2011 International Conference on Engineering and Risk Management

Toronto, Canada
28-30 October 2011

Editors:

Desheng Dash Wu

ISBN: 978-1-62748-646-0
ISSN: 2211-3819
Contents

Foreword
John R. Birge ................................................................. 1

Editorial: Risk and Engineering Management
Desheng Dash Wu ............................................................ 2

Disaster and Safety Engineering
MapXtreme Resolution for Internet Publication of Natural Disaster Information in Earthquake Engineering Based on ANN
Qingjie Zhu and Jing Chen .................................................. 4

Static Test Analysis of a Bridge Structure in Civil Engineering
Jiemai Zhao, Tao Liu and Yuliang Wang .................................. 10

Thermodynamic Analysis of Air Cycle Refrigeration System for Chinese Train Air Conditioning
Zhenyong Zhang, Shengjun Liu and Lili Tian ............................. 16

The Experimental Research of Low Strength Concrete Considering Strain Rate under Uniaxial Compression
Yumin Zhang, Yunfei Jia, Youpo Su and Jingyu Su ..................... 23

Ductility and Strength of Hybrid Fiber Reinforced Self-Consolidating Concrete Beam with Low Reinforcement Ratios
Zhiyou Guo, Xiangyu Chen and Shuai Dong .............................. 28

Experimental Investigation on the Effect of Reinforcement Ratio to Capacity of RC Column to Resist Lateral Impact Loading
Xingguo Wang, Yumin Zhang, Youpo Su and Yu Feng .................. 35

Finite Element Analysis on Casing Failure Based on ADINA
Peng Wang, Qingjie Zhu and Xiangying Bu ................................. 42

Design Methods of Reinforce-Concrete Frame Structure to Resist Progressive Collapse in Civil Engineering
Hongyu Wang, Youpo Su and Qingshen Zeng ........................... 48

ANN Model for the Estimation of Life Casualties in Earthquake Engineering
Hai Xia Wang, Jinxin Niu and Jiangfeng Wu ............................... 55

Model Test Study on Vibration Transferring of Dynamic Compaction of Hydraulic Filling Foundation Reinforcement
Jingsheng Qiao and Loushan Li .............................................. 61

Experimental Study on Concrete T-Beams Strengthened with Carbon Fiber Reinforced Polymer (CFRP) Sheets on Three Sides
Guowei Ni, Bo Liu, Xiaoli and Wenhong Yan ............................. 69

Model Test Study on Transfer Law of Dynamic Stress Produced by Dynamic Compaction
Qingjuan Meng, Jingsheng Qiao and Lin Wang ......................... 74

Numerical Simulation Analysis of Block's Thermal Performance and Its Influencing Factors
Lihui Ma, Liang Wei and Weijun Yang .................................... 80

Study on Evaluation of Earthquake Evacuation Capacity in Village Based on Multi-level Grey Evaluation
Danxiang Ma, Jianyu Chu, Xinian Liu and Shiyong Zhao ................ 85

Research of the 3d GIS Based on Open GL_ES for Earthquake Engineering
Chuanwen Luo, QingjieZhu, BePang and JinsheWang ................... 93

Simultaneous COD and Nitrogen Removal in a Micro-Aerobic Granular Sludge Reactor for Domestic Wastewater Treatment
Xiaol Liu and Chunjuan Dong .............................................. 99

The Energy Analysis of Concrete Failure in Structural Engineering
Tingquian Liu, Shuo Wang, Jing Gao and Xueqin Tian .................. 106

Thermodynamic Analysis of the Actual Air Cycle Refrigeration System
Liu Shengjun, Zhang Zhenying and Tian Lili ............................ 112

Relationship between Energy Consumption and Economic Growth: Empirical Study Based on Data on Hebei Province from 1980 to 2008
Yang Li, Feng Nan and Fang Nan .......................................... 117

Effects of Total Phosphorus (TP) and Microbially Available Phosphorus (MAP) on Bacterial Regrowth in Drinking Water Distribution System
Dengling Jiang, Yue Chen and Guowei Ni .................................. 124

