ Remediation in Taihu Lake by Four Fillers
H. Wang, J. Liu, S. Yu, J. Lin, L. Shi, Y. Chen ..................... 89
Study on Reference Datum of Global Crustal Vertical Motion
X. Zhu, F. Sun, R. Wang .......................................... 95
Y. Zhang ............................................................ 101
Application of Granular Sludge Membrane Bioreactor in the Treatment of Wastewater
Y. Wei, G. Li, B. Wang ............................................ 108
8mm Passive Focal Plane Image System
L. Fang, X. Wang, Y. Shi ....................................... 112
Heuristic Research on Mathematical Models of Air Refueling Support
Y. Qin, Y. Xu, A. Song ............................................. 117
Influence of 1,2-Dichlorobenzene on Microbial and Enzyme Activities in Wetland Soil
H. Liang, A. Chen, C. Ding, Z. Li ................................ 122
Chaos in a Hybrid Three-Species Food Chain with Beddington-DeAngelis Functional Response
X. Wang, Z. Min ................................................... 128
Complex Dynamics in a Ratio-dependent Food-chain Model with Beddington-DeAngelis Functional Response
X. Wang, M. Zhao ................................................ 135
Research on Collaborative Management in Supply Chain Crisis
Y. Liu, S. Wang .................................................... 141
The Research of Environmental Costs based on Activity Based Cost
H. Jing, S.Li ....................................................... 147
Multi-sensor Remote Sensing Technologies in Water System Management
S. Shu ............................................................... 152
Application of Fibrous Coalescer in the Treatment of Oily Wastewater
H. Zhao, G. Li ...................................................... 158
Joint MAC-PHY Layer Resource Allocation Algorithm Based on Triangle Module Operator for Multi-Service OFDM System
Y. Sun, Y. Li, J. Zhang, L. Tang ................................ 163

