TABLE OF CONTENTS

VOLUME 1

Experimental Study of Noise Generation by a Turbulent Premixed Flame .................................................. 1
Ligika Kabiraj, Holger Narwisoth, Aditya Saurabh, Christian O. Paschereit

Modelling Thermo-acoustic Instabilities of an Anchored Laminar Flame in a Simple Lean Premixed Combustor:
Including Hydrodynamic Effects ................................................................................................................. 8
Charles M. Lazzato, Raphael Assier, Aimee Morgans, Xuesong Wu

Combustion Modeling Effects on the Thermoacoustic Sources of a Laminar Premixed Flame .................. 23
Georg Geisser, Stephan Schlimpert, Wolfgang Schroeder

Flame Instability Under the Influence of Its Spontaneous Sound ............................................................. 32
Raphael Assier, Xuesong Wu

The Effect of a Boundary Layer on Engine Noise propagating to the Fuselage at Flight Conditions ............. 40
Juergen Dierke, Roland Ewert, Jan Delfs, Christian Stoehr, Marco Rose

Parametric Guidance for Turbulent Noise Reduction from Poroelastic Trailing Edges and Owls .............. 54
Justin Javorski, Nigel Peake

Trailing-Edge Noise Modeling and Validation for Separated Flow Conditions ........................................ 68
Chan Yong Schuele, Karl-Stephane S. Rossignol

An Analytical Investigation of Trailing Edge Noise Reduction Using Novel Serrations ............................. 81
Mahdi Azareypayand, Mathieu Gruber, Phillip Joseph

Tonal Noise from Trailing Edge Serrations at Low Reynolds Number ..................................................... 98
Danielle Moreau, Con J. Doolan

An Experimental Investigation of Novel Trailing Edge Geometries on Airfoil Trailing Edge Noise Reduction ................................................................. 114
Mathieu Gruber, Phillip Joseph, Mahdi Azareypayand

Airfoil Noise Analysis Using Symbolic Regression ......................................................................................... 137
Ennes Sarraduf, Thomas F. Geyer

DNS of a Compliant Trailing-Edge Flow ..................................................................................................... 152
Stefan C. Schlanderer, Richard D. Sandberg

Correlation of Aircraft Certification Noise Levels EPNL with Controlling Physical Parameters ............... 170
Ulf Michel

Community Noise Prediction of Digital High Speed Train Using LBM .......................................................... 187
Mohammed Monkeine, Franc Perot, Mitsu-Suk Kim, Dave M. Freed, Siva Senkoor, Zen Sugiyama, Francesco Polidoro, Sebastian Gautier

Full-field, Dynamic Pressure and Displacement Measurements of a Panel Excited by Shock Boundary-layer Interaction .................................................................................................................. 204
Stephen M. Spottswood, Thomas Eason, Timothy Bebermias

A Time-domain Equivalent Source Method for Acoustic Scattering with Coincident Source and Control Points .......................................................................................................................... 222
S. Hales Swift, Gregory A. Blaisdell, Anastasios S. Lyrintzis

An Efficient Solution of Time Domain Boundary Integral Equations for Acoustic Scattering and Its Acceleration by Graphics Processing Units ............................................................................... 243
Fang Q. Hu

A 3D Frequency-domain Linearised Euler Solver Based on the Goldstein Acoustic Analogy Equations for the Study of Nonuniform Meanflow Propagation Effects .................................................. 279
Vasiliy A. Semiletov, Sergey A. Karabasov

CFD-CAA Coupled Computation of Fan Noise Propagation from Engine Nacelle Based on Cartesian Mesh Method .......................................................................................................................... 285
Yuma Fukushima, Takashi Misaka, Shinkyu Jeong, Shigeru Obayashi, Daisuke Sasaki, Kazuhiro Nakahashi

High-Order Pressure-based Solver for Aeroacoustic Simulations ................................................................ 296
Hong Q. Yang, Zhiqian Chen, Jonathan G. Dudley

Prediction of In-duct and Near-field Noise for a Fan Rig Intake ................................................................. 319
Rie Sagimoto, Paul Murray, Alan McAlpine, R. Jeremy Astley

Prediction of Transmission Loss for Two Turboprop Engine Inlet Designs ............................................. 330
Lyubesh S. Lieber, Donald Weir, Yogi Sheoran

