Third International Neural Network Society Winter Conference

(INNS-WC 2012)

Procedia Computer Science Volume 13

Bangkok, Thailand
3-5 October 2012

Editors:

Jonathan H. Chan
Ah-Hwee Tan

ISBN: 978-1-62748-820-4
ISSN: 1877-0509
Contents

Editorial
Preface: Trends in Natural and Machine Intelligence
   J.H. Chan, A.-H. Tan ................................................................. 1

Trends in Natural and Machine Intelligence
A Neurocomputing Approach for Monitoring Plinian Volcanic Eruptions Using Infrasound
   F.M. Ham, I. Iyengar, B.M. Hambebo, M. Garces, J. Deaton, A. Perttu, B. Williams ............................. 7
Self-Regulating Action Exploration in Reinforcement Learning
   T.-H. Teng, A.-H. Tan, Y.-S. Tan ............................................. 18
Stimuli Localization: An Integration Methodology Inspired by the Superior Colliculus for Audio and Visual Attention
   K.K. Rayulakollu, J. Liu, K. Burn ............................................. 31
Controlling Generative Processes of Generative Art
   S. Phon-Amnuaisuk, J. Paniapornpon .................................... 43
A Framework of Multi-Stage Classifier for Identifying Criminal Law Sentences
   S. Thammaboosadee, B. Watanapa, N. Charoenkitkarn ................................................................. 53

INNS Symposium on Data Analytics and Competitions (SoDAC 2012)
Factors Affecting Student’s Intention to Choose IT Program
   S. Sathapornvajana, B. Watanapa ........................................... 60
Temporal Data Mining and Visualization for Treatment Outcome Prediction in HIV Patients
   W. Chanthaweetip, S. Guha ....................................................... 68
Post-Modern Portfolio Theory for Information Retrieval
   M.-F. Tsai, C.-J. Wang ............................................................. 80
Robustness Test of Genetic Algorithm on Generating Rules for Currency Trading
   S. Deng, Y. Sun, A. Sakurai ..................................................... 86
Source Identification of Traffic-Related Ultrafine Particles Data Mining Contest
   K. Sabaliauskas, G. Evans, C.-H. Jeong ..................................... 99

INNS Symposium on Vision and Image Processing (SoVIP 2012)
Bounding Box Object Localization based on Image Superpixelization
   M.S. Ibrahim, A.A. Badr, M.R. Abdallah, I.F. Eissa .............................................................. 108
A Folded Neural Network Autoencoder for Dimensionality Reduction
   J. Wang, H. He, D.V. Prokhorov ............................................. 120
A Novel Shape Descriptor for Rectangle-like Classification
   R. Siricharoenchai, W. Sinthupinyo, T. Sunpetchniyom .......................... 128
3D Motion Trajectory Analysis Approach to Improve Sign Language 3D-based Context Recognition
   M. Boulares, M. Jemni ............................................................ 133
Firearm Classification based on Numerical Features of the Firing Pin Impression
   C.-Y. Liong, N.A.M. Ghan, S.B.A. Kamaruddin, A.A. Jemain ................................. 144
Irregular Rotation Deformation from Paper Scanning: An Investigation
   M.F. Nasrudin, O.M. Wahdan, K. Omar .................................... 152
A Set of Criteria for Face Detection Preprocessing
   H.Z. Nafchi, S.M. Ayatollahi ................................................ 162
A Hybrid Approach to Localize Farsi Text in Natural Scene Images
   M. Darab, M. Rahmati ............................................................ 171
Upper Body Tracking Using KLT and Kalman Filter
   P. Bagherpour, S.A. Cheraghi, M.B.M. Mokji ................................ 185

INNS Symposium on Autonomous Learning (Autonomous Learning 2012)
Detecting and Preventing Error Propagation via Competitive Learning
   T.C. Silva, L. Zhao ................................................................. 192
An Autonomous Distal Reward Learning Architecture for Embodied Agents
   S.E. Taylor, M.J. Healy, T.P. Caudell ...................................... 198
Autonomous Reinforcement Learning with Experience Replay for Humanoid Gait Optimization
   P. Wawrzynski ............................................................ 205
How a Population-based Representation of Binocular Visual Signal can Intrinsically Mediate Autonomous Learning of Vergence Control
   A. Gibaldi, A. Canessa, M. Chessa, F. Solari, S.P. Sabatini ................................. 212
