2013 IEEE Wireless Power Transfer

(WPTC 2013)

Perugia, Italy
15-16 May 2013
# TABLE OF CONTENTS

## WEKS1: KEYNOTE SPEECH

**FAR-FIELD WIRELESS POWER DELIVERY AND POWER MANAGEMENT FOR LOW-POWER SENSORS**  
Zoya Popovic  

---

## WEO1: WPT TECHNOLOGIES BASED ON RESONANT DEVICES

**ORIENTATION INSENSITIVE POWER TRANSFER BY MAGNETIC RESONANCE FOR MOBILE DEVICES**  
Olutola Jonah, Stavros V. Georgakopoulos, Manos M. Tentzeris  

**EXPERIMENTAL ANALYSIS OF DOUBLE SPIRAL RESONATOR FOR WIRELESS POWER TRANSMISSION**  
Wei Wei, Yoshihiro Kawahara, Tohru Asami  

**A CONSIDERATION OF EFFICIENCY IMPROVEMENT OF TRANSMITTING COIL ARRAY IN WIRELESS POWER TRANSFER WITH MAGNETICALLY COUPLED RESONANCE**  
Keishi Miwa, Hiroshi Hirayama, Kunto Sakakibara  

**RESONANT WIRELESS POWER TRANSFER: INVESTIGATION OF RADIATING RESONANCES**  
M. Dionigi, G. Franceschetti, M. Mongiardo  

---

## WEO2: POWER SOURCES FOR WPT SYSTEMS

**SPATIALLY-COMBINED MULTISINE TRANSMITTER FOR WIRELESS POWER TRANSMISSION**  
Alírio Soares Boaventura, Nuno Borges Carvalho  

**ZERO PHASE DIFFERENCE CAPACITANCE CONTROL (ZPDCC) FOR MAGNETICALLY RESONANT WIRELESS POWER TRANSMISSION**  
Shunta Iguchi, Pyungwoo Yeon, Hiroshi Fuketa, Koichi Ishida, Takayasu Sakurai, Makato Takamiya  

**ADVANCED GAN-BASED HIGH FREQUENCY POWER AMPLIFIERS**  
V. Camarchia, E. Cipriani, P. Colantonio, G. Ghione, F. Giannini, M. Pirola, R. Quaglia  

---

## WEP1: POSTER SESSION I

**ORGANIC FREQUENCY DOUBLER RFID TAG EXPLOITING 7.5-MHZ WIRELESS POWER TRANSFER**  
M. Virili, F. Alimenti, L. Roselli, P. Mezzanotte, M. Dionigi  

**CALIBRATION METHOD OF RETRODIRECTIVE ANTENNA ARRAY FOR MICROWAVE POWER TRANSMISSION**  
Yazhou Dong, Shi-Wei Dong, Ying Wang, Liming Gong  

**A NOVEL QI-STANDARD COMPLIANT FULL-BRIDGE WIRELESS POWER CHARGER FOR LOW POWER DEVICES**  
M. Galtzzi, M. Caldara, V. Re, A. Vitali  

**OPTIMUM FRAME SIZE EVALUATION FRAMEWORK FOR EFFICIENT TAG IDENTIFICATION IN PASSIVE RFID SYSTEMS**  
Tanvi Agrawal, P. K. Biswas, A. D. Raoot, Rohit Sharma  

**THERMAL ANALYSIS FOR TEMPERATURE ROBUST WIRELESS POWER TRANSFER SYSTEMS**  
Kiwon Hwang, Sanghoon Chung, Uooyeol Yoon, Manho Lee, Seungyoung Ahn  

**DESIGN OF BURIED POWER LINE FOR ROADWAY-POWERED ELECTRIC VEHICLE SYSTEM**  
Jaegue Shin, Boyune Song, Seungyoung Shin, Sanghoon Chung, Yangsu Kim, Guho Jung, Seongjeab Jeon
DESIGN OF A PICKUP WITH COMPENSATION WINDING FOR ON-LINE ELECTRIC VEHICLE (OLEV) ................................................................. 60
Boyune Song, Jaegue Shin, Sanghoon Chung, Seungyong Shin, Seokhwan Lee, Yangsu Kim, Guho Jung

A NEW SOLAR POWER SATELLITE SYSTEM FACED TO ENGINEERING: CONCENTRIC DISC ................................................................. 63
Shi-Wei Dong, Hongxi Yu, Yazhou Dong, Liming Gong, Ying Wang

GRAPHENE-BASED WIRELESS COMMUNICATIONS SYSTEMS: ANALYSIS OF THE EM-QUANTUM TRANSPORT OF COUPLED NANO-PATCH ANTENNAS ................................................................. 66
Luca Pierantoni, Davide Mencarelli, Fabio Coccetti