Sound-turbulence Interaction in Low Mach Number Duct Flow ............................................................... 342
Chenyang Weng, Ardeeshr Hanifi, Susann Boij

Aeroacoustics of Rectangular T-junctions Subject to Combined Grazing and Bias Flows - An Experimental Investigation .................................................................................................................................. 360
Andreas Holmberg, Mikael Karlsson, Mats Aabom

Corrugated Pipe Segment with Anechoic Termination: Critical Mach Number for Whistling ..................... 369
Oleksii Rudenko, Gunes Nakiboglu, Ad P. Holten, A. Hirschberg

Olivier Robin, Alain Berry, Stephane Moreau, Simon Campeau

Examination of the Influence of Flight Altitude and Speed on the Efimtsov Model Parameters .................. 410
Stefan Haxter, Carsten Spehr

Flow-Induced Input of Sound to the Interior of a Simplified Car Model Depending on Various Setup Parameters .......................................................................................................................... 425
Stefan Müller, Stefan Becker, Christoph Gabriel, Reinhard Leuch, Frank Ulrich

Contributions of Different Aeroacoustic Sources to Aircraft Cabin Noise .................................................. 442
Nan Hu, Heino Buchholz, Michaela Herr, Carsten Spehr, Stefan Haxter
Flow Field Measurements to Characterize Flap Side-Edge Noise Generation ............................................................... 926
Stephane S. Rossignol

Noise Generation Characteristics of a High-lift Swept and Tapered Wing Model ................................................................. 936
Yazuru Yokokawa, Mitsuhiro Murayama, Ysushi Ito, Hiroki Ura, Dong-Yun Kwak, Hiroshi K Nomoto, Shigemichi Shindo, Kazuomi Yamamoto

Effect of Sweep on Chevron Slat Noise .................................................................................................................. 965
Victor F. Kopiev, Mikhail Zaitsev, Ivan Belyaev

An Aerodynamic Noise Reduction Study for Airframe Noise from Flap Tips ........................................................................... 981
Kazuhide Ino, Kenji Hayama, Yzuru Yokokawa, Mitsuhiro Murayama, Hiroki Ura, Kazuomi Yamamoto

Parameterization and Optimization of Broadband Noise for High-lift Devices ..................................................................... 992
Arnaud Fasso Pouangue, Chokri Mnasri, Stephane Moreau

Hybrid RANS/LES Simulations for Aerodynamic and Aeroacoustic Analysis of a Multi-Element Airfoil ........................................... 1010
Bastian Neufelder, Huadong Yao, Shao-Hui Peng, Lars Davidson

Numerical Investigation on Change of Airframe Noise by Flap Side-edge Shape ............................................................ 1038
Mitsuhiro Murayama, Yazuru Yokokawa, Kazuomi Yamamoto, Hiroki Ura, Toru Inamurara, Tohru Hirai

Numerical Simulation of Landing Gear Noise via Weakly Coupled CFD-CAA Calculations .................................................. 1057
Stephane Redonnet, Guillaume Cunha, Saloua Ben Khedid

Detached-Eddy Simulation of Landing-Gear Noise ........................................................................................................ 1075
Liang Wang, Charles Mockett, Thilo Knacke, Frank Thiele

Acoustic Absorption of Porous Materials Using LBM .................................................................................................. 1084
Franck Perot, David Freed, Adrian Mann

Aeroacoustic Simulation of Nose Landing Gear on Adaptive Unstructured Grids with FUN3D ................................................. 1093
Peer N. Fatta, Mehdi P. Khosravi, Michael A. Park, David P. Lockard

Attenuation of Sound in Wide Ducts with Flow at Elevated Pressure and Temperature ......................................................... 1114
Claus Lahiri, Karsten Knobloch, Friedrich Bake, Lars Enghardt

A Comprehensive Study on Non-Loctally Reacting Liners, Part 1: Experimental Investigation .................................................. 1132
Stefan Busse-Gerstengarbe, Steffen Nitsch, Friedrich Bake, Lars Enghardt

A Comprehensive Study on Non-Loctally Reacting Liners, Part 2: Impedance Eduction and Liner Modeling ................................ 1146
Juns Abdel Hay, Stefan Busse-Gerstengarbe, Christoph Richter, F. Thiele, Luzt Blom, Lars Enghardt

The Impact of Boundary Layers on Bulk Reacting Liners at Low Mach Number Flows ......................................................... 1165
Anna Firm, Susanna Buci