Propulsion Control of Fuel Cell Electric Vehicle
G. Zhang, H. Li, H. Fei .................................... 439
Strategy for Mobile Map Data Interactive Balance in 3G Network
Z. Chen, T. Yin ................................................ 444
A Method of Water Quality Assessment based on Biomonitoring and Multiclass Support Vector Machine
L. Yue, J. Xu, W. Wang ...................................... 451
Study on the Mechanism of the Position Adjustable Rotors for Sediment Deposition Reduction
J. Wang ..................................................... 458
Design and Commissioning of the Landfill Leachate Treatment Project in Ju-Rong City
J. Chen, Z. Ding, Y. Nie ...................................... 464
Acoustic Sustainability in Urban Residential Areas
C.-J. Yu, J. Kang ............................................. 471
The Expression of Discretization Line and Error Analysis in Discrete Global Grid System
M. Tao, Y. Wen, L. Su, G. Peng ................................. 478
Study of Underground Mine Locomotive Monitoring and Tracking Management System
J. Song, Y. Liu ................................................ 484
Relationship Between Land Use and Evapotranspiration — A Case Study of the Wadaogou Area in Huaihe River basin
J. Chen, Z. Yu, Y. Zhu, C. Yang ................................. 491
Investigation of the Impact of Surrounding Light on Monitor’ Color Showing
Y. Xu, Z. Wang, H. Min, H. Liu ............................... 499
Exact Characterization of Monitor’ Color Showing
Y. Xu, Y. Li, H. Liu, H. Min .................................. 505
A Technique of Filtering Dirty Data based on Temporal-Spatial Correlation in Wireless Sensor Network
Research on Shared Intelligent Test Paper Generating Algorithm based on Multi Branches Tree
Y. Zhang, M. Ye, H. Li, H. Fu .................................. 517
Quantitative Inversion Model of Water Chlorophyll-a based on Spectral Analysis
Gravity Anomaly from Satellite Gravity Gradiometry Data by GOCE in Japan Ms9.0 strong earthquake region
Y. Zhang, H. Xu, W. Wang, H. Duan, B. Zhang .......................... 529
Design and Implementation of Database for a webGIS-based Rice Diseases and Pests System
Y.-W. Bao, M.-X. Yu, W. Wu ................................ 535
Optimum Operating Conditions Confirmation and Effectiveness Analysis based on Research of the Coagulation and Precipitation Integrated Process
J. He, F. Liu, O. Li, K. Xu ...................................... 541
Research of the Key Technologies for Undercarriage Landing Buffer System
L. Fu, L. Lin, Y. Zhou ......................................... 549
Effect of Ozone Enhanced Flocculation on the Treatment of Secondary Effluent
L. H. Cheng, X. J. Bi, T. T. Jiang, C. Q. Liu ........................ 555
Research on Field Characteristics of Shared Earth System Science Data using Keyword Analysis and Visualization
R. Liu, H. Lin, H. Zhao ...................................... 561
A Novel Spatial Interpolation Method based on the Integrated RBF Neural Network
S. Liu, Y. Zhang, P. Ma, B. Lu, H. Su ............................ 568
Local Path Searching based Map Matching Algorithm for Floating Car Data
F. Chen, M. Shen, Y. Tang ................................... 576
Research on Land use Change in Beijing Hanshiqiao Wetland Nature Reserve using Remote Sensing and GIS
W. W. Zhang, L. Yao, H. Li, D. F. Sun, L. D. Zhou .......................... 583
The Improvement of DTC System Performance on Fuzzy Control
Y. Gao, J. Wang, X. Qiu ..................................... 589
Comparison Study to Hierarchical Routing Protocols in Wireless Sensor Networks
D. Xu, J. Gao ................................................ 595
The Fracture Characteristics Analysis of the Asphalt Mixtures by Virtual Loading Test
H. Wang, L. Yang ............................................. 601
Analysis on Dynamic Ecological Security and Development Capacity of 2005-2009 in Qinhuangdao, China
Y. Wang, H. Yu, D. Lv ....................................... 607
A Stable Viewing Strategy for Rotation Normalization Free 3D Model Retrieval
C. Chen, B. Leng, Z. Xiong .................................................. 613
Research on Energy-Saving Emission Reduction Control System based on Information Technology
B. Zhu, Y. Dong, D. Li, X. Ding ........................................... 622
A Real Time Evaluating Method of Aerosol Extinction Coefficients For Multi Laser Wavelengths
D. Hao, Z. Bi, Y. Sun ..................................................... 628
Secret Key-Awareness Secure in Certificateless Cryptography
G. Zhang ................................................................. 633
Study on Queuing System Optimization of Bank based on BPR
T. Hao, Y. Tong ............................................................ 640