A Fuzzy-Stochastic Constraint Programming Model for Hazmat Road Transportation Considering Terrorism Attacking
Hongmei Jia, Lin Zhang, Xiuliou Lou and Huiyun Cao .................... 130

Experimental Research on Seismic Behavior of Unbonded Precast Reinforced Concrete Frame
Jianqiang Han, Yulong Cai, Changyan Lin, Guanyu Gao and Fei Wang .................. 137

do:10.1016/S2211-3819(11)00079-8
Contents

Engineering Construction and Project Management
The Application of Nested-Game Theory in the Public Participation Mechanism in the Decision-Making of Large Engineering Projects
PANG Yongshi, XIE Shufeng and JIANG Shasha ................................................................. 142
Establishment and Application of Performance Assessment Model of Waste Management in Architectural Engineering Projects in China
Liu Jingxiang and Wang Yousong .................................................................................... 147
Forecast for Construction Engineering Risk Based on Fuzzy Sets and Systems Theory
Yanjun Zhao, Xiaojun Liu and Yan Zhao ........................................................................ 156
Risk Assessment Based On Fuzzy Network (F-ANP) In New Campus Construction Project
Zhou Lin and Yang Jianping ......................................................................................... 162
The Risk Assessment Model of BT Construction Engineering Project Financing
Luo Fu-zhou and Gao Hong-yuan ............................................................................... 169
Research on Risk Management of Railway Engineering Construction
WANG Lin, LI Yaqi and WANG Enmao ........................................................................ 174
Study on the Reasonable Value Distribution of Residential Engineering on the Theory of Industrial Value Chain
LI Lingyan, LIU Xiaojun and YAN Weicheng ................................................................. 181
Based on Gray Comprehensive Evaluation Method of Real Estate
Xiaojun Liu and BeiBei Chen ....................................................................................... 189
Engineering Risk Management Planning in Energy Performance Contracting in China
Hu Jinrong and Zhou Enyi .......................................................................................... 195
Spatial Autoregressive Model of Commodity Housing Price and Empirical Research
Feng Lan and Yuan Zhang ............................................................................................ 206
Research of 4M1E’s Effect on Engineering Quality Based on Structural Equation Model
Mao Yihua and Xu Tuo .................................................................................................. 213
The Study of the Risk Decision of Cluster Park Engineering
Wang La-yin and Luo Fu-zhou ..................................................................................... 221
Fuzzy Real Option Evaluation of Real Estate Project Based on Risk Analysis
Yihua Mao and Wenjing Wu .......................................................................................... 228
The Comprehensive Evaluation for Design Elements of Urban Aged Residential Engineering Project Based on NSFDS
Wang Xu Jia, Zhang Jing and Gao Qian Qian ................................................................. 236
Application of Entropy Measurement in Risk Assessment of the Engineering Project of Construction-Agent System
Ge Xiao-mei and Liu Xiao-jun ...................................................................................... 244
The Model Combined the BT Project and Land Development Risk Assessment Research
Yuan Hai-lin and Cai Wen-ying .................................................................................... 250
Study on the Scope that Subway Engineering Influence the Price of Peripheral Real Estate*
SONG Hong, LIU Xiao-jun and HU Zhen .................................................................. 257
Analysis and Evaluation of Project Cost Risk Based on BP Algorithm
Binmei Zhu, Hao Zhang and Xujia Wang ..................................................................... 264
Progress Risk Assessment for Spliced Network of Engineering Project Based on Improved PERT
Li Wenying and Liu Xiaojun ....................................................................................... 271

