SPE 165410 Case Study: Thermal Enhance Bohai Offshore Heavy Oil Recovery by Costimulation of Steam and Gases ................................................................. 320
Yongtao Sun, Lichang Zhao, Tao Lin, Haitao Liu, Yubao Sun, Liguo Zhong, Zhaoxia Dong, Jirui Hou, Yiqiang Li
SPE 165411 Wellbore Efficiency Model for CO2 Geological Storage Part I: Theory and Wellbore Element ................................................................. 329
Ahmad Nahid, Richard Chalaturnyk
SPE 165412 A New Method To Increase Oil Recovery And Decreasing GOR by Using Downhole Choke In One of Iranian Oil Reservoirs ................................................................. 343
H. A. Riazy Pour, F. Khoravi
SPE 165414 Consideration of Geomechanics for In-situ Bitumen Recovery in Xinjiang, China ................................................................ 351
Xinsheng Yuan, Shenjun Dou, Jing Zhang, Sen Chen, Bin Xu
Guogang Han, He Zhang, Kegang Ling
SPE 165416 Phase Behavior and Viscosity Modeling of Athabasca Bitumen and Light Solvent Mixtures ................................................................. 378
M. Ghasemi, C. H. Whitson
SPE 165419 Observations on the Mechanisms of Solvent-Additive SAGD Processes ................................................................. 406
Neil R. Edmunds
SPE 165420 Incorporating 4D Seismic Steam Chamber Location Information into Assisted History Matching for A SAGD Simulation ................................................................. 419
A. D. Hiebert, A. Kumar, C. Card, J. C. Close, H. Ha, I. C. Morrish, F. Sun, S. Porter
SPE 165421 Rodless PCP Technology: From Theory to Reality; Analyzing One Year of Performance ................................................................. 438
Gilberto Jose Garcia
SPE 165422 Numerical Assessment of Caprock Integrity in SAGD Operations ................................................................. 443
Ehsan Rahmati, Hossein Rahmati, Alireza Nouri
SPE 165423 Coupled Geomechanical and Thermal Simulation of SAGD Process ................................................................. 458
X. Bao, Z. Chen, C. Dong, H. Deng, H. Liu, H. Zhong
SPE 165424 Synergistic Interactions Between Different Components on Blending Ispindler Kailey, Jacqueline Behles, Catherine Blackwell ................................................................................................................................. 476
SPE 165425 3.5D + 4D Seismic Reservoir Surveillance in Case of No Baseline Survey Yun Ling, Xiangyu Guo, Yintao Cai, Jianming Guo ................................................................ 492
SPE 165426 Modeling Three-Phase Flow during Steam Chamber Rise- Impact of Water Drainage on Oil Production Rate ................................................................. 499
Zhongxue He, Muhammad Murtaza, Hassan Dehahampour
SPE 165427 Challenges of Multiphase Flow Metering in Heavy Oil Applications ................................................................. 510
Flavia Viana, Parviz Meh dizadeh, Rebecca A. Owston, Kevin R. Supak
SPE 165428 Continuous Land Seismic Reservoir Monitoring of Thermal EOR in the Netherlands ................................................................ 522
Julien Cotton, Laurence Michou, Eric Forges, Kees Hornman
SPE 165429 The Role of the Phase Behavior Model within the Numerical Simulation of In Situ Combustion Processes ................................................................. 531
J. M. Palma, E. Rodriguez
SPE 165430 Polymer/Gel Enhanced Foam Flood for Improving Post-Waterflood Heavy Oil Recovery ................................................................. 543
Wei Zhou, Mingzhe Dong, Xiaoi Wang
SPE 165431 An Integrated Practical Approach to Forecasting Multi-well SAGD Production using Analog, Analytical, and Numerical Modeling Techniques ................................................................. 553
Yomi Adesimi, Jin Wang
SPE 165432 Got Steam? Understanding ESP Steam Handling Capabilities in the Centrifugal Pump ................................................................. 564
S. G. Noonan, A. Baugh, W. Klaeck, K. Womity, L. Wilson
SPE 165433 Vertical Single-Well SAGD with Multiple Producers ................................................................. 578
G. Hocking, D. A. Walters
SPE 165434 Findings from a Solvent-Assisted SAGD Pilot at Cold Lake ................................................................. 587
SPE 165436 Fire-flooding Technologies in Post-Steam-Injected Heavy Oil Reservoir: A Successful Example of CNPC ................................................................. 600
Wenlong Guan, Changfeng Xi, Jihong Huang, Junshi Tang
SPE 165437 Using Geochemistry to Address H2S Production Risk due to Steam Injection in Oil Sands ................................................................. 610
Violaine Lamoureux-Var, Claire Barroux
SPE 165438 The Effects of Clay Minerals of Reservoir Formations During Steam Distillation of Heavy Oils ................................................................. 622
Yashar Tavakkoli Osgouei, Mahmut Parlaktuna, Sahinde Demirci
SPE 165440 Insights into Heavy Oil Recovery by Surfactant, Polymer and ASP Flooding .................................................. 631
J. Bryan, H. Shamoli, S. Su, A. Kantzas

