6th IFAC Symposium on Mechatronic Systems 2013

Hangzhou, China
10-12 April 2013

Editor:

Bing Feng Ju

ISBN: 978-1-62748-707-8
ISSN: 1474-6670
## TABLE OF CONTENTS

Position Sensor Performance in Nanometer Resolution Feedback Systems ................................................................. 1  
Andrew John Fleming

Time Domain Resolution of Nanopositioning Systems ............................................................................................... 7  
Andrew John Fleming

Self-Tuning in Sliding Mode Control of High-Precision Motion Systems .............................................................. 13  
Marcel Heerjes, Yasemin Vardar

High-Precision Positioning System Using a Low-Stiffness Dual Stage Actuator ..................................................... 20  
Shingo Iio, Juergen Steininger, Peter I. Chang, Georg Schitter

Fixed-Structure, Low-Order Damping and Tracking Control Schemes for Nanopositioning ...................................... 28  
Arnfinn Aas Elelsen, Marialena Vagia, Jan Tommy Gravdahl, Kristin Y. Petersen

Acquisition of Behavioral Dynamics for Vision Based Mobile Robot Navigation from Demonstrations ................... 37  
Krishna Kumar Narayanan, Luis Felipe Posada, Frank Hoffmann, Torsten Bertram

Visual Servoing Considering Sensing Dynamics and Robot Dynamics .................................................................... 45  
Cong Wang, Chung-Yen Lin, Masayoshi Tomizuka

Wearable Sensing for Physical Activity Measurement: Design and Performance Evaluation .................................... 53  
Shaopeng Liu, Robert Gao, Lingfei Mo, Patty Freedson

Bearings-Only Localization Using Nonlinear Second-Order Extended H∞ Filter .................................................... 61  
Jwu-Sheng Hu

Target Design and Recognition for 2-D Localization of Indoor Mobile Robots Using a Laser Sensor ......................... 67  
Madhu Soodhanan Govindarajan, Junmin Wang, Bill Post, Andrew Fox

An Industrial Tool for Identification and Control of Nonlinear Valve Characteristics ........................................... 75  
Alexander Schirrer, Martin Kozeck, Wolfgang Bacher

Energy Saving Control of a Hydraulic Manipulator Using Five Cartridge Valves and One Accumulator ...................... 84  
Lu Lu, Bin Yao, Zhibin Liu

Modeling and Control of a Mobile Concrete Pump .................................................................................................. 91  
Johannes Henikl, Wolfgang Kemmetmueller, Andreas Kugi

Robust Non-Chattering Observer Based Sliding Control Concept for Electro-Hydraulic Drives .............................. 99  
Lasse Schmidt, Torben Ole Andersen, Henrik Clemmensen Pedersen

Control Strategy for Hybrid Excavator Swing System Driven by Electric Motor .................................................... 109  
Hong Yao, Qingfeng Wang

Robust Inverse Dynamics Control for a Hydrostatic Transmission with Actuator Uncertainties ............................. 116  
Hao Sun, Harald Aschemann

A High-Speed Electromagnetically-Actuated Scanner for Dual-Stage Nanopositioning ............................................. 125  
Tomas Tuma, Walter Haebeler, Hugo Rothuizen, John Lygeros, Angeliki Pantazi, Abu Sebastian

Towards High Speed Ferrule-Top Atomic Force Microscopy .................................................................................... 131  
Peter I. Chang, Dhivajal Chavan, Rene Paris, Davide Iannuzzi, Georg Schitter

Analysis and Design of Multiresolution Scan Trajectories for High-Speed Scanning Probe Microscopy ................ 138  
Tomas Tuma, John Lygeros, Abu Sebastian, Angeliki Pantazi

Image-Based Modeling of the Lateral Axes of a Scanning Probe Microscope ......................................................... 145  
Garrett Clayton, Brian McManus

On Detection and Estimation in Atomic Force Microscopy at Different Scan Speeds ......................................... 153  
Peng Huang, Sean Andersson

A Sensor-Less Motion Sensing Method of a 3-DOF Permanent Magnet Spherical Motor ........................................... 160  
Kun Bai, Kok-Meng Lee

Design of an Actuation System for a High-Speed Quadruped Robot, Cheetaroid-I .................................................... 165  
Byeonghun Na, Hyunjin Choi, Kyoungchul Kong

Voltage Based Linearization of a Reluctance Actuator for High-Precision Applications .......................................... 170  
Andelko Katalenic, P. P. J. van den Bosch