Acoustic Characterization of a Helmholtz Resonator Under Grazing Flow Conditions Using a Hybrid Methodology ........................................................................................................ 1172
Hervé Denayer, Wim De Roeck, Thomas Toulorge, W. Desmet

Acoustical Behaviour of Purely Reacting Liners ........................................................................................................ 1183
Yves Jurigne, Lei Xia, Wenping Bi

Segmented Liner to Control Mode Scattering ............................................................................................................... 1191
Carl S. Gerhold, Michael G. Jones, Martha Brown

Experimental Study of Flight Effects on Slightly Underexpanded Supersonic Jets ................................................................... 1209
Benoit André, Thomas Castelain, Christophe Bailly

Experimental Study of Shock-cell Noise in Underexpanded Supersonic Jets ........................................................................ 1223
Alessandro Savarese, Peter Jordan, Steve Girard, Erwan Collin, Mauro Porta, Yves Gervais, Alexandre Royer, Carine Fourment

Quantifying Crackle-inducing Acoustic Shock-structures Emitted by a Fully-expanded Mach 3 Jet .................................................. 1238
Wouter J. Bauw, Charles E. Timney

Correlation Studies in the Acoustic Far-Field of Non-ideally Expanded Supersonic Jets .......................................................... 1257
Ashwin K. Subramanyam, Karthikayen Nanrajar, Lakshmi Venkatakrishnan

Near-field Wavepackets and the Far-field Sound of a Subsonic Jet .................................................................................... 1274
David E. Breakey, Peter Jordan, Andre Cavalleri, Olivier Léon, Mengzi Zhang, Guillaume Lehnasch, Tim Colonius, Daniel Rodriguez

Wavepacket Eduction in Turbulent Jets Based on Eigenmode Decomposition of PIV Data ......................................................... 1296
Daniel Rodriguez, Andre Cavalleri, Tim Colonius, Peter Jordan

Instability Wave Control in Turbulent Jet .......................................................................................................................... 1315
Victor F. Kopiev, Mikhail Zaitsev, Georgy A. Faranov, Vladimir Kopiev, Ivan Belyaev

A Comparison of the Silent Base Flow and Vortex Sound Analogy Sources in High Speed Subsonic Jets .................................. 1335
Samuel Sinayoko, Anurag Agarwal

Nonlinear and Linear Noise Source Mechanisms in Subsonic Jets .................................................................................... 1352
Yamin B. Baqui, Anurag Agarwal, Andre Cavalleri, Samuel Sinayoko

The Effect of Base-flow Changes in Kelvin-helmholtz Instability ...................................................................................... 1365
Andre Cavalleri, Anurag Agarwal

Vorticity Generated Sound and Jet Noise .......................................................................................................................... 1381
Luigi Morino, Paolo Gradassi

Analysis of the Characteristic Acoustic Tones of an Impinging Jet ...................................................................................... 1403
Giorgia Spinabelli, Giovanni Lacagnina, Luca Marino, Giovanni P. Romano

The Harmonics of Jet Screech Tones ................................................................................................................................ 1413
Christopher R. Tam, Sarah A. Parrett, Krishna Vyasathan

WENEMOR: Wind Tunnel Tests for the Evaluation of the Installation Effects of Noise Emissions of an Open Rotor Advanced Regional Aircraft ........................................................................................................... 1430
The Application of Advanced Beamforming Techniques for the Noise Characterization of Installed Counter Rotating Open Rotors
John Kennedy, Petr Eret, Gareth Bennett, Paolo Castellini, Paolo Chiariotti, Francesca Soprannetti, Christophe Picard, Arthur Fize
1439

A Parametric Study of Installed Counter Rotating Open Rotors
John Kennedy, Petr Eret, Gareth Bennett
1447

A Method for Predicting the Tone Noise Produced by an Open Rotor in a Rectangular Wind Tunnel
Prathiban Suresh Kumar, Michael Kingan, Anthony Parry
1457

Validation of a Model for Open Rotor Noise Predictions and Calculation of Shielding Effects using a Fast BEM
Markus Lummer, Riste A. Akkermans, Christoph Richter, Carsten Priber, Jan Delfs
1480

Broadband Noise of Axial Fans: an Experimental and Computational Benchmark Study
Alessandro Zanon, Michele De Gennaro, Helmut Kuehntes, Domenico Cardi
1504

