2013 World Haptics Conference
(WHC 2013)

Daejeon, South Korea
14 – 17 April 2013
# TABLE OF CONTENTS

PERCEPTUAL COLLAPSE: THE FUSION OF SPATIALLY DISTINCT TACTILE CUES INTO A SINGLE PERCEPTR ............................................................... 1
   S. Manuel, J. Colgate, M. Peshkin, R. Klatzky

HAPTIC CONTOUR FOLLOWING AND FEATURE DETECTION WITH A CONTACT LOCATION DISPLAY .............................................................. 7
   J. Park, W. Provancher, D. Johnson, H. Tan

BACK-TO-BACK SKIN STRETCH FEEDBACK FOR COMMUNICATING FIVE DEGREE-OF-FREEDOM DIRECTION CUES ........................................ 13
   A. Guinan, N. Hornbaker, M. Montandon, A. Doxon, W. Provancher

HAPTIC MATCHING OF DIRECTIONAL FORCE AND SKIN STRETCH FEEDBACK CUES ................................................................. 19
   L. Gwilliam, A. Doxon, W. Provancher

HAPTIC JAMMING: A DEFORMABLE GEOMETRY, VARIABLE STIFFNESS TACTILE DISPLAY USING PNEUMATICS AND PARTICLE JAMMING .................. 25
   A. Stanley, J. Gwilliam, A. Okamura

AERIAL DISPLAY OF VIBROTACTILE SENSATION WITH HIGH SPATIAL-TEMPORAL
RESOLUTION USING LARGE-APERTURE AIRBORNE ULTRASOUND PHASED ARRAY ................................................................. 31
   K. Hasegawa, H. Shinoda

MULTIFINGER ELECTROSTATIC PASSIVE HAPTIC FEEDBACK ON A VISUAL DISPLAY ................................................................................ 37
   T. Nakamura, A. Yamamoto

FINGERTIP FRICTION MODULATION DUE TO ELECTROSTATIC ATTRACTION ................................................................................ 43
   D. Meyer, M. Peshkin, J. Colgate

HAPTIC INTERACTION WITH OBJECTS IN A PICTURE BASED ON SURFACE NORMAL ESTIMATION ................................................................. 49
   S. Kim, D. Kwon

MPEG-V STANDARDIZATION FOR HAPTICALLY INTERACTING WITH VIRTUAL WORLDS ................................................................. 55
   J. Kim, Y. Kim, J. Ryu

FORMABLE OBJECT - A NEW HAPTIC INTERFACE FOR SHAPE RENDERING ................................................................................ 61
   S. Klare, D. Foersllow, A. Peer

LOCALIZED TACTILE STIMULATION BY TIME-REVERSAL OF FLEXURAL WAVES: CASE STUDY WITH A THIN SHEET OF GLASS ................. 67
   C. Hudin, J. Lozada, V. Hayward

DEFORMABLE HAPTIC RENDERING FOR VOLUMETRIC MEDICAL IMAGE DATA ................................................................................ 73
   S. Chan, N. Blevins, K. Salisbury

STRAIN LIMITING FOR SOFT FINGER CONTACT SIMULATION ................................................................................................. 79
   A. Perez, G. Cirio, F. Hernandez, C. Garre, M. Otaduy

NONCONTACT HUMAN FORCE CAPTURING BASED ON SURFACE HARDNESS MEASUREMENT .................................................................................. 85
   M. Fujiwara, H. Shinoda

SCALABLE RENDERING OF VARIABLE DENSITY POINT CLOUD DATA ................................................................................ 91
   P. Kumari, K. Sreeni, S. Chaudhuri

RENDERING VARIABLE-SIZED LUMP SENSATIONS ON A SOFTNESS TACTILE DISPLAY ................................................................................ 97
   F. Kimura, A. Yamamoto

TACTILE SENSING OVER ARTICULATED JOINTS WITH STRETCHABLE SENSORS ................................................................................ 103
   T. Bhattacharjee, A. Jain, S. Vaish, M. Killpack, C. Kemp

MR-COMPATIBLE BIOPSY NEEDLE WITH ENHANCED TIP FORCE SENSING ................................................................................ 109
   S. Elayaperumal, J. Bae, D. Christensen, M. Cutkosky, B. Daniel, R. Black, J. Costa, F. Faridian, B. Moslehi

ANISOTROPIC VIRTUAL COUPLING WITH ENERGY-BASED DEFLECTION FOR PALPATING INHOMOGENEOUS COMPLIANT OBJECTS ................................................. 115
   U. Koek, K. Palmerius, M. Cooper

