2012 IEEE National Aerospace and Electronics Conference

(NAECON 2012)

Dayton, Ohio, USA
25 – 27 July 2012
# Table of Contents

## Advanced Phase Array Systems, Antennas & Tomography

**Graphite-based Material Development for Reconfigurable Antennas** ........................................................... 1  
Christie L.H. Devlin, Adatom Scientific, L.L.C.  
F. Lincoln Vogel, GraphiTech, Inc.  
Robert H. Slater, Wright State University  
Elliott R. Brown, Wright State University  
Christopher E. Bunker, Air Force Research Laboratory  
K.A. Shiral Fernando, Air Force Research Laboratory  
Robert L. Ewing, Air Force Research Laboratory

**Microwave Characterization of Graphite and Intercalated Graphite as an Antenna Element** .......... 8  
Altan M. Ferendeci, ElectroMagneticSystems  
Christie L.H. Devlin, Adatom Scientific, L.L.C.

**Wideband Phased Array Calibration Method for Digital Beamforming** ..................................................... 11  
M. Longbrake, Air Force Research Laboratory  
L.L. Liou, Air Force Research Laboratory  
D.M. Lin, Air Force Research Laboratory  
P. Buxa, Air Force Research Laboratory  
J. McCann, Air Force Research Laboratory  
T. Pemberton, Air Force Research Laboratory  
T. Dalrymple, Air Force Research Laboratory  
S. Hary, Air Force Research Laboratory

## Advanced Terahertz and Millimeter Wave Devices

**Broadband THz Filters for THz Sensing Device** ................................................................................................. 18  
Varittha Sanphuang, Ohio State University  
Niru K. Nahar, Ohio State University  
John L Volakis, Ohio State University

**Finite-Element Simulation and Design of a High-Extinction-Ratio THz Wire-Grid Polarizer** ................. 20  
John S. Cetnar, Wright State University  
John R. Middendorf, Wright State University  
Elliott R. Brown, Wright State University

**Dual-Band, Wide-Incident-Angle Absorber for Far-IR and THz Frequencies** ............................................ 24  
Woon-Gi Yeo, Ohio State University  
Niru K. Nahar, Ohio State University  
Kubilay Sertel, Ohio State University

**Wideband Active Matching of Terahertz Envelope Detectors** ................................................................. 26  
Yasir Karisan, Ohio State University  
Kubilay Sertel, Ohio State University

**A New Approach to On-Chip Probing in the MM-Wave to THz Range** ...................................................... 28  
Mads J.H. Larsen, Wright State University  
E.R. Brown, Wright State University
Increased Output Power 300 GHz Oscillator Based on Linear Superposition .................................................. 31
Sai Tenneti, Ohio State University
Niru K. Nahar, Ohio State University
John L. Volakis, Ohio State University

Non-contact THz probes for On-chip Device and IC Characterization ......................................................... 34
Georgios C. Trichopoulos, Ohio State University
Kagan Topalli, Ohio State University
Kubilay Sertel, Ohio State University

THz Imaging Performance of a Broadband 80x64 Focal Plane Array ......................................................... 36
Georgios C. Trichopoulos, Ohio State University
Kubilay Sertel, Ohio State University

Broadband THz Filters for THz Sensing Device ....................................................................................... 38
Varittha Sanphuang, Ohio State University
Niru K. Nahar, Ohio State University
John L. Volakis, Ohio State University

Bio-Inspired Systems and Cyber-Physical Applications

Language Translation of Web-based Content ................................................................................................ 40
Bart Kahler, SAIC
Brian Bacher, SAIC
K.C. Jones, SAIC

Web-based Geospatial Information Extraction .......................................................................................... 46
Bart Kahler, SAIC
K.C. Jones, SAIC
Brian Bacher, SAIC

Collaborative and Distributive Processing

A Trustworthiness Evaluation Framework for Distributed Networks ......................................................... 51
Simin Hall, Virginia Polytechnic Institute and State University
William McQuay, The Design Knowledge Company
Kenneth Littlejohn, Air Force Research Laboratory

Abduction's Role in Reverse Engineering Software ................................................................................... 57
Kirk A. Weigand, Air Force Research Laboratory
Ronald Hartung, The Design Knowledge Company

Power Electronics and Control Technology

Octagon Architecture for Low Power and High Performance NoC Design ................................................. 63
Gursaran Reehal, Ohio State University
Mohamed A. Abd El Ghany, German University in Cairo
Mohammed Ismail, Ohio State University