Electrochemical Oxidation of Bisphenol A on TiSnOx, Sb2O5/PbO2 Anode for Waste Water Treatment
B. Xue, Y. Zhang, J.Y.Wang ........................................... 647
Study on Geological Structural Interpretation based on Worldview-2 Remote Sensing Image and Its Implementation
R. Zhang, Z. Min, J. Chen .............................................. 653
Biological Early Warning System for Prawn Aquaculture
H. Yang ................................................................. 660
Remote Sensing Technique for Predicting Harvest Time of Tomatoes
H. Yang ................................................................. 666
Spectroscopic Calibration for Soil N and C Measurement at a Farm Scale
H. Yang ................................................................. 672
The Analysis of Characteristic and Spatial Variability for Soil Organic Matter and Organic Carbon around Qinghai Lake
Evaluation of Pollution Source of the Bays in Fujian Province
W. Cui, S. Qi, J. Shang, J. Wang ........................................ 685
Building a Cloud Storage Service System
C. Peng, Z. Jiang .......................................................... 691
Hyperspectral Remote Sensing Estimation Models of Aboveground Biomass in Gannan Rangelands
X. Wang, G. Ni, K. Zhang, J. Wang ....................................... 697
The Quantum Chemical Investigation on the Important Middle Product Dimethyldiazene in the Degradation Process of UDMH and •OH
G. Zhang, W. Li, Y. Xu, C. Fan, R. Xue ................................ 703
Effect of Chlorophytum Comosum Growth on Soil Enzymatic Activities of Lead-contaminated Soil
Y. Wang, D. Wu, N. Wang, S. Hu ........................................ 709
Phytoremediation of Copper-contaminated Soil by Chlorophytum Comosum
N. Wang, Y. Wang, J. Dai, J. Tao ........................................ 715
Land Use Status Analysis in Chuanei Low Hills–a Case Study on Nanjiang Sichuan
Huanglei, Pengfeihao, Cuiongxiu ........................................ 721
Effect of Reactor Structures on the Liquid Phase Velocity Distributions of Bio-Fluidized Bed Reactor
M. Li, J. Zhang, G. Yu ..................................................... 726
Different Forms of Phosphorus in Sediments Collected from Zhuyuan Outfall in the Yangtze Estuary, China
M. Li, J. Zhang, H. Wei ................................................... 732
Video Segmentation Algorithm based on HSV Color Piece
W. Wang, W. Wang .......................................................... 739
Research on Dynamic-Average-Gray-Scale-Based Video Segmentation Algorithm
Z. Hu ................................................................. 743
Analysis of Image Fusion of TM and CBERS Based on Pixel Level
W. Cheng, J. Zhou, C. Yang, W. Zhou ................................ 748
Numerical Simulation of 3D Density Flow by an Improved EASM Model
L.H. Xing, G.B. Huang, Y. Min ........................................ 753
Cost-benefit Model for PHM
H. He, J. Zhao, C. Xu ..................................................... 759
Analysis of Software Process Effectiveness based on Orthogonal Defect Classification
Z. Li, X. Hou, L. Yu, Z. Du, B.Xu ........................................ 765
Industrial Sewage Evaluation based on Fuzzy Neural Network
H. Zeng, Z. Xu ........................................................... 771
A New Color Feature Extraction Method based on QuadHistogram
F. Alamdar, M.R. Keyvanpour ........................................... 777
A Functional Measure-based Framework for Evaluation of Multi-Dimensional Point Access Methods
M. Keyvanpour, N. Izadpanah ............................................. 784
Intra-Product Trade and Ordinary Trade on China’s Environmental Pollution
Y. Meng, X. Ni ........................................................... 790
Response of Water Status of Populus boleanea Lauche to the Amount of Irrigation Water in the Southern Edge of Taklimakan Desert, China
A. Fu, W. Li, J. Li, Y. Chen, X. Ma ....................................... 796
Research Progress of Coloring Aluminum Pigments by Corrosion Protection Method
B. Du, S.S. Zhou, N.L. Li .................................................. 807
Application of Interference Cancellor in Bioelectricity Signal Disposing
L. Gu, N. Zhou, H. Wu ..................................................... 814
Research of Frequency Divider based on Programmable Logic Device
L. Gu, N. Zhou, H. Li ..................................................... 820
Review of Statistical Induction Analysis Methods on Aircraft Vibration Test Data
C. Wang, J. Bai, F. Wan, G. Yan ........................................ 825
Review of Aircraft Vibration Environment Prediction Methods  
J. Bai, C. Wang, F. Wan, G. Yan ................................................................. 831

