TABLE OF CONTENTS

SPE 153984 Real-Time Downhole Monitoring of Electrical Submersible Pumps Rated to 250°C Using Fiber Optic Sensors: Case Study and Data Value in the Leismer SAGD Project ................................................................. 1
Max Medina, Carlos Torres, Julio Sanchez, Lindsey Boida, Alfredo Leon, Jason Jones, Carlos Yicon

SPE 165004 Tracking System, Failure Analysis and Reuse Program To Optimize Usage of Power Cable in Electrical Submersible Pumping Systems ......................................................................................................................... 12
E. Rubiano, H. Vargas, J. L. Martin

SPE 165005 Implementation of Bottom-Drive Progressive-Cavity Pumps Technology in La Cira-Infantas Oil Field as a Reliable Artificial Lift Method .................................................................................................................. 19
M. Bohorquez, E. Rubiano, L. Labrador, M. C. Suarez

T. Pestana, S. Bordalo, M. De Almeida Barreto Filho

SPE 165008 Selection Criteria And New Technologies On The Artificial Lift Systems For Heavy Oil and Extra Heavy Oil Wells in Colombia .................................................................................................................. 35
J. J. Cuesta, J. D. Ortega

SPE 165009 Automated Surface Gas Handling Through Expert Systems for Optimization of Artificial Lift Systems .................................................................................................................................................. 42
Miguel Ramirez, Carlos Bruenings

SPE 165010 Design of a Laboratory for Intermittent Gas-Lift and Study of the Dynamic Behavior of Its Components .................................................................................................................................................... 50
Ismael Orlando Ochoa Lara, Sergio N. Bordalo

SPE 165011 Progressing Cavity Pumps In Light Oil: Expanding the Application Envelope Through Best Practices and Lessons Learnt .................................................................................................................. 60
Sheldon Jahn, Brett Baldwin

SPE 165013 Buckling Prevention Using the Tensioning Device ............................................................................................................................ 70
Clemens Langbauer, Elena Chevelcha, Herbert Hofstätter

SPE 165014 Gas Lift Smart Flow Integrates Quality and Control Data for Diagnostic and Optimization in Real Time .................................................................................................................................................. 81

SPE 165015 Optimizing an Artificially Lifted Reservoir using ESPs and Real Time Information ................................................................................................................................. 91
Gerardo Paez

SPE 165022 Improving the Reliability and Maintenance Costs of Hydraulically Actuated Sucker Rod Pumping Systems ................................................................................................................................. 101
W. Phillips, L. Mehegan, J. Hernandez

SPE 165023 Wireless Simultaneous Acquisition and Analysis of Dynamometer and Fluid Level Data for Real Time Monitoring of Well Performance .................................................................................................. 113
J. N. McCoy, Dieter Becker, Gustavo Fernandez, A. L. Podio

SPE 165024 Implementation of New Seal Design to Improve ESP Performance in Corcel Field ................................................................................................................................. 126
N. Sarkis, W. Guerra, L. F. Moreno, I. Salazar, H. Cuellar, J. Pirela, B. Urdaneta

SPE 165025 Dynamic Evaluation Alternatives for Deep and Ultra-Deep-Water Environments for Heavy and Extra-Heavy Oil Exploration in Mexico .................................................................................. 137
Ricardo Aguilar, Jan Loaiza, Amit Nakhwa, Curtis Wendler, Pablo Ruiz

SPE 165026 Development of a PCP Dynamic Safe Drive With Viscosity Super Brake and Successful Deployment in an Argentine Field ........................................................................................................ 149
Esteban Young, Lucas Young, Sergio Sosino, Fernando Bertomeu, Daniel Villota, Alberto Modon, Juan Zahiri, Nicolas Pontelli, Carlos Caunedo

SPE 165027 Importance of Preventive and Predictive Maintenance Plan in Reducing Occurrences of Failures (MTBF-MTTR) - Rod Pumping Systems: Hydro-Pneumatic Surface Units, Experience in Mexico .................................................................................................................................................. 161
R. Galvan, J. J. Rucabado, C. A. Rubio Arvillia

SPE 165028 Experimental Study of Centrifugal Pump Handling Viscous Fluid and Two-Phase Flow .................................................................................................................................................... 169
G. M. Paternost, A. C. Bannwart, V. Estevam

