Contents

Finite element analysis method for horizontal well hydraulic fracturing .......................................................... N/A
Zhang Guangming, Xiong Chunming, Liu Jiandong, Jin Juan, Shen Luhe

Analysis and Design of Attachment Module Based on Sine Vibrating Suction Method for Wall-climbing Robot ......................... 9
Kun Wang, Wei Wang, Houxiang Zhang

The Effect of Traversing System on Wind Tunnel Flow Field ............................................................................ 15
Zhigang Yang, Qiaoyun Liu, Qiliang Li

3-Bar Simulation-Transfer Matrix Method for Shear Lag Analysis ........................................................................ 21
Chuanxi Li, Bin Li, Chenglong Wei, Jian Zhang

The Effect of Temperature and Dissolved Oxygen Concentration on the Electrochemical Behaviour of Al-Zn-In-based Anodes .................................................................................. 27
Weili Li, Yonggui Yan, Guang Chen, Ma Li

3D FEM simulations for the homogeneity of plastic deformation in aluminum alloy HS6061-T6 during ECAP .................................................................................................................. 35

3D Geological Modeling and Its Application under Complex Geological Conditions ........................................ 41
Shao Yan-lin, Zheng Ai-ling, He You-bin, Xiao Ke-yun,

A General Multitask Simulation Package of Aircraft Engine .................................................................................. 47
Wang Lifeng

Study of Real Sense Terrain Generating Based on Fractal ...................................................................................... 54
Jun Chen, Xiong Shi

Dynamic analysis of a steel floating pipeline on sea .............................................................................................. 60
Shifu Zhang, Yunlong Wang, Lianghua Liu, Qixin Zhang

Simulation of water dynamics of farmland in the piedmont plain of the Taihang Mountains in the North China Plain .................. 66
He Jin, Wang Zhongfu, Guo Shengxiu

City air quality forecasting and impact factors analysis based on grey model .................................................. 74
Lin Pan, Baosheng Sun, Wei Wang

Study of Structural Damage Detection with Multi-objective Function Genetic Algorithms .............................. 80
Hui LIU, Kegui XIN, Quanquan QI
Utilization of Molecular Simulation Software Gaussian 03 to Design Absorbent for CO₂ Capture .......... 87
ZhiGang Tang, Xia Gui, WeiYang Fei

Simulation of Inner Ballistic of Underwater Weapon Based on Flow Field Numerical Calculation .......... 93
Xiong Shi, Jun Chen

Modeling the Impacts of Related Factors on Traffic Operation ................................................................. 99
Han Feng, Changcheng Li, Nale Zhao, Han Hu

Design and optimization of planar structure micro-hotplate ................................................................. 105
Zili Zhang, Chenbo Yin, Chunmin Tao, Bin Zhu, Ningning Dong

Study on Distributed Interactive Coal Mine Production Simulation System ........................................... 111
Zu-qiang Xiong, Jun He, Yan-hui Liu, Lei-lei Zhao, Sheng-juan Zhang

Finite element analysis of expansive behaviour due to reinforcement corrosion in RC structure .......... 117
Xiao Pengwei, Yi Ning, Su Linwang, Li Guobao, Wang Lebin

An Improved Simulation Model of Shear Wall Structures of Tall Building ............................................. 127
Bowang Chen, Jianguo Tan, Yang Oyang

The Application of EASY5 Software to Simulate the Operating Characteristics of Parallel-Flow Condensing Unit ........................................................................................................................................ 133
Yixiong Hu, Jing Su, Zicheng Yan

The Modeling and Simulation of Marine Air-condition ........................................................................... 141
Langtao Yan, Jingming Li, Derong Zhang, Chunjiang Liu

Seismic Response Analysis of Yachi River Super-large Bridge .............................................................. 149
Wen-xiu Liu, Bing Zhu, Zhang-liang Yu and Xing Han

On Moral Hazard of Construction Project Visual Organizational ............................................................ 156
Zeying Zhang

Simulation Analysis of Aircraft Taxiing Dynamic Load on Random Road Roughness ......................... 163
Liang Lei, Gu Qiang-kang, Liang Zheng, Liu Guo-dong, Wu Ai-hong

Numerical simulation of 3-D seepage field in tailing pond and its practical application ....................... 170
Li-ting Zhang, Qing-lan Qi, Bao-lin Xiong, Jun Zhang

A universal model of stress sensitive coefficient in low permeability reservoir ..................................... 177
Yang Junfeng, Liu Renjing, Liu Huiqing

Applied Research on Improved Fuzzy Chance-constrained Model in Engineering Project Comparison and Selection ................................................................................................................................................... 184
Peng Zuojun, Chen Yuhong, Shi Lei

Mathematical Simulation on Self-tuning Fuzzy Controller for Small Cylindrical Object Navigating Near Free-surface ........................................................................................................................................... 191
Shao Zhiyu, Fang Dongyang, Feng Shunshan

Numerical simulation study on hydraulic behavior at the confluence of Yangtze River and Jialing River ........................................................................................................................................... 197
Yang Zhong-chao, Yang Ze-ji