Review of Vibration Signals Trend Forecasting Methods  
H. Li, C. Wang, C. Chen, G. Yan ................................................................. 837

Video Watermarking Scheme based on MPEG-2 for Copyright Protection  
M. Jiang, Z. Ma, X. Niu, Y. Yang ................................................................. 843

Sorption Capacity of New Type Oil Absorption Felt for Potential Application to Ocean Oil Spill  
X. Qi, Z. Jia, Y. Yang, H. Liu ................................................................. 849

A Robust Double Set Parameter Nonconforming Rectangular Element for Fourth Order Elliptic Singular Perturbation Problems  
D. Shi, P. Xie ................................................................. 854

Study on Method of Bus Service Frequency Optimal Model based on Genetic Algorithm  
Shen Luhua, H. Yin, Jiang Xinkai ................................................................. 869

The Research of Supply Chain Information Collaboration based on Cloud Computing  
C. Jun, M. Wei ................................................................. 875

Numerical Model for the Capacity Evaluation of Shallow Groundwater Heat Pumps in Beijing Plain, China  
Q. C. Yang, J. Liang, L. C. Liu ................................................................. 881

Accuracy Evaluation of Satellite Network Simulation  
L. Qi, L. Zhi ................................................................. 890

Using ALOS High Spatial Resolution Image to Detect Vegetation Patches  
Q. Liu, G. Liu, H. Chong, C. Xie, L. Shi ................................................................. 896

Evaluation on Development Capability of Low-carbon Economy and Countermeasures in China  
Z. Luo, X. Tong ................................................................. 902

Study on the Purification Efficiency of Micro-polluted River Treated by Subsurface Horizontal Flow Constructed Wetlands  
H. Lie, G. Xu, J. Guo, X. Ma, M. Lie ................................................................. 908

Heavy Metal Pollution in Surface Water of Linglong Gold Mining Area, China  
L. Ning, L. Wang, J. Dai, X. Pang ................................................................. 914

The Human Pollution Evaluation of Phosphorus in Surface Sediments of Nanshu Lake  
L. Yang, E. Liu ................................................................. 918

The Study of Labor Mobility and its Impact on Regional Economic Growth  
B. Liu ................................................................. 922
Contents

Preparation and Mechanical Properties of PTFE/nano-EG Composites Reinforced with Nanoparticles
Y. Yan, Z. Jia, Y. Yang ............................................................... 929

An “Elder Mode” of New Generation Phone Using Augment Reality
S. Zhou, Z. Chen, X. Liu, H. Tang ........................................... 936

Analysis of Interferogram based on DEM of Dilijan in Caucasus Region, Armenia
S. Zhou, Z. Chen, F. Meng ..................................................... 943

An Overview of the Reducing Principle of Design of Corrugated Box used in Goods Packaging

Research on GIS Application System of Environmental Risk for Hazardous Chemicals Enterprises
Y. Liu, Z.-m. Deng ................................................................. 956

Study on Criteria for Chinese Researchers of Environmental Area Based On GIS Oil and Gas Field Company Seismic Data Loading Quality Control System Architecture Design
J. Chen, Y.-l. Zhang, J. Sun ..................................................... 962

Analysis on Hazard Factors of the Use of Corrugated Carton in Packaging Low-Temperature Yogurt during Logistics
Y.-l. Zhang, J. Chen, Y. Wu, J. Sun ........................................ 968

Removing Noise from Digital Images Using of Mean Square Approximation
J. Pesink, G. Mikołajczak ....................................................... 974

Research on GIS Application of Environmental Risk for Hazardous Chemicals Enterprises
R. Tang, Y. Bai, T. Wang .......................................................... 1006

Study on Corrugated Box in Packaging Low-Temperature Yogurt during Logistics
Y. Liu, Z.-m. Deng ................................................................. 956

An Overview of the Reducing Principle of Design of Corrugated Box used in Goods Packaging
J. Chen, Y.-l. Zhang, J. Sun ..................................................... 992

The Research on Structuring Water-Saving Standards System Framework in Beijing
Y. Zhang, J. Wang, P. Xu, J. Wang ........................................... 1006

Research on GIS Application System of Environmental Risk for Hazardous Chemicals Enterprises
R. Tang, Y. Bai, T. Wang .......................................................... 1011

Performance of Graphite Oxide load FeO/Sm system for Acid Orange II degradation
J. Ye, J.-Xiong Chen, X.-Qing Chen, H.-Ping Tao ....................... 1035

Modeling and Rendering of Real-time Large-scale Granular Flow Scene on GPU
J. Ye, J.-Xiong Chen, X.-Qing Chen, H.-Ping Tao ....................... 1035

Design of Wetland Monitoring System based on the Internet of Things
S. Xiao-yong, Q. Huanyan ....................................................... 1046

Hydraulic System Optimization and Dynamic Characteristic Simulation of Double Clutch Transmission
L. Yulong, L. Xianghuo, L. Weiping, A. Hanyong ....................... 1065