A Programmable Charger for Monitoring and Control of Multi-Cell Lithium-Ion Batteries .................. 68
Abdullah Al-Refai, Oakland University
Rami AbouSleiman, Oakland University
Osamah A. Rawashdeh, Oakland University

Rectangular Cavity High Harmonic Maser Amplifier ............................................................................... 75
Altan M. Ferendeci, ElectroMagneticSystems
Robert L. Ewing, Air Force Research Laboratory
Grey-Model based Ice Prediction Sensor System on Wind Turbine System ........................................... 78
Chao Feng, Case Western Reserve University
Chris Papachristou, Case Western Reserve University

High-Performance Switching QFT Control for Large Radio Telescopes with Saturation Constraints .... 84
Mario Garcia-Sanz, Case Western Reserve University
Trupti Ranka, Case Western Reserve University
Bhal Chandra Joshi, Tata Institute of Fundamental Research

Modeling and Control Scheme Design of a Solenoid-Actuated Fuel Injection System ......................... 92
Nathaniel A. Posey, Columbia University
Thomas Wu, University of Central Florida
Mitch Wolff, Air Force Research Laboratory
Jon Zumberge, Air Force Research Laboratory

Remote Sensing Signal and Image Processing

Multiscale Analysis to Facilitate Joint Chaos and Fractal Analysis of Biosignals ................................. 96
Jianbo Gao, Wright State University
Erik Blasch, Air Force Research Laboratory
Qian Chen, Dolby Laboratory

Image Denoising in the Presence of Non-Gaussian, Power-Law Noise .................................................. 103
Jianbo Gao, Wright State University
Qian Chen, Dolby Laboratory
Erik Blasch, Air Force Research Laboratory

A Passive Wireless Sensor Platform for Chemical and Biological Agents ............................................ 109
Mark Patterson, University of Dayton
Maher Qumsiyeh, University of Dayton
Guru Subramanyam, University of Dayton

Range Focusing for Large Scene Circular SAR ..................................................................................... 113
Kerry E. Dungan, Dynamics Research Corporation
John W. Nehrbass, Dynamics Research Corporation

Automatic Object Recognition Applied to Where’s Waldo ................................................................. 117
Tony Buchenroth, Wright State University
Fred Garber, Wright State University
Benita Gowker, Wright State University
Stephen Hartzell, Wright State University

Phased Array Receiver Filtering and Demonstration of Digital Beamforming on Measured Wideband Data ............................................................................................................. 121
Danielle Scarpone, Air Force Institute of Technology
Jeremy Stringer, Air Force Institute of Technology
Geoffrey Akers, Air Force Institute of Technology

Diffusion Maps for Exploring Electro-Optical Synthetic Vehicle Image Data ..................................... 126
Juan Ramirez Jr., University of Colorado Boulder
Olga Mendoza-Schrock, Air Force Research Laboratory

The Effects of Clothing on Gender Classification using LIDAR data ............................................... 134
Ryan McCoppin, Wright State University
Mateen Rizki, Wright State University
Louis Tamburino, Wright State University
Andrew Freeman, Air Force Research Laboratory
Olga Mendoza-Schrock, Air Force Research Laboratory
Electro-Optical Synthetic Civilian Vehicle Data Domes ................................................................. 140
Rebecca L. Price, Air Force Research Laboratory
Juan Ramirez Jr., Air Force Research Laboratory
Todd V. Rovito, Air Force Research Laboratory
Olga Mendoza-Schrock, Air Force Research Laboratory

Recent Advances in RFIC Technology

Ultra-Low Power Read-Out-Integrated-Circuit Design ................................................................. 144
Jian Chen, Wright State University
George Lee, Wright State University
Saiyu Ren, Wright State University

Ferroelectric Thin-Film Characterization Through Use of Coplanar Waveguide Varactors .......... 149
D. Brown, University of Dayton
M. Qumsiyeh, University of Dayton
G. Subramanyam, University of Dayton
M. Patterson, University of Dayton
C. H. Zhang, University of Dayton

An Ultra-small On-Chip Sensor for Temperature and Thermal Gradient Measurements .......... 154
Yen-Ting Wang, Iowa State University and Tatung University
Chen Zhao, Iowa State University
Degang Chen, Iowa State University
Shu-Chuan Huang, Tatung University
Randall Geiger, Iowa State University

Modeling and Simulation of Packaging Substrate Effects on Radio Frequency Integrated Circuits ..... 158
Chris Benedik, Wright State University
Saiyu Ren, Wright State University