A PREDICTIVE MODEL FOR HAPTIC ASSISTANCE IN ROBOT ASSISTED TROCAR INSERTION ........................................................................ 121
   A. Chowriappa, R. Witz, Y. Seo, A. Reddy, T. Kesavadas, P. Scott, K. Guru, T. Kesavadas

A HIGH-PERFORMANCE VELOCITY ESTIMATOR FOR HAPTIC APPLICATIONS ................................................................................ 127
   K. Ghaffari, J. Koveces
ADVANCED 2D MACHINE PALPATION FOR TISSUE ABNORMALITY LOCALIZATION IN A SIMULATED ENVIRONMENT ............................................................................................................................... 133
Y. Kim, Y. Na, B. Ahn, J. Kim
IDENTIFICATION OF VARIOUS KINDS OF PAPERS USING MULTI-AXIAL TACTILE SENSOR WITH MICRO-CANTILEVERS ........................................................................................................ 139
K. Watanabe, M. Sohgawa, T. Kanashima, M. Okuyama, H. Noma
TACTILE SENSING SYSTEM INCLUDING BIDIRECTIONALITY AND ENHANCEMENT OF HAPTIC PERCEPTION BY TACTILE FEEDBACK TO DISTANT PART ...
Y. Tanaka, T. Nagai, M. Sakaguchi, M. Fujimura, A. Sano
ELECTRICALLY MULTIPLEXED TACTILE INTERFACE: FUSION OF SMART TACTILE SENSOR AND DISPLAY ............................................................................................................................. 151
S. Yoshimoto, Y. Kuroda, M. Imura, O. Oshiro, K. Sato
SIX-DOF HAPTIC INTERACTION WITH FLUIDS, SOLIDS, AND THEIR TRANSITIONS .............................................................. 157
G. Cirio, M. Marchal, M. Otaduy, A. Lecuyer
TOWARD TRANSPARENT VIRTUAL COUPLING FOR HAPTIC INTERACTION DURING CONTACT TASKS ............................................................................................................................. 163
M. Kim, D. Lee
ADAPTIVE AND EMBEDDED DEFORMATION MODEL: AN APPROACH TO HAPTIC INTERACTION WITH COMPLEX INHOMOGENEOUS ELASTIC OBJECTS ........................................................................ 169
K. Tagawa, T. Oishi, H. Tanaka
LUMP DETECTION WITH A GELSIGHT SENSOR ............................................................................................................................... 175
X. Jia, R. Li, M. Srinivasan, E. Adelson
FORCE PREDICTION BY FINGERNAIL IMAGING USING ACTIVE APPEARANCE MODELS ............................................................................................................................. 181
T. Grieve, J. Hollerbach, S. Mascaro
PERIODIC TACTILE FEEDBACK FOR ACCELERATOR PEDAL CONTROL ............................................................................................................................. 187
Y. Kurihara, T. Hachisu, M. Sato, S. Fukushima, H. Kajimoto
VIPONG: PROBABILISTIC HAPTIC FEEDBACK FOR EYES-FREE INTERACTION ............................................................................................................................. 193
S. Strachan, M. Wiertlewski, H. Zophoniasson, M. Anastassova
MERGING TWO TACTILE STIMULATION PRINCIPLES: ELECTROVIBRATION AND SQUEEZE FILM EFFECT ............................................................................................................................. 199
F. Giraud, M. Amberg, B. Lemaire-Semail
SNAP-TO-FIT, A HAPTIC 6 DOF ALIGNMENT TOOL FOR VIRTUAL ASSEMBLY ............................................................................................................................. 205
P. Olsson, F. Nyssla, J. Hirsch, I. Carlbom
THE TASST: TACTILE SLEEVE FOR SOCIAL TOUCH ............................................................................................................................. 211
G. Huisman, A. Frederiks, B. Dijk, D. Heylen, B. Krose
VIRTUAL RESTRAINT OF HAND POSITION AND POSTURE FOR COOPERATIVE VIRTUAL OBJECT MANIPULATION WITH UNGROUNDED FORCE DISPLAY DEVICE ............................................................................................................................. 217
K. Fujitaka, Y. Takehana, K. Kamata
VIRTUAL COUPLING DESIGN FOR STABILITY AND TRANSPARENCY OF MULTI-DEVICE HAPTIC SYSTEMS WITH DELAYS ............................................................................................................................. 223
G. Bianchini, D. Prattichizzo
REAL-TIME HAPTIC RENDERING AND HAPTIC TELEPRESENCE ROBOTIC SYSTEM FOR THE VISUALLY IMPAIRED ............................................................................................................................. 229
C. Park, A. Howard
SHARP TACTILE SENSATION USING SUPERPOSITION OF VIBROTACTILE STIMULI IN DIFFERENT PHASES ............................................................................................................................. 235
T. Sakurai, H. Shinoda, M. Konyo
AN ENGINEERED TACTILE AFFERENT MODULATION PLATFORM TO ELICIT COMPOUND SENSORY NERVE ACTION POTENTIALS IN RESPONSE TO FORCE MAGNITUDE ............................................................................................................................. 241
E. Kim, K. Sugg, N. Langhals, S. Lighthoby, M. Baltrusaitis, M. Urbanchek, P. Cedema, G. Gerling
CAN THE FEEL OF THE HAPTIC INTERACTION MODIFY A USER’S EMOTIONAL STATE? ............................................................................................................................. 247
E. Gatti, G. Caruso, M. Bordegoni, C. Spence
TACTILE FLASH LAG EFFECT: TAPS WITH CHANGING INTENSITIES LEAD BRIEFLY FLASDED TAPS ............................................................................................................................. 253
L. Chen
"INVITATION TO THE VOYAGE": THE DESIGN OF TACTILE METAPHORS TO FULFILL OCCASIONAL TRAVELERS’ NEEDS IN TRANSPORTATION NETWORKS ............................................................................................................................. 259
L. Brunet, C. Megard, S. Paneels, G. Changeon, J. Lozada, M. Daniel, F. Darses
ROLE OF HAPTIC CUES IN MOTOR LEARNING ............................................................................................................................. 265
D. Kim, B. Johnson, R. Gillespie, R. Seidler
MR-BRAKE WITH PERMANENT MAGNET AS PASSIVE ACTUATOR FOR HAPTICS .............................................................. 413
O. Erol, H. Gurocak