SPE 165441 Enhancement of Thermal Properties of Water by Using Nano Particles for Application in Thermal EOR Methods ............................................................................................................................... 646
A. Maghouli, P. Pourafshari, B. Taheri, A. Haji

SPE 165442 Shale Barrier Failure Strategies in Heterogeneous SAGD Reservoirs: A Case Study ........................................... 655
Yongbin Wu, Shilong Qi, Wanjuan He, Xin Zhao

SPE 165443 Integral Study of the Influence of Well Trajectory on the SAGD Performance .......................................................... 669
Yongbin Wu, Xiaotong Li, Wanjuan He, Min Qiu, Bolin Lv

SPE 165444 Coupling of Solvent and Hot Water to Improve Heavy Oil Recovery: Experimental and Simulation Studies ................................................................................................................................................. 680
Weiyou Luo, Farshid Torabi

SPE 165445 Developing New Corey-Based Water/Oil Relative Permeability Correlations for Heavy Oil Systems ............................................................... 695
Nader Mosavat, Farshid Torabi, Ostat Zarivny

SPE 165446 Estimation of Three-Phase Relative Permeability Isoperms in Heavy Oil/Water/Carbon Dioxide and Heavy Oil/Water/Methane Systems ........................................................................................................ 713
Manoochehr Akhlaghinia, Farshid Torabi, Christine W. Chan

SPE 165447 Experimental Investigation of the Effect of Solvent Type and Drainage Height on the Performance of Vapor Extraction (VAPEX) Process in Heavy Oil Systems ........................................................................... 734
Mehdi Mohammadpoor, Farshid Torabi

SPE 165448 Impact of Thermal Pore Pressure on the Caprock Integrity During the SAGD Operation ........................................... 744
B. Yang, B. Xu, Y. Yuan

SPE 165449 Cold Heavy Oil Development: Learn from the Past, Plan for the Future ...................................................................... 758
Tg. Rasidi, Tg. Obhman, M Medhat El Enam, Raj Deo Tewari, Anis Salwa Ramli, Nadiah Anasir, M. Izzat A. Rahman, Shahida Sulleh, Sameh M. Ahmed

SPE 165450 Potential of Combining Propane (LPG) Hydraulic Fracturing and Chemical Flooding in Thin Heavy-Oil Reservoirs ........................................................................................................ 780
Samira Morsy, James J. Sheng, Mohamed Y. Soliman, Mehdi Shahri

VOLUME 2

SPE 165451 How Heavy Gas Solvents Reduce Heavy Oil Viscosity? .......................................................................................... 793
Motonao Imai, Ichiro Nishioka, Masanori Nakano, Fuminori Kaneko

SPE 165452 A State-of-the-Art Computational Fluid Dynamics Simulation for Erosion Rates Prediction in a Bottom Hole Electrical Submersible Pump ........................................................................................................... 802
Emanuel Marsis, Ronnie Russell

SPE 165453 Enhance Heavy Oil Production of Horizontal Well by Distributed Downhole Electrical Heating .................................................................................................................. 816

SPE 165454 Effect of Dead Oil Viscosity and Injected Solvent Type on SVX Process Performance ............................................. 826
Kelvin (Kelly) D. Knorr, Muhammad Imran

SPE 165455 A Novel Solvent Injection Technique for Enhanced Heavy Oil Recovery: Cyclic Production with Continuous Solvent Injection ........................................................................................................ 846
T. Jiang, X. Jia, F. Zeng, Y. Gu

SPE 165456 Understanding the Steam Hammer Mechanism in Steam-Assisted Gravity Drainage (SAGD) Wells .................................................. 859
Mazda Irani, Patou Zeleke

SPE 165457 Modifications to Butler Theory for Geomechanical Effects at the Edge of SAGD Steam Chamber, Part I: Drained Condition ........................................................................................................... 894
Mazda Irani, Ian Gates

SPE 165458 Design Parameters and Technique Evaluation of Combustion Processes from Tube Testing ........................................................................................................ 934
L. R. Oliveros, F. C. Yatte, H. Bottia, S. F. Muñoz