Service Engineering
An Engineering Pricing Model for Scenic Spots Based on Revenue Management
Duan Zhiping, Li Ranran and Ma Huaifu ....................................................................... 279
Analysis of Tourism and Landscape Engineering on Real Estate Impact Based on Correlation
Ai-juan Chen, Yue Han and Xiao Tan ............................................................................... 286
Information Seeking as a Mediator Between Proactive Personality and Adjustment
Wenchi Zou, Yong Zheng and Jingshan Zhu ................................................................. 294
Setting up the Tourism Engineering Marketing Information System of China
Li Ying and Mike Peters ............................................................................................... 301
Research on Service Quality Engineering Management of Tourist Destination —Taking the Yangtze Three Gorges for Example
KONG Ting, KAN Ru-liang and MOU Xiao-juan .......................................................... 309
Loss-Averse Behavioral Hypothesis Manufacturer in Engineering Supplier Development Under Risk
Kuan Yang .................................................................................................................... 317
Victor K. Y. Chan ........................................................................................................ 323
The Engineering of China Commercial Bank Operational Risk Measurement
Yuan Xie, Ya-wen Wu and Yu-chun Hu ......................................................................... 330
Service Quality Measurement from Customer Perception Based on Services Science, Management and Engineering
Xinglong Xie ................................................................................................................ 337
Analysis on Service Engineering Innovation of Tourism Based on Process Metaphysics
Haiying Liu .................................................................................................................... 344
### Contents

On Life Cycle of Cultural Heritage Engineering Tourism: A Case Study of Macau  
Zhang Meng, Yu Wei and Yang Yu  

Culture Heritage Tourism Engineering at Penang: Complete the Puzzle of “The Pearl of Orient”  
Lim Tiam Chai  

Gender and Engineering Career Development of Hotel’s Employees in China  
Yun Yang  

An IDEF0 Design for PDM-Based Die Integrated Intelligent Design System Functional Model  
Dong Linfeng, Guo Qiang and Wang Lin  

Extension Analysis of Ecological Engineering Management of Tourist Area  
Qiao-Xing Li and Ting Zhang  

Research on Tourism Water Resources Carrying Capacity Engineering in Hainan Province  
Jie Quyun, Fu Guoji, Liu Mulian, Wang Yujun and Xu Jingxuan  

The PRA Tools for Qualitative Rural Tourism Research  
Rosalind Sia Juo Ling  

A Study of the Owner’s Commission Model and Incentive Contract Based on Principal-Agent Relationship  
GUO Tao and WANG Jingjiong  

**Decision Engineering**  
Study on Similar Engineering Decision Problem Identification Based On Combination of Improved Edit-Distance and Skeletal Dependency Tree with POS  
Dong-bin Hu and Jun Ding  

A Study on Preference Reversal on WTA, WTP and Choice under the Third Generation Prospect Theory  
Yongmei Liu, Tiantian Li, Junhua Hu and Chen Fan  

A Decision Study on River Carrying Capacity of Changsha-Zhu-Tan Region  
Ying Zhang, Lanying Yin and Xiang Li  

Dynamic Stochastic Multi-Criteria Decision Making Method Based on Cumulative Prospect Theory and Set Pair Analysis  
Junhua Hu and Liang Yang  

Improvement of the VaR Method for Foreign Exchange Risk Measurement Based on Macro Information Released  
Xiaofeng Liu and Hua Cao  

Distance Measure for Linguistic Decision Making  
Yefun Xu and Huimin Wang  

Meta-Heuristics in Multi-Core Environments  
Ragnar Magnús Ragnarsson, Hlynur Stefánsson and Eyjólfur Ingi Ásgeirsson  

Evaluation of Promotional and Cross-Promotional Effects Using Support Vector Machine Semiparametric Regression  
Maria Pilar Martínez-Ruiz, José Luis Rojo-Álvarez and Francisco Javier Gimeno-Blanes  

Detecting Changes in a Distillation Column by Using a Sequential Probability Ratio Test  
Yahya CHETOUANI  

Predicting the Price of EU ETS Carbon Credits  
Heiða Njóla Guðbrandsdóttir and Haraldur Óskar Haraldsson  

A Switching Threshold Model for Oil Prices  
J.A. Flores, J.J. Pastor, A. Martinez-Gabarron, F.J. Gimeno-Blanes and M.J. Frutos  

Pressure Impact on Common Reed Particleboards Manufacturing Procedure  
Palombizio Ennio A. and Olivares Pablo