Modeling of Hybrid Stepper Motors for Closed Loop Operation ............................................................................... 177  
Benjamin Henke, Oliver Savodny, Steffen Schmidt, Ruediger Neumann

Analytical Calculation of No-Load Magnetic Field Distribution in the Slotted Airgap of a Permanent Magnet Synchronous Motor .................................................................................................. 184  
Jie Ma, Ruichao Tao, Xinglong Lee

Inductance Measurement of the Switched Reluctance Motor with the Current Traversal Response for Exciting Voltage Pulse .............................................................................................................. 190  
Da Shao, Liang Gong, Bing-chu Li, Cheng-liang Liu
Adaptive Prefilter Design for Control of Quasistatic Microscanners................................................................. 197
Klaus Janschek, Thilo Sandner, Richard Schroeder, Matthias Roth

μ-Synthesis Based Adaptive Robust Control of Linear-Motor-Driven Stages with High-Frequency Flexible Modes ................................................................................................................................. 207
Zheng Chen, Bin Yao, Qiongfei Wang

High Performance Tracking of Piezoelectric Positioning Stage Using Current-Cycle Iterative Learning Control with Gain Scheduling ........................................................................................................... 214
Jian-Xin Xu, Deqing Huang, Venkataramanan Venkatakrishnan, Huynh The Cat Tuong

Improving Positioning Accuracy Using a General Framework for Macro Mini Manipulation .......................................................................................................................... 225
Ahmad Soryo Arifin, Marcello H. Ang Jr., Lim Chee Wang, Chow Yin Lai

Proposal of Position Reconstruction with Polynomial Fitting Approach for Precise Motion Control .......................................................................................................................... 231
Hongzhang Zhu, Hiroshi Fujimoto, Toshiharu Sugi

Predictive Control for the Stabilization of a Fast Mechatronic System: From Simulation to Real-Time Experiments ........................................................................................................................................... 237
Nahla Touati, Ahmed Chemori

Wavefront Aberration Characterization and Correction for Laser Beam Propagating over Saline Water and Sands .......................................................................................................................................................... 243
Songsong Zhu, Hong Song, Ping Yang, Hongbo Liu, Ruihong Lan, yuan liu, Huocai Huang, Fengzhong Qu, Jianxing Leng, Ying Chen

Modeling and Identification of the Optical Path at ELTs - A Case Study at the LBT .......................................................................................................................................................... 249
Michael Bohm, Jorg-Uwe Pott, Martin Kurster, Oliver Sawodny

Sub-Nanometre Validation of a Deformable Mirror Concept .......................................................................................... 256
Rudolf Saathof, Luuk J. Ursem, Jo W. Spronck, Robert H. Munnig Schmidt

Compensation Based Displacement Measurement Using Objective Laser Speckles .......................................................................................................................................................... 264
Rene Paris, Thomas Thurner, Georg Schitter

The Openloop Liquid Crystal Adaptive Optics for Astronomical Application .......................................................................................................................................................... 271
Lifa Hu, Li Xuan, Chao Liu, Xingyan Zhang, Daya Li, Quanquan Mu, Zhaoliang Cao, Zenghui Peng, Yonggang Liu, Chengliang Yang, Lishuang Yao, Xinghai Lu, Mingliang Xia

Prediction Control Algorithm for Close-Loop Adaptive Optical System .......................................................................................................................................................... 276
Xin-yang Li, Zhao-jun Yan, Chang-hui Rao

7 Degrees of Freedom Passive Exoskeleton for Human Gait Analysis: Human Joint Motion Sensing and Torque Estimation during Walking .......................................................................................................................................................... 285
Kan Kanjanapas, Masayoshi Tomizuka

Kinematic Design and Analysis of a 6-DOF Upper Limb Exoskeleton Model for a Brain-Machine Interface Study .......................................................................................................................................................... 293
Juncai Lu, Wenjie Chen, Masayoshi Tomizuka

Mechanical Design and Kinematic Analysis of a 10 D.O.F. Robot Manipulator .......................................................................................................................................................... 301
Ming-Chang Teng, Yi-Jeng Tsai, Chin-Chi Hsiao

Mechatronic Design of a Three-Fingered Gripper for Underwater Applications .......................................................................................................................................................... 307
J.R. Bemfica, C. Melchiorri, L. Moriello, G. Palli, U. Scarcia, G. Vassura

Design of Prosthetic Robot Hand with High Performances Based on Novel Actuation Principles .......................................................................................................................................................... 313
Young June Shin, Soohyun Kim, Kyong-Soo Kim

Design of a Robot Gripper for a Rapid Service Robot .......................................................................................................................... 319
TaeJin Jung, Jun Ho Oh