SPE 165460 Determination of Thermal Conductivity of Carbonate Cores ........................................................................................... 959
Joyce Chen, James Donald, Haibo Huang, Jeff Macdonald, Qi Jiang, Mark Rabin, Jian-Yang Yuan

SPE 165461 Modelling Fluid Flow in Grosmont C Carbonates Using Fractals – A Concept .......................................................... 971
Jian-Yang Yuan, Jen Rassell-Houston, Daniel Nugent

SPE 165462 A Heuristic Production Model for Cyclic Steam Stimulation in a Fractured Heavy Oil Carbonate Reservoir ........................................................................................................... 984
Kent Qin, Jeff Macdonald

SPE 165524 An Experimental Study of the Post-CHOPS Cyclic Solvent Injection Process ............................ 1773
Zhongwei Du, Fanhua Zeng, Christine Chan
SPE 165525 Residual Oil Recovery by Injection of Biosurfactant and Chemical Surfactant following Hot Water Injection in Middle East Heavy Oil Field ............................................................................................................ 1794
SPE 165526 Enhanced Vapor Extraction through Foamy-oil flow ..................................................................... 1806
Xinfeng Jia, Tao Jiang, Fanhua Zeng, Yongan Gu
SPE 165527 Kinetic Models for Low Temperature Oxidation Subranges based on Reaction Products ........ 1822
Zeinab Khansari, Punitkumar Kapadia, Nader Mahinpey, Ian D. Gates
SPE 165528 Efficiency of Solvent Retrieval during Steam-Over-Solvent Injection in Fractured Reservoirs (SOS-FR) Method: Core Scale Experimentation .............................................................................................................. 1836
M. Almojtaba Mohammed, Tayfun Babadagli
SPE 165530 Bitumen Recovery by the SOS-FR (Steam-Over-Solvent Injection in Fractured Reservoirs) Method: An Experimental Study on Grosmont Carbonates ................................................................. 1850
Khosrow Naderi, Tayfun Babadagli, Gökhan Coskuner
SPE 165531 Optimal Application Conditions of Solvent Injection into Oilsands to Minimize the Effect of Asphaltene Deposition: An Experimental Investigation .......................................................... 1882
L. Moreno, T. Babadagli
SPE 165533 A Study on Energy Transfer during SAGD and Its Effects on Flow Characteristics .................... 1903
L. Little, N. A. Romanuk, B. Feland, F. A. Vivas, T. Babadagli, B. Ozum
SPE 165534 Modeling Thermal and Solvent Injection Techniques as Post-CHOPS Applications Considering Geomechanical and Compositional Effects ................................................................. 1911
A. Rangriz-Shokri, T. Babadagli
SPE 165535 Integrating Reservoir Simulator and Model Predictive Control Software for Automating SAGD Well Pair Operations ............................................................................................................. 1923
Kalpesh Patel, Elvira Marie Aske, Morten Fredriksen
SPE 165536 Closure Modeling of Sub-grid-scale, Effects for Well-drainage-scale Prediction of CHOPS ................................................................. 1932
Brian Vanderheyden, Xia Ma, Duan Zhang
SPE 165538 Integrated Study of Foamy Oil Flow and Wormhole Structure in CHOPS through Transient Pressure Analysis ......................................................................................................................... 1946
Lei Xiao, Gang Zhao
SPE 165539 Reservoir Simulations of Chemical Additive Transport within SAGD Operations .................... 1961
Paul Gillis, Jonathan Mendenhall, Joydeep Mukherjee, Naoko Akita
SPE 165540 More Realistic Four-Phase Stability and Phase Splitting Calculations for Canadian Heavy Oil and Bitumen Reservoirs Using Solvent Injection Processes ......................................................... 1976
Seyed Ali Feizabadi, Jalal Abedi, Zhangxin Chen
SPE 165541 Stochastic Optimization fo Hot Water Flooding Strategy in Thin Heavy Oil Reservoirs ............... 2008
David W. Zhao, Ian D. Gates
SPE 165542 Full-Field Simulation Supports Reservoir Management Decisions in a Giant Carbonate Complex ................................................................. 2028
Ernesto Pérez-Martínez, Antonio Rojas-Figueroa, Patricia E. Carreras, James P. Sizer, Víctor O. Segura-Cornejo
SPE 165544 Understanding the Thermo-Hydro-Mechanical Pressurization in Two-Phase (Steam/Water) Flow and its Application in Low-Perm Caprock Formations in SAGD Projects ............................. 2048
Sahar Ghannadi, Mazda Irani, Rick Chalaturnyk
SPE 165545 Surfactant-Steam Process: An Innovative Enhanced Heavy Oil Recovery Method for Thermal Applications ............................................................................................................. 2084
K. Zeidani, S. C. Gupta
SPE 165546 Combining a Surveillance Testing Workflow into the Assisted History Matching Process to Reduce Uncertainties in a SAGD Reservoir ............................................................................................................. 2100
W. K. Shaker, Z. Chen, G. J. Walker
SPE 165547 A Performance Comparison Study of Electromagnetic Heating and SAGD Process .................. 2119
Manyang Liu, Gang Zhao
SPE 165548 The Effect of Solvents on the Viscosity of an Alberta Bitumen at In Situ Thermal Process Conditions .............................................................................................................................................................................. 2130
H. Motahhari, F. F. Schoeggl, M. A. Satyro, H. W. Yarranton