Reconfigurable Computing

Detection and Tracking Performance with Compressed Wide Area Motion Imagery .................. 163
Patrick C. Hytla, University of Dayton Research Institute
Kevin S. Jackowitz, University of Dayton
Eric J. Balster, University of Dayton
Juan R. Vasquez, Air Force Research Laboratory
Michael L. Talbert, Air Force Research Laboratory

A Real-Time Gracefully Degrading Avionics System for Unmanned Aerial Vehicles ...................... 171
Belal H. Sababha, Princess Sumaya University for Technology
Osamah A. Rawashdeh, Oakland University
Waseem A. Sa’deh, Oakland University

Analysis of Motion Estimation using Multiple Reference Frames in MPEG-4 AVC/ H.264 ............. 178
Jonathan P. Skeans, University of Dayton
Eric J. Balster, University of Dayton
William F. Turri, University of Dayton

Method for Detection and Compensation of Alignment Errors occuring between a Programmable
Optically Reconfigurable Gate Array and its Writer System ...................................................... 182
Shinya Kubota, Shizuoka University
Minoru Watanabe, Shizuoka University
RF and Nonlinear Signal Processing

An 180nm CMOS Low Noise Amplifier with a Single Ended Input and Differential Output – RF and Non Linear Signal Processing ................................................................. 186
Sunny Raj Dommaraju, Wright State University
Saiyu Ren, Wright State University

Future Directions in Information Fusion and Autonomy

Global Workspace Theory Inspired Architecture for Autonomous Structural Health Monitoring ...... 190
Mark M. Derriso, Air Force Research Laboratory
Charles D. McCurry, Booz Allen Hamilton
Martin P. DeSimio, University of Dayton Research Institute

Detection and Tracking of Near-Earth Objects using a Cognitive Hierarchical Data-Association Model ............................................................... 196
Alan C. O'Connor, Air Force Research Laboratory
Roman Ilin, Air Force Research Laboratory
Igor Ternovskiy, Air Force Research Laboratory

Information Fusion Management and Enterprise Processing .................................................. 204
Erik Blasch, Air Force Research Laboratory
Otto Kessler, MITRE
Jeffrey Morrison, Office of Naval Research
John Tangney, Office of Naval Research
Frank E. White, GA Tech Res Inst.

Information Fusion Reliability Analysis for Component Survivability ..................................... 212
Erik Blasch, Air Force Research Laboratory
Li Bai, Temple University
Genshe Chen, Intelligent Fusion Tech.

Information Fusion of the Terahertz-Visual NAECON Grand Challenge Data .......................... 220
Erik Blasch, Air Force Research Laboratory
Robert Ewing, Air Force Research Laboratory
Zheng Liu, Toyota Technological Institute
Gernot Pomrenke, Air Force Research Laboratory
Doug Petkie, Wright State University
Kitt Reinhardt, Air Force Research Laboratory

The URREF Ontology for Semantic Wide Area Motion Imagery Exploitation ............................ 228
Erik Blasch, Air Force Research Laboratory
Paulo C.G. Costa, George Mason University
Kathryn B. Laskey, George Mason University
Haibin Ling, Temple University
Genshe Chen, Information Fusion Tech.

Compressive Sensing

Localization of RF Emitters using Compressed Sensing with Multiple Cooperative Sensors ........... 236
D.J. Walter, Rose-Hulman Institute of Technology
K. Bryan, Rose-Hulman Institute of Technology
James Stephens, Air Force Research Laboratory
Cliff Bullmaster, Air Force Research Laboratory
Vasu Chakravarthy, Air Force Research Laboratory
Tec Edge

Save the Soldier: Surgical Simulation (STS3) ................................................................. 241
   Priya Chawla, Air Force Research Laboratory
   Sharlene Dong, Cornell University
   Lexi Heironimus, Wright State University
   Tyler Maschino, Miami University
   Eliza Straughter, Ohio University
   Luke Wunderlich, Wright State University
   Mary McCarthy, Wright State University
   Robert Williams, Air Force Research Laboratory

Poster

True Time-Delay Beamsteering for Radar ................................................................. 246
   Matt Longbrake, Wright State University and Air Force Research Laboratory

Student Paper Contest

Doorway Identification and Classification Using Software-Defined UWB OFDM Radar .................. 250
   Brian Jameson, Miami University
   Y.T. Jade Morton, Miami University
   Dmitriy Garmatyuk, Miami University
   Robert Ewing, Air Force Research Laboratory

A Brief Taxonomy of Intrusion Detection Devices ......................................................... 255
   Howard E. Poston III, University of Dayton