RIGOROUS MODELING OF MID-RANGE WIRELESS POWER TRANSFER SYSTEMS BASED ON ROYER OSCILLATORS ................................................................. 69
A. Costanzo, M. Dionigi, F. Mastri, M. Mongiardo

MODE LOCKED OSCILLATOR ARRAYS FOR EFFICIENT WIRELESS POWER TRANSMISSION ................................................................................. 73
Apostolos Georgiadis, Ana Collado

WIRELESS POWER TRANSFER SYSTEM FOR HIGH POWER APPLICATION AND A METHOD OF SEGMENTATION ................................................................. 76
Seungyong Shin, Jaegue Shin, Boyune Song, Boyune Song, Yangsu Kim, Guho Jung, Seongjeub Jeon

WEKS2: KEYNOTE SPEECH

INTRODUCTION TO THE ALLIANCE FOR WIRELESS POWER LOOSELY-COUPLED WIRELESS POWER TRANSFER SYSTEM SPECIFICATION VERSION 1.0 ................................................................................. 79
Ryan Tseng, Bill Von Novak, Sumukh Shevde, Kamil A. Grajski

WEOS: ENERGY HARVESTING AND SCAVENGING

SCALABLE ADAPTIVE WIRELESS POWERING OF MULTIPLE ELECTRONIC DEVICES IN AN OVER-MODED CAVITY ................................................................................. 84
Sushia Rahimizadeh, Sean Korhummel, Benjamin Kaslon, Zoya Popovic

HIGH EFFICIENCY RECTIFICATION BY SOI BASED GATE CONTROLLED DIODE FOR RF ENERGY HARVESTING ................................................................................. 88
Ryo Umesao, Jiro Ida, Kouta Kawabata, Sou Tashino, Keisuke Noguchi, Kenji Itoh

AN INTEGRATED RF ENERGY HARVESTER FOR UHF WIRELESS POWERING APPLICATIONS ................................................................................. 92
S. Scorcioni, L. Larcher, A. Bertacchini, L. Vincetti, M. Maini

WEOS: WPT SENSOR APPLICATIONS

WIRELESS SENSOR NETWORK IN REUSABLE VEHICLE ROCKET AND LOW-POWER 20-30 GHZ AMPLIFIER MMIC ................................................................................. 96
Ryo Takamori, Midori Kawasaki, Harunobu Seita, Kentaro Nishimori, Naoki Honma

WIRELESS POWER TRANSFER SYSTEM FOR DIAGNOSTIC SENSOR ON ROTATING SPINDLE ................................................................................. 100
Gibum Lee, Hocheol Gwak, Young-Sik Kim, Wee-Sang Park

SMART FLOOR: INDOOR NAVIGATION BASED ON RFID ................................................................................. 103
Ricardo Goncalves, Joao Reis, Emanuel Santana, Nano B. Carvalho

WIRELESS POWER TRANSFER FOR SENSORS AND SYSTEMS EMBEDDED IN FIBER COMPOSITES ................................................................................. 107
Iker Mayordomo, Tobias Drager, Jose Antonio Alayon Josef Bernhard

THKS1: KEYNOTE SPEECH

THE GREEN ENERGY HARVESTING WINDS BY THE RF/MICROWAVE POWER TRANSMISSION ................................................................................. 111
Shigeo Kawasaki
### TH01: RECTIFYING DEVICES, CIRCUITS, AND RECTENNAS

**DC Power Pattern Analysis of N-by-N Staggered Pattern Charge Collector and N² Rectenna Array**

Blake R. Marshall, Christopher R. Valenta, Gregory D. Durgin

A Harmonically-Terminated Two-Gram Low-Power Rectenna on a Flexible Substrate

Sean Korhummel, Daniel G. Kuester, Zoya Popovic

**Numerical Analysis of an Innovative Energy-Harvesting System in the Infrared Region**

Martino Aldrigo, Alessandra Costanzo, Vittorio Rizzoli

**Design of a Dual-Band Rectifier for Wireless Power Transmission**

Defu Wang, Renato Negra

### TH02: WPT APPLICATIONS

**Structure of Handheld Resonant Magnetic Coupling Charger (HH-RMCC) for Electric Vehicle Considering Electromagnetic Field**

Chiuk Song, Hongseok Kim, Sukyu Kong, Daniel H. Jung, In-Myoung Kim, Young-II Kim, Jonghoon Kim, Joongho Kim

