1st French Singaporean Workshop on Formal Methods and Applications

FSFMA’13, July 15–16, 2013, Singapore

Edited by
Christine Choppy
Jun Sun
Contents

Preface
Christine Choppy and Jun Sun .................................................. vii

Invited Talks
Control of Switching Systems by Invariance Analysis
Laurent Fribourg ................................................................. 1
Specification, Verification and Inference
Wei-Ngan Chin .................................................................. 2

Regular Papers
Analysis of Two-Layer Protocols: DCCP Simultaneous-Open and
Hole Punching Procedures
Somsak Vanit-Anunchai ......................................................... 3
Dynamic Clock Elimination in Parametric Timed Automata
Étienne André ................................................................... 18
On the Determinism of Multi-core Processors
Vladimír-Alexandru Paun, Bruno Monsuez, and Philippe Baufreton .......... 32

PhD Papers
An Improved Construction of Petri Net Unfoldings
César Rodríguez and Stefan Schwoon ........................................ 47
Constructing Attractors of Nonlinear Dynamical Systems by
State Space Decomposition
Laurent Fribourg, Ulrich Kühne, and Romain Soulat ........................ 53
Formal Modelling and Verification of Pervasive Computing Systems
Yan Liu ............................................................................. 61
Illustrating the Mezzo Programming Language
Jonathan Protzenko ............................................................. 68
Improving System-Level Verification of SystemC Models with SPIN
Martin Elshuber, Susanne Kandl, and Peter Puschner ..................... 74
Modelling and Reasoning about Dynamic Networks as Concurrent Systems
Yanti Rusmawati and David Rydeheard ...................................... 80
Safety of Unmanned Aircraft Systems Facing Multiple Breakdowns
Patrice Carle, Christine Choppy, Romain Kervarc, and Ariane Piel .......... 86