VISIO-ACOUSTIC SCREEN FOR CONTACTLESS TOUCH INTERFACE WITH TACTILE SENSATION .......................................................................................................................... 419
K. Yoshino, H. Shinoda

HAPTIC STYLUS WITH INERTIAL AND VIBRO-TACTILE FEEDBACK ........................................................................... 425
A. Arasan, C. Basdogan, T. Sezgin

HAIRLYTOP INTERFACE: AN INTERACTIVE SURFACE DISPLAY COMPRISED OF HAIR-LIKE SOFT ACTUATORS ................................................................. 431
T. Nojima, Y. Ooide, H. Kawaguchi

SIMULTANEOUS GEOMETRY AND TEXTURE DISPLAY BASED ON LATERAL FORCE FOR TOUCHSCREEN ........................................................ 437
S. Saga, R. Raskar

2-DOF CONTACT LOCATION DISPLAY FOR MANIPULATING VIRTUAL OBJECTS .......................................................... 443
S. Yazdian, A. Doxon, D. Johnson, H. Tan, W. Provancher

PROTOTYPE OF A VR UPPER-LIMB REHABILITATION SYSTEM ENHANCED WITH MOTION-BASED TACTILE FEEDBACK ........................................................................ 449
D. Sadihov, B. Migge, R. Gassert, Y. Kim

DEVELOPMENT OF A NEW MINIATURE KINESTHETIC ACTUATOR WITH VIBROTACTILE FEEDBACK FOR HANDHELD INTERFACES ....................................................... 455
D. Pyo, S. Ryu, B. Han, J. Park, D. Kwon

A FRAMEWORK FOR THE CLASSIFICATION OF DEXTEROUS HAPTIC INTERFACES BASED ON THE IDENTIFICATION OF THE MOST FREQUENTLY USED HAND CONTACT AREAS ...................................................................................................................... 461
F. Gonzales, F. Gosselin, W. Bachta

SENSORY AUGMENTATION OF STIFFNESS USING FINGERPAD SKIN STRETCH .......................................................... 467
Z. Quek, S. Schorr, I. Nisky, A. Okamura, W. Provancher

VIBROTACTILE STIMULI FOR AUGMENTED HAPTIC FEEDBACK IN ROBOT-ASSISTED SURGERY ................................................................. 473
A. Peon, C. Pacchierotti, D. Prattichizzo

A PRELIMINARY STUDY OF A TWISTED STRINGS-BASED ELBOW EXOSKELETON ......................................................... 479
D. Popov, I. Gaponov, J. Ryu

DESIGN AND OPTIMIZATION OF SUPPORT STRUCTURES FOR TACTILE FEEDBACK ....................................................... 485
I. Jiang, Y. Ishikawa, J. Lindsay, B. Hannaford