**Increasing the RFID Readability Range Using Wireless Power Transmission Enhancements**

Ricardo Goncalves, Nuno B. Carvalho, Pedro Pinho

**Feasibility of a Battery-Less Wirelessly-Powered RFID Remote Control System**

Alírio Jesus Soares Boaventura, Nuno Borges Carvalho

**Study on Panel Gradient Estimation System for Panel-Structure Solar Power Satellite / Station**

Takaki Ishikawa, Naoki Shinohara

**Design Considerations for a Moving Field Inductive Power Transfer System**

Johannes A. Russer, Peter Russer

### THP1: POSTER SESSION II

**Influence of Magnetic Design Choices on the Quality Factor of Off-The-Shelf Wireless Power Transmitter and Receiver Coils**

Stijn Wielandt, Nobby Stevens

**Wireless Power Transfer with Artificial Magnetic Conductors**

Jing Wu, Bingnan Wang, William S. Yerazunis, Koon Hoo Teo

**Flexible Wireless Energy Transfer Systems by Carbon Fiber as a Dielectric Material: Study and Experiments**

Sai Kiran Oruganti, Franklin Bien

**The C-Band MPT Rectifier Using a HEMT Without Bonding-Wire Connection for a Space Health Monitoring System**

**Improvement of Coupling Coefficient by Designing a Spiral Pattern Formed on a Printed Circuit Board**

S. Konno, T. Yamamoto, K. Koshiji

**A New Configuration of Magnetic Coupled Power Transfer Using Parallel Line Feeder**

Takeshi Higashino, Ma Ziji, Yoshikazu Goto, Yoshinori Tsuruda, Ryuhei Tanaka, Minoru Okada Yassuki Tatsuta

**Microwave-Band Wireless Power Transfer System Using Ceramic Dielectric Resonators**

Kenta Nishikawa, Toshio Ishizaki

**Effect of Hop Counts on Power Division Ratio in Multi-Hop Power Transfer Via Magnetic Resonance**

Akiro Shimada, Yuki Ito, Hideyuki Uehara, Takashi Ohira
THO3: BASIC TECHNOLOGIES FOR WPT SYSTEMS

RADIATIVE POWER TRANSMISSION FROM DIPOLAR SOURCES .................................................................................. 206
Charles. L. Moorey, William Holderbaum, Ben Potter

POSITION DETECTION FOR TRANSCUTANEOUS ENERGY TRANSMISSION SYSTEM FOR
CAPSULE ENDOSCOPE ........................................................................................................................................... 210
T. Yamamoto, K. Koshiji

FABRICATION OF A NEW HIGH-PERFORMANCE WPT SYSTEM BY ELECTRIC ENERGY
CONFINEMENT ......................................................................................................................................................... 214
Ikuo Awai, Yuichi Sawahara, Toshio Ishizaki

POSSITIONAL CHARACTERISTICS OF CAPACITIVE POWER TRANSFER AS A RESONANCE
COUPLING SYSTEM ................................................................................................................................................ 218
Takashi Komaru, Hidenori Akita

A 13.56 MHZ WIRELESS POWER TRANSFER SYSTEM WITHOUT IMPEDANCE MATCHING
NETWORKS ............................................................................................................................................................... 222
Minfan Fu, Tong Zhang, Xinen Zhu, Chengbin Ma

IMPEDANCE MATCHING CONSIDERING CROSS COUPLING FOR WIRELESS POWER
TRANSFER TO MULTIPLE RECEIVERS .................................................................................................................. 226
J. Kim, H.-C. Son, D.-H. Kim, Y.-J. Park

THO4: STANDARDIZATION, REGULATION AND BIOLOGICAL EFFECTS

3-COIL RESONANCE-BASED WIRELESS POWER TRANSFER SYSTEM FOR IMPLANTABLE
ELECTRONIC ............................................................................................................................................................. 230
Ying Yi, Ulrich Buttner, Yiqiang Fan, Ian G. Foulds

OPERATING FREQUENCY SELECTION FOR LOOSELY COUPLED WIRELESS POWER
TRANSFER SYSTEMS WITH RESPECT TO RF EMISSIONS AND RF EXPOSURE
REQUIREMENTS ....................................................................................................................................................... 234
Jagadish Nadakuduti, Lin Lu, Paul Guckian

EFFECT OF VIA-WHEEL POWER TRANSFER SYSTEM ON HUMAN BODY .................................................................. 238
Qiaowei Yuan, Takanori Ishikawa

THKS2: SPECIAL TALK AND EXHIBITION

VIA-WHEEL POWER TRANSFER TO VEHICLES IN MOTION .................................................................................. 242
Takashi Ohira