Prescribed Adaptive Control of a Class of Nonlinear System with Asymmetric Hysteresis .......................................................................................................................................................... 325
Zhi Li, Chun-Yi Su, Tianyou Chai, Ying Feng

Control of Transient Response Via Polynomial Method .......................................................................................................................... 332
Chengbin Ma, Yue Qiao, Junyi Cao

Robust Finite Frequency H∞ Passive Fault Tolerant Static Output Feedback Control with Application to Active Vibration Attenuation .......................................................................................................................................................... 340
Hui Zhang, Rongrong Wang, Junmin Wang

Limits of Performance in Systems with Periodic Irregular Sampling and Actuation Rates .......................................................................................................................................................... 347
Behrooz Shahsavari, Richard Conway, Ehsan Keikha, Roberto Horowitz

Polynomial Control for Air-To-Air Missiles Based on Coefficient Diagram Methods .......................................................................................................................................................... 355
Jinlei Zhao, Junyi Cao, Wen Chen, Chengbin Ma, Binggao Cao

Robust Stabilizer Design for High-Precision Tracking of a Linear Gantry .......................................................................................................................................................... 362
Tongtong Leng, Bofeng Liu, Chao Lu, Zhen Zhang, Peng Yan

A New Approach to Active Q Control of an Atomic Force Microscope Micro-Cantilever Operating in Tapping Mode .......................................................................................................................................................... 368
Matthew Fairbairn, S.O. Reza Moheimani

Control of a MEMS Nanopositioner for Atomic Force Microscopy .......................................................................................................................................................... 375
Yuen Kuan Yong, Anthony Fowler, Ali Mohammad, S.O. Reza Moheimani

Multi-Agent Deployment Based on Homogenous Maps and a Special Inter-Agent Communication Protocol

Hossein Rastgoftar, Suhada Jayasuriya

Moving Horizontal Reference Map for Bipedal Robot Walking Over Uneven Terrain

Ning Wu, Chee Meng Chew, Aun Neow Poo, Renjun Li

A Novel Self-Adaptation Hybrid Artificial Fish-Swarm Algorithm

X.T. Hu, H.Q. Zhang, Z.C. Li, Y.A. Huang, Z.P. Yin

The Study on the Learning of Walking Gaits for Biped Robots

Kao-Shiong Hwang, Keng-Hao Yeh, Jia-Yan Liu

Active Landmark Configuration for Accurate Nano-Positioning

Shuai Yuan, Lianqing Liu, Zhidong Wang, Ning Xi, Yuechao Wang, Zaili Dong

Frequency Based Combination Control Strategy for AFMs

Xiao Ren, Yongchun Fang

A Novel Flexure-Based 3-DOF Micro-Parallel Manipulator with a Gripper for Micro/nano Manipulation

Shunli Xiao, Yangmin Li, Qianmin Yang

A Novel Analytical Model for Flexure-Based Compliant Proportion Mechanisms

Qiaoling Meng, Yangmin Li

Reducing Intersample Ripple of Actuator in Multirate Environment by a Joint Space Interpolator

Lan Yue Ji, Frank Kirchner

Energy-Saving Trajectory Planning for a Toggle Mechanism Driven by a PMSM

Yi-Lung Hsu, Ming-Shyan Huang, Rong-Fong Fung

LuGre-Model-Based Friction Compensation in Direct-Drive Inertially Stabilization Platforms

Zhiqiang Li, Dapeng Fan, Shixun Fan

Remedial Operations of Permanent Magnet Fault Tolerant Motor for Short-Circuit Fault

Si Binqiang, Zhu Jihong, Ji Jinhua

A Linear Interpolation Fuzzy Controller for a Boiler Pressure Control System

Yanhong Bai, Zhijuan Zhao, Zhiyi Sun, Long Quan

Holistic Design Optimization in Mechatronics

Daniel Frede, Daniel Malmquist, Jan Wikander

Mechatronic Design of a Four Wheel Steering Mobile Robot with Fault-Tolerant Odometry Feedback

Reza Oftadeh, Mohammad M. Aref, Reza Ghabcheloo, Jouni Mattila

Autonomous Stair Climbing of a Wheeled Double Inverted Pendulum

Bruno Strah, Stephan Rinderknecht

Design of a Gravity Balanced Upper Limb Exoskeleton with Bowden Cable Actuators

Qingsong Wu, Xingxiang Wang

Analysis of Dynamic Tissue Deformation During Needle Insertion into Soft Tissue

Dedong Gao, Yong Lei, Bin Yao