WHAT YOU TOUCH IS WHAT YOU GET: SELF-ASSESSING A MINIMALIST TACTILE SENSORY SUBSTITUTION DEVICE ................................................................................................ 491
L. Brayda, C. Campus, M. Gori

DESIGN AND EVALUATION OF FACTORS FOR MANAGING ATTENTION CAPTURE .............................................................. 497
Y. Zheng, E. Su, J. Morrell

WEARABLE TACTILE DISPLAY OF DIRECTIONS FOR PEDESTRIAN NAVIGATION: COMPARATIVE LAB AND FIELD EVALUATIONS .............................................................................. 503
M. Srikulwong, E. O'Neill

GENERATION OF DIRECTIONAL WIND BY COLLIDING AIRFLOWS .............................................................................. 509
K. Hirota, Y. Ito, T. Amamiya, Y. Ikei

FLEXIBLE VISUO-HAPTIC DISPLAY .......................................................................................................................... 515
S. Yun, S. Park, B. Park, H. Prahlad, P. Guggenberg, K. Kyung

NAVIGATION IN THE FINGERTIP ..................................................................................................................................... 519
A. Moscatelli, A. Naceri, M. Ernst

ANTICIPATORY VIBROTACTILE CUEING FACILITATES GRIP FORCE ADJUSTMENT ...................................................... 525
S. Okamoto, M. Wiertlewski, V. Hayward

VIBROTACTILE FEEDBACK OF POSE ERROR ENHANCES MYOELECTRIC CONTROL OF A PROSTHETIC HAND ........................................................................................................ 531
R. Christiansen, J. Conteras-Vidal, R. Gillespie, P. Shewokis, M. O'Malley

AN EMG-BASED ROBOTIC HAND EXOSKELETON FOR BILATERAL TRAINING OF GRASP ...................................................... 537
C. Loconsole, D. Leonardis, M. Barsotti, M. Solazzi, A. Frisoli, M. Bergamasco, M. Troncosi, M. Fumashii, C. Mazzotti, V. Castelli

DEFORMABLE HAPTIC MODEL GENERATION THROUGH MANUAL EXPLORATION ....................................................... 543
O. Goksel, S. Jeon, M. Harders, G. Sekely

BIASES IN VISUO-HAPTIC MATCHING OF CURVATURE .................................................................................................. 549
G. Doorn, M. Symmons

ILLUSION OF MOTION INDUCED BY TENDON ELECTRICAL STIMULATION ........................................................................ 555
H. Kajimoto
HAPTICS ASSISTED TRAINING (HAT) SYSTEM FOR CHILDREN'S HANDWRITING ........................................... 559
Y. Kim, M. Collins, W. Bulmer, S. Sharma, J. Mayrose

PRELIMINARY STUDY ON HAPTICS-STIMULATION BASED BRAINWAVE ENTRAINMENT .................... 565
D. Wang, M. Xu, Y. Zhang, J. Xiao

EFFECTS OF MULTI-MODAL GUIDANCE FOR THE ACQUISITION OF SIGHT READING SKILLS: A CASE STUDY WITH SIMPLE DRUM SEQUENCES ......................................................... 571
I. Lee, S. Choi

VISUAL AND FORCE FEEDBACK TIME-DELAYS CHANGE TELEPRESENCE: QUANTITATIVE EVIDENCE FROM CROSSMODAL CONGRUENCY TASK .............................................................. 577
A. Sengul, F. Rivest, M. Elk, O. Blanke, H. Bleuler

INTRODUCING THE SHAPE-LENGTH ILLUSION .......................................................................................... 583
M. Plaisier, M. Ernst

LIVE-LINE MAINTENANCE TRAINING USING ROBOTICS TECHNOLOGY .................................................. 587
Y. Maddahi, K. Zareinia, T. Olson, W. Mueller, N. Sepehri

MASS AND DENSITY ESTIMATES CONTRIBUTE TO PERCEIVED HEAVINESS WITH WEIGHTS THAT DEPEND ON THE DENSITIES' RELIABILITY .............................................................. 593
K. Drewing, W. Tiest

A BIDIRECTIONAL HAPTIC DEVICE FOR THE TRAINING AND ASSESSMENT OF HANDWRITING CAPABILITIES ......................................................................................................................... 599
N. Pedemonte, T. Laliberte, C. Gosselin

A FIRST LOOK AT INDIVIDUALS' AFFECTIVE RATINGS OF VIBRATIONS .................................................. 605
H. Seifi, K. MacLean