The Effect of Cow Dung and Red Bean Straw Dosage on Soil Nutrients and Microbial Biomass in Chestnut Orchards
Y. Zhichen, Z. Liandi, S. Danfeng, L. dong, C. jun, L. qimei ........... 1071

Decolorization of Acid Chrome Blue K by Persulfate
S.-Xin Li, W. Hu ................................................................. 1078

The Use of Spatial Analysis Techniques in Mapping Potential Natural Hazard Areas: A Case Study of Taiwan
L. Chin Hsien, C. Haush Sheng ............................................... 1085

Using the Internet of Things Technology Constructing Digital Mine
L. Yu-fang, S. Jin-xing ........................................................... 1109

Asynchronous Multisensor Track Association Algorithm and Simulation
C. Cheng ................................................................. 1092

Monitoring and Experiment on the Effect of Freeze-Thaw on Soil Cutting Slope Stability
Y. GUO, W. SHAN ............................................................... 1115
The Study on Error Analysis of Discretization Area in Discrete Global Grid System
M. Tao, Y. Wen, P. GuangXiong, L. Su, W. Zhanggang .................................................. 1122
Research on Image Watermarking Algorithm based on DCT
B. Wu, Z. Zhang, Q. Li ................................................................. 1129
Treatment of Methyl Orange by Photocatalysis Floating Bed
E. Wang, Q. Zheng, S. Xu, D. Li ......................................................... 1136
Potential of Perennial Crop on Environmental Sustainability of Agriculture
Y. Zhang, Y. Li, L. Jiang, C. Tian, J. Li, Z. Xiao ..................................................... 1141
Field Test and Research on Heat-transfer Performance of Plate Air-cooled Condensers in Traditional Chinese Medicinal Herbs
X. Huang X. Zhang ................................................................. 1148
Pretreatment of Chemical Cleaning Wastewater by Microelectrolysis Process
S. Qin, X. Li, T. Zhang, W. Rong ............................................................. 1154
Landfill leachate Treatment using Electrocoagulation
X. Li, J. Song, J. Guo, Z. Wang, Q. Feng .................................................. 1159
The Modified Algorithm in the Median Calculation for the Filtering of 2D Signals
E. Kornatowski ................................................................. 1165
Discussion on the Demand Management of Water Resources
J. Da-ping, G. Hong-yu, H. Dan ............................................................ 1173
Progress in Research of Corrosion and Protection by Sulfate-Reducing Bacteria
C. Zhang, F. Wen, Y. Cao ............................................................. 1177
Research on Information Resources Dynamic Allocation based on Carbon Management Certification
M. Hu, L. Shuangzhen, Q. Yue .......................................................... 1183
The Design of LDF Data Acquisition System based on LabVIEW
H. Q. Liao, Z. R. Qiu, G. H. Feng .......................................................... 1188
Environmental Risk and Assessment Management System of High-level Biosafety Laboratory
D. Peng, L. Peng, L. Shi-Bei, Z. Yang ..................................................... 1193
Applications of Optical Orthogonal Frequency Division Multiplexing in Optical Access Network
B. Wu, Z. Zhang ................................................................. 1199
Coalmine Green Mining with Gangue Backfilling Technique
Y. Guo-liang, Y. Ren-shu, T. Qiang, H. Chuan .................................................. 1205
The Application of Multidimensional Data Analysis in the EIA Database of Electric Industry
C. Lei, D. Feng, C. Wei, Z. Ai-xing, C. Zhen-hua .................................................. 1210
Cloud Current Coupling Effects on flow and Salinity Circulations and Stratification in Saline Basins
Z. Shi, J. Yan, Y. Ma, H. Zhang ............................................................ 1216
Coal Subsided Area Land Harmonious Governance and Suitability Evaluation Methods
Y. Ren-shu, Y. Guo-liang, C. Yu-long, T. Qiang .................................................. 1222
Dynamical Monitoring and Evaluation Methods to Urban Heat Island Effects based on RS&GIS
H. Xu, Y. Chen, S. Dan, W. Qiu .......................................................... 1228
Design and Key Technology of Urban Landscape 3D Visualization System