SPE 165030 Field Experience with the Application and Operation of Permanent Magnet Motors in the ESP Industry: Success Stories and Lessons Learned ................................................................................................. 183
Luis Seczon, Andrey Sagalovskiy
| SPE 165031 | The Effect of Temperature on the Mechanical Pump Slippage in Heavy Oil Wells with Steam Injection | 189 |
| SPE 165032 | Spatial Well Surveillance: An Approach For Early Detection of Well Behavior in Highly Populated Fields | 197 |
| SPE 165033 | Experimental Study of a Poor Boy Downhole Gas Separator Under Continuous Gas-Liquid Flow | 206 |
| SPE 165034 | First Concentric Rod System for Dual ESP Completion in Ocelote Field | 217 |
| SPE 165035 | Listening Sucker Rod Pumps: Stroke’s Signature | 225 |
| SPE 165036 | Preventing Gas Locking In Sucker Rod Pumps Using an Actuated Traveling Solenoid Valve | 240 |
| SPE 165037 | Successful Installation of 7” Bypass System for PLT Test on Highly Deviated Wells in Colombia | 252 |
| SPE 165038 | PCP Production Optimization in Real Time with Surface Controller | 258 |
| SPE 165039 | Aggressive Applications: Successful Beam Pump Systems under Ultra High GOR and Deviated Conditions in Guaduas Field - Colombia | 265 |
| SPE 165040 | Insertion Problems in Tandem Progressing Cavity (PC) Pumps, Solving This on a Decision Tree | 272 |
| SPE 165041 | Mature Fields, Oil Well Optimization Using Plunger Lift Systems in Tibu Field | 278 |
| SPE 165042 | SPE 165043 | Improving Well Performance with Multiphase Helicoaxial Pump in Wells with High Gas to Liquid Ratio | 284 |
| SPE 165044 | Optimizing the Efficiency of Artificial Lifting Systems in the Production of Heavy Crude, by the Use of Electrical Heating in Surface Facilities | 290 |
| SPE 165045 | SPE 165046 | Downhole Fluid Conditioning System for Electric Submersible Pumps | 296 |
| SPE 165047 | Innovative Multidisciplinary Technique Used To Evaluate Production Profile in Wells With Artificial Lift Systems in Small Casing 5.5 in. | 298 |
| SPE 165048 | Successful Strategy through Artificial Lift Systems to Develop Coalbed Methane Production in Colombia | 314 |
| SPE 165049 | SPE 165050 | Operational Cost Saving through Artificial Lift Optimization with Long Stroke Pumping Units in Fields of Cravo Viejo Block | 323 |
| SPE 165051 | ALS Compact Completion Using Unitized Wellheads | 331 |
| SPE 165052 | Aggressive Applications: Changing the Failure Rate History in Casabe South Field - Colombia | 336 |
| SPE 165053 | Successful PCP Applications in High Deviated Wells: Breaking Away the Paradigm of PCP Only for Vertical or Low Deviated Wells in Colombia | 341 |
| SPE 165054 | Aggressive Applications: Successful Beam Pump Systems under Ultra High GOR and Deviated Conditions in Guaduas Field - Colombia | 348 |
| SPE 165055 | SPE 165056 | Insertion Problems in Tandem Progressing Cavity (PC) Pumps, Solving This on a Decision Tree | 354 |
| SPE 165057 | SPE 165058 | Mature Fields, Oil Well Optimization Using Plunger Lift Systems in Tibu Field | 362 |
| SPE 165059 | SPE 165060 | PCP Production Optimization in Real Time with Surface Controller | 372 |
| SPE 165061 | Successful Installation of 7” Bypass System for PLT Test on Highly Deviated Wells in Colombia | 381 |
SPE 165059 Successful Installation of a Dual Concentric Completion System on 9 5/8” Casing ESP-
ESP type in Colombia.................................................................392
SPE 165060 Geometric Analysis of Progressive Cavity Pump Single Lobe, for the Production of
Extra-Crude Heavy Oil at Huyapari Oil Field at Orinoco Oil Belt Venezuela .....................................410
Manuel Arredondo, Leonardo Cermeño, Efren Quijada
SPE 165061 Management and Best Practices of Progressive Cavity Pumps Failures Huyapari Field,
Orinoco Oil Belt ............................................................................423
Eglier Yánez, Hecsony Arredondo, Micksu Han
SPE 165062 Lower Tertiary - A Fully Comprehensive Well Completion Design Methodology to
Overcome Reservoir Challenges ..................................................433
Marco A Chavez, Gonzalo A. Garcia, Oje Pogoson, Yu Li, Andres H. Cardona, Roy N. Nelson
SPE 165063 Cost Reduction in High Production Wells With ESP in Tello Field ....................................452
Jesus Archila, Julio Mario Rueda, Carlos Garces, Oscar Carreño
SPE 165064 First Heater Cable Installed in Colombia .................................................................459
W. Acosta, C. A. Garcés
SPE 165065 Study of an Electrical Submersible Pump (ESP) as Flow Meter .........................................465
M. P. Varón, J. L. Biazussi, A. C. Bannwart, W. Monte Verde, N. Sassim
SPE 165068 Implementation of an Integrated Artificial Lift Solution To Test Wells in Colombia .............478
Diego Fernando Leon-Quintero, Roberto Robayo, Luis Edison Pachon
SPE 165069 Results From Annular Injection in Heavy and Extra Heavy Oil Wells Producing With Rod
Pumping in the Samaria Field: A Field Test .....................................482
H. M. Gutiérrez Jiménez, J. E. Carril Naranjo, R. Pérez Herrera
SPE 165070 Well Data Analysis and Integration System Practices ..................................................493
German Gornatti, Gabriela Albertini, Eugenio Ferrigno
SPE 165072 Gas and Viscous Effects on the ESPs Performance ..........................................................507
W. Monte Verde, J. Biazussi, A. Bannwart, N. Arrifano Sassim, V. Esteveam
SPE 165075 Backspin Analysis in Progressive Cavity Pumping Systems and its Impact on Safety .........515
P. J. Magnoni, P. J. Pich
SPE 165076 Alternative Deployment of an ESP System in South America .............................................524
Carlos Blum, Jackson Jimenez, Lenin Pozo, Nicolas Garibay, Neil Griffiths, Luis Constante, Edison Padilla
SPE 165077 Benefits Of PCP Charge Pumps Applied To Sand Producing Reservoirs .............................538
Mariano Montiveros, Lucas Echavarria, Maria Briozzo
