2013 IEEE/ACM 21st
International Symposium on
Quality of Service

(IWQoS 2013)

Montreal, Quebec, Canada
3 – 4 June 2013
# Table of Contents

mBenchLab: Measuring QoE of Web Applications using mobile devices ......................................................... 1  
*Emmanuel Cecchet, Robert Sims, Xin He, Prashant Shenoy*

A Cloud-Assisted Energy-Efficient Video Streaming System for Smartphones ............................................ 11  
*Mohammad Reza Zakerinasab and Mea Wang*

Remora: Sensing Resource Sharing Among Smartphone-based Body Sensor Networks ......................... 21  
*Matthew Keally, Gang Zhou, Guoliang Xing, and Jianxin Wu*

Adaptive Data Transmission in the Cloud ........................................................................................................ 31  
*Wenfei Wu, Yizheng Chen, Ramakrishnan Durairajan, Dongchan Kim, Ashok Anand, and Aditya Akella*

Optimization and Stabilization of Composite Service Processing in a Cloud System ............................... 41  
*Sheng Di, Derrick Kondo, and Cho-Li Wang*

Small versus Large: Switch Sizing in Topology Design of Energy-Efficient Data Centers ....................... 51  
*Indra Widjaja, Anwar Walid, Yanbin Luo, Yang Xu, and H. Jonathan Chao*

Revenue Maximization with Dynamic Auctions in IaaS Cloud Markets ...................................................... 57  
*Wei Wang, Ben Liang, and Baochun Li*

Autonomic Performance and Power Control for Co-located Web Applications on Virtualized Servers ............................................................................................................................. 63  
*Palden Lama, Yanfei Guo, and Xiaobo Zhou*

Prioritizing Local Inter-Domain Communication in Xen ............................................................................. 73  
*Sisu Xi, Chong Li, Chenyang Lu, and Christopher Gill*

Predictive VM Consolidation on Multiple Resources: Beyond Load Balancing ........................................... 83  
*Lei Lu, Hui Zhang, Evgenia Smirni, Guofei Jiangy, and Kenji Yoshihira*

Quantifying and Improving I/O Predictability in Virtualized Systems ....................................................... 93  
*Cheng Li, Inigo Goiri, Abhishek Bhattacharjee, Ricardo Bianchini, and Thu D. Nguyen*

A Datacenter Network Tale from a Server’s Perspective ............................................................................. 99  
*Robert Birke, Lydia Y. Chen, and Cyriel Minkenberg*

Joint Study on Optimizations of Data Center Deployment, VM Assignment and Migration ..................... 109  
*Yin Li, Min Yao, and Chuang Lin*

Exploring the Profit-Reliability Trade-off in Amazon’s Spot Instance Market: a Better Pricing Mechanism ............................................................................................................................. 119  
*Kai Song, Yuan Yao, and Leana Golubchik*

Joint Channel and Delay Aware User Scheduling for Multiuser MIMO system over LTE-A Network ................... 129  
*Jayeta Biswas, Ren Ping Liu, Wei Ni, Iain B. Collings, and Sanjay K. Jha*
RPFP: IP Fast ReRoute with Providing Complete Protection and without Using Tunnels ...................... 137
Baobao Zhang, Jun Bi, and Jianping Wu

Multi-Resource Generalized Processor Sharing for Packet Processing ............................................. 147
Wei Wang, Ben Liang, and Baochun Li

An Enhanced Bloom Filter for Longest Prefix Matching ................................................................. 157
Gahyun Park and Minseok Kwon

Optimising Quality of Information in Data Collection for Mobile Sensor Networks............................. 163
Farshid Hassani Bijarbooneh, Pierre Flener, Edith Ngai, and Justin Pearson

Modeling and Understanding Burst Transmission Algorithms for Energy Efficient Ethernet.............. 173
Jinli Meng, Fengyuan Ren, Wanchun Jiang, and Chuang Lin

On the Impact of Popularity Decays in Peer-to-Peer VoD Systems............................................... 183
Fei Chen, Haitao Li, and Jiangchuan Liu

Improving Wireless Network Capacity under High Transmission Power with Adaptive Carrier Sensing and Routing ................................................................. 189
Yue Wang

Achieving Secure and Efficient Data Collaboration in Cloud Computing....................................... 195
Xin Dong, Jiadi Yu, Yuan Luo, Yingying Chen, Guangtao Xue, and Minglu Li

On Interference-aware Provisioning for Cloud-based Big Data Processing...................................... 201
Yi Yuan, Haiyang Wang, Dan Wang, Jiangchuan Liu

Preferred Keyword Search over Encrypted Data in Cloud Computing ............................................. 207
Zhirong Shen, Jiwu Shu, and Wei Xue

Cost-Minimizing Preemptive Scheduling of MapReduce Workloads on Hybrid Clouds.................. 213
Xuanjia Qiu, Wai Leong Yeow, Chuan Wu, Francis C.M. Lau