J. Tan, X. Fan, F. Deng ................................................................. 1238
Particle System Based Snow Simulating in Real Time
J. Tan, X. Fan ................................................................. 1244
Irrigation Demand Simulation and Crop Genotype Selection Over Large Geographies and Time Scales
F. Kang, P.-H. Cournède, J. Lecoeur ......................................................... 1250
Barrier Belt Division based on RS and GIS in the Three Gorges Reservoir Area — A Case of Wanzhou District
Q. Gang Zhou, Z. Qiang, L. Z. Ma, Y. Zhang, H. Wang .................................................. 1257
New Concurrent Modulus Algorithm and Soft Decision Directed Scheme for Blind Equalization
W. Rao ................................................................. 1264
Combination Blind Equalization Suitable for 4-PAM and 16-QAM Signals
W. Rao ................................................................. 1270
Amplitude Transformation-Based Blind Equalization Part I: Suitable for High-Order PAM Signals
W. Rao ................................................................. 1276
Amplitude Transformation-Based Blind Equalization Part II: Suitable for High-Order QAM Signals
W. Rao ................................................................. 1282
Utility of landSat Image in the Study of Land Cover and Land Surface Temperature Change
Z. qiang Lv, Q. gang Zhou .......................................................... 1287
Wave-current Coupling Effects on flow and Salinity Circulations and Stratification in Saline Basins
A. Bakhtiari, M. Zeinoddini .............................................................. 1293
The Analysis of Human Factors on Grassland Productivity in Western Songnen Plain
S. Zheng, Y. Sun ................................................................. 1302
New Prediction Method for Atmospheric Environmental Impact Based on AERSCREEN
B. Xin, F. YinYin, L. Meng, D. Feng .......................................................... 1308
Implementation and Simulation of Content Distribution Strategy in P2P VOD System
J. Zhang ................................................................. 1315
Community Structure of Zooplankton and Water Quality Assessment of Jialing River in Nan Chong
J. Tan, X. Fan ................................................................. 1321
Experiment and Numerical Simulation on Transportation of Ammonia Nitrogen in Saturated Soil Column with Steady Flow
S. Zhang, M. Jin, Q. Sun .......................................................... 1327
Research on EEG Features Extraction based on Clique
S. Huang, H. Xiao .......................................................... 1333
Assessment of Pollutant Reducing Effect by Poly-Culture and Bioremediation in Sediment of Marine Shrimp Ponds
Y. Su, S. Ma, J. Lei ........................................... 1559
The Study of Vegetation Carbon Storage in Qinghai Lake Valley based on Remote Sensing and CASA Model
C. Kelong, H. Yanli, C. Shengkai, M. Jiu, C. Guanghe, L. Hui ........................................... 1568
X. Li, Q. Zhang ........................................... 1575
The Application of Life Cycle Assessment in a Typical Litopenaeus Vannamei Comprehensive Utilization Process Model
X. Yi, H. Chen, J. Fan, H. Sun ........................................... 1583
The Application of Remote Sensing and Controlling Factors of Urban Land Use Changes for the Extension of Desert Grassland in Xinjiang,
Landscape and Water Quality Change Detection in Urban Wetland: A Post-classification Comparison Method with IKONOS Data
P. Shen, J. Zhang, Z. Su ........................................... 1589
Strengthen Water Conservancy Construction, Use Water Resources Scientifically, and Develop Modern Agriculture
C. Wang, G. Wang, Z. Feng, X. Ji, Q. Li, Z. Zhang, D. Song ........................................... 1595
Intercomparison of δ18O in precipitation simulated by Isotopic GCMs with GNIP Observation over the East Asia
Z. Xiping, S. Zhian, G. Huade, Z. Xinzhui W. huawu, H. Yunin ........................................... 1601
Prediction of Potential Habitat for South China Tiger (Panthera tigris) based on GIS and Web Datasets
M. Yang Li, Q. Zhou, W. Huang ........................................... 1613
Remote Sensing Analysis of Impact of Typhoon on Environment in the Sea Area South of Hainan Island