STABILITY ANALYSIS OF TRILATERAL HAPTIC COLLABORATION ......................................................... 611
J. Li, M. Tavakoli, Q. Huang

HUMAN FORCE REPRODUCTION ERROR DEPENDS UPON FORCE LEVEL .................................................... 617
B. Onneweer, W. Mugge, A. Schouten

A NOVEL HAPTIC TRAINING METHOD THROUGH SKILL DECOMPOSITION ............................................. 621
L. Liu, G. Liu, Y. Zhang

SLIP-INDUCED VIBRATION INFLUENCES THE GRIP REFLEX: A PILOT STUDY ........................................... 627
M. Wiertlewski, S. Endo, A. Wing, V. Hayward

CONSERVATISM OF PASSIVITY CRITERIA FOR STABILITY ANALYSIS OF TRILATERAL HAPTIC SYSTEMS ................................................................................................................................. 633
J. Li, M. Tavakoli, V. Mendez, Q. Huang

PSYCHOPHYSICAL STUDY OF AIR JET BASED TACTILE STIMULATION .................................................. 639
M. Tsalamlal, N. Ouarti, M. Ammi

NATURAL VARIATION IN SKIN THICKNESS ARGUES FOR MECHANICAL STIMULUS CONTROL BY FORCE INSTEAD OF DISPLACEMENT ................................................................. 645
Y. Wang, K. Marshall, Y. Baba, E. Lumpkin, G. Gerling

AN ASYMMETRY IN FORCE PERCEPTION CONTINGENT ON MOTION REVERSAL ......................................... 651
Y. Visell, V. Hayward

REACTION TIMES TO CONSTRAINT VIOLATION IN HAPTICS: COMPARING VIBRATION, VISUAL AND AUDIO STIMULI ....................................................................................................................... 657
A. Peon, D. Prattichizzo

JUDGED CONSONANCE OF TACTILE AND AUDITORY FREQUENCIES ......................................................... 663
R. Okazaki, T. Hachisu, M. Sato, S. Fukushima, V. Hayward, H. Kajimoto

AN EVALUATION OF THE EFFECTS ON POSTURAL STABILITY OF A FORCE-FEEDBACK RENDERED BY A LOW-COST HAPTIC DEVICE IN VARIOUS TASKS ........................................ 667
G. Baud-Bovy, F. Tatti, N. Borghese

USING TRADITIONAL HORIZONTAL-VERTICAL ILLUSION FIGURES AND SINGLE LINES TO DIRECTLY COMPARE HAPTICS AND VISION .......................................................... 673
J. Howell, M. Symmons, G. Doorn

VIBROTACTILE INPUTS TO THE FEET CAN MODULATE VECTION .............................................................. 677
I. Farkhatdinov, N. Ouarti, V. Hayward

IS THE HUMAN OPERATOR IN A TELEOPERATION SYSTEM PASSIVE? .......................................................... 683
M. Dyck, A. Jazayeri, M. Tavakoli

EVALUATION OF HAPTIC FEEDBACK CUES ON VEHICLE TELEOPERATION PERFORMANCE IN AN OBSTACLE AVOIDANCE SCENARIO ................................................................. 689
A. Hacinecioglu, E. Konukseven, A. Koku

STABILITY ANALYSIS OF TELEOPERATION SYSTEMS UNDER STRICTLY PASSIVE AND NON-PASSIVE OPERATOR ....................................................................................................................... 695
A. Jazayeri, M. Dyck, M. Tavakoli
STABILITY ANALYSIS OF DELAYED 4-CHANNEL BILATERAL TELEOPERATION SYSTEMS ................................................................. 701
N. Miandashti, M. Tavakoli

HAPTIC TRANSPARENCY INCREASES THE GENERALIZABILITY OF MOTOR LEARNING DURING TELEMANIPULATION ................................................................. 707
J. Wildenbeest, D. Abbink, J. Schorsch

IMPROVING TACTILE FEEDBACK WITH AN IMPEDANCE ADAPTER ........................................ 713
J. Lindsay, R. Adams, B. Hannaford

FREQUENCY-DOMAIN MAPPING APPROACH OF STABILITY BOUNDS FOR LOOP SHAPING OF BILATERAL CONTROLLERS ............................................................................. 719
G. Evers, G. Naus, M. Molengraft, M. Steinbuch

THE ROLE OF MECHANICAL PROPERTIES ON THE BEHAVIOUR AND PERFORMANCE OF MULTI-DOF HAPTIC DEVICES .................................................................................. 725
S. Shayan-Amin, L. Kovacs, J. Kovecses