Limitations of Phased Array Beamforming in Open Rotor Noise Source Imaging
Csaba Horvath, Gary G. Podboy, Edmune Envia
1518

Thermoacoustic Analysis of a Full Annular Aero-engine Lean Combustor with Multi-perforated Liners
Andrea Giusti, Antonio Andreini, Bruno Facchini, Ignazio Vitale, Fabio Turrini
1528

Nancy Kings, Lars Engblad, Friederich Bake
1545

Extension of a Compressible Pressure-Based Solver for Reacting Flows
Jean-Michel Lourier, Berthold Noll, Manfred Aigner
1556

Numerical Simulation of Acoustic and Entropy Waves Propagating Through Turbine Blades
Ignacio Duran, Stephane Moreau
1569

Verification of the Inverse Cut-off Effect in a Turbomachinery Stage - Part 2 - Comparison to Experimental Results
Dominik U. Brosat, Thorsten Selic, Andreas Marn
1589

A Comprehensive Numerical Study of Tone Noise Emissions in a Multistage Cold Flow Rig
Lorenzo Pinelli, Francesco Poli, Ettore Di Grazia, Andrea Arnone, Davide Torzo
1597

Large Scale Inflow Distortions as a Source Mechanism for Discrete Frequency Sound from Isolated Axial Fans
Stefan Pröbsting, Jacopo Serpieri, Fulvio Scarano
1612

On the Turbulent Boundary Layers Developed on Flat Plate with a Serrated Trailing Edge
Alexandros Vathylakis, Tze Fei Chong
1627

Reduction of Airfoil Turbulence-Impingement Noise by Means of Leading-Edge Serrations and/or Porous Material
Michel Roger, Christophe Schram, Leandro De Santana
1643

Investigation of Laminar Detachment by Means of Simultaneous Microphone and Surface Hot Wire Measurements
Thoreau Delfsfield, Arne Henning, Frank Meneses
1663

Investigation of Tonal Noise Generation on an Airfoil with Time-Resolved PIV
Stefan Pribsting, Jacopo Serpieri, Fulvio Scarano
1675

Acoustic Feedback-Loop Interactions in Transitional Airfoils
Vladimir V. Golubev, Lap Nguyen, Reda M. Mankbadi, Michel Roger, Miguel R. Vishal
1685

An Investigation on the Near-field Turbulence and Radiated Sound for an Airfoil with Trailing Edge Serrations
Weiyang Qiao, Liang Ji, Kunbo Xu, Weijie Cheng, Fan Tong
1697

Prediction of LAGOON Landing-gear Noise Using an Unstructured LES Solver
Jean-Christophe Giriet, Alois Sengissen, Stephane Moreau, Jean-Christophe Jouhoud
1716

Numerical Simulations of Flow over a Landing Gear with Noise Reduction Devices using the Lattice-Boltzmann Method
Daniel Armstrong, Alireza Najafiyazdi, Luc G. Mongeau, Vincent Raymond
1738

Investigating Landing Gear Noise Using Fly-over Data: the Case of a Boeing 747-400
Irene C. Dedoussi, Thomas P. Hynes, Henri A. Stiller
1750

CHARACTERIZATION OF NOISE GENERATION ON A CANONICAL NOSE LANDING GEAR SUB-SYSTEM
Nikolas S. Zavodny, Derek Dussault, Lawrence S. Ukeiley, Fei Liu, Louis N. Catafesta
1760

Phased Array Measurements of Tandem Cylinder Noise
Fangli Ning, Kanchasamy Cheiliah, Rakesh Chandran Ramchandran, Ganesh Raman
1780

The Influence of Aerodynamic Interactions between Components on Landing Gear Noise
Malcolm Smith, Leung Choi Chow, Nicolas Molin
1794

Simultaneous Computation of Surface and Volume Sources for Fan Broadband Noise with the Random-Particle-Mesh Method
Atila M. Wohlbründt, Sebastian Guerin, Roland Ewert
1801

The Effects of Wavy Leading Edges on Airfoil-Gust Interaction Noise
Alex Siu Hong Lau, Jae Wook Kim
1819

Investigation of Noise Sources in a Two-Dimensional Model Airframe Noise Problem with Wake Interaction
William Wolf, Bruno Backes, Joao Luiz F. Azevedo, Edemar Morsch Filho
1846