SPE 165551 Removal of Manganese Tetraoxide Filter Cake Using Combination of HCl and Organic Acid ................................................................................................................................................................................................. 2153
Abdullah M. Al Moajil, Hisham A. Nasr-El-Din

SPE 165552 Specifics and Challenges of Heavy oil Production in Northern Siberia Illustration Based on Biggest Heavy Oil Project in Russia ................................................................................................................................................................................................. 2166
M. Aksenov, D. Lachugin, M. Nukhnev, K. Rymarenko, F. Telkov, L. Gaidukov, K. Vologodskiy, D. Khramov

SPE 165555 A Practical Approach to History-matching Large, Multi-well SAGD Simulation Models: A MacKay River Case Study ................................................................................................................................................................................................. 2178
Frank Liu, Jin Wang, Paul Morris

SPE 165556 Optimization of a Vertical-Horizontal Heavy Oil Thermal Operation by using Automated Field-scale Control ................................................................................................................................................................................................. 2189
Yu Bao, Jingyi (Jacky) Wang, Ian D. Gates

SPE 165557 Data-Driven Modeling Approach for Recovery Performance Prediction in SAGD Operations ................................................................................................................................................................................................. 2206
Ehsan Amirian, Juliana Y. Leung, Stefan Zanon, Peter Dzurman

SPE 165558 Physics-Based Proxy for Vapex Process Modeling in Heterogeneous Reservoirs ................................................................................................................................................................................................. 2223
Jindong Shi, Juliana Y. Leung

SPE 165559 Experimental Measurement of CO2 Solubility in heavy Oil and Its Diffusion Coefficient Calculation at both Static and Dynamic Conditions ................................................................................................................................................................................................. 2242
Ali Kavousi, Farshid Torabi, Christine Chan

SPE 165560 History Matching Grosmont C Carbonate Thermal Production Performance ................................................................................................................................................................................................. 2258
Jinxin Qi, Jian-Yang Yuan

SPE 165561 A New Method to Extract In-situ Bitumen from Core Samples ................................................................................................................................................................................................. 2268
Hongying Zhao, Jinglin Gao, Na Jia, Afzal Memon, Jon Knut Ringen, Tao Yang, Jarle Larsen, Svein Tollefsen

SPE 165562 Application of Comprehensive Water Injection Optimization Techniques Based on Study of Detailed Reservoir Characteristics at Offshore Heavy Oil Field ................................................................................................................................................................................................. 2283
Yuxian Wang, Ming Liu, Weina Zhang, Qionghong Yang, Xinwu Liao, Tingli Li, Xiujuan Zhao, Wei Qin, Juan Du, Zijun Zhou

SPE 165563 Design and Field Evaluation of Tubing Deployed Passive Outflow Control Devices in SAGD Injection Wells ................................................................................................................................................................................................. 2293
Max Medina

SPE 165564 Improve Economy of Oil Sands Reservoir Development by Integrating Reservoir Simulation with Economic Evaluation ................................................................................................................................................................................................. 2305
Fagang Gu, Hannah Laplante, David Bergen, Eric Tuchet, Francesco Ferreira

SPE 165565 Analysis of Impact of Thermal and Permeability Heterogeneity on SAGD Performance Using a Semi-Analytical Approach ................................................................................................................................................................................................. 2315
Travis Hampton, Dhananjay Kumar, Prince Azom, Sanjay Srinivasan

SPE 165567 Interwell Connectivity Evaluation in Cases of Frequent Production Interruptions ................................................................................................................................................................................................. 2326
M. Soroush, D. Kaviani, J. L. Jensen

SPE 165571 Comparative Experimental Design of Steamflooding for Optimal Efficient Performance of a Heterogeneous Light Oil Sandstone Reservoir ................................................................................................................................................................................................. 2347
Wathiq J. Al-Mudhafer
